

ANNUAL REPORT

2024

**SCOTIABANK'S VISION IS TO BE OUR CLIENTS' MOST TRUSTED
FINANCIAL PARTNER AND DELIVER SUSTAINABLE, PROFITABLE GROWTH**

Our Strategy

Launched at our Investor Day in December 2023, our strategy focuses on four key pillars.

GROW AND SCALE IN PRIORITY MARKETS

We are deploying the majority of our incremental capital to our priority businesses in Canada, the United States, and Mexico to support our growth strategy, and to strengthen our connectivity across the North American corridor.

MAKE IT EASY TO DO BUSINESS WITH US

By simplifying and improving access to our products and services, we are committed to making it easier for our clients to bank with us.

EARN PRIMARY CLIENT RELATIONSHIPS

Leading with advice and following with solutions, we are working to create consistently high-quality experiences across all channels.

WIN AS ONE TEAM

By investing in our people, culture, and communities, we are striving to be the employer of choice for all employees and creating an environment where everyone can thrive.

CEO's message to shareholders

Fellow shareholders,

It has been one year since Scotiabank launched its new enterprise strategy at our Investor Day in December 2023, where we unveiled our bold new vision: *to be our clients' most trusted financial partner and deliver sustainable, profitable growth*.

One year into our execution, I can confidently say that we are making progress in doing what we said we would do. While it is still early days and there is more hard work ahead, we are advancing against the key priorities outlined in our strategy, including focusing on deposit growth and purposeful capital allocation. We are strengthening our balance sheet, including reducing our wholesale funding requirement, maintaining strong liquidity metrics, and increasing our Common Equity Tier 1 ratio. And we have been disciplined in how and where we allocate capital, investing in those areas that will drive growth for the Bank, while optimizing existing capital in those markets that have seen lower returns. We also introduced a new culture framework for our Bank, our ScotiaBond, which establishes values and behaviours to drive high performance and support the execution of our strategy.

Scott Thomson

President and
Chief Executive Officer

Our success this year is not just about what we have delivered, but also how we have delivered. As a testament to the Bank's progress, Scotiabank was once again named Bank of the Year for Canada by The Banker magazine — a Financial Times publication — as well as the top bank in Canada by Global Finance and Euromoney magazines. Euromoney magazine also recognized Scotiabank as the World's Best Bank for Corporate Responsibility. I am extremely proud of our progress to date, of the strength of our team, and of all that we are achieving together.

“As a testament to the Bank's progress, Scotiabank was once again named Bank of the Year for Canada by The Banker magazine — a Financial Times publication — as well as the top bank in Canada by Global Finance and Euromoney magazines. Euromoney magazine also recognized Scotiabank as the World's Best Bank for Corporate Responsibility.”

ScotiaBond

ScotiaBond encompasses the core Values and key Behaviours needed to help us build a strong future for our clients, shareholders and Scotiabankers globally.

It's our commitment to each other — to create safe spaces to learn and grow, to promote accountability and inclusivity, and to recognize **we only win when we win together as one team.**

Values

A strong values-driven culture has always been part of the fabric of Scotiabank. Our values guide our day-to-day interactions and decisions, reflecting our client-centric focus in the way we do business across our footprint.

Behaviours

Our key Behaviours outline the expectations of every Scotiabanker to deliver on our strategic priorities and captures how we win together as one team.

Grow and Scale in Priority Markets

At the core of our strategy is a focus on growing and scaling in our priority businesses across Canada, the United States (U.S.), and Mexico. As the only bank that operates at scale across the North American corridor, a unique differentiator for us, we are allocating the majority of our capital to focus our growth in North America.

“As the only bank that operates at scale across the North American corridor, a unique differentiator for us, we are allocating the majority of our capital to focus our growth in North America.”

In Canada, we put greater emphasis this year on growing deposits across our portfolios, with retail deposits and investment growth up approximately 6% this year. While there is still much progress to be made, we have invested in transforming our business mix across different lines of business. We have strong momentum in our Global Wealth Management business with year-over-year earnings growth of 10%, and fee and commissions revenue in our Global Banking and Markets business is up approximately 14% this year. This increase is evidence of our growing emphasis on providing a more holistic suite of services to our clients, and the value that they see in our offering.

In our International Banking business, our countries are positioning to drive higher returns, with less capital deployed this year. Less emphasis is being put on those areas with limited long-term strategic value to the Bank, such as the agreement that we announced earlier this year to sell our consumer finance business in Peru, while we grow our focus on those segments and client groups that drive a greater return. We are seeing the important role

that all of our countries — even those outside of the North American corridor — are playing in growing and enhancing value for shareholders, while optimizing the capital already deployed in these businesses.

Consistent with our commitment to allocate more capital to North America, this year we announced an investment in KeyCorp, a large U.S. regional bank. The KeyCorp investment represents a cost-effective, high-return, and low-risk approach to deploying capital in the U.S. market, while contributing to near-term earnings growth.

Further to our goal to provide \$350 billion in climate-related finance¹ by 2030, we provided \$40 billion this year and a total of \$172 billion since November 1, 2018.

“We are seeing the important role that all of our countries — even those outside of the North American corridor — are playing in growing and enhancing value for shareholders, while optimizing the capital already deployed in these businesses.”

¹ Climate-related finance consists of those products and services (such as lending and advisory services) as well as the types of transactions (such as sustainability-linked loans or dedicated purpose loans) which support, among other things, climate change mitigation, adaptation, pollution prevention, sustainable management of natural resources, biodiversity conservation and circular economy. For further details, see Scotiabank's Climate-related Finance Framework.

“This year, Scene+ membership has grown to over 15 million clients, and almost 40% of Scotiabank clients with Scene+ have three or more Scotiabank products.”

Earn Primary Client Relationships

Key to our execution is an increased focus on driving value over volume when it comes to our client relationships. We are putting greater emphasis on deeper, multi-product client relationships, rather than monoline lending-only relationships, and enhancing our value proposition for clients across all of our channels. We have already started to see some success this year, growing the number of primary clients across our Canadian and International Retail businesses by approximately 280,000. These are clients to whom we can provide core banking solutions, through ongoing delivery of our products and services, and who are engaged digitally. While good progress has been made in primary client growth, much more progress is needed to achieve our long-term aspirations.

In our Canadian Retail business, our Mortgage+ offering has driven strong growth in primary clients. Through Mortgage+, customers are able to unlock preferred mortgage rates as part of a product bundle, with more than 75% of new mortgages this year being Mortgage+. Through our Scene+ program, we are continuing to expand our partnerships and deepen client relationships, including new product offerings introduced this year such as the Scotia Home Hardware PRO Visa Business card, designed to support entrepreneurs in the trades

and construction industry to better manage and expand their businesses. This year, Scene+ membership has grown to over 15 million clients, and almost 40% of Scotiabank clients with Scene+ have three or more Scotiabank products.

For those digitally-savvy clients that prefer to transact almost entirely virtually, our Tangerine Bank continues to be the leading digital Bank in Canada. For the 13th consecutive year, Tangerine Bank topped the J.D. Power 2024 Canada Retail Banking Satisfaction Study, widening its lead amongst midsize banks in overall Client Satisfaction and building further gains in Client Trust and Digital Channels performance.

We have also worked to enhance our cash management and Global Transaction Banking capabilities, supporting our business clients' day-to-day transaction, liquidity and working capital needs as we focus on building client primacy. Our cash management platform, ScotiaConnect, will elevate our offering in both Mexico and Canada, with our focus now on strengthening capabilities in the U.S. to make it easier for our multinational, corporate, and commercial clients to do business across the North American corridor. For our efforts in Cash Management, Scotiabank was recognized as North America's Best Cash Management Bank for Corporate Accounts and North America's Best Cash Management Bank for Foreign Exchange in Euromoney magazine's 2024 Cash Management Survey.

Make it Easy To Do Business With Us

The third pillar of our strategy is to make it easy to do business with us, by simplifying and improving access to our products and services and building an organization that is both more efficient and more effective.

A core piece of this is our regionalization efforts. We are building scale and leveraging common platforms to enhance the client experience, drive greater client primacy, and work more effectively. Particularly in our International Banking business, this means moving from what was a federated model of countries, towards one that is more unified — in roles and responsibilities, in products, in processes and procedures, and in underlying architecture — so that clients can transact seamlessly across jurisdictions and in a common manner. We are already making good progress, generating positive operating leverage of 5% in International Banking. Similarly, in our Canadian Banking business, we have also made good progress, generating positive operating leverage of 2.6%.

We are also investing in our core technology, having expanded our partnership with Google Cloud this year and naming it the enterprise cloud platform of choice for the next phase of our cloud acceleration journey. The partnership will enable us to further enhance both our client and employee experience, strengthen the security of the Bank, and move faster on technologies that are shaping the future of business and society, such as generative AI. Our partnership has already helped to create a more personal and predictive banking experience for our clients, including powering our award-winning chatbot.

“We are building scale and leveraging common platforms to enhance the client experience, drive greater client primacy, and work more effectively.”

Win as One Team

Finally, our fourth pillar is to win as one team, which reflects the important role that every Scotiabanker has in driving our efforts forward. By breaking down silos and investing in our people, culture, and communities, we are working to create an environment where everyone can thrive and deliver their very best, each and every day. In this year's internal employee sentiment survey, Scotiabankers expressed a sense of belonging, and trust in senior leadership was up throughout the year,

“By breaking down silos and investing in our people, culture, and communities, we are working to create an environment where everyone can thrive and deliver their very best, each and every day.”

well exceeding the Financial Services benchmark. We were proud that Scotiabank was once again recognized as one of the Best Workplaces™ in Canada by Great Place to Work® for the fifth consecutive year.

One of the ways that we are demonstrating enterprise-wide thinking in action is the growing collaboration between our business lines to deliver for our customers. For example, in 2024 we had \$13 billion in closed referrals across our Canadian Retail, Commercial, and Wealth businesses — providing those clients with a more holistic suite of products and services that allow us to meet more of their financial services needs.

Continuing the strong progress we have made against our strategy requires cultivating a culture of high performance. Building on our strong foundation, we introduced a new culture framework this year: ScotiaBond. Comprised of core values and new behaviours, ScotiaBond is our commitment to each other — to create safe spaces to learn and grow, to promote accountability and inclusivity, and to recognize that we only win when

Awards and Recognitions

Named Bank of the Year in Canada for the fifth year in a row by The Banker, as well as Bank of the Year in Bahamas, Barbados, Cayman Islands, and Turks and Caicos.

Scotiabank was recognized with 11 Euromoney Awards for Excellence 2024, including the World's Best Bank for Corporate Responsibility and Best Bank in Canada, Chile, The Bahamas, Jamaica, and Trinidad and Tobago.

Named North America's Best Cash Management Bank for Corporate Accounts and North America's Best Cash Management Bank for Foreign Exchange by Euromoney.

“This year we took a significant step forward in our journey of truth and reconciliation with Indigenous Peoples with the launch of our Truth & Reconciliation Action Plan.”

we win together as one team. ScotiaBond is being embedded in all aspects of our organization over the coming months, from how we set performance and development goals, to ongoing recognition programs, to the way we reward our team at the end of the year. We are confident these behaviours will help us create a workplace that enables us to deliver the strongest future for each other, our clients, and our Bank.

This year we took a significant step forward in our journey of truth and reconciliation with Indigenous Peoples with the launch of our Truth & Reconciliation Action Plan, which outlines 37 meaningful, progressive commitments spanning across our business lines and functions at the Bank. We also partnered with Nch'kay Development, Des Nedhe Group, and Chippewas of Rama First Nation to launch Canada's first majority Indigenous-owned investment dealer, Cedar Leaf Capital. Though there is significant and ongoing work ahead for us, I am confident that Scotiabank is on a path that will support economic progress for Indigenous clients and a culture of reconciliation that benefits us all.

Named the 2024 Best Bank in Canada by Global Finance magazine.

Global Wealth Management recognized with six Euromoney Private Banking Awards 2024 and 21 awards at the annual FundGrade A+™ Awards.

Recognized as Best Corporate Bank in Chile by International Finance.

We made further, meaningful progress in building up the people and communities around us throughout the past year. Through ScotiARISE, our 10-year, \$500 million program to drive greater economic inclusion, we reached more than \$156 million in investments since 2021 in 300 organizations driving meaningful action across our footprint. Scotiabankers also raised more than \$14 million through our first global employee giving campaign that wrapped up this year, and logged more than 250,000 volunteer hours through our internal community engagement platform in 2024.

As a reflection of our efforts over the past year and beyond, Scotiabank was once again named to the Dow Jones Sustainability North America Index for the sixth year in a row, ranking highest in North America among banks assessed through the S&P Global Corporate Sustainability Assessment.

**“Thank you to our shareholders
for your ongoing support of the Bank
and its leadership team, and to our
clients for your continued business.”**

Recognized as one of the Best Workplaces™ in Canada by Great Place to Work® for the fifth consecutive year.

Named one of Canada's Top Employers for Young People 2024 by Mediacorp Canada Inc., for the fourth consecutive year.

The Globe and Mail's Women Lead Here list recognized Scotiabank for executive gender diversity for the fourth consecutive year.

Scotiabank was named to the Dow Jones Sustainability North America Index for the sixth year in a row, with a 2023 S&P Global Corporate Sustainability Assessment score ranking the Bank in the top 4% of banks globally and highest in North America.

Looking Ahead

In the face of continued economic uncertainty, ongoing geopolitical conflict, and rapidly evolving client preferences, your Bank continues to be resilient, adaptable, and positioned for the future, with an ongoing belief in the strength of the North American corridor. This past fall, Scotiabank's entire senior leadership team came together in Toronto to review the progress that we have made against our strategy to date, and to collaborate on our path forward. We left that session as a team that is aligned, confident, and focused on the journey ahead.

As we look to 2025, we recognize that there is much more to do. But we are already starting to see the benefits of disciplined implementation and execution of our strategy, and we are on track to deliver on the medium-term financial objectives that we laid out at our Investor Day last year. We will continue to reallocate capital from developing to developed markets, while prioritizing value over volume and deepening our client relationships.

Thank you to our shareholders for your ongoing support of the Bank and its leadership team, and to our clients for your continued business. Over the past twelve months, we have worked day in and day out to earn and maintain your trust, and it is a trust that we will never take for granted.

I would also like to thank our team of Scotiabankers across our global footprint, who bring passion, deep expertise, and a tireless attitude as they show up and relentlessly deliver for all of their stakeholders.

It remains my privilege to lead this storied institution through its next chapter, and I am looking forward to what 2025 will bring.

Scott Thomson
President and CEO

Scotiabank achieved the highest Gold level certification from the Canadian Council for Indigenous Business' Partnership Accreditation in Indigenous Relations.

Recognized as one of the Best Workplaces in Financial Services & Insurance in Canada by Great Place to Work® for the seventh year in a row.

Recognized as having one of the 2024 Most Trusted Executive Teams in Canada by Great Place to Work®.

In Mexico, Scotiabank achieved Certificación Aequales for its high standards related to gender equity and diversity.

Aaron Regent
Chair of the Board

Chair's message to shareholders

Dear fellow shareholders,

2024 marked a pivotal year for Scotiabank with the launch of its new strategy, underpinned by a bold new vision: to be our clients' most trusted financial partner. Your Board has been actively engaged in overseeing the implementation of the strategy, and is pleased with the progress being made against the plan laid out at our Investor Day one year ago.

2024 PERFORMANCE

Under the leadership of its President and CEO, Scott Thomson, the Bank has taken important foundational steps. This includes continued growth in primary client relationships, strengthening of the balance sheet, improved business mix, and growth in deposits. Repositioning of the Bank's business lines continues as capital is reallocated from developing towards developed markets, with a focus on the North American corridor, and we are seeing the benefits of the entire Bank thinking and acting as one organization by making trade-offs to deliver results for the whole. The Bank also made important strides to drive greater value and productivity by improving cost and process efficiencies, and it continued to enhance its compliance and risk management programs. We recognize that the Bank continues to operate in an uncertain macroeconomic environment, and that there is more work to do in key priority areas to deliver on its strategy, but we believe the Bank is well positioned for 2025 and we are looking forward to continued progress.

COMMITMENT TO GOVERNANCE

This year, your Board continued to engage with shareholders on a wide range of issues — with particular focus on governance, climate, and leadership matters. Our commitment to year-round dialogue with our shareholders is an important component of our stewardship process, ensuring our awareness of issues that are most important to our shareholders.

Your Board played a critical role in providing oversight of the Bank's progress towards its Environment, Social, and Governance (ESG) commitments. This includes our support of the Bank's Truth & Reconciliation Action Plan, which details Scotiabank's formal commitments and steps to achieve reconciliation and establish relationships of trust with Indigenous employees, clients, and communities. The Bank also partnered with Nch'kay Development Limited Partnership, Des Nedhe Financial LP, and Chippewas of Rama First Nation to launch Canada's first Indigenous-owned and -led investment dealer, Cedar Leaf Capital, which was launched in October to foster greater Indigenous participation in the capital markets.

CULTURE

Your Board recognizes that the strength of the Bank is rooted in its people. Through ScotiaBond, the Bank's new cultural framework, we are confident that the deepened focus on the right values and behaviours to support the execution of its strategy will enable Scotiabank to deliver in 2025 and beyond.

OUR THANKS

On behalf of the entire Board, I would like to thank Scott and the Senior Management Team for their leadership, and the entire Scotiabank team for their tremendous dedication. I would also like to thank our shareholders for their ongoing support and confidence in our Bank. We look forward to seeing you at our upcoming Annual Meeting in Halifax, Nova Scotia, as we return to where the Scotiabank story started.

ESG Highlights

ENVIRONMENTAL

- Provided \$40 billion in climate-related finance in 2024, aligned with Scotiabank's Climate-related Finance Framework.
- Issued a total of \$5.7 billion in sustainability finance offerings in Europe, Mexico and Canada, supported by a renewed Sustainable Issuance Framework.
- Launched a Sustainability GIC for retail and small business clients and a benchmark sustainability issuance that allows for allocation of proceeds to nuclear energy, aligned to our Sustainable Issuance Framework.

SOCIAL

- Released our inaugural Truth & Reconciliation Action Plan.
- Reached more than \$156 million of ScotiaRISE investments since 2021 across 300 organizations operating in communities across our footprint.
- Engaged more than 39,000 women entrepreneurs through the Scotiabank Women Initiative®, with programs in Canada, Chile, Costa Rica, Jamaica, Peru, and the U.S. designed to help women increase their economic and professional opportunities.

GOVERNANCE

- Maintained Dow Jones Sustainability North American Index inclusion and an "AAA" ESG rating from MSCI.
- Awarded Bank of the Year in Canada for the fifth time by The Banker.
- Garnered 11 Euromoney Awards for Excellence 2024, including Canada's Best Bank, and World's Best Bank for Corporate Responsibility.

OUR CLIMATE GOALS ARE:

1. Financing Climate Solutions:

Provide \$350 billion in climate-related finance¹ by 2030, of which we have provided \$172 billion since November 1, 2018.

2. Advancing to Net-Zero:

Achieve net-zero financed emissions by 2050; in furtherance of this goal we will

work with clients to support their environmental strategies and are setting 2030 sectoral emissions intensity reduction targets. Our climate-related client engagement framework and net-zero preparedness ratings help to facilitate client conversations about supporting their climate-related strategies.

3. Reducing Our Own Emissions:

Introduce solutions to minimize the Bank's operational emissions, such as securing 100% emission-free electricity² in Canada by 2025.

¹ Climate-related finance consists of those products and services (such as lending and advisory services) as well as the types of transactions (such as sustainability-linked loans or dedicated purpose loans) which support, among other things, climate change mitigation, adaptation, pollution prevention, sustainable management of natural resources, biodiversity conservation and circular economy. For further details, see Scotiabank's Climate-related Finance Framework.

² Either physically or virtually. Emission-free sources includes renewable (hydro, solar, wind, geothermal, tidal) and nuclear sources, and may include the use of renewable energy certificates (RECs). Electricity from emission-free sources in Canada is based on provincial electricity mix sourced from Natural Resources Canada Energy Fact Book 2023-2024, pp. 62 and 63.

ScotiaRISE helps disadvantaged people reach their full potential by funding programs that address education, employment opportunity, and basic needs supports. ScotiaRISE's Latin American and Caribbean strategy puts additional emphasis on advancing community-based action for human rights and social harmony.

- Renewed partnership with Windmill Microlending, contributing \$2.5 million to support career advancement for skilled immigrants and refugees in Canada.
- Partnered with Teach For All, providing \$1.4 million to enhance programs training classroom leaders in underserved communities in the U.S. and Mexico.
- Supported the CHUM Foundation with \$1 million to improve access to healthcare services and Indigenous wellness supports in Canada.

Scotiabank's Truth & Reconciliation Action Plan establishes 37 meaningful commitments designed to progress reconciliation with Indigenous Peoples in Canada.

The Bank has also:

- Earned Gold level Partnership Accreditation in Indigenous Relations recertification from the Canadian Council for Indigenous Business.
- Supported the Moose Hide Campaign to bring awareness to gender-based violence and the crisis of murdered and missing Indigenous women, girls, and Two-Spirit people.
- Amplified the voices of Indigenous authors and gifted more than 2,800 copies of Phyllis Webstad's Today is Orange Shirt Day book to Indigenous schools and organizations.
- Partnered with Nch'kay Development, Des Nedhe Group, and Chippewas of Rama First Nation to create the first-to-market majority Indigenous-owned investment dealer in Canada: Cedar Leaf Capital.

ENHANCED DISCLOSURE TASK FORCE (EDTF) RECOMMENDATIONS

The Enhanced Disclosure Task Force (EDTF) was established by the Financial Stability Board in May 2012 with the goal of developing fundamental disclosure principles. On October 29, 2012, the EDTF published its report, "Enhancing the Risk Disclosures of Banks," which sets forth recommendations around improving risk disclosures and identifies existing leading practice risk disclosures.

Below is the index of all these recommendations to facilitate easy reference in the Bank's annual report and other public disclosure documents available on www.scotiabank.com/investorrelations.

Reference Table for EDTF

Type of risk	Number	Disclosure	Pages		
			MD&A	Financial Statements	Supplementary Regulatory Capital Disclosures
General	1	The index of risks to which the business is exposed.	16		
	2	The Bank's risk to terminology, measures and key parameters.	75-78		
	3	Top and emerging risks, and the changes during the reporting period.	80-81, 85-91		
	4	Discussion on the regulatory development and plans to meet new regulatory ratios.	55-58, 100-103, 116		
Risk governance, risk management and business model	5	The Bank's Risk Governance structure.	72-74		
	6	Description of risk culture and procedures applied to support the culture.	75-78		
	7	Description of key risks from the Bank's business model.	79		
	8	Stress testing use within the Bank's risk governance and capital management.	75-76		
Capital Adequacy and risk-weighted assets	9	Pillar 1 capital requirements, and the impact for global systemically important banks.	55-58	205	4, 5
	10	a) Regulatory capital components.	59		24-26
		b) Reconciliation of the accounting balance sheet to the regulatory balance sheet.			20-21
	11	Flow statement of the movements in regulatory capital since the previous reporting period, including changes in common equity tier 1, additional tier 1 and tier 2 capital.	60-61		103
	12	Discussion of targeted level of capital, and the plans on how to establish this.	55-58		
	13	Analysis of risk-weighted assets by risk type, business, and market risk RWAs.	63-68, 79, 123	174	7, 39-42, 46-63, 76-81, 85, 100, 106, 112
	14	Analysis of the capital requirements for each Basel asset class.	63-68	174, 223-229	18-19, 39-81, 85, 90-93
	15	Tabulate credit risk in the Banking Book.	63-68	224	18-19, 39-64, 85, 90-93
	16	Flow statements reconciling the movements in risk-weighted assets for each risk-weighted asset type.	63-68		65, 84, 105
Liquidity Funding	17	Discussion of Basel III Back-testing requirement including credit risk model performance and validation.	64-66		66-69, 110
	18	Analysis of the Bank's liquid assets.	98-103		
	19	Encumbered and unencumbered assets analyzed by balance sheet category.	100		
	20	Consolidated total assets, liabilities and off-balance sheet commitments analyzed by remaining contractual maturity at the balance sheet date.	104-106		
Market Risk	21	Analysis of the Bank's sources of funding and a description of the Bank's funding strategy.	103-104

FORWARD LOOKING STATEMENTS

From time to time, our public communications include oral or written forward-looking statements. Statements of this type are included in this document, and may be included in other filings with Canadian securities regulators or the U.S. Securities and Exchange Commission (SEC), or in other communications. In addition, representatives of the Bank may include forward-looking statements orally to analysts, investors, the media and others. All such statements are made pursuant to the "safe harbor" provisions of the U.S. Private Securities Litigation Reform Act of 1995 and any applicable Canadian securities legislation. Forward-looking statements may include, but are not limited to, statements made in this document, the Management's Discussion and Analysis in the Bank's 2024 Annual Report under the headings "Outlook" and in other statements regarding the Bank's objectives, strategies to achieve those objectives, the regulatory environment in which the Bank operates, anticipated financial results, and the outlook for the Bank's businesses and for the Canadian, U.S. and global economies. Such statements are typically identified by words or phrases such as "believe," "expect," "aim," "achieve," "foresee," "forecast," "anticipate," "intend," "estimate," "outlook," "seek," "schedule," "plan," "goal," "strive," "target," "project," "commit," "objective," and similar expressions of future or conditional verbs, such as "will," "may," "should," "would," "might," "can" and "could" and positive and negative variations thereof.

By their very nature, forward-looking statements require us to make assumptions and are subject to inherent risks and uncertainties, which give rise to the possibility that our predictions, forecasts, projections, expectations or conclusions will not prove to be accurate, that our assumptions may not be correct and that our financial performance objectives, vision and strategic goals will not be achieved.

We caution readers not to place undue reliance on these statements as a number of risk factors, many of which are beyond our control and effects of which can be difficult to predict, could cause our actual results to differ materially from the expectations, targets, estimates or intentions expressed in such forward-looking statements.

The future outcomes that relate to forward-looking statements may be influenced by many factors, including but not limited to: general economic and market conditions in the countries in which we operate and globally; changes in currency and interest rates; increased funding costs and market volatility due to market illiquidity and competition for funding; the failure of third parties to comply with their obligations to the Bank and its affiliates, including relating to the care and control of information, and other risks arising from the Bank's use of third parties; changes in monetary, fiscal, or economic policy and tax legislation and interpretation; changes in laws and regulations or in supervisory expectations or requirements, including capital, interest rate and liquidity requirements and guidance, and the effect of such changes on funding costs; geopolitical risk; changes to our credit ratings; the possible effects on our business and the global economy of war, conflicts or terrorist actions and unforeseen consequences arising from such actions; technological changes, including the use of data and artificial intelligence in our business, and technology resiliency; operational and infrastructure risks; reputational risks; the accuracy and completeness of information the Bank receives on customers and counterparties; the timely development and introduction of new products and services, and the extent to which products or services previously sold by the Bank require the Bank to incur liabilities or absorb losses not contemplated at their origination; our ability to execute our strategic plans, including the successful completion of acquisitions and dispositions, including obtaining regulatory approvals; critical accounting estimates and the effect of changes to accounting standards, rules and interpretations on these estimates; global capital markets activity; the Bank's ability to attract, develop and retain key executives; the evolution of various types of fraud or other criminal behaviour to which the Bank is exposed; anti-money laundering; disruptions or attacks (including cyberattacks) on the Bank's information technology, internet connectivity, network accessibility, or other voice or data communications systems or services, which may result in data breaches, unauthorized access to sensitive information, denial of service and potential incidents of identity theft; increased competition in the geographic and in business areas in which we operate, including through internet and mobile banking and non-traditional competitors; exposure related to significant litigation and regulatory matters; environmental, social and governance risks, including climate change, our ability to implement various sustainability-related initiatives (both internally and with our clients and other stakeholders) under expected time frames, and our ability to scale our sustainable-finance products and services; the occurrence of natural and unnatural catastrophic events and claims resulting from such events, including disruptions to public infrastructure, such as transportation, communications, power or water supply; inflationary pressures; global supply-chain disruptions; Canadian housing and household indebtedness; the emergence or continuation of widespread health emergencies or pandemics, including their impact on the global economy, financial market conditions and the Bank's business, results of operations, financial condition and prospects; and the Bank's anticipation of and success in managing the risks implied by the foregoing. A substantial amount of the Bank's business involves making loans or otherwise committing resources to specific companies, industries or countries. Unforeseen events affecting such borrowers, industries or countries could have a material adverse effect on the Bank's financial results, businesses, financial condition or liquidity. These and other factors may cause the Bank's actual performance to differ materially from that contemplated by forward-looking statements. The Bank cautions that the preceding list is not exhaustive of all possible risk factors and other factors could also adversely affect the Bank's results, for more information, please see the "Risk Management" section of the Bank's 2024 Annual Report, as may be updated by quarterly reports.

Material economic assumptions underlying the forward-looking statements contained in this document are set out in the 2024 Annual Report under the headings "Outlook", as updated by quarterly reports. The "Outlook" and "2025 Priorities" sections are based on the Bank's views and the actual outcome is uncertain. Readers should consider the above-noted factors when reviewing these sections. When relying on forward-looking statements to make decisions with respect to the Bank and its securities, investors and others should carefully consider the preceding factors, other uncertainties and potential events.

Any forward-looking statements contained in this document represent the views of management only as of the date hereof and are presented for the purpose of assisting the Bank's shareholders and analysts in understanding the Bank's financial position, objectives and priorities, and anticipated financial performance as at and for the periods ended on the dates presented, and may not be appropriate for other purposes. Except as required by law, the Bank does not undertake to update any forward-looking statements, whether written or oral, that may be made from time to time by or on its behalf.

Additional information relating to the Bank, including the Bank's Annual Information Form, can be located on the SEDAR+ website at www.sedarplus.ca and on the EDGAR section of the SEC's website at www.sec.gov.

(1) The Bank adopted IFRS 17 effective November 1, 2023. As required under the new accounting standard, prior period amounts have been restated. Refer to Note 4 of the consolidated financial statements.

(2) Refer to Glossary on page 132 for the description of the measure.

(3) Refer to Non-GAAP Measures section starting on page 20.

(4) Commencing Q1 2024, regulatory capital ratios are based on Revised Basel III requirements as determined in accordance with OSFI Guideline – Capital Adequacy Requirements (November 2023). 2023 regulatory capital ratios are based on Revised Basel III requirements as determined in accordance with OSFI Guideline – Capital Adequacy Requirements (February 2023).

(5) This measure has been disclosed in this document in accordance with OSFI Guideline – Total Loss Absorbing Capacity (September 2018).

(6) The leverage ratios are based on Revised Basel III requirements as determined in accordance with OSFI Guideline – Leverage Requirements (February 2023).

(7) This measure has been disclosed in this document in accordance with OSFI Guideline – Public Disclosure Requirements for Domestic Systemically Important Banks on Liquidity Coverage Ratio (April 2015).

(8) This measure has been disclosed in this document in accordance with OSFI Guideline – Net Stable Funding Ratio Disclosure Requirements (January 2021).

(9) Includes allowance for credit losses on all financial assets – loans, acceptances, off-balance sheet exposures, debt securities, and deposits with financial institutions.

(10) Includes provision for credit losses on certain financial assets – loans, acceptances, and off-balance sheet exposures.

NON-GAAP MEASURES

The Bank uses a number of financial measures and ratios to assess its performance, as well as the performance of its operating segments. Some of these financial measures and ratios are presented on a non-GAAP basis and are not calculated in accordance with Generally Accepted Accounting Principles (GAAP) which are based on International Financial Reporting Standards (IFRS) as issued by the International Accounting Standards Board (IASB), are not defined by GAAP and do not have standardized meanings, and therefore might not be comparable to similar financial measures and ratios disclosed by other issuers. The Bank believes that non-GAAP measures and ratios are useful as they provide readers with a better understanding of how management assesses performance. These non-GAAP measures and ratios are used throughout this report and are defined below.

Adjusted results and adjusted diluted earnings per share

The following presents a reconciliation of GAAP reported financial results to non-GAAP adjusted financial results. Management considers both reported and adjusted results and measures useful in assessing underlying ongoing business performance. Adjusted results and measures remove certain specified items from revenue, non-interest expenses, income taxes and non-controlling interest. Presenting results on both a reported basis and adjusted basis allows readers to assess the impact of certain items on results for the periods presented, and to better assess results and trends excluding those items that may not be reflective of ongoing business performance.

T2 Reconciliation of reported and adjusted results and diluted earnings per share

As at October 31 (\$ millions)

	2024 ⁽¹⁾	2023 ⁽¹⁾
Reported Results

(1) Including related impacts on regulatory capital and risk-weighted assets.

The Bank's fiscal 2024 and 2023 results were adjusted for the following items. These amounts were recorded in the Other operating segment, unless otherwise noted.

a) Divestitures and wind-down of operations

In Q3 2024, the Bank entered into an agreement to sell CrediScotia Financiera, a wholly-owned consumer finance subsidiary in Peru, to Banco Santander. The Bank recognized an impairment loss of \$143 million in non-interest income and a recovery of expenses of \$7 million in non-interest expenses (collectively \$90 million after-tax), majority of which relates to goodwill. In Q4 2023, the Bank sold its 20% equity interest in Canadian Tire's Financial Services business (CTFS) to Canadian Tire Corporation. The sale resulted in a net gain of \$367 million (\$319 million after-tax). For further details, please refer to Note 37 of the Consolidated Financial Statements.

b) Impairment of non-financial assets

In Q4 2024, the Bank recorded impairment charges of \$343 million (\$309 million after-tax) related to its investment in associate, Bank of Xi'an Co. Ltd. in China, driven primarily by the continued weakening of the economic outlook in China and whose market value has remained below the Bank's carrying value for a prolonged period (Q4 2023 – \$185 million pre-tax and \$159 million after-tax). In Q4 2024, the Bank recorded an impairment of software intangible assets of \$97 million (\$70 million after-tax). In Q4 2023, the Bank recorded an impairment of software and other intangible assets of \$161 million (\$114 million after-tax). For further details, please refer to Notes 18 and 19 of the Consolidated Financial Statements.

c) Restructuring charge and severance provisions

In Q4 2024, the Bank recorded severance provisions of \$53 million (\$38 million after-tax) related to the Bank's continued efforts to streamline its organizational structure and support execution of the Bank's strategy. In Q4 2023, the Bank recorded a restructuring charge and severance provisions of \$354 million (\$258 million after-tax) related to workforce reductions and changes as a result of the Bank's end-to-end digitization, automation, changes in customers' day-to-day banking preferences, as well as the ongoing efforts to streamline operational processes and optimize distribution channels. For further details, please refer to Note 24 of the Consolidated Financial Statements.

d) Legal provision

In Q3 2024, the Bank recognized a \$176 million expense for legal actions in Peru relating to certain value-added tax assessed amounts and associated interest. The legal actions arose from certain client transactions that occurred prior to the Bank's acquisition of its Peruvian subsidiary. For further details, please refer to Note 24 of the Consolidated Financial Statements.

e) Amortization of acquisition-related intangible assets

These costs relate to the amortization of intangible assets recognized upon the acquisition of businesses, excluding software, and are recorded in the Canadian Banking, International Banking and Global Wealth Management operating segments.

f) Consolidation of real estate and contract termination costs

In Q4 2023, the Bank recorded costs of \$87 million (\$63 million after-tax) related to the consolidation and exit of certain real estate premises, as well as service contract termination costs, as part of the Bank's optimization strategy.

g) Canada recovery dividend

In Q1 2023, the Bank recognized an additional income tax expense of \$579 million reflecting the present value of the amount payable for the Canada Recovery Dividend (CRD). The CRD is a Canadian federal tax measure which requires the Bank to pay a one-time tax of 15% on taxable income in excess of \$1 billion, based on the average taxable income for the 2020 and 2021 taxation years. For further details, please refer to Note 28 of the Consolidated Financial Statements.

Constant Dollar

International Banking business segment results are analyzed on a constant dollar basis which is a non-GAAP measure. Under the constant dollar basis, prior period amounts are recalculated using current period average foreign currency rates. The following table presents the reconciliation between reported, adjusted and constant dollar results for International Banking for prior periods. The Bank believes that constant dollar is useful for readers to understand business performance without the impact of foreign currency translation and is used by management to assess the performance of the business segment. The tables below are computed on a basis that is different than the table "Impact of foreign currency translation" in Overview of Performance on page 29.

Earning and non-earning assets, core earning assets, core net interest income and net interest margin

Net interest margin

Net interest margin is a non-GAAP ratio that is used to measure the return generated by the Bank's core earning assets, net of the cost of funding. Net interest margin is calculated as core net interest income divided by average core earning assets.

Components of net interest margin are defined below:

Earning assets

Earning assets are defined as income generating assets which include deposits with financial institutions, trading assets, investment securities, investments in associates, securities borrowed or purchased under resale agreements, loans net of allowances, and customers' liability under acceptances. This is a non-GAAP measure.

Non-earning assets

Non-earning assets are defined as cash, precious metals, derivative financial instruments, property and equipment, goodwill and intangible assets, deferred tax assets and other assets. This is a non-GAAP measure.

Core earning assets

Core earning assets are defined as interest-bearing deposits with financial institutions, investment securities and loans, net of allowances. This is a non-GAAP measure. The Bank believes that this measure is useful for readers as it presents the main interest-generating assets and eliminates the impact of trading businesses.

Core net interest income

Core net interest income is defined as net interest income earned from core earning assets. This is a non-GAAP measure.

(2) Average balances represent the average of daily balances for the period.

Return on equity

Return on equity is a profitability measure that presents the net income attributable to common shareholders as a percentage of average common shareholders' equity.

Adjusted return on equity is a non-GAAP ratio which represents adjusted net income attributable to common shareholders as a percentage of average common shareholders' equity.

Attributed capital and operating segment return on equity

The amount of common equity allocated to each operating segment is referred to as attributed capital. The attribution of capital within each operating segment is intended to approximate a percentage of the Basel III common equity capital requirements based on credit, market and operational risks and leverage inherent within each operating segment. Attributed capital is a non-GAAP measure.

Effective November 1, 2023, in line with OSFI's increased Domestic Stability Buffer announced requirements, the Bank increased the capital attributed to its business lines to approximate 11.5% of the Basel III common equity capital requirements. Previously, capital was attributed based on a methodology that approximated 10.5% of Basel III common equity capital requirements.

Return on equity for the operating segments is calculated as a ratio of net income attributable to common shareholders of the operating segment and the capital attributed. This is a non-GAAP measure.

Adjusted return on equity for the operating segments is calculated as a ratio of adjusted net income attributable to common shareholders of the operating segment and the capital attributed. This is a non-GAAP measure.

Return on tangible common equity

Return on tangible common equity is a profitability measure that is calculated by dividing the net income attributable to common shareholders, adjusted for the amortization of intangibles (excluding software), by average tangible common equity. Tangible common equity is defined as common shareholders' equity adjusted for goodwill and intangible assets (excluding software), net of deferred taxes. This is a non-GAAP ratio.

Adjusted return on tangible common equity represents adjusted net income attributable to common shareholders as a percentage of average tangible common equity. This is a non-GAAP ratio.

T8 Return on tangible common equity

(1) The Bank adopted IFRS 17 effective November 1, 2023. As required under the new accounting standard, prior period amounts have been restated. Refer to Note 4 of the consolidated financial statements.

(2) Average amounts calculated using methods intended to approximate the daily average balances for the period.

(3) Includes imputed goodwill from investments in associates.

(4) Refer to Tables on pages 20 and 22.

Adjusted productivity ratio

Adjusted productivity ratio represents adjusted non-interest expenses as a percentage of adjusted total revenue. This is a non-GAAP ratio.

Management uses the productivity ratio as a measure of the Bank's efficiency. A lower ratio indicates improved productivity.

Adjusted operating leverage

This financial metric measures the rate of growth in adjusted total revenue less the rate of growth in adjusted non-interest expenses. This is a non-GAAP ratio.

Management uses operating leverage as a way to assess the degree to which the Bank can increase operating income by increasing revenue.

Trading-related revenue (Taxable equivalent basis)

Trading-related revenue consists of net interest income and non-interest income. Included are unrealized gains and losses on trading security positions held, realized gains and losses from the purchase and sale of securities, fees and commissions from trading securities borrowing and lending activities, and gains and losses on trading derivatives. Underwriting and other advisory fees, which are shown separately in the Consolidated Statement of Income, are excluded. Trading-related revenue includes certain net interest income and non-interest income items on a taxable equivalent basis (TEB). This methodology grosses up tax-exempt income earned on certain securities to an equivalent before tax basis. This is a non-GAAP measure.

Management believes that this basis for measurement of trading-related revenue provides a uniform comparability of net interest income and non-interest income arising from both taxable and non-taxable sources and facilitates a consistent basis of measurement. While other banks also use TEB, their methodology may not be comparable to the Bank's methodology.

Adjusted effective tax rate

The adjusted effective tax rate is calculated by dividing adjusted income tax expense by adjusted income before taxes. This is a non-GAAP ratio.

OVERVIEW OF PERFORMANCE

Financial Results: 2024 vs 2023

Net income was \$7,892 million in 2024, compared to \$7,450 million in 2023, an increase of 6%. The increase was driven mainly by higher revenues and lower provision for income taxes, partly offset by higher provision for credit losses and non-interest expenses. Diluted earnings per share (EPS) were \$5.87 in fiscal 2024 compared to \$5.72 last year. Return on equity was 10.2% this year compared to 10.3% in fiscal 2023.

Adjusting items impacting net income in the current year were a net charge of \$735 million after-tax (\$877 million pre-tax). The net impact of the adjusting items on diluted earnings per share was \$0.60 and on Basel III Common Equity Tier 1 (CET1) ratio was negative nine basis points. In the prior year, adjusting items were a net charge of \$913 million after-tax (\$501 million pre-tax), with an impact on diluted earnings per share of \$0.76 and on Basel III Common Equity Tier 1 (CET1) ratio of negative six basis points. Refer to Non-GAAP Measures starting on page 20 for further details.

Adjusted net income was \$8,627 million in 2024 compared to \$8,363 million in 2023, an increase of 3%. The increase was driven mainly by higher revenues, partly offset by higher provision for credit losses, non-interest expenses and provision for income taxes. Adjusted diluted EPS were \$6.47 compared to \$6.48, and adjusted return on equity was 11.3% compared to 11.6%.

Net interest income was \$19,252 million, an increase of \$990 million or 5% due primarily to a higher net interest margin and asset growth. Higher net interest income in Canadian Banking and International Banking was partly offset by lower net interest income in the Other segment due mainly to higher funding costs and higher losses from hedges, partly offset by higher income from liquid assets. The net interest margin was 2.16%, an increase of four basis points, driven primarily by higher margins in Canadian Banking and International Banking. This was partly offset by a lower contribution from asset/liability management activities, including increased levels of high quality, lower yielding liquid assets.

Non-interest income was \$14,418 million, an increase of \$466 million or 3%. Adjusted non-interest income was \$14,561 million, an increase of \$976 million or 7% due mainly to higher wealth management revenues, other fees and commissions, underwriting and advisory fees, higher unrealized gains on non-trading derivatives, and the positive impact of foreign currency translation. These were partly offset by lower bankers' acceptance fees related to the conversion of bankers' acceptances to loans due to the cessation of CDOR in June 2024 ("BA conversion").

The provision for credit losses was \$4,051 million compared to \$3,422 million last year, an increase of \$629 million due mainly to higher provision for credit losses on impaired loans, primarily in Canadian Banking and International Banking retail portfolios due to higher formations. The provision for credit losses on performing loans was lower this year, as prior year included higher provisions from the uncertainty of the impact of higher interest rates on consumers and the Bank's portfolios. The provision for credit losses ratio increased 9 basis points to 53 basis points.

Non-interest expenses were \$19,695 million, an increase of \$574 million or 3%. Adjusted non-interest expenses were \$18,961 million, an increase of \$708 million or 4%. The increase was due mainly to higher personnel costs related to performance and share-based compensation, inflationary adjustments and annual increases, higher technology-related costs and advertising and business development costs to support business growth, as well as higher professional fees. Business and capital taxes and the unfavourable impact of foreign currency translation also contributed to the increase. These were partly offset by lower communications expenses and the benefit from prior productivity initiatives. Operating leverage was positive 1.5% for fiscal 2024 and adjusted operating leverage was positive 2.3%.

The effective tax rate was 20.5% compared to 23.0% in 2023 due primarily to the Canada Recovery Dividend in the prior year, partly offset by lower tax-exempt income and higher non-deductible expenses. On an adjusted basis, the effective tax rate was 20.1% compared to 17.8% due primarily to lower tax-exempt income, partly offset by higher income in lower tax jurisdictions.

The Basel III Common Equity Tier 1 (CET1) ratio was 13.1% as at October 31, 2024, compared to 13.0% last year.

Medium-term financial objectives

The following table provides a summary of our 2024 performance against our medium-term financial objectives⁽¹⁾:

	2024 Results	
	Reported	Adjusted ⁽²⁾
Diluted earnings per share growth of 7%+	2.6%	(0.2)%
Return on equity of 14%+	10.2%	11.3%
Achieve positive operating leverage	Positive 1.5%	Positive 2.3%
Maintain strong capital ratios	CET1 capital ratio of 13.1%	N/A

(1) Refer to the Risk Management section for further discussion on the Bank's risk management framework.

(2) Refer to Non-GAAP Measures on page 20.

Shareholder Returns

In fiscal 2024, the total shareholder return on the Bank's shares was 36%, compared to the total return of the S&P/TSX Composite Index of 32%. The total compound annual shareholder return on the Bank's shares over the past five years was 4.8%, and 5.6% over the past 10 years. This is below the total annual return of the S&P/TSX Composite Index over the past five years and ten years of 11.4% and 8.4%, respectively.

Dividends per share totaled \$4.24 for the year, an increase of 1.4% from 2023. The Bank's target payout range is 40-50%. The dividend payout ratio for the year was 71%. The Board of Directors approved a quarterly dividend of \$1.06 per common share, at its meeting on December 2, 2024. This quarterly dividend applies to shareholders of record at the close of business on January 7, 2025, and is payable January 29, 2025.

C1 Closing common share price as at October 31

T9 Shareholder returns

For the years ended October 31

	2024	2023
Closing market price per common share (\$)	71.69	56.15
Dividends paid (\$ per share)	4.24	4.18

Increase (decrease) in share price (%)	27.7	(14.7)
Total annual shareholder return (%) ⁽¹⁾	35.9	(9.1)

(1) Refer to Glossary on page 132 for the description of the measure.

Recent Developments

On August 12, 2024, the Bank announced an agreement to acquire an approximate 14.9% pro-forma ownership interest in KeyCorp for approximately U.S. \$2.8 billion through an all-cash purchase of newly issued voting common shares, at a fixed price of U.S. \$17.17 per share. The transaction will be completed in two stages, an initial investment of 4.9% (Initial Investment) and an additional investment of approximately 10% (Additional Investment), for a total pro-forma ownership of approximately 14.9%, subject to receipt of regulatory approvals. Upon completion of the Additional Investment, the Bank will have the right to designate two individuals to serve on KeyCorp's Board of Directors.

Acquisition of the Initial Investment of approximately 47.8 million shares was completed on August 30, 2024 for cash of U.S. \$0.8 billion and recorded as an equity investment at fair value, with subsequent mark-to-market changes recorded in other comprehensive income.

Subject to regulatory approvals, the Additional Investment is expected to close in fiscal 2025. Upon completion of the Additional Investment, the Bank's total interest in KeyCorp of approximately 14.9% will be accounted for as an investment in associate, as the Bank will have significant influence over KeyCorp, given its board representation and ownership interest.

Any difference between the fixed transaction price and the quoted share price of KeyCorp at the date of acquisition of the Additional Investment will be recognized as a gain (loss) within profit or loss in the period of closing, with a corresponding increase (decrease) in the carrying value of the investment in associate.

Upon completion of the Additional Investment, the total impact to the Bank's CET1 ratio from both stages of the transaction is expected to be approximately 55 basis points.

Strategy, Economic Summary and Outlook**Strategy**

The Bank's strategic vision is to be our clients' most trusted financial partner, while driving sustainable, profitable growth to maximize shareholder value. Our vision is driven by four strategic pillars: First, grow and scale in priority businesses, leveraging connectivity across North America and optimizing capital in lower return businesses. Second, earn more primary clients to build deeper, more meaningful relationships with a focus on value over volume. Third, focus on making it easier for our clients to do business with us; improving experiences while streamlining and digitizing processes. Last, win as one team by bringing the whole bank to our clients, while building and strengthening our culture where all employees can thrive. Our strategy is underpinned by strong risk management practices to keep our bank and our clients safe, and a robust balance sheet that provides flexibility and growth opportunities across changing market conditions.

Economic Summary

The change in administration in the United States inserts some uncertainty into the global economic outlook. Global central banks have begun a somewhat synchronized monetary easing as inflation approaches target rates in a large number of countries. This easing should support economic activity in coming years leading to gradual strengthening of the global economy. The results of the U.S. election raises some questions on the path forward for global growth and inflation that depend largely on the president-elect's approach to trade and immigration policy and the uncertainty this may create. In the short-run, proposed cuts to corporate tax rates are likely to support growth, as will efforts to ease the regulatory burden in some sectors of the economy. The imposition of broad-based tariffs would raise input costs for firms, putting upward pressure on prices and downward pressure on economic activity. Aggressive trade policies could raise the risk of retaliation from impacted countries, raising global inflation while reducing growth.

In Canada, the cuts in the Bank of Canada's policy rate should lead to a rebound in economic activity next year, from the roughly 1.2% expected in 2024 to around 2% next year. The interest-rate sensitive sectors of the economy, notably consumption and the housing sector, should underpin this modest recovery and there is already evidence of this occurring. With inflation largely under control, the Bank of Canada is forecast to lower interest rates until late spring, for a total cut of 200 basis points from peak policy rate to the 3% terminal value.

Further policy rate cuts are also expected in the U.S., though the economy there is substantially stronger than in other advanced economies. The past tightening in monetary policy should contribute to moderate growth next year, as the economy is expected to slow from a roughly 2.6% pace this year to around 1.8% in 2025. The U.S. outlook is subject to considerable policy uncertainty, which suggests the economy could be stronger than expected early next year, but then weaken somewhat if uncertainty remains high and changes in trade and immigration policies are implemented. Progress on the inflation front should allow the Federal Reserve to continue cutting interest rates until mid-2025.

Central banks in the Latin American countries are also in the process of normalizing interest rates, with further reductions in policy rates expected across the region. The impact of past interest rate increases continue to be felt across the region. As a consequence, growth is expected to moderate from the 2024 pace across most countries. Economic prospects are perhaps most challenging in Mexico, where the economic impacts of the judicial reform and other changes are yet to be fully understood. The incoming U.S. administration risks posing additional, though not currently quantifiable, headwinds for the Mexican economy.

Outlook

The Bank expects solid earnings growth in 2025, benefitting from strong net interest income growth and higher net interest margin, driven by lower funding costs and growth in both loans and deposits. Non-interest revenues are expected to grow more modestly. Earnings are expected to be impacted by a higher tax rate, driven by the impact of global minimum taxes and reduction in inflation in certain international countries, and higher provision for credit losses. The Bank expects moderate expense growth, as investments to strategically grow the Bank will be partly offset by productivity initiatives. The Bank is expected to generate positive operating leverage, and all capital and liquidity metrics are expected to remain strong in 2025.

Impact of Foreign Currency Translation

The impact of foreign currency translation on net income is shown in the table below.

T10 Impact of foreign currency translation

GROUP FINANCIAL PERFORMANCE

Net Income

Net income was \$7,892 million in 2024 compared to \$7,450 million in 2023, an increase of 6%. The increase was driven mainly by higher revenues and lower provision for income taxes, partly offset by higher provision for credit losses and non-interest expenses.

Adjusted net income was \$8,627 million compared to \$8,363 million, an increase of 3%. The increase was driven mainly by higher revenues, partly offset by higher provision for credit losses, non-interest expenses and provision for income taxes. Refer to Non-GAAP Measures starting on page 20 for further details on adjusting items.

Net Interest Income

Net interest income was \$19,252 million, an increase of \$990 million or 5% due primarily to a higher net interest margin and asset growth. Higher net interest income in Canadian Banking and International Banking was partly offset by lower net interest income in the Other segment due mainly to higher funding costs and higher losses from hedges, partly offset by higher income from liquid assets.

The net interest margin was 2.16%, an increase of four basis points, driven primarily by higher margins in Canadian Banking and International Banking. This was partly offset by a lower contribution from asset/liability management activities, including increased levels of high quality, lower yielding liquid assets.

Adjusted non-interest income⁽³⁾	\$ 14,561	\$ 13,585	7%

(1) The Bank adopted IFRS 17 effective November 1, 2023. As required under the new accounting standard, prior period amounts have been restated. Refer to Note 4 of the consolidated financial statements.

(2) Recorded in Other Non-interest Income.

(3) Refer to Non-GAAP Measures on page 20.

Non-interest income was \$14,418 million, an increase of \$466 million or 3%. Adjusted non-interest income was \$14,561 million (refer to Non-GAAP Measures starting on page 20), an increase of \$976 million or 7% mainly due to higher wealth management revenues, other fees and commissions, underwriting and advisory fees, higher unrealized gains on non-trading derivatives, and the positive impact of foreign currency translation. These were partly offset by lower bankers' acceptance fees related to the BA conversion.

Banking revenues decreased \$109 million or 2%, from lower bankers' acceptance fees related to the BA conversion, partly offset by higher card revenues and higher deposit and payment services fees.

Wealth management revenues increased \$356 million or 8%, due to higher mutual fund revenues, brokerage fees, and investment management and trust revenues.

Underwriting and advisory fees increased by \$148 million or 27%, due mainly to higher new issuance activities across all segments, including debt and equity capital markets.

Trading revenues increased \$54 million or 3%, due mainly to increases in client-driven activity in the equities business, partly offset by lower trading revenues in the fixed income business.

Other fees and commissions increased by \$174 million or 16% due mainly to higher securities borrowing and lending activities.

Net gain on sale of investment securities decreased by \$81 million or 63%, due to lower realized gains on bond securities.

Net income from investments in associated corporations increased \$45 million or 29%, due mainly to lower unrealized losses on private equity investments, partly offset by the impact of the divestiture of Canadian Tire Financial Services in the prior year.

Insurance underwriting income increased \$57 million or 14%, due largely to lower claims expenses than the prior year and higher premiums.

Other income decreased by \$197 million. On an adjusted basis, other income increased by \$313 million due primarily to higher unrealized gains on non-trading derivatives, as well as higher investment gains.

C2 Sources of non-interest income

T13 Trading-related revenues ⁽¹⁾

For the fiscal years (\$ millions)

	2024	2023
Trading-related revenue (TEB)⁽²⁾		
Net interest income	\$ (256)	\$ (260)
Non-interest income		
Trading revenues	1,686	2,017
Other fees and commissions	613	503
Total trading-related revenue (TEB)	\$ 2,043	\$ 2,260
Taxable equivalent adjustment	(52)	(437)
Trading-related revenue (Non-TEB)	\$ 1,991	\$ 1,823

(1) Refer to Non-GAAP Measures on page 20.

(2) Trading-related revenue consists of net interest income and non-interest income. Included are unrealized gains and losses on trading security positions held, realized gains and losses from the purchase and sale of trading securities, fees and commissions from securities borrowing and lending activities, and gains and losses on trading derivatives. Underwriting and other advisory fees, which are shown separately in the Consolidated Statement of Income, are excluded.

Provision for Credit Losses

The provision for credit losses was \$4,051 million compared to \$3,422 million last year, an increase of \$629 million due mainly to higher provision for credit losses on impaired loans, primarily in Canadian Banking and International Banking retail portfolios due to higher formations. The provision for credit losses ratio increased 9 basis points to 53 basis points.

Provision for credit losses on performing loans was \$121 million compared to \$699 million. The provision this period reflects retail credit migration to impaired in International Banking, mainly in Mexico and Peru. Retail provisions were impacted by portfolio growth and higher interest rates, including related migration in retail portfolios in Canadian Banking. Commercial and corporate provisions were impacted by credit migration and the unfavourable macroeconomic outlook. Higher provisions last year were driven primarily by the unfavourable macroeconomic outlook and uncertainty resulting in migration on retail and certain sectors in commercial portfolios.

Provision for credit losses on impaired loans was \$3,930 million compared to \$2,723 million, an increase of \$1,207 million, due primarily to higher formations in the International Banking retail portfolios, across most markets, as well as higher provisions in Canadian Banking. The provision for credit losses ratio on impaired loans increased 17 basis points to 52 basis points.

Productivity ratio⁽³⁾	58.5%	59.4%	
Adjusted productivity ratio⁽²⁾	56.1%	57.3%	

(1) The Bank adopted IFRS 17 effective November 1, 2023. As required under the new accounting standard, prior period amounts have been restated. Refer to Note 4 of the consolidated financial statements.

(2) Refer to Non-GAAP Measures starting on page 20.

(3) Refer to Glossary on page 132 for the description of the measure.

Non-interest expenses were \$19,695 million, an increase of \$574 million or 3%. Adjusted non-interest expenses were \$18,961 million, an increase of \$708 million or 4%. The increase was due mainly to higher personnel costs related to performance and share-based compensation, inflationary adjustments and annual increases, higher technology-related costs and advertising and business development costs to support business growth, as well as higher professional fees. Business and capital taxes and the unfavourable impact of foreign currency translation also contributed to the increase. These were partly offset by lower communications expenses and the benefit from prior productivity initiatives.

The Bank's total technology costs, consisting of Technology expenses (refer Table T17), as well as certain costs included within salaries, professional fees, and depreciation and amortization, were approximately \$4.8 billion, an increase of 7% compared to 2023 and represented 14% of revenues, in line with the prior year. New investments in 2024 reflect the Bank's medium-term commitment to modernize at scale by accelerating cloud migration, data and analytics capabilities, and end-to-end digitization, as well as continued investment in core foundational enterprise security and architecture.

The productivity ratio was 58.5% compared to 59.4%. On an adjusted basis, the productivity ratio was 56.1% compared to 57.3%. Operating leverage was positive 1.5%. On an adjusted basis, operating leverage was positive 2.3%.

Provision for Income Taxes

The effective tax rate was 20.5% compared to 23.0% in 2023 due primarily to the Canada Recovery Dividend in the prior year, partly offset by lower tax-exempt income and higher non-deductible expenses. The lower tax-exempt income reflects the impact of the denial of the dividend received deduction measure enacted during the year as part of Federal Budget Implementation Act Bill C-59. In line with the provisions of this measure, effective January 1, 2024, the Bank no longer claims the dividend received deduction on Canadian shares that are mark-to-market property.

On an adjusted basis, the effective rate was 20.1% compared to 17.8% due primarily to lower tax-exempt income, partly offset by higher income in lower tax jurisdictions.

Net income

Q4 2024 vs Q4 2023

Net income was \$1,689 million compared to \$1,354 million, an increase of 25%. The increase was driven mainly by higher net interest income and lower provision for credit losses and non-interest expenses, partly offset by higher provision for income taxes. Adjusted net income was \$2,119 million compared to \$1,643 million, an increase of 29%, due mainly to higher revenues and lower provision for credit losses, partly offset by higher provision for income taxes.

Q4 2024 vs Q3 2024

Net income was \$1,689 million compared to \$1,912 million, a decrease of 12%. The decrease was due mainly to higher non-interest expenses and provision for income taxes, partly offset by higher revenues. Adjusted net income was \$2,119 million compared to \$2,191 million, a decrease of 3%, due mainly to higher provision for income taxes.

Total revenue

Q4 2024 vs Q4 2023

Revenues were \$8,526 million compared to \$8,272 million, an increase of 3%. Adjusted revenues were \$8,526 million compared to \$7,905 million, an increase of 8%.

Net interest income was \$4,923 million, an increase of \$257 million or 6%, due primarily to loan growth inclusive of the BA conversion. This was partly offset by the negative impact of foreign currency translation. The net interest margin was 2.15%, in line with the prior year.

Non-interest income was \$3,603 million, a decrease of \$3 million. Adjusted non-interest income was \$3,603 million, an increase of \$364 million or 11%. The increase was due mainly to higher trading revenues, wealth management revenues, other fees and commissions, and insurance revenue, partly offset by lower bankers' acceptance fees related to the BA conversion, as well as the negative impact of foreign currency translation.

Q4 2024 vs Q3 2024

Revenues were \$8,526 million compared to \$8,364 million, an increase of 2%. Adjusted revenues were \$8,526 million compared to \$8,507 million.

Net interest income increased \$61 million or 1%, due mainly to loan growth inclusive of the impact of BA conversion, partly offset by the negative impact of foreign currency translation. The net interest margin increased one basis point driven mainly by a higher contribution from asset/liability management activities related to lower funding costs and lower losses from hedges, partly offset by lower margins in Canadian Banking, and lower levels of higher yielding loans in International Banking.

Non-interest income increased \$101 million or 3%. Adjusted non-interest income declined \$42 million or 1%. The decrease was due mainly to lower bankers' acceptance fees related to the BA conversion, lower underwriting and advisory fees, and the negative impact of foreign currency translation, partly offset by higher other fees and commissions, higher trading revenues, and higher wealth management revenues.

Provision for credit losses

Q4 2024 vs Q4 2023

The provision for credit losses was \$1,030 million, compared to \$1,256 million, a decrease of \$226 million. The provision for credit losses ratio decreased 11 basis points to 54 basis points.

The provision for credit losses on performing loans was a net reversal of \$13 million, compared to a provision taken of \$454 million. The provision reversal this period was driven by retail credit migration to impaired, mainly in Mexico and Peru, as well as the impact of interest rate cuts, mainly on the mortgage and auto loan portfolios in Canada, and the improved macroeconomic outlook. This was partly offset by credit migration in the commercial and corporate portfolios and retail unsecured lines. The higher provision last year was driven primarily by the unfavourable macroeconomic outlook and uncertainty, resulting in migration in retail and certain sectors in commercial and corporate portfolios.

The provision for credit losses on impaired loans was \$1,043 million, compared to \$802 million, an increase of \$241 million or 30% due primarily to higher formations in Canadian Banking retail and commercial portfolios. There were also higher formations in International Banking retail portfolios, mostly in Mexico, Chile and Colombia. The provision for credit losses ratio on impaired loans was 55 basis points, an increase of 13 basis points.

Q4 2024 vs Q3 2024

The provision for credit losses decreased \$22 million from \$1,052 million, primarily in International Banking. The provision for credit losses ratio decreased one basis point to 54 basis points.

The provision for credit losses on performing loans was a net reversal of \$13 million, compared to a provision taken of \$82 million, a decrease of \$95 million. The decrease was mostly in Canadian Banking reflecting the favorable impact of interest rate cuts and the improved macroeconomic outlook relating to the commercial portfolio. This was partly offset by credit migration in the commercial and corporate portfolios and retail unsecured lines.

The provision for credit losses on impaired loans was \$1,043 million, compared to \$970 million, an increase of \$73 million or 8%, due primarily to higher formations in Canadian Banking retail and commercial portfolios. This was partly offset by lower retail provisions in International Banking, mainly in Colombia, Chile and Peru due to lower formations. The provision for credit losses ratio on impaired loans was 55 basis points, an increase of four basis points.

Non-interest expenses

Q4 2024 vs Q4 2023

Non-interest expenses were \$5,296 million, a decrease of 4%. Adjusted non-interest expenses were \$4,784 million, an increase of \$63 million or 1%, driven by higher performance-based compensation, technology-related costs, personnel costs, advertising costs, and business and capital taxes. This was partly offset by the favourable impact of foreign currency translation, lower communications expenses and share-based compensation.

The productivity ratio was 62.1% compared to 66.8%. The adjusted productivity ratio was 56.1% compared to 59.7%.

Q4 2024 vs Q3 2024

Non-interest expenses increased by \$347 million or 7%. Adjusted non-interest expenses increased marginally by \$21 million. The increase was due to higher technology-related costs, performance-based compensation, advertising, and professional fees. Partly offsetting were lower other employee benefits and the favourable impact of foreign currency translation.

The productivity ratio was 62.1% compared to 59.2%. The adjusted productivity ratio was 56.1% compared to 56.0%.

Provision for income taxes

Q4 2024 vs Q4 2023

The effective tax rate was 23.2% compared to 9.1% due primarily to lower tax-exempt income, lower income in lower tax jurisdictions, and the benefit of divestitures in the prior year. The lower tax-exempt income reflects the impact of the denial of the dividend received deduction measure enacted during the year as part of Federal Budget Implementation Act Bill C-59. In line with the provisions of this measure, effective January 1, 2024, the Bank no longer claims the dividend received deduction on Canadian shares that are mark-to-market property. On an adjusted basis, the effective rate was 21.8% compared to 14.8% due primarily to lower tax-exempt income and lower income in lower tax jurisdictions.

Q4 2024 vs Q3 2024

The effective tax rate was 23.2% compared to 19.1% due primarily to the impairment charge on Bank of Xi'an Co. Ltd, lower income in lower tax jurisdictions and adjustments related to prior year taxes, partly offset by higher non-deductible expenses in the prior quarter. On an adjusted basis, the effective tax rate was 21.8% compared to 18.6% due primarily to lower income in lower tax jurisdictions and adjustments related to prior year taxes.

(1) The Bank adopted IFRS 17 effective November 1, 2023. As required under the new accounting standard, prior period amounts have been restated. Refer to Note 4 of the consolidated financial statements.

(2) Refer to Non-GAAP Measures starting on page 20.

(3) Refer to Glossary on page 132 for the description of the measure.

Earnings over the period were driven by higher net interest income and generally higher non-interest income, partly offset by higher provision for credit losses and increased term funding costs. Earnings for the current quarter were impacted by adjusting items.

Total revenue

Canadian Banking net interest income over the period has increased, driven by deposit growth and margin expansion. International Banking net interest income has trended upward driven by improvements in lending mix and rates, and the impact of lower funding costs. Global Wealth Management fee-based revenues increased during the period and are impacted by market conditions. Global Banking and Markets revenues are affected by market conditions that impact client activity in the capital markets and business banking businesses. Revenues in the Other segment were impacted by higher term funding costs and asset/liability management activities.

Provision for credit losses

Provision for credit losses have trended upward during the period driven by higher impaired loan provisions due mainly to higher formations and retail credit migration. There were also higher provisions due to the uncertainty around the impact of higher interest rates, retail portfolio growth and continued unfavorable macroeconomic outlook.

Non-interest expenses

Non-interest expenses for the period reflect the Bank's continued investment in personnel and technology to support strategy and business growth, as well as the impact of inflation. This was partly offset by expense management and efficiency initiatives. The impact of foreign currency translation also contributed to fluctuations over the period.

Provision for income taxes

The effective tax rate was 23.2% this quarter. The effective tax rate average was 20.8% over the period and was impacted by the recognition of the CRD in Q1 2023, increased statutory tax rates, divestitures, restructuring charge and net income earned in foreign jurisdictions, as well as the variability of tax-exempt dividend income and inflationary benefits.

BUSINESS LINE OVERVIEW

Business line results are presented on a taxable equivalent basis, adjusting for the following:

- The Bank analyzes revenue on a taxable equivalent basis (TEB) for business lines. This methodology grosses up tax-exempt income earned on certain securities reported in either net interest income or non-interest income to an equivalent before tax basis. A corresponding increase is made to the provision for income taxes; hence, there is no impact on net income. Management believes that this basis for measurement provides a uniform comparability of net interest income and non-interest income arising from both taxable and non-taxable sources and facilitates a consistent basis of measurement. While other banks also use TEB, their methodology may not be comparable to the Bank's methodology. A segment's revenue and provision for income taxes are grossed up by the taxable equivalent amount. The elimination of the TEB gross-up is recorded in the Other segment.
- For business line performance assessment and reporting, net income from associated corporations, which is an after-tax number, is adjusted to normalize for income taxes. The tax normalization adjustment grosses up the amount of net income from associated corporations and normalizes the effective tax rate in the business lines to better present the contribution of the associated corporations to the business line results.
- International Banking business segment results are analyzed on a constant dollar basis. Under constant dollar basis, prior period amounts are recalculated using current period average foreign currency rates thereby eliminating the impact of foreign currency translation. The Bank believes that reporting in constant dollar is useful for readers in assessing ongoing business performance.
- The Other segment includes Group Treasury, smaller operating segments and corporate items which are not allocated to a business line. Group Treasury is primarily responsible for Balance Sheet, Liquidity and Interest Rate Risk management, which includes the Bank's wholesale funding activities.

The TEB gross-up to net interest income, non-interest income, total revenue, and provision for income taxes is presented below. Effective January 1, 2024, in line with the provisions of Bill C-59, the Bank no longer claims the dividend received deduction on Canadian shares that are mark-to-market property, which resulted in a lower TEB gross-up:

T20 TEB Gross-up

(\$ millions)	2024	2023
Net interest income	3	36
Non-interest income	52	437
Total revenue and provision for taxes	55	473

Below are the results of the Bank's operating segments for 2024.

CANADIAN BANKING

Canadian Banking reported net income attributable to equity holders of \$4,274 million, compared to \$3,984 million. Adjusted net income to equity holders was \$4,277 million, an increase of \$290 million or 7%. The increase was due primarily to higher revenue driven by deposit growth and margin expansion, partly offset by higher non-interest expenses and provision for credit losses. Return on equity was 20.8% compared to 21.1% in the prior year.

INTERNATIONAL BANKING

Net income attributable to equity holders was \$2,714 million, an increase of 11% from \$2,449 million. Adjusted net income attributable to equity holders was \$2,737 million, an increase of \$258 million or 10%. The increase was driven by higher net interest income and non-interest income and the positive impact of foreign currency translation, partly offset by higher provision for credit losses, non-interest expenses and provision for income taxes. Return on equity was 14.2% compared to 12.9% in the prior year. Adjusted return on equity was 14.4% compared to 13.1% in the prior year.

GLOBAL WEALTH MANAGEMENT

Net income attributable to equity holders was \$1,576 million, compared to \$1,431 million in the prior year. Adjusted net income attributable to equity holders was \$1,602 million, up \$145 million or 10%. The increase was due primarily to higher mutual fund fees, brokerage revenues, and net interest income across the Canadian and International wealth businesses. This was partly offset by higher non-interest expenses due largely to volume-related expenses. Return on equity was 15.4% compared to 14.6% in the prior year. Adjusted return on equity was 15.7% compared to 14.9% in the prior year.

GLOBAL BANKING AND MARKETS

Global Banking and Markets reported net income attributable to equity holders of \$1,688 million, a decrease of \$80 million or 5%. This decline was due to higher non-interest expenses, lower net interest income, and lower non-interest income, partly offset by lower provision for credit losses, lower income tax expense and the positive impact of foreign currency translation. Return on equity was 11% compared to 12.2% in the prior year.

OTHER

The Other segment reported a net loss attributable to equity holders of \$2,494 million compared to a net loss of \$2,294 million in the prior year. Adjusted net income attributable to equity holders was a loss of \$1,813 million compared to net loss of \$1,443 million in the prior year. The higher loss of \$370 million was due to lower revenues resulting primarily from increased funding costs and higher income taxes, partly offset by lower non-interest expenses.

KEY PERFORMANCE INDICATORS FOR ALL BUSINESS LINES

Management uses a number of key metrics to monitor business line performance:

- Net income
- Return on equity
- Productivity ratio
- Provision for credit losses ratio

Canadian Banking

2024 Achievements

Earn primary client relationships

- Demonstrated solid momentum, as multiple initiatives to deepen client relationships increased client primacy penetration in Retail Banking, Small Business, and Tangerine.
- Grew Scene+ membership to over 15 million members; point issuance reached a record high, and 38% of the Bank's clients with Scene+ have 3+ Scotia products.
- Increased Mortgage+ program – a customizable bundle with a preferred mortgage rate, everyday banking account and other retail products – penetration to 83% of mortgage originations in Q4 and 77% of mortgage originations in the year.
- Launched Money Style by Advice+ to better understand customers' financial sentiments, improve their experience with advisors and enhance our value proposition.

Grow and scale in priority businesses

- Launch of the PRO Visa Business Card for Small Business clients, powered by Scene+, to earn and redeem more points on everyday business purchases made at Home Hardware.
- Launched the Scotiabank Lawyer Banking Program, an innovative team-based offering that streamlines financial management for lawyers, giving them access to a wide range of services through a dedicated team of advisors.

Make it easy to do business with us

- Increased the number of virtual advisors across our network, making it easier for Retail and Small Business clients to partner with the Bank, regardless of location.
- Tangerine continued to lead the industry in competitive net promoter score, reaching a new three-year high and surpassed one million active mobile clients, with half of their sales coming from the mobile channel.
- Expanded partnership with Nova Credit to enhance access to digital credit, by allowing newcomers from select countries to use their credit history from their original home country when applying online for increased credit limit.
- Partnered with Willful, one of Canada's leading online estate planning services, which marks another important step in providing clients advice and digital solutions to help them manage their future.

Win as one team

- Exceeded internal referral target between Retail, Wealth, Small Business, and Commercial Banking, referring more than \$13 billion in wealth advisory, lending, and deposit balances.
- Named one of Canada's Top Employers for Young People 2024 by Mediacorp Canada for the 4th consecutive year.
- Tangerine Bank was recognized on the Best Workplaces™ in Financial Services & Insurance in Canada list by Great Place to Work®.

Select awards

- Awarded Canada's Best Bank by *Global Finance*, which recognizes financial institutions that offer the broadest range of services, long-term reliability, and technological innovation.
- Awarded Canada's Best Bank in 2024 by Euromoney.
- Tangerine Bank received the highest client satisfaction score from J.D. Power among mid-size banks for a 13th consecutive year and the highest client satisfaction score among credit card issuers in the J.D. Power 2024 Canada Credit Card Satisfaction Study.
- Moved up to 2nd (from 4th) in J.D. Power 2024 Canada Retail Banking Advice Satisfaction Survey, delivering strong performance across all 5 index factors.

Business Profile

Canadian Banking provides a full suite of financial advice and banking solutions, supported by an excellent customer experience, to over 11 million customers. Retail, Small Business and Commercial Banking customers receive service through its network of 898 branches and 3,578 automated banking machines (ABMs), as well as online, mobile and telephone banking, and specialized sales teams. Canadian Banking also provides an alternative self-directed banking solution to Tangerine customers. Canadian Banking comprises the following areas:

- Retail Banking provides financial advice and solutions along with day-to-day banking products, including debit cards, chequing accounts, credit cards, investments, mortgages, personal loans, and related creditor insurance products to retail customers, including automotive dealers and their customers, providing retail automotive financing solutions. Tangerine Bank provides day-to-day banking products, including chequing and saving accounts, credit cards, mortgages, loans, and investments to self-directed customers.
- Business Banking delivers advice and a full suite of lending, deposit, cash management and trade finance solutions to small, medium, and large businesses, including the Roynat franchise, which provides clients with innovative financing alternatives through both public and private markets.

Strategy

We aim to be Canada's most trusted and data-driven bank with market-leading client advice, and sustainable growth in earnings and return on equity. Canadian Banking will continue to execute its long-term strategy to deliver stable and consistent earnings, including businesses and products that deliver higher returns on equity and lower risk-weighted assets. Ongoing efforts focus on deepening relationships with clients to increase engagement, loyalty and primacy, investing in digital and analytical capabilities to understand and anticipate customer needs, and developing a high-quality and diverse team of Scotiabank employees.

2025 Priorities

- **Client primacy:** Increase client primacy across Retail, Tangerine, Small Business and Commercial Banking, by deepening relationships through personalized value propositions and harnessing the full potential of Scene+ to capture share of wallet.
- **Sales and channel effectiveness:** Improve overall sales infrastructure in Retail, Small Business and Commercial Banking to drive consistency, enhance advisor effectiveness, and ramp up utilization of our digital channel.
- **Accelerate data deployment and analytics:** Strengthen capabilities across data, technology and analytics to support salesforce effectiveness, client servicing, insight-driven decision-making, and pricing optimization.
- **Execute at scale:** Deliver productivity-enabled investments, including end-to-end automation and digitization, to unlock savings to fund future growth.
- **Improve execution:** Accelerate agile delivery with cross-functional teams and horizontal end-to-end single point accountability.
- **Realize Tangerine's full potential as a digital challenger:** Accelerate growth and further embedding our brand and value proposition to digitally-savvy Canadians.

(3) Includes adjustment for amortization of acquisition-related intangible assets of \$4 (2023 – \$4).

Financial Performance

Net income

Canadian Banking reported net income attributable to equity holders of \$4,274 million, compared to \$3,984 million. Adjusted net income to equity holders was \$4,277 million, an increase of \$290 million or 7%. The increase was due primarily to higher revenue driven by deposit growth and margin expansion, partly offset by higher non-interest expenses and provision for credit losses.

Average assets and liabilities

Average assets were in line with prior year. The increase of \$6 billion or 7% in business loans and acceptances, \$1 billion or 16% in credit cards, and \$1 billion or 1% in personal loans, was offset by a decline of \$8 billion or 3% in residential mortgages.

Average liabilities increased \$17 billion or 5% to \$389 billion. The growth included \$14 billion or 12% in non-personal deposits, primarily in demand products, and \$13 billion or 6% in personal deposits, primarily in term products, partly offset by a reduction of \$12 billion in bankers' acceptances liabilities.

Revenues

Revenues of \$13,690 million increased \$883 million or 7%, due to higher net interest income, partly offset by lower non-interest income.

Net interest income of \$10,842 million increased \$1,081 million or 11%, due primarily to deposit growth, margin expansion, and the benefit from the BA conversion. The net interest margin increased 19 basis points to 2.53%, driven by higher loan margins and favourable changes in business mix.

Non-interest income of \$2,848 million declined \$198 million or 7%, due primarily to lower banking fees, including the impact of the BA conversion, lower income from associated corporations driven primarily by the sale of the Bank's equity interest in Canadian Tire Financial Services last year, and elevated private equity gains in the prior year. This was partly offset by higher insurance revenue and mutual fund distribution fees.

Retail Banking

Total Retail Banking revenues were \$10,370 million, an increase of \$912 million or 10%. Net interest income increased \$863 million or 12%, due primarily to deposit growth and margin expansion. Non-interest income increased \$49 million or 2% due primarily to higher banking and insurance revenue, and increased mutual fund distribution fees, partly offset by lower income from associated corporations driven primarily by the sale of the Bank's equity interest in Canadian Tire Financial Services last year.

Business Banking

Total Business Banking revenues were \$3,320 million, a decrease of \$29 million or 1%. Net interest income increased \$218 million or 9% due primarily to strong loan and deposit growth, and the benefit from the BA conversion, partly offset by margin compression. Non-interest income decreased \$247 million or 24% due primarily to lower banking fees, including the impact of the BA conversion, and elevated private equity gains in the prior year.

Provision for credit losses

The provision for credit losses was \$1,691 million, an increase of \$248 million. The provision for credit losses ratio was 38 basis points, an increase of 6 basis points.

Provision for credit losses on performing loans was \$127 million, compared to \$489 million. The provision this year was driven by the impact of higher interest rates, including credit migration in the retail portfolio, as well as portfolio growth in retail and commercial. The provision was also impacted by the macroeconomic outlook that continues to be unfavourable, yet improved from the prior year. Higher provisions last year related to the retail and commercial portfolios, and were due primarily to the unfavourable macroeconomic outlook and uncertainty resulting in migration on retail and certain sectors in the commercial portfolios.

Provision for credit losses on impaired loans was \$1,564 million compared to \$954 million, due primarily to higher retail and commercial formations. The provision for credit losses ratio on impaired loans was 35 basis points, an increase of 14 basis points.

Non-interest expenses

Non-interest expenses were \$6,118 million, an increase of \$252 million or 4%, due primarily to higher technology, personnel, professional, advertising, and business development costs to support the Bank's strategy and drive business growth. This was partly offset by benefits from prudent expense management and productivity initiatives.

Provision for income taxes

The effective tax rate was 27.3% compared to 27.5% in the prior year.

Outlook

Revenue in Canadian Banking is expected to be driven by further growth in deposits and loans across Retail and Business Banking, while margins will be negatively impacted as interest rates decline. Maintaining strong expense discipline while balancing investments in strategic growth initiatives to drive future growth will be a primary objective. Provision for credit losses is expected to remain stable. Earnings growth will be supported by the continued focus on client primacy across Retail, Tangerine, and Business Banking, and client acquisition through our Scene+ loyalty program.

International Banking

2024 Achievements

Earn primary client relationships

- Implemented retail client segmentation and redefined value proposition, making progress in client primacy with a focus on growth in priority segments.
- Significant progress in strengthening client relationships in the corporate business, with primary clients up 15% and cash management clients up 12% from the prior year.
- Outperformed industry benchmarks in Mexico for productivity improvement and deposit growth, while deepening client relationships.

Grow and scale in priority markets

- Solid earnings growth with increased capital allocated to priority businesses (Mexico and Caribbean region) and optimized capital in other businesses.
- Capital markets business significantly improved profitability by delivering earnings growth while optimizing Risk Weighted Assets.
- Announced the sale of CrediScotia in Peru, a key milestone in focusing on our core businesses.

Make it easy to do business with us

- Completed roll-out of proprietary digital credit tool for commercial and corporate clients globally.
- Increased number of clients served through virtual and digital channels, strengthening client experience and efficiency.
- Continuous progress in digital experience and product suite. Select highlights include:
 - Enhanced our digital payments capabilities in mobile wallets in Caribbean, Chile, Peru and Colombia.
 - Consolidated multiple digital applications into a single digital experience in Mexico and Chile.
 - Launched digital customer and deposit onboarding platforms at-scale across 7 Caribbean countries.

Win as one team

- Established segment-driven organizational structure to ensure successful execution of our strategy.
- Fostered development and retention of high performing talent.
- Recognized as a Great Place to Work® in Peru.
- Ranked as a Top Employer in Chile with Certified Excellence in Employee Conditions by Top Employer.

Select awards

- Ranked #1 in the 'World's Safest Banks' ranking by Global Finance in Chile and ranked Top 10 in Peru.
- Named 'Best Bank' in The Bahamas, Barbados, Jamaica, Trinidad and Tobago and the Turks and Caicos Islands by Global Finance in 2024.
- Recognized as Best Bank for Corporates (Chile and Trinidad & Tobago) by Euromoney.
- Recognized as Investment Bank of the Year & Sovereign Bond of the Year in Chile by Latin Finance.
- Recognized as World's Best Trade Finance Providers 2024 (Chile | Country-Territory winner) by Euromoney.
- Won the award for Best Private Bank for Digital Solutions (Chile, Mexico) by Euromoney Private Banking Award.
- Recognized as Best International Private Bank (Bahamas, Jamaica, Cayman Islands) by Euromoney in 2024.
- Recognized as Best Private Bank for Digital Solutions (Chile, Mexico) by Euromoney in 2024.
- Won the Infrastructure Financing of the Year award in Mexico: Mayakan pipeline expansion by Latin Finance in 2024.
- Recognized by Global Finance as Best Bank for Transition/Sustainability-Linked Loans and Best Bank for ESG-Related Loans in Latin America, and Best Bank for Sustainable Finance in Chile for 2024.

Business Profile

International Banking is a strong and diverse franchise that provides financial advice and solutions to over 12 million retail, corporate, and commercial clients. Its geographic presence spans more than 15 countries, including Mexico, Chile, Peru, Colombia, Brazil, Uruguay, and various markets in Central America and the Caribbean. The Bank's unique geographical footprint ensures robust connectivity within the North American corridor. Many countries within the International Banking network boast of favorable demographics and present significant opportunities for increasing banking penetration.

Strategy

International Banking aims to achieve sustainable earnings growth by strategically targeting priority segments and geographies. The focus is on deepening client relationships to enhance engagement and primacy, managing credit risk prudently, accelerating deposit growth, and prioritizing expansion in markets with scale opportunities. International Banking will continue to maintain a strong emphasis on expense management while executing our long-term vision of building a robust client franchise across priority segments and geographies, supported by a diverse and talented team. Our International Banking business is undergoing a transformational change, focusing on strategic client deselection and reorganization for scale and efficiency. This will serve as a key enabler towards the successful execution of our strategy and commitments.

2025 Priorities

- **Deepen client relationships:** Deploy regional and segment driven value propositions with optimized service model.
- **Grow and scale in priority markets:** Enhance acquisition funnel by prioritizing on-strategy segments and geographies, strengthen Commercial business and grow Global Transactional Banking presence while bolstering cross-border value proposition to foster connectivity across our footprint.
- **Make it easy to do business with us:** Continue the business-led transformation, followed closely by the transformation of corporate functions, digitize and streamline key client journeys in Retail and Commercial, and strengthen operational resiliency.
- **Win as one team:** Attract, develop, and promote high-caliber talent, continue to foster enterprise mindset with execution and accountability culture, and deliver on sustainability commitments.

(3) Includes adjustment for amortization of acquisition-related intangible assets of \$32 (2023 – \$41).

Financial Performance

Net income

Net income attributable to equity holders was \$2,714 million, an increase of 11% from \$2,449 million. Adjusted net income attributable to equity holders was \$2,737 million, an increase of \$258 million or 10% from \$2,479 million. The increase was driven by higher net interest income and non-interest income and the positive impact of foreign currency translation. This was partly offset by higher provision for credit losses, non-interest expenses and provision for income taxes.

Financial Performance on an Adjusted and Constant Dollar Basis

The discussion below on the results of operations is on an adjusted and constant dollar basis. Under the constant dollar basis, prior period amounts are recalculated using current period average foreign currency rates, which is a non-GAAP financial measure (refer to Non-GAAP Measures on page 20). The Bank believes that constant dollar is useful for readers in assessing ongoing business performance without the impact of foreign currency translation and is used by management to assess the performance of the business segment. Ratios are on a reported basis.

(2) Includes adjustment for amortization of acquisition-related intangible assets of \$32 (2023 – \$39).

C8 Total revenue by region \$ millions

C9 Average loans and acceptances \$ billions

C10 Average earning assets by region \$ billions

C11 Average deposits \$ billions

Net income

Net income attributable to equity holders was \$2,714 million, an increase of \$183 million or 7% from \$2,531 million. Adjusted net income attributable to equity holders was \$2,737 million, an increase of \$178 million or 7% from \$2,559 million. The increase was driven by higher net interest income and non-interest income, partly offset by higher provision for credit losses, non-interest expenses and provision for income taxes.

Assets and liabilities

Average assets were \$232 billion, down \$2 billion or 1%. Loans decreased 2%, primarily in Brazil, Chile, and Peru. The decrease included a 7% reduction in business loans, in line with the Bank's portfolio optimization strategy, partly offset by an increase of 6% in residential mortgages.

Average liabilities were \$180 billion, an increase of \$2 billion or 1%. Total deposits increased by 3%, mainly in Mexico. Non-personal deposits increased by 4% and personal deposits increased by 2%.

Revenues

Revenues were \$11,989 million, an increase of \$812 million or 7%.

Net interest income was \$8,889 million, an increase of \$786 million or 10%, driven by strong margin expansion. Net interest margin increased by 33 basis points to 4.42%, driven by higher loan and deposit margins and changes in business mix.

Non-interest income was \$3,100 million and increased \$26 million or 1%, driven by Peru and Mexico, partly offset by lower capital markets revenues in Chile and Brazil.

Provision for credit losses

The provision for credit losses was \$2,285 million, an increase of \$413 million. The provision for credit losses ratio was 137 basis points, an increase of 28 basis points.

Provision for credit losses on performing loans was a net reversal of \$52 million, compared to provision taken of \$97 million. The provision reversal this period was driven primarily by retail migration to impaired, mainly in Mexico and Peru. This was partly offset by retail portfolio growth, and the impact of the macroeconomic outlook that continues to be unfavourable yet improved from the prior year, as well as credit migration impacting the commercial portfolios.

Provision for credit losses on impaired loans was \$2,337 million, compared to \$1,775 million, an increase of \$562 million. This was due primarily to an increase in retail provisions driven by higher formations across most markets. The provision for credit losses ratio on impaired loans was 140 basis points, an increase of 37 basis points.

Non-interest expenses

Non-interest expenses were \$6,131 million, an increase of \$174 million or 3%. On an adjusted basis, non-interest expenses were \$6,099 million, an increase of \$181 million or 3%, driven mainly by higher salaries and employee benefits and technology costs. The business continues to see the benefits of the productivity initiatives, despite an inflationary environment.

Provision for income taxes

The effective tax rate was 20.6% compared to 21.5%. On an adjusted basis, the effective tax rate was 20.6% compared to 21.6%, due primarily to changes in earnings mix.

Outlook

Revenues in International Banking are expected to be lower in 2025, impacted by our planned divestiture of CrediScotia in Peru, and lower earning assets in line with our strategic capital allocation plans. Expenses are expected to grow at a modest rate, reflecting the benefit of ongoing productivity initiatives. Earnings are expected to be lower, impacted by a higher tax rate, driven by the impact of global minimum taxes and reductions in inflation, higher provision for credit losses and the impact of weaker Latin American currencies in 2025. The business will continue to invest to drive profitability and sustainable growth in selected segments and markets across the region.

Global Wealth Management

2024 Achievements

Earn primary client relationships

- Through our commitment to provide clients with Total Wealth advice, Scotia Wealth Management businesses in Canada reached an all-time high in client satisfaction, as measured by Net Promotor Score.
- Delivered over 30% more financial plans to wealth advisory clients in Canada compared to 2023, as we focus on supporting our clients with plan-based, holistic Total Wealth advice.
- Scaled Total Wealth planning capabilities across our international footprint by launching a Total Wealth pilot for Bahamas and Cayman private banking clients, while continuing to expand the Total Wealth model in Mexico.
- Built strong momentum in broadening investment advice to retail clients with mutual funds gross sales increasing significantly over the same period last year.
- Launched the Scotia Private Real Estate Fund as part of our strategic relationship with Sun Life Capital Management to provide private asset solutions to high-net-worth clients.
- Launched the Scotia Global Asset Management brand in Colombia, to further extend our asset management capabilities globally and deliver leading investment solutions to clients.

Grow and scale in priority businesses

- Ranked as the 3rd largest wealth management business in Canada, based on total net income for publicly traded banks as of July 31, 2024.
- Strong momentum continued in our Canadian Wealth and Asset Management businesses, with AUA and AUM in Canada growing by 15% and 18%, respectively.
- Scotiabank is the largest Private Investment Counsel (PIC) business in Canada on a combined basis with Jarislowsky Fraser Ltd (JFL) PIC, Scotia PIC and MD PIC (Investor Economics Winter 2024).
- Scotia Global Asset Management is ranked in the top three in Canadian Retail Mutual Funds by market share among bank-owned peers.
- International Wealth Management delivered double-digit earnings growth, supported by strong growth in Mexico, as we deliver Total Wealth advice and best-in-class investment solutions to our international clients.

Make it easy to do business with us

- Implemented a new financial planning tool to deliver even more Total Wealth advice and planning to our clients.
- Scotia Wealth Management launched a new mobile app for our ScotiaMcLeod clients, which will provide clients access to more digital capabilities and opportunities to engage with advisors in a seamless manner.
- Successfully rolled out a new portfolio management platform for ScotiaMcLeod, enabling greater efficiency and effectiveness for our advisors in constructing portfolios for clients.
- The Scotia Smart Investor platform continued to play an integral role in helping our clients invest and plan for their future, with a 70% year over year lift in assets under management and a 40% increase in the number of accounts activated through Smart Investor
- Continued to modernize the advisor tools across our international footprint by implementing a new advisor desktop solution in Peru, that will enhance advisor productivity and efficiency.
- Maintained the best ratio of wealth specialists to advisors (including ScotiaMcLeod, PIC, JFL and MD) among the Big 5 Canadian Banks to support clients with their unique wealth needs.

Win as one team

- Continued focus on delivering the entire bank to clients and driving partnerships across businesses. Referrals across our Wealth, Retail and Commercial Banking businesses reached a new all-time high in fiscal 2024.
- Scotia Wealth Management was recognized with six Euromoney's Private Banking Awards for 2024: Bahamas' Best International Private Bank; Cayman Islands' Best International Private Bank; Jamaica's Best International Private Bank; Chile's Best Private Bank for Digital Solutions; Mexico's Best Private Bank for Digital Solutions; and Canada's Best Private Bank for Sustainability.
- Scotia Global Asset Management's investment teams were recognized with 21 awards at the annual FundGrade A+ Awards, and were also recognized with 10 individual mutual fund and ETF awards at the 2024 LSEG Lipper Canadian Fund Awards.
- Scotia Wealth Management recognized with three Global Finance Private Bank Awards for 2025: Best Private Bank – Bahamas, Best Private Bank – Caribbean & Central America and Best Private Bank – Peru.
- Scotia Wealth Management received two awards from PWM/The Banker 2024 Global Private Banking Awards: Best Private Bank in North America for Wealthy Women and Best Private Bank in North America for Education and Training of Private Bankers.
- Scotia iTRADE ranked 2nd among the Big 5 banks in the 2024 MoneySense Best Online Brokers in Canada.

Business Profile

Global Wealth Management is focused on delivering comprehensive wealth management advice and solutions to clients across Scotiabank's footprint. Global Wealth Management serves over 2 million investment fund and advisory clients across 13 countries – administering over \$700 billion in assets.

Global Wealth Management has built a robust client-centric business with comprehensive advice, products, and platforms to meet a broad range of client needs.

Global Wealth Management is comprised of the following businesses:

- **Wealth Management:** Online brokerage (Scotia iTRADE), Scotia Financial Planning (Scotiabank), Full-service brokerage (ScotiaMcLeod and MD Financial Management), Scotiastrust, Private Banking, Private Investment Counsel (Scotia Wealth Management, Jarislowsky Fraser, and MD Financial Management).
- **Asset Management:** Retail mutual funds, Exchange Traded Funds, Liquid Alternatives, Institutional Funds/Strategies.

Scotiabank, ScotiaMcLeod, Scotia iTRADE, Private Banking, Private Investment Counsel, 1832 Asset Management and Dynamic Funds are top performers in key industry metrics.

Strategy

Global Wealth Management continues to execute on its mission to provide clients with strong risk-adjusted investment results and financial planning to deliver wealth solutions that meet their complex needs. The focus continues to be delivering comprehensive advice and planning to best serve clients in the current economic environment and through all market conditions. To maintain our strong momentum towards that focus, Global Wealth Management is continuing to enhance our Total Wealth advice capabilities and innovating our product shelf to deliver purpose-built products for our clients.

In addition, Global Wealth Management is focused on maximizing its international footprint, including leveraging the Bank's Retail and Commercial Banking infrastructure and network in priority markets across Latin America and the Caribbean.

2025 Priorities

- **Earn primary client relationships:** Evolve Total Wealth model to do even more financial planning, and broaden investment advice to Retail clients to win new clients and deepen relationships
- **Grow and scale in priority businesses:** Maximize momentum in Canada across Wealth and Asset Management, while continuing to scale capabilities in international markets to accelerate growth
- **Make it easier to do business with us:** Deliver innovative digital client solutions and modernize our advisor tools and platforms to deliver a leading client experience, while investing in our people to grow our integrated team
- **Win as one team:** Enhance partnerships with Retail, Small Business and Commercial Banking to deliver the whole Bank to clients, and foster an inclusive culture that reflects our communities

Financial Performance

Net income

Net income attributable to equity holders was \$1,576 million, compared to \$1,431 million in the prior year. Adjusted net income attributable to equity holders was \$1,602 million, up \$145 million or 10%. The increase was due to higher mutual fund fees, brokerage revenues, and net interest income across the Canadian and International wealth businesses. This was partly offset by higher non-interest expenses due largely to volume-related expenses.

Assets under management (AUM) and assets under administration (AUA)

Assets under management of \$373 billion increased \$56 billion or 18% driven by market appreciation partly offset by net redemptions. Assets under administration of \$704 billion increased \$94 billion or 15% due to higher net sales and market appreciation.

Revenues

Revenues of \$5,762 million increased \$471 million or 9%, due to higher fee income and net interest income.

Net interest income of \$936 million increased \$94 million or 11%, driven by loan and deposit growth, and improved margins.

Non-interest income was \$4,826 million, up \$377 million or 8%. The increase was due primarily to higher mutual fund, brokerage and investment management fees, driven by assets under management and assets under administration growth.

Canada

Revenues of \$4,947 million were up \$375 million or 8% due primarily to higher brokerage, mutual fund, and investment management fees, driven by assets under management and assets under administration growth, and higher net interest income driven by loan and deposit growth, and improved margins.

International

Revenues of \$814 million increased by \$95 million or 13%. The growth was due primarily to higher mutual fund fees, particularly within Mexico, and higher brokerage revenues and net interest income, driven by loan and deposit growth.

Provision for credit losses

The provision for credit losses was \$27 million, compared to \$10 million. The provision for credit losses ratio was 11 basis points, an increase of seven basis points.

Provision for credit losses on performing loans was \$3 million, compared \$6 million.

Provision for credit losses on impaired loans was \$24 million, compared to \$4 million. The provision this year was due primarily to higher formations, mainly related to two impaired loan accounts. The provision for credit losses ratio on impaired loans was nine basis points, an increase of seven basis points.

Non-interest expenses

Non-interest expenses of \$3,610 million increased by \$260 million or 8%, due primarily to increased volume-related expenses, sales force expansion, and higher technology, advertising, and business development costs to support business growth.

Provision for income taxes

The effective tax rate of 25.4% was in line with prior year.

Outlook

Revenue growth in Global Wealth Management is expected to be driven by retail mutual fund volume growth through active management and multi-brand distribution in Canada; solid growth across our advisory business; and continued expansion across our key international markets. Earnings are expected to grow in 2025 from market appreciation and strong new business volumes. Global Wealth Management will continue to invest in the business through ongoing enhancements to digital client and advisor capabilities.

Global Banking and Markets

2024 Achievements

Earn primary client relationships

- Advanced U.S. Technology and Healthcare sector strategies, growing non-lending revenue across these sectors.
- Supported our clients in three notable transactions that earned recognition in the 2024 Environmental Finance Sustainable Debt Awards. These awards celebrate leading green, social, sustainable and sustainability-linked bond and loan deals.
- Hosted inaugural Global Technology Conference in San Francisco, strengthening our Investment Banking practice and client relationships in this priority sector.

Grow and scale in priority markets

- In Canadian League Tables, GBM is ranked 4th in both Mergers and Acquisitions (M&A) and Equity Capital Market (ECM).
- In Pacific Alliance League Tables, GBM is ranked 4th in M&A and 5th in ECM; in the U.S., GBM is ranked 19th in Debt Capital Market (DCM).
- Launched Multinational Client Pilot Program with a select group of multinational clients across our global footprint, to co-create a comprehensive value proposition for this strategic client segment.
- Signed first sustainability-linked loan in the European market, acting as Lead Arranger, Lender, and Sole Sustainability Coordinator on three ESG-linked facilities.

Make it easy to do business with us

- Launched a simplified and streamlined Know Your Client process in April 2024.
- Added new FX Options capabilities for corporate and commercial clients.
- Hired an industry leading specialized team to launch the U.S. Mortgage Capital Markets business, contributing to a more complete U.S. client-focused business.
- Commenced Pilot Chaperone Process, aiming to improve the client onboarding experience and reduce time-to-transact through a single point of contact.

Win as one team

- Established Canada's first majority Indigenous owned and operated investment dealer: Cedar Leaf Capital Inc., together with two Indigenous development corporations and one First Nation.
- Partnered with 100 Women in Finance to further strengthen our DEI strategy to attract and retain women while positioning GBM as an employer of choice for diverse communities.

Select awards and deal highlights

Awards

- Global Finance Sustainable Finance Awards 2024 including Best Bank for Sustainable Finance in Canada
- Global Finance 2024: Best Foreign Exchange (FX) Bank in Canada

Deal highlights

- Joint Bookrunner on a number of notable mandates this year, including:
 - Enbridge Inc's \$1.8 billion three-tranche offering, tied for the 2nd largest corporate transaction of 2024
 - Foundry JV Holdco's \$3.85 billion 4-part senior offering, meaningfully tightening trading delta vs. Intel Corp's secondaries, and was Scotiabank's first Active Joint Bookrunner role for the client
 - Pembina Pipeline's \$1.3 billion cross border offering of subscription receipts, representing the largest deal in the Canadian Energy sector in 2024 and the second largest bought deal for the year overall.
 - Lineage Inc's US\$5.1 billion initial public offering, which represents the largest IPO in the history of the REIT industry, as well as the largest U.S. equity or equity-linked offering of 2024
 - Southern Company's US\$1.5 billion convertible bond offering, which was the third largest U.S. deal in the Utilities sector in 2024
- Financial Advisor on a number of marquee transactions this year, including:
 - KKR's acquisition of Emera's indirect interest in the Labrador Island Link for \$1.2 billion
 - Tricon Residential on its sale to Blackstone for US\$6.5 billion
 - Enbridge on its sale of its interests in Alliance Pipeline and Aux Sable to Pembina Pipeline for \$3.1 billion
 - Persistence Capital Partners on its privatization of Neighbourly Pharmacy at a valuation of \$1.2 billion
 - eStruxture Data Centers on its \$1.8 billion strategic investment from Fengate Asset Management

Business Profile

Global Banking and Markets (GBM) provides corporate clients with lending and transaction services, investment banking advice and access to capital markets. GBM is a full-service wholesale bank in the Americas, serving clients across Canada, the United States, Latin America, Europe and Asia-Pacific.

Strategy

Global Banking and Markets' ambition is to deliver sustainable and profitable growth for shareholders, driven by disciplined capital allocation across our footprint. To achieve this vision, GBM is focused on increasing relevance with clients with leading financial advice and solutions and on expanding the Bank's full-service corporate offering and prioritizing client relationships where we can provide incremental value beyond lending. We are leveraging regional and institutional capabilities to deliver for our clients with focused growth in businesses and markets supported by our strategic framework.

2025 Priorities

- **Earn primary client relationships:** Drive greater emphasis on shareholder value by strengthening our repeatable, fee-based businesses and improving the precision of our capital and liquidity pricing at the client and product level
- **Grow and scale in priority markets:** Continue to make strong progress in our North American focused capability build, and in the U.S., make significant infrastructure upgrades to meet regulatory expectations and enable growth
- **Make it easy to do business with us:** Transition from a product centric to a client-first global coverage model, reducing loan-only clients and increasing the velocity of capital to improve returns
- **Win as one team:** Develop a comprehensive go-to-market strategy to drive greater cross-sell within GBM and increase partnerships with other Business Lines

(3) Refer to Glossary on page 132 for the description of the measure.

Financial Performance

Net income

Global Banking and Markets reported net income attributable to equity holders of \$1,688 million, a decrease of \$80 million or 5%. This decline was due to higher non-interest expenses, lower net interest income, and lower non-interest income due mainly to a lower taxable equivalent basis (TEB) gross-up, as the Bank no longer claims the dividend received deduction on Canadian shares that are mark-to-market property. This was partly offset by lower provision for credit losses, lower income tax expense and the positive impact of foreign currency translation.

Average assets and liabilities

Average assets increased by \$4 billion or 1% to \$495 billion this year, due mainly to higher trading securities and the impact of foreign currency translation, partly offset by lower business loans and acceptances.

Average liabilities increased by \$20 billion or 4% to \$475 billion this year, due mainly to higher securities sold under repurchase agreements and the impact of foreign currency translation, partly offset by lower deposits.

Revenues

Revenues were \$5,413 million, a decrease of \$139 million or 3%. This was due to lower net interest income and lower non-interest income, partly offset by the positive impact of foreign currency translation.

Net interest income of \$1,441 million decreased by \$131 million or 8%. This was due mainly to higher trading-related funding costs and lower corporate lending volume of \$16 billion or 13%, as well as lower deposit volume of \$10 billion or 5% related to capital optimization efforts to improve profitability.

Non-interest income of \$3,972 million decreased by \$8 million. Higher underwriting and advisory fees and fee and commission revenue were offset by lower trading-related revenue resulting from a lower taxable equivalent basis (TEB) gross-up, as the Bank no longer claims the dividend received deduction on Canadian shares that are mark-to-market property.

Provision for credit losses

The provision for credit losses was \$47 million compared to \$101 million. The provision for credit losses ratio was four basis points, a decrease of three basis points.

Provision for credit losses on performing loans was \$42 million, compared to \$101 million. The provision this period was driven primarily by credit migration and the macroeconomic outlook that continues to be unfavourable, yet improved from the prior year.

Provision for credit losses on impaired loans was \$5 million, compared to nil.

Non-interest expenses

Non-interest expenses increased by \$137 million or 4% to \$3,199 million, driven mainly by higher personnel and technology costs to support business growth and the impact of foreign currency translation.

Provision for income taxes

The effective tax rate was 22.1% compared to 26.0% the prior year, due mainly to the change in earnings mix across jurisdictions.

Outlook

Global Banking and Markets will be focused on priority markets and client primacy to generate increased share of wallet and higher fee income. In capital markets, revenue growth will be led by Fixed Income, Currencies & Commodities (FICC), while business banking is expected to grow at a more moderate pace due to lower balance sheet growth, driven by capital and liquidity optimization initiatives. Expense growth will be focused on key investments in priority segments and markets, partly funded by productivity initiatives. Earnings growth will be supported by focusing on its priority markets in North America to strengthen client relationships and drive profitable and sustainable growth.

C15 Total revenue

C16 Business banking revenue

C17 Capital markets revenue by business line

C18 Composition of average assets

C19 US Net Income

Other

The Other segment includes Group Treasury, smaller operating segments and corporate items which are not allocated to a business line. Group Treasury is primarily responsible for Balance Sheet, Liquidity and Interest Rate Risk management, which includes the Bank's wholesale funding activities.

Net interest income, non-interest income, and the provision for income taxes in each period include the elimination of tax-exempt income gross-up. This amount is included in the operating segments, which are reported on a taxable equivalent basis.

Net income from associated corporations and the provision for income taxes in each period include the tax normalization adjustments related to the gross-up of income from associated companies. This adjustment normalizes the effective tax rate in the divisions to better present the contribution of the associated companies to the divisional results.

Provision for credit losses	1	–
Non-interest expenses ⁽³⁾	(25)	137
Income before taxes	(3,017)	(2,981)
Income tax expense ⁽⁴⁾	(1,205)	(1,538)
Net income (loss)	\$ (1,812)	\$ (1,443)
Net income (loss) attributable to non-controlling interests (NCI)	1	–
Net income (loss) attributable to equity holders	\$ (1,813)	\$ (1,443)

(1) Refer to Non-GAAP Measures on page 20 for the description of the adjustments.

(2) Includes adjustment for divestitures and wind-down of operations of \$143 (October 31, 2023 – \$(367)).

(3) Includes adjustment for legal provision of \$176, restructuring charge and severance provisions of \$53, impairment of non-financial assets of \$440 and divestiture and wind-down of operations of \$(7) for the year ended October 31, 2024. Adjustments for the year ended October 31, 2023 include restructuring charge and severance provisions of \$354, consolidation of real estate and contract termination costs of \$87 and impairment of non-financial assets of \$346.

(4) Includes adjustment for the Canada recovery dividend of \$579 for the year ended October 31, 2023.

Net income

The Other segment reported a net loss attributable to equity holders of \$2,494 million compared to a net loss of \$2,294 million in the prior year. Adjusted net income attributable to equity holders was a loss of \$1,813 million compared to net loss of \$1,443 million in the prior year. The higher loss of \$370 million was due to lower revenues primarily related to higher funding costs and higher income taxes, partly offset by lower non-interest expenses.

Revenues

Revenues were negative \$3,184 million this year. Adjusted revenues were negative \$3,041 million, a decrease of \$197 million from the prior year, due primarily to higher funding costs and higher losses from hedges, as a result of central bank rate increases from prior years. This was partly offset by higher income from liquid assets, lower unrealized losses in associated corporations, and a lower taxable equivalent basis (TEB) gross-up as the Bank no longer claims the dividend received deduction on Canadian shares. The TEB gross-up is offset in income taxes.

Non-interest expenses

Non-interest expenses were \$637 million, compared to \$924 million. Adjusted non-interest expenses were a gain of \$25 million compared to an expense of \$137 million in 2023. The decrease of \$162 million is due mainly to lower project costs.

Outlook

The loss in the Other segment is expected to improve in fiscal 2025. The improved results are expected to be driven primarily by lower funding costs as a result of central bank rate decreases, as well as repricing of assets at higher interest rates.

(1) The Bank adopted IFRS 17 effective November 1, 2023. As required under the new accounting standard, prior period amounts have been restated. Refer to Note 4 of the consolidated financial statements.

(2) Includes net impact of foreign currency translation, primarily change in spot rates on the translation of assets and liabilities from functional currency to Canadian dollar equivalent.

Statement of Financial Position

Assets

The Bank's total assets were \$1,412 billion as at October 31, 2024, an increase of \$1 billion from October 31, 2023. Cash and deposits with financial institutions decreased \$26 billion due primarily to lower balances with central banks. Trading securities increased \$12 billion due mainly to higher client activity. Loans increased \$10 billion. Residential mortgages were up \$7 billion due mainly to growth in Canada. Personal and credit cards loans increased \$2 billion, primarily in Canada. Business and government loans increased \$1 billion with growth in Canada, partly offset by decreases in other locations. Securities purchased under resale agreements and securities borrowed increased \$1 billion due mainly to higher client activity. Derivative instrument assets decreased by \$7 billion due to changes in interest rates and foreign exchange rates. Investment securities increased \$35 billion due mainly to increased holdings of U.S. and Canadian government debt to support liquidity requirements. Customers' liability under acceptances decreased \$18 billion due to the BA conversion. Other assets decreased \$5 billion due mainly to lower collateral requirements.

Liabilities

Total liabilities were \$1,328 billion as at October 31, 2024, a decrease of \$5 billion from October 31, 2023. Total deposits decreased \$8 billion. Personal deposits of \$299 billion increased \$10 billion due primarily to growth in term deposits in Canada. Business and government deposits were lower by \$12 billion, mainly in Asia and the U.S. Deposits by financial institutions were down \$7 billion, mainly in Asia. Financial instruments designated at fair value through profit or loss increased \$10 billion due to new issuances and changes in fair value (see note 10 of the Consolidated Financial Statements). Obligations related to securities sold under repurchase agreements and securities lent increased \$30 billion due mainly to client activity. Obligations related to securities sold short decreased \$1 billion due to lower client demand. Derivative instrument liabilities decreased \$7 billion due to changes in interest rates and foreign exchange rates. Acceptances decreased \$19 billion due to the BA conversion. Subordinated debentures were lower by \$2 billion due mainly to a redemption in Q1 2024. Other liabilities decreased \$7 billion due mainly to lower subsidiary debt.

Equity

Total shareholders' equity was \$84 billion, an increase of \$6 billion from October 31, 2023. Equity was higher due to current year earnings of \$7,892 million, other comprehensive income of \$712 million, net preferred share and other equity instrument issuances of \$704 million, and common share issuances of \$1,945 million, primarily related to the Shareholder Dividend and Share Purchase Plan. Partly offsetting these items were dividends paid of \$5,670 million.

Capital Management

Overview

Scotiabank is committed to maintaining a strong capital base to support the risks associated with its diversified businesses. Strong capital levels contribute to financial safety for the Bank's customers, foster investor confidence and support strong credit ratings. It also allows the Bank to take advantage of growth opportunities as they arise and enhance shareholder returns through increased dividends. The Bank's capital management framework includes a comprehensive internal capital adequacy assessment process (ICAAP), aimed at ensuring that the Bank's capital is adequate to meet current and future risks and achieve its strategic objectives. Key components of the Bank's ICAAP include sound corporate governance; creating a comprehensive risk appetite for the Bank; managing and monitoring capital, both currently and prospectively; and utilizing appropriate financial metrics which relate risk to capital, including internal capital and regulatory capital measures.

C20 Loan portfolio loans & acceptances, \$ billions, as at October 31

C21 Deposits \$ billions, as at October 31

Governance and oversight

The Bank has a sound capital management framework to measure, deploy and monitor its available capital and assess its adequacy. Capital is managed in accordance with the Board-approved Capital Management Policy. In addition, the Board reviews and approves the Bank's annual capital and strategic plans. The Asset-Liability Committee and senior executive management provide governance over the capital management process. The Bank's Finance, Group Treasury and Global Risk Management groups take a coordinated approach to implementing the Bank's capital plan.

Risk appetite

The risk appetite framework that establishes enterprise-wide risk tolerances in addition to capital limits is detailed in the Risk Management section "Risk Appetite". The framework encompasses medium-term targets with respect to regulatory capital thresholds, earnings and other risk-based parameters. These limits drive behaviour to ensure the Bank achieves the following overall objectives: exceed regulatory and internal capital targets, manage capital levels commensurate with the risk profile of the Bank, maintain strong credit ratings and provide the Bank's shareholders with acceptable returns.

Regulatory capital

Canadian banks are subject to the revised capital adequacy requirements as published by the Basel Committee on Banking Supervision (BCBS) and commonly referred to as Basel III. Under Basel III, there are three primary risk-based regulatory capital ratios used to assess capital adequacy: Common Equity Tier 1 (CET1), Tier 1 and Total capital, which are determined by dividing those capital components by risk-weighted assets. Basel III also provides guidance on non-viability contingent capital (NVCC). The guidance stipulates that in order to qualify as regulatory capital, non-common share capital instruments must be convertible into common equity upon a trigger event as defined within the guidance.

C22 Minimum Regulatory Capital Requirements (as at October 31, 2024)

The Office of the Superintendent of Financial Institutions, Canada (OSFI) has issued guidelines, reporting requirements and disclosure guidance which are consistent with the international implementation of Basel III. OSFI requires Canadian deposit-taking institutions to meet minimum requirements related to risk-weighted assets of 7%, 8.5% and 10.5% for CET1, Tier 1 and Total capital ratios, respectively, which includes the capital conservation buffer of 2.5%. OSFI has also designated the Bank a domestic systemically important bank (D-SIB), increasing its minimum capital ratio requirements by 1% across all tiers of capital, in line with the requirements for Global Systemically Important Banks. OSFI's minimum Pillar 1 capital ratio requirements, are 8.0%, 9.5% and 11.5% for Common Equity Tier 1, Tier 1 and Total capital ratios, respectively.

In June 2018, OSFI implemented the Domestic Stability Buffer, to be held by Domestic Systemically Important Banks (D-SIBs) as an additional Pillar 2 buffer. Breaches of this buffer will not result in banks being subject to automatic constraints on capital distributions. Instead, OSFI will require a remediation plan to address any shortfall to their minimum. Supervisory interventions pursuant to OSFI's Guide to Intervention would occur in cases where a remediation plan is not produced or executed in a timely manner satisfactory to OSFI. OSFI undertakes a review of the buffer on a semi-annual basis, in June and December, and any changes to the buffer are made public, along with supporting rationale. In exceptional circumstances, OSFI may make and announce adjustments to the buffer in-between scheduled review dates. In addition, OSFI may subsequently vary the minimum requirements for individual D-SIBs or groups of D-SIBs, as a supervisory measure.

In June 2023, OSFI announced that the Domestic Stability Buffer (DSB) will increase to 3.5% of total risk-weighted assets (RWA), effective November 1, 2023. In addition, in June 2024, OSFI maintained the DSB at 3.5% of RWA. OSFI's minimum regulatory capital ratio requirements, including the D-SIB 1.0% surcharge and its DSB are: 11.5%, 13.0% and 15.0% for Common Equity Tier 1 (CET1), Tier 1 and Total capital ratios, respectively.

Leverage ratio

In addition to risk-based capital ratio requirements, Basel III introduced a simpler, non risk-based Leverage ratio requirement to act as a supplementary measure to its risk-based capital requirements. The Leverage ratio is defined as a ratio of Basel III Tier 1 capital to a leverage exposure measure which includes on-balance sheet assets and off-balance sheet commitments, derivatives and securities financing transactions, as defined within the requirements. OSFI's Basel III Leverage Ratio Requirements Guideline and Public Disclosure Requirements outline the application and disclosure of the Basel III Leverage ratio in Canada. Institutions are expected to maintain an operating buffer above the 3.5% minimum, including the D-SIB surcharge of 0.5%, effective Q2 2023.

Total Loss Absorbing Capacity (TLAC)

OSFI has issued its guideline on Total Loss Absorbing Capacity (TLAC), which applies to Canada's D-SIBs as part of the Federal Government's bail-in regime. The standard is intended to address the sufficiency of a systemically important bank's loss absorbing capacity to support its

recapitalization in the event of its failure. D-SIBs are required to maintain a minimum risk-based Total Loss Absorbing Capacity (TLAC) ratio and a minimum TLAC leverage ratio. TLAC is defined as the aggregate of NVCC Tier 1 capital, NVCC Tier 2 capital, and other TLAC instruments that are subject to conversion in whole or in part into common shares under the Canada Deposit Insurance Corporation (CDIC) Act and meet all of the eligibility criteria under the guidelines. The Bank's minimum TLAC ratio requirements consist of 25.0% of RWA and 7.25% of leverage ratio exposures. As noted above, OSFI may subsequently vary the minimum TLAC requirements for D-SIBs. Where a D-SIB falls below the minimum TLAC requirements, OSFI may take any measures deemed appropriate, including measures set out in the Bank Act (Canada). As at October 31, 2024, the Bank exceeds the OSFI minimum TLAC and TLAC leverage ratios.

Regulatory capital developments

Effective the second quarter of fiscal 2023, the Bank adopted the Revised Basel III reforms in accordance with OSFI's revised Capital Adequacy Requirements Guideline, Leverage Ratio Requirements Guideline, and Pillar 3 Disclosures Guideline for domestic systematically important banks (D-SIBs). OSFI's requirements are substantially aligned with the BCBS' Revised Basel III reforms with some differences, primarily in residential real estate and qualifying revolving retail exposures, and with respect to an acceleration of the phase-in period of the aggregate capital output floor to 72.5% by 2026.

Revised Basel III reforms

The final Basel III reforms implemented in the second quarter of 2023 primarily impact the calculation of RWA and include:

- a revised standardized approach for credit risk, with increased granularity of prescribed risk weights for credit cards, mortgages and business loans;
- revisions to the internal ratings-based approach for credit risk with new requirements for internally developed model parameters under the Advanced Internal Ratings-Based Approach (AIRB), including scope restrictions which limit certain asset classes to only the Foundation Internal Ratings-Based (FIRB) approach;
- a revised standardized approach for operational risk, which builds on the existing standardized approach including the recognition of an institution's operational risk loss experience;
- revisions to the measurement of the Leverage ratio and a Leverage ratio buffer, which will take the form of a Tier 1 capital buffer set at 50% of a D-SIB's 1.0% risk-weighted surcharge capital buffer; and,
- an aggregate output floor, which will ensure that banks' RWAs generated by internal models are not lower than 72.5% of RWAs as calculated by the Basel III framework's standardized approaches. There is an international phase-in period for the 72.5% aggregate capital output floor from 2023 until 2028, beginning at 65% for Canadian banks in the second quarter of 2023. Internationally, adoption of the revised Basel III reforms is varied across jurisdictions. Current expectations are that many jurisdictions will implement no earlier than 2025.

Additionally, the revised market risk framework and credit valuation adjustment (CVA) framework were implemented in the first quarter of 2024. The main changes include:

- revised standardized and modelled approaches for market risk capital requirements.
- a new standardized approach for CVA (SA-CVA) similar to the standardized approach for market risk.

Internationally, adoption of the revised Basel III reforms is varied across jurisdictions. Current expectations are that many jurisdictions will implement no earlier than 2025.

The Bank continues to monitor and prepare for developments impacting regulatory capital requirements.

OSFI delays phase-in of Basel III output floor

In July 2024, OSFI announced a one-year delay to the increase of the capital output floor. OSFI has noted that the one-year delay will give OSFI time to consider the implementation timeline of the Basel III 2017 reforms in other jurisdictions.

As noted above, Canada concluded its implementation of the revised Basel III 2017 reforms in early 2024 and established an accelerated phase-in of the capital output floor, calibrated at 65% in 2023, increasing in the first quarter by 2.5% per year through to 72.5% in 2026. OSFI's announcement of a one-year delay maintains the capital floor calibration at 67.5% through fiscal 2024 and fiscal 2025, increasing to 70% in 2026 and 72.5% in 2027. OSFI plans to continue to measure implementation progress of the Basel III 2017 reforms across jurisdictions with a focus on both the competitive balance in banking and the soundness of Canada's capital regime.

OSFI finalizes its Solo Total Loss Absorbing Capacity (TLAC) framework

In September 2023, OSFI finalized changes to its Solo TLAC Framework, effective the first quarter of 2024. Under this framework, OSFI has established a risk-based Solo TLAC ratio, which builds on the risk-based TLAC ratio set out in OSFI's TLAC Guideline and the risk-based capital ratios described within OSFI's Capital Adequacy Requirements Guideline. The risk-based Solo TLAC ratio will be the primary basis used by OSFI to assess the sufficiency of TLAC that is readily available to the domestic Parent Bank and to assess the Parent's ability to act as a source of strength for its subsidiaries and/or other affiliates. D-SIBs are required to maintain a minimum Solo TLAC ratio of 21.5% on a continuous basis. Public disclosure of a D-SIBs' Solo TLAC ratio is not presently a requirement. OSFI plans to consult on its data assurance and its future public disclosure expectations in due course. The Bank is compliant with OSFI's final Solo TLAC requirements.

The Bank continues to monitor and prepare for developments impacting regulatory capital requirements.

Planning, managing and monitoring capital

Capital is managed and monitored based on planned changes in the Bank's strategy, identified changes in its operating environment or changes in its risk profile. As part of the Bank's comprehensive ICAAP, sources and uses of capital are measured and monitored on an ongoing basis through financial metrics, including regulatory thresholds, and internal capital. These results are used in capital planning and strategic decision-making.

The Bank's assessment of capital adequacy is in the context of its current position and its expected future risk profile and position relative to its internal targets while considering the potential impact of various stress scenarios. Specific scenarios are selected based on the current economic conditions and business events facing the Bank. In addition, the Bank's forward looking capital adequacy assessment includes a consideration of the results of more severe multi-risk scenarios within its enterprise-wide stress testing. This testing is used to determine the extent to which severe, but plausible events, impact the Bank's capital.

The Bank sets internal regulatory capital targets to ensure the Bank's available capital is sufficient within the context of its risk appetite.

The Bank's internal target includes an adequate buffer over the regulatory minimum ensuring sufficient flexibility for future capital deployment and in consideration of the Bank's risk appetite, the volatility of planning assumptions, the results from stress testing and contingency planning.

The Bank has a comprehensive risk management framework to ensure that the risks taken while conducting its business activities are consistent with its risk appetite, its impact on capital relative to internal targets, and that there is an appropriate balance between risk and return. Refer to the Risk Management section for further discussion on the Bank's risk management framework. In managing the Bank's capital base, close attention is paid to the cost and availability of the various types of capital, desired leverage, changes in the assets and risk-weighted assets, and the opportunities to profitably deploy capital. The amount of capital required for the business risks being assumed, and to meet regulatory requirements, is balanced against the goal of generating an appropriate return for the Bank's shareholders.

Capital generation

Capital is generated internally through net earnings after dividend payments. As well, capital is generated by the issuance of common shares, preferred shares and other equity instruments, and subordinated debentures, net of redemptions.

Capital deployment

The Bank deploys capital to support sustainable, long-term revenue and net income growth. The growth can be through existing businesses by attracting new customers, increasing cross-selling activities to existing customers, adding new products and enhancing sales productivity, or through acquisitions. All major initiatives to deploy capital are subject to rigorous analysis, validation of business case assumptions and evaluation of expected benefits. Key financial criteria include impact on earnings per share, capital ratios, return on invested capital, expected payback period and internal rate of return based on discounted cash flows.

Regulatory capital and total loss absorbing capacity ratios

The Bank continues to maintain strong, high quality capital levels which position it well for future business growth and opportunities. The CET1 ratio as at October 31, 2024 was 13.1%, an increase of approximately 10 basis points from the prior year. The ratio benefited from internal capital generation, share issuances under the Bank's Shareholder Dividend and Share Purchase Plan, and revaluation gains on FVOCI securities, partly offset by the adoption impacts from the revised Basel III FRTB market and CVA capital requirements, RWA growth and the Bank's initial investment in KeyCorp.

The Bank's Tier 1 capital ratio was 15.0% as at October 31, 2024, an increase of approximately 20 basis points from the prior year, due primarily to the above noted impacts to the CET1 ratio and a U.S. \$750 million issuance of Limited Recourse Capital Notes partly offset by a redemption of \$300 million of preferred shares.

The Bank's Total capital ratio was 16.7% as at October 31, 2024, a decrease of approximately 50 basis points from 2023, due primarily to redemptions of \$3.25 billion of subordinated debentures, partly offset by the issuance of \$1 billion of subordinated debentures and the above noted impacts to the Tier 1 capital ratio.

The TLAC ratio was 29.7% as at October 31, 2024, a decrease of approximately 90 basis points from the prior year, primarily from higher RWA.

The Leverage ratio was 4.4% as at October 31, 2024, an increase of 20 basis points from the prior year, due primarily to growth in Tier 1 capital.

The TLAC Leverage ratio was 8.8%, an increase of approximately 20 basis points from 2023, due primarily to higher available TLAC.

The Bank's capital, leverage and TLAC ratios continue to be in excess of OSFI's minimum capital ratio requirements for 2024. In 2025, the Bank will continue to maintain strong capital ratios, continuing to optimize capital deployment in line with its strategic plans while absorbing the impact of the Bank's increased investment in KeyCorp.

C23 Continuity of Common Equity Tier 1 ratio ⁽¹⁾

(1) This measure has been disclosed in this document in accordance with OSFI Guideline – Capital Adequacy Requirements (November 2023).

T29 Regulatory capital⁽¹⁾ and total loss absorbing capacity (TLAC)⁽²⁾ ratios

As at October 31 (\$ millions)

	2024	2023
Common Equity Tier 1 capital		
Total Common Equity ⁽³⁾	\$ 73,590	\$ 68,853
Qualifying non-controlling interest in common equity of subsidiaries	683	763
Goodwill and intangibles, net of deferred tax liabilities ⁽⁴⁾	(15,044)	(15,738)
Threshold related deductions	–	–
Net deferred tax assets (excluding those arising from temporary differences)	(451)	(231)
Other Common Equity Tier 1 capital deductions ⁽⁵⁾	1,853	3,394
Common Equity Tier 1	60,631	57,041
Additional Tier 1 capital		
Preferred shares ⁽⁶⁾	–	300
Subordinated additional Tier 1 capital notes (NVCC)	3,249	3,249
Limited recourse capital notes (NVCC)	5,530	4,526
Capital instrument liabilities – trust securities ⁽⁶⁾	–	–
Other Tier 1 capital adjustments ⁽⁷⁾	89	107
Net Tier 1 capital	69,499	65,223
Tier 2 capital		
Subordinated debentures, net of amortization ⁽⁶⁾	6,190	8,412
Allowance for credit losses eligible for inclusion in Tier 2 and excess allowance (re: IRB approach)	1,942	1,931
Qualifying non-controlling interest in Tier 2 capital of subsidiaries	77	85
Tier 2 capital	8,209	10,428
Total regulatory capital	77,708	75,651
Non-regulatory capital elements of TLAC		
External TLAC instruments	59,092	58,001
TLAC deductions and other adjustments	952	852
TLAC available after deductions	137,752	134,504
Risk-weighted assets (\$ billions)⁽¹⁾		
Credit risk	398.2	378.7
Market risk	14.7	12.0
Operational risk	51.1	49.3
Risk-weighted assets	\$ 464.0	\$ 440.0
Regulatory Capital ⁽¹⁾ and TLAC ⁽²⁾ ratios		
Common Equity Tier 1	13.1%	13.0%
Tier 1	15.0%	14.8%
Total	16.7%	17.2%
Total loss absorbing capacity	29.7%	30.6%
Leverage⁽⁸⁾		
Leverage exposures	\$ 1,563,140	\$ 1,562,963
Leverage ratio	4.4%	4.2%
Total loss absorbing capacity leverage ratio ⁽²⁾	8.8%	8.6%

(1) 2024 regulatory capital ratios are based on Revised Basel III requirements as determined in accordance with OSFI Guideline – Capital Adequacy Requirements (November 2023). Prior year regulatory capital ratios were prepared in accordance with OSFI Guideline – Capital Adequacy Requirements (February 2023).

(2) This measure has been disclosed in this document in accordance with OSFI Guideline – Total Loss Absorbing Capacity (September 2018).

(3) Includes Other Reserves adjusted for regulatory capital purposes.

(4) Reported amounts are based on OSFI's requirements that goodwill relating to investments in associates be classified as goodwill for regulatory reporting purposes.

(5) Other CET1 capital deductions under Basel III include gains/losses due to changes in own credit risk on fair valued liabilities, pension plan assets and other items.

(6) Non-qualifying Tier 1 and Tier 2 capital instruments were subject to a phase-out period until 2022.

(7) Other Tier 1 capital adjustments under Basel III rules include eligible non-controlling interests in subsidiaries.

(8) The leverage ratios are based on Revised Basel III requirements as determined in accordance with OSFI Guideline – Leverage Requirements (February 2023).

T30 Changes in regulatory capital

For the fiscal years (\$ millions)

	2024	2023
Total capital, beginning of year	\$ 75,651	\$ 70,710
Changes in Common Equity Tier 1		
Net income attributable to common equity holders of the Bank	7,286	6,991
Dividends paid to equity holders of the Bank	(5,198)	(5,003)
Shares issued	1,945	1,402
Shares repurchased/redeemed	–	–
Gains/losses due to changes in own credit risk on fair valued liabilities	723	1,001
ECL transitional adjustment	–	(75)
Movements in accumulated other comprehensive income, excluding cash flow hedges	(1,577)	7
Change in non-controlling interest in common equity of subsidiaries	(80)	69
Change in goodwill and other intangible assets (net of related tax liability) ⁽¹⁾	694	(192)
Other changes including regulatory adjustments below:	(202)	(240)
– Deferred tax assets that rely on future profitability (excluding those arising from temporary differences)	(220)	(143)
– IFRS 17 impact	(86)	–
– Other capital deductions	85	(162)
– Other	19	65
Changes in Common Equity Tier 1	\$ 3,591	\$ 3,960
Changes in Additional Tier 1 Capital		
Issued	1,004	–
Redeemed	(300)	–
Other changes including regulatory adjustments and phase-out of non-qualifying instruments	(20)	1
Changes in Additional Tier 1 Capital	\$ 684	\$ 1
Changes in Tier 2 Capital		
Issued	1,000	1,447
Redeemed	(3,250)	–
Allowance for credit losses eligible for inclusion in Tier 2 and Excess Allowance under IRB ⁽²⁾	11	62
Other changes including regulatory adjustments and phase-out of non-qualifying instruments	21	(529)
Changes in Tier 2 Capital	\$ (2,218)	\$ 980
Total capital generated (used)	\$ 2,057	\$ 4,941
Total capital, end of year	\$ 77,708	\$ 75,651

(1) Reported amounts are based on OSFI's requirements that goodwill relating to investments in associates be classified as goodwill for regulatory reporting purposes.

(2) Eligible allowances for 2024 and 2023.

Regulatory capital components

The Bank's regulatory capital is divided into three components – CET1, Additional Tier 1 capital and Tier 2 capital, depending on their degree of permanency and loss absorbency. All components of capital provide support for banking operations and protect depositors.

CET1 consists primarily of common shareholders' equity, regulatory derived non-controlling interest capital, and prescribed regulatory adjustments or deductions. These regulatory deductions include goodwill, intangible assets (net of deferred tax liabilities), deferred tax assets that rely on future profitability, defined-benefit pension assets and the shortfall (if any) of the allowance for credit losses to regulatory parameter-based expected losses.

Additional Tier 1 capital consists primarily of qualifying non-cumulative preferred shares, and qualifying other equity instruments (as described in Note 25). Tier 2 capital consists mainly of qualifying subordinated debentures and eligible allowances for credit losses.

The Bank's CET1 capital was \$60.6 billion as at October 31, 2024, an increase of approximately \$3.6 billion from the prior year due primarily to:

- \$2.1 billion growth from internal capital generation, net of dividends paid;
- \$1.9 billion from share issuances, mainly from the Bank's Shareholder Dividend and Share Purchase Plan;
- \$0.7 billion from changes in the regulatory deduction for own credit risk on fair valued liabilities; and,
- \$0.4 billion from lower regulatory deductions and other regulatory adjustments.

Partly offset by:

- \$1.6 billion decrease from movements in Accumulated Other Comprehensive Income, excluding cash flow hedges, primarily from the impact of foreign currency translation, net of changes in the fair values of investment securities.

The Bank's Tier 1 capital increased by \$4.3 billion to \$69.5 billion, primarily due to the above noted impacts to CET1 capital and a USD \$750 million issuance of Limited Recourse Capital Notes partly offset by a redemption of \$300 million of preferred shares.

Total capital increased by \$2.1 billion during the year to \$77.7 billion, mainly due to the above noted impacts to CET1 and Tier 1 capital, and the issuance of \$1 billion of subordinated debentures, partly offset by redemptions of \$3.25 billion of subordinated debentures.

Dividends

The annual dividend in 2024 was \$4.24, an increase of \$0.06 from 2023. The Board of Directors approved a quarterly dividend of \$1.06 per common share, at its meeting on December 2, 2024. This quarterly dividend applies to shareholders of record at the close of business on January 7, 2025, and is payable January 29, 2025.

T31 Selected capital management activity

For the fiscal years (\$ millions)

	2024	2023
Dividends		
Common	\$ 5,198	\$ 5,003
Preferred and other equity instruments	472	419
Common shares issued ⁽¹⁾	1,945	1,402
Common shares repurchased for cancellation under the Normal Course Issuer Bid ⁽²⁾	—	—
Preferred shares and other equity instruments issued	—	—
Preferred shares and other equity instruments redeemed	300	—
Maturity, redemption and repurchase of subordinated debentures	3,250	78

(1) Represents primarily cash received for stock options exercised during the year and common shares issued pursuant to the Shareholder Dividend and Share Purchase Plan.

(2) No buybacks in fiscal 2024.

Normal Course Issuer Bid

The Bank currently does not have an active normal course issuer bid and did not repurchase any common shares pursuant to a normal course issuer bid during the years ended October 31, 2024 and October 31, 2023.

Share data and other capital instruments

The Bank's common and preferred share data, as well as certain other capital instruments, are shown in T32. Further details, including exchangeability features, are discussed in Note 22 and Note 25 of the consolidated financial statements.

T32 Shares and other instruments

As at October 31, 2024	Amount (\$ millions)	Dividends declared per share ⁽¹⁾	Number outstanding (000s)	Conversion features

Scotiabank Trust Securities – Series 2006-1 issued by Scotiabank Capital Trust ^(16a,b)	\$ 750	28.25	5.650	750
Options				Number outstanding (000s)
Outstanding options granted under the Stock Option Plans to purchase common shares ⁽²⁾				11,456

(1) Dividends declared from November 1, 2023 to October 31, 2024.

(2) Dividends on common shares are paid quarterly, if and when declared. As at November 22, 2024, the number of outstanding common shares and options was 1,244,973 thousand and 10,912 thousand, respectively.

(3) These securities contain Non-Viability Contingent Capital (NVCC) provisions necessary to qualify as regulatory capital under Basel III. Refer to Notes 22 and 25 of the consolidated financial statements in the Bank's 2024 Annual Report for further details.

(4) On January 29, 2024, the Bank redeemed all outstanding Non-cumulative Preferred Shares Series 40 at a price equal to \$25.00 per share plus dividends declared on November 28, 2023 of \$0.303125 per Series 40 share.

(5) Distributions per face amount of \$1,000 or U.S.\$1,000 semi-annually or quarterly, as applicable.

(6) Quarterly distributions are recorded in each fiscal quarter if and when paid.

(7) In respect of these securities, on June 28, 2023, the Bank announced the interest rate transition from three-month USD LIBOR to three-month Term SOFR, plus a spread adjustment of 26.161 bps, for interest periods commencing on or after July 12, 2023.

(8) Subsequent to the initial five-year fixed rate period ending on June 4, 2025, and resetting every five years thereafter, the distributions, if and when paid, will be determined by the sum of the five-year U.S. Treasury rate plus 4.551%.

(9) Subsequent to the initial five-year fixed rate period ending on July 27, 2026, and resetting every five years thereafter, the distributions will be determined by the sum of the five-year Government of Canada Yield plus 2.761%.

(10) Subsequent to the initial five-year fixed rate period ending on October 27, 2026, and resetting every five years thereafter, the distributions will be determined by the sum of the five-year U.S. Treasury rate plus 2.613%.

(11) Subsequent to the initial five-year fixed rate period ending on July 27, 2027, and resetting every five years thereafter, the distributions, if and when paid, will be determined by the sum of the five-year Government of Canada Yield plus 3.95%.

(12) Subsequent to the initial five-year fixed rate period ending on October 27, 2027, and resetting every five years thereafter, the distributions will be determined by the sum of the five-year U.S. Treasury rate plus 4.389%.

(13) Subsequent to the initial five-year fixed rate period ending on January 27, 2029, and resetting every five years thereafter, the distributions, if and when paid, will be determined by the sum of the five-year U.S. Treasury rate plus 4.017%.

(14) On January 18, 2024, the Bank redeemed all outstanding \$1,750 million 3.89% Subordinated Debentures (NVCC) due January 2029, at 100% of their principal amount plus accrued interest.

(15) On July 3, 2024, the Bank redeemed all outstanding \$1,500 million 2.836% Subordinated Debentures (NVCC) due July 2029, at 100% of their principal amount plus accrued and unpaid interest.

(16)(a) On September 28, 2006, Scotiabank Capital Trust issued 750,000 Scotiabank Trust Securities – Series 2006-1 (Scotia BaTS II Series 2006-1). The holders of Scotia BaTS II Series 2006-1 are entitled to receive non-cumulative fixed cash distributions payable semi-annually in an amount of \$28.25 per security. With regulatory approval, these securities may be redeemed in whole upon the occurrence of certain tax or regulatory capital changes, or in whole or in part on December 30, 2011 and on any distribution date thereafter at the option of Scotiabank Capital Trust. The holder has the right at any time to exchange their security into Non-cumulative Preferred Shares Series S of the Bank. The Series S shares will be entitled to cash dividends payable semi-annually in an amount of \$0.4875 per \$25.00 share. Refer to Note 25(c) – Restrictions on payment of dividends and retirement of shares. The Scotia BaTS II Series 2006-1 may be automatically exchanged, without the consent of the holder, into Non-cumulative Preferred Shares Series T of the Bank in the following circumstances: (i) proceedings are commenced for the winding-up of the Bank; (ii) the Superintendent takes control of the Bank or its assets; (iii) the Bank has a Tier 1 Capital ratio of less than 5% or a Total Capital ratio of less than 8%; or (iv) the Superintendent has directed the Bank to increase its capital or provide additional liquidity and the Bank elects such automatic exchange or the Bank fails to comply with such direction. The Series T shares will be entitled to non-cumulative cash dividends payable semi-annually in an amount of \$0.625 per \$25.00 share. If there is an automatic exchange of the Scotia BaTS II Series 2006-1 into Preferred Shares Series T of the Bank, then the Bank would become the sole beneficiary of the Trust.

(16)(b) No cash distributions will be payable on the Scotia BaTS II Series 2006-1 in the event that the regular dividend is not declared on the Bank's preferred shares and, if no preferred shares are outstanding, the Bank's common shares. In such a circumstance the net distributable funds of the Trust will be payable to the Bank as the holder of the residual interest in the Trust. Should the Trust fail to pay the semi-annual distributions on the Scotia BaTS II Series 2006-1 in full, the Bank will not declare dividends, of any kind on any of its preferred or common shares for a specified period of time. Refer to Note 25(c) – Restrictions on payment of dividends and retirement of shares of the consolidated financial statements in the Bank's 2024 Annual Report.

Credit ratings

Credit ratings are one of the factors that impact the Bank's access to capital markets and the terms on which it can conduct derivatives, hedging transactions and borrow funds. The credit ratings and outlook that the rating agencies assign to the Bank are based on their own views and methodologies.

The Bank continues to have strong credit ratings and its deposits and legacy senior debt are rated AA by Fitch Ratings, Aa2 by Moody's, AA by Morningstar DBRS and A+ by Standard and Poor's (S&P). The Bank's bail-inable senior debt is rated AA- by Fitch Ratings, A2 by Moody's, AA (low) by Morningstar DBRS, and A- by S&P. As of October 31, 2024, all such rating agencies have a Stable outlook on the Bank.

Credit ratings are not recommendations to purchase, sell or hold a security and are subject to revision or withdrawal at any time by the rating agency.

Risk-weighted assets

Regulatory capital requirements are based on OSFI's target minimum percentage of risk-weighted assets (RWA). RWA represent the Bank's exposure to credit, market and operational risks and are computed by applying a combination of the OSFI approved Bank's internal risk models and OSFI prescribed risk weights to on and off-balance sheet exposures. In addition, OSFI has adopted the revised Basel III aggregate output floor, which ensures that the Bank's total RWA are not lower than 72.5% of RWA as calculated by the revised Basel III framework's standardized approaches. The output floor has been set at 72.5% with an international phase-in period from 2023 to 2028. For Canadian banks, the floor is presently at 67.5%. As noted above, OSFI has delayed further increases to the floor to 2026 (70%) and 2027 (72.5%).

As at year end, the Bank's RWA of \$464.0 billion, represents an increase of approximately \$24.0 billion, or 5.5%, from 2023, due primarily to the adoption impacts from the revised Basel III FRTB market and CVA capital requirements, higher RWA from changes in book quality, model updates, and the Bank's initial investment in KeyCorp, partly offset by lower volumes from capital optimization initiatives and the impacts from foreign currency translation.

Credit risk-weighted assets

Credit risk measures the risk that a borrower or counterparty will fail to honour its financial or contractual obligations to the Bank.

The credit risk component consists of on and off-balance sheet claims. The Basel III rules are not applied to traditional balance sheet categories but to categories of on and off-balance sheet exposures which represent general classes of assets or exposure types (e.g. Large Corporate, Mid-size Corporate, Small and Medium Enterprise, Sovereign, Bank, Retail Mortgages, Other Retail, Equity, etc.) based on their different underlying risk characteristics. Generally, while calculating capital requirements, exposure types are analyzed by the following credit risk exposure sub-types: drawn, undrawn, repo-style transactions, over-the-counter (OTC) derivatives, exchange-traded derivatives and other off-balance sheet claims.

Credit risk-weighted assets increased by \$19.5 billion to \$398.2 billion. The key drivers or components of the change are reflected in Table T33 below.

T33 Flow statement for Basel III credit risk-weighted assets (\$ millions)

Credit risk-weighted assets movement by key driver (\$ millions)	2024 ⁽¹⁾		2023 ⁽¹⁾	
	Credit risk	Of which counterparty credit risk	Credit risk	Of which counterparty credit risk
Credit risk-weighted assets as at beginning of year	\$ 378,670	\$ 16,276	\$ 401,434	\$ 20,217
Book size ⁽²⁾	(5,165)	246	(4,121)	(4,081)
Book quality ⁽³⁾	17,516	662	2,039	529
Model updates ⁽⁴⁾	6,640	635	—	—
Methodology and policy ⁽⁵⁾	776	776	(29,372)	(677)
Acquisitions and disposals	2,749	—	(560)	—
Foreign exchange movements	(3,033)	165	9,250	288
Other	—	—	—	—
Credit risk-weighted assets as at end of year	\$ 398,153	\$ 18,760	\$ 378,670	\$ 16,276

(1) Regulatory amounts reported in 2024 and 2023 are under Revised Basel III requirements.

(2) Book size is defined as organic changes in book size and composition (including new business and maturing loans).

(3) Book quality is defined as quality of book changes caused by experience such as underlying customer behaviour or demographics, including changes through model calibrations/realignments.

(4) Model updates are defined as model implementation, change in model scope or any change to address model enhancement.

(5) Methodology and policy is defined as methodology changes to the calculations driven by regulatory policy changes, such as new regulation (e.g. Basel III revision).

T34 Internal rating scale⁽¹⁾ and mapping to external rating agencies

Equivalent Rating

External Rating – S&P and Fitch	External Rating – Moody's	External Rating – Morningstar DBRS	Grade	IG Code	PD Range ⁽²⁾
AAA to AA+	Aaa to Aa1	AAA to AA (high)	Investment grade	99-98	0.0000% – 0.0565%

Total		650,900	153,072	0.52	30	24	669,487	137,909	0.38	29	21

(1) Excludes securitization exposures.

(2) Regulatory amounts reported in 2024 and 2023 are under Revised Basel III requirements.

(3) Excludes government guaranteed residential mortgages of \$53.3 billion (\$56.4 billion in 2023).

(4) After credit risk mitigation.

(5) RWA – Risk-Weighted Assets.

(6) PD – Probability of Default.

(7) LGD – Loss Given Default.

(8) RW – Risk Weight.

(9) Exposure at default used as basis for estimated weightings.

(10) Gross defaulted exposures, before any related allowances.

Credit risk-weighted assets – non-retail

The Bank uses the Internal Ratings Based (IRB) approach under revised Basel III to determine minimum regulatory capital requirements for credit risk in its Canadian, U.S. and European credit portfolios, and for a significant portion of its international corporate and commercial portfolios. The remaining credit portfolios are subject to the Standardized approach, which relies on the external credit ratings (e.g. S&P, Morningstar DBRS, Fitch, etc.) of borrowers, if available, or prescribed risk weights for real estate lending to compute regulatory capital for credit risk. For the Bank's Corporate, Bank and Sovereign IRB portfolios, the key risk measures used in the quantification of regulatory capital for credit risk include probability of default (PD), loss given default (LGD) and exposure at default (EAD).

- Probability of default (PD) measures the likelihood that a borrower, with an assigned Internal Grade (IG) rating, will default within a one-year time horizon. IG ratings are a component of the Bank's risk rating system. Each of the Bank's internal borrower IG ratings is mapped to a PD estimate.

- Loss given default (LGD) measures the severity of loss on a facility in the event of a borrower's default. LGD segments are determined based on facility characteristics such as seniority, collateral type, collateral coverage and other structural elements. Each LGD segment is assigned a LGD estimate. LGD is based on the concept of economic loss and is calculated using the present value of repayments, recoveries and related direct and indirect expenses.
- Exposure at default (EAD) measures the expected exposure on a facility at the time of default.

Under the Advanced Internal Ratings Based (AIRB) approach, all three risk measures are estimated using the Bank's historical data, as well as available external benchmarks, and are updated on a regular basis. The historical data used for estimating these risk measures exceeds the minimum five-year AIRB requirement for PD estimates and the minimum seven-year AIRB requirement for LGD and EAD estimates.

Under revised Basel III there are new IRB requirements for internally developed model parameters under AIRB including scope restrictions which limit certain asset classes to only the Foundation Internal Ratings Based (FIRB) approach. For those asset classes (e.g. Large Corporates, Banks, etc.) the FIRB utilizes the Bank's internally modeled PD parameters combined with internationally prescribed LGD and EAD parameters.

Further adjustments, as required under the Basel III Framework and OSFI's requirements set out in its Domestic Implementation Notes, including any input floor requirements, are applied to average estimates obtained from historical data. These adjustments incorporate the regulatory requirements pertaining to:

- Long-run estimation of PD, which requires that PD estimates capture average default experience over a reasonable mix of high-default and low-default years of the economic cycle;
- Downturn estimation for internally modeled AIRB LGD, which requires that LGD estimates appropriately reflect conditions observed during periods where credit losses are substantially higher than average;
- Downturn estimation for internally modeled AIRB EAD, which requires that EAD estimates appropriately reflect conditions observed during periods of economic downturn; and
- The addition of a margin of conservatism, which is related to the likely range of errors based on the identification and quantification of the various sources of uncertainty inherent in historical estimates.

These risk measures are used in the calculation of regulatory capital requirements based on the Basel framework. The credit quality distribution of the Bank's IRB non-retail portfolio is shown in Table T35. Portfolio average PD, LGD and RW increased marginally year-over-year due to changes in customer ratings and model updates.

The risk measures are subject to a rigorous back-testing framework which uses the Bank's historical data to ensure that they are appropriately calibrated. Based on results obtained from the back-testing process, risk measures are reviewed, re-calibrated and independently validated on at least an annual basis in order to reflect the implications of new data, technical advances and other relevant information.

- As PD estimates represent long-run parameters, back-testing is performed using historical data spanning at least one full economic cycle. Realized PDs are back-tested using pre-defined confidence intervals, and the results are then aggregated to provide an overall assessment of the appropriateness of each PD estimate;
- The back-testing for AIRB LGD and EAD estimates is conducted from both long-run and downturn perspectives, in order to ensure that these estimates are adequately conservative to reflect both long-run and downturn conditions.

Portfolio-level back-testing results, based on a comparison of estimated and realized parameters for the four-quarter period ended at July 31, 2024, are shown in Table T36. During this period the actual experiences of PD, LGD and CCF were materially lower than the estimates as reflected within the risk parameters.

T36 Portfolio-level comparison of estimated and actual non-retail percentages

	Estimated ⁽¹⁾	Actual
Average PD	0.52	0.16
Average LGD	40.23	30.41
Average CCF ⁽²⁾	51.04	30.86

(1) Estimated parameters are based on portfolio count-weighted averages at Q3/23, whereas actual parameters are based on count-weighted averages of realized parameters during the subsequent four quarters.

(2) Exposure-at-default (EAD) back-testing of the Bank's credit conversion factor (CCF) parameters is performed through Limit Factor (LF) back-testing. EAD is computed using the total limit multiplied by the estimated LF.

Credit risk-weighted assets – Canadian retail

The AIRB approach is used to determine minimum regulatory capital requirements for the retail credit portfolio in Canada. The retail portfolio is comprised of the following Revised Basel-based pools:

- Residential real estate secured exposures mainly consist of conventional and high ratio residential mortgages and all other products opened under the Scotia Total Equity Plan (STEP), such as mortgage loans, credit cards and secured lines of credit;
- Qualifying revolving retail exposures (QRRE) consist of unsecured credit cards and lines of credit, including transactors and revolvers;
- Other retail consists of term loans (secured and unsecured), as well as credit cards and lines of credit which are secured by assets other than real estate or do not meet the QRRE definition.

For the AIRB portfolios, the following models and parameters are estimated, subject to parameter input floors as required by OSFI:

- Probability of Default (PD) is the likelihood that the facility will default within the next 12 months.
- Loss Given Default (LGD) measures the estimated economic loss as a proportion of the defaulted balance.
- Exposure at Default (EAD) is the portion of expected exposures at time of default.

The data observation period used for PD/EAD/LGD estimates meets the five year minimum. Various statistical techniques including predictive modeling and decision trees were used to develop models. The models assign accounts into homogenous segments using internal and external borrower/facility-level credit experience. Every month, exposures are automatically re-rated based on risk and loss characteristics. PD, LGD and EAD estimates are then assigned to each of these segments incorporating the following regulatory requirements:

- PD incorporates the average long run default experience over an economic cycle. This long run average includes a mix of high and low default years.

Management's Discussion and Analysis

- LGD is adjusted to appropriately reflect economic downturn conditions.
- EAD may also be adjusted to reflect downturn conditions when PD and EAD are highly correlated.
- Sources of uncertainty are reviewed regularly to ensure uncertainties are identified, quantified and included in calculations so that all parameter estimates reflect appropriate levels of conservatism.

The table below summarizes the credit quality distribution of the Bank's AIRB retail portfolio as at October 31, 2024.

Year-over-year the Bank's AIRB retail portfolio parameters and average risk weights at the total portfolio level remained stable.

T37 Retail AIRB portfolio exposure by PD range⁽¹⁾

As at October 31 (\$ millions)		2024 ⁽²⁾					2023 ⁽²⁾				
Category	PD Range	Exposure at default (\$) ⁽¹⁾	RWA (\$) ⁽³⁾	PD (%) ⁽⁴⁾⁽⁷⁾	LGD (%) ⁽⁵⁾⁽⁷⁾	RW (%) ⁽⁶⁾⁽⁷⁾	Exposure at default (\$) ⁽¹⁾	RWA (\$) ⁽³⁾	PD (%) ⁽⁴⁾⁽⁷⁾	LGD (%) ⁽⁵⁾⁽⁷⁾	RW (%) ⁽⁶⁾⁽⁷⁾
Exceptionally low ⁽⁸⁾	0.0000% – 0.0500%	145,243	3,873	0.05	22	3	123,755	3,062	0.05	19	2
Very low	0.0501% – 0.1999%	148,919	12,705	0.16	37	9	145,654	11,202	0.15	39	8
Low	0.2000% – 0.9999%	79,011	22,791	0.63	43	29	80,470	22,913	0.62	43	28

Medium	3.0000% – 9.9999%	7,524	8,812	5.81	77	117	7,506	7,502	4.99	66	100
High	10.0000% – 19.9999%	3,232	4,002	14.29	39	124	1,882	2,890	11.08	70	154
Extremely high	20.0000% – 99.9999%	2,263	3,528	43.74	50	156	2,363	3,683	34.27	55	156
Default ⁽⁹⁾	100%	975	3,030	100.00	52	311	751	2,879	100.00	61	384
Total		412,645	74,408	1.02	35	18	386,611	68,082	0.87	36	18

(1) After credit risk mitigation.

(2) Regulatory amounts reported in 2024 and 2023 are under Revised Basel III requirements.

(3) RWA – Risk-Weighted Assets.

(4) PD – Probability of Default.

(5) LGD – Loss Given Default.

(6) RW – Risk Weight.

(7) Exposure at default used as basis for estimated weightings.

(8) OSFI revised the Retail PD floor from 0.03% to 0.05% in 2023, under the Revised Basel III Framework.

(9) Gross defaulted exposures, before any related allowances.

All AIRB models and parameters are monitored on a quarterly basis and independently validated annually by the Global Risk Management group. These models are tested to ensure rank ordering and back testing of parameters is appropriate. Comparison of estimated and actual loss parameters for the period ended July 31, 2024 is shown in Table T38. During this period the actual experience was generally more favourable to the estimates as reflected by the risk parameters; however, for Residential Real Estate Secured exposures, actual PDs are slightly elevated as they reflect the most recent year of defaults while estimated PDs reflect the long run overall portfolio averages.

T38 Estimated and actual loss parameters⁽¹⁾

(\$ millions)	Average estimated PD (%) ⁽²⁾⁽⁷⁾	Actual default rate (%) ⁽²⁾⁽⁵⁾	Average estimated LGD (%) ⁽³⁾⁽⁷⁾	Actual LGD (%) ⁽³⁾⁽⁶⁾	Estimated EAD (\$) ⁽⁴⁾⁽⁷⁾	Actual EAD (\$) ⁽⁴⁾⁽⁵⁾
Residential real estate secured						
Residential mortgages						
Insured mortgages ⁽⁸⁾	0.45	0.52	–	–	–	–
Uninsured mortgages	0.37	0.40	17.91	8.64	–	–
Secured lines of credit	0.24	0.32	24.26	16.41	193	174
Qualifying revolving retail exposures	1.34	1.07	92.74	87.85	661	584
Other retail	1.92	1.28	67.77	53.60	23	22

(1) Estimates and actual values are recalculated to align with new models implemented during the period.

(2) Account weighted aggregation.

(3) Default weighted aggregation.

(4) EAD is estimated for revolving products only.

(5) Actual based on accounts not at default as at four quarters prior to reporting date.

(6) Actual LGD calculated based on 24 month recovery period after default and therefore excludes any recoveries received after the 24 month period.

(7) Estimates are based on the four quarters prior to the reporting date.

(8) Actual and estimated LGD for insured mortgages are not shown. Actual LGD includes the insurance benefit, whereas estimated LGD may not.

Credit risk-weighted assets – International retail

International retail credit portfolios follow the Standardized approach and consist of the following components:

- Residential real estate secured lending; and,
- Other regulatory retail, mainly consisting of term loans and credit card and lines of credit transactors and revolvers.

Under the standardized approach, each of the above components is risk-weighted based on prescribed risk weights, which consider borrower or facility attributes, such as, loan-to-value, transactors vs. revolvers, and drawn vs. undrawn.

Market risk

Market risk is the risk of loss from changes in market prices including interest rates, credit spreads, equity prices, foreign exchange rates, and commodity prices, the correlations between them, and their levels of volatility.

Market Risk – Market Risk-Weighted Assets

Following the implementation of the revised OSFI Capital Adequacy Requirements in Q1 2024, VaR, Stressed VaR (sVaR) and the Incremental Risk Charge (IRC) are no longer components of market risk capital. The Bank now calculates market risk capital based on the Standardized Approach under the new Fundamental Review of the Trading Book (FRTB) framework. Prior periods have not been restated to conform to the new FRTB requirements.

Below are the market risk requirements as at October 31, 2024 and 2023:

T39 Total market risk capital⁽¹⁾⁽²⁾

(\$ millions)	2024	2023
General interest rate risk	\$ 80	
Equity risk	145	
Commodity risk	90	
Foreign exchange risk	42	
Credit spread risk	371	
Default risk	400	
Residual risk add-on	49	
All-Bank VaR		\$ 141
All-Bank stressed VaR		390
Incremental risk charge		315
Standardized approach		117
Total market risk capital	\$ 1,177	\$ 963

(1) Commencing Q1 2024, the Bank has moved to a fully standardized approach for calculating market risk capital.

(2) Equates to \$14,710 of market risk-weighted assets (2023 – \$12,040).

T40 Risk-weighted assets movement by key drivers

	Market risk	
	2024	2023
RWA as at beginning of the year	\$ 12,040	\$ 10,820
Movement in risk levels ⁽¹⁾	(1,184)	1,208
Model updates ⁽²⁾	–	12
Methodology and policy ⁽³⁾	3,854	–
Acquisitions and divestitures	–	–
RWA as at end of the year	\$ 14,710	\$ 12,040

(1) Movement in risk levels are defined as changes in risk due to position changes and market movements. Foreign exchange movements are embedded within Movement in risk levels.

(2) Model updates are defined as updates to the model to reflect recent experience, change in model scope.

(3) Methodology and policy is defined as methodology changes to the calculations driven by regulatory policy changes, such as new regulations (e.g. Revised Basel III), including regulatory interpretation.

Market risk-weighted assets increased by \$2.7 billion to \$14.7 billion, as shown in the table above. This was primarily due to higher market risk-weighted assets under the new market risk capital rules, offset by changes in risk levels.

Market Risk – CVA Risk-Weighted Assets

Credit Valuation Adjustment (CVA) is the adjustment to the risk free mark-to-market value of transactions to account for the potential default of a counterparty. CVA risk is the risk of loss arising from changing CVA values in response to changes in counterparty credit spreads and market risk factors.

Following the implementation of the revised OSFI Capital Adequacy Requirements (CAR) in Q1 2024, the Bank applies primarily the standardized approach (SA-CVA) for calculating CVA capital as approved by OSFI, and for netting sets carved out from SA-CVA, the basic approach (BA-CVA). CVA capital covers derivatives; SFT positions which are not fair valued for accounting purposes are excluded from CVA Capital.

Operational risk

Operational risk is the risk of loss, whether direct or indirect, to which the Bank is exposed due to external events, human error, or the inadequacy or failure of processes, procedures, systems or controls.

Consistent with OSFI's adoption of the revised Basel III reforms, the Bank applies the Standardized Approach (SA) for calculating operational risk capital requirements. Under the SA, operational risk capital is determined based on the existing gross income approach further supplemented by a scalar or internal loss multiplier (ILM) that recognizes the Bank's operational risk loss experience.

Operational risk-weighted assets increased by \$1.8 billion during the year to \$51.1 billion, due primarily to growth in the Bank's gross income and an increase to the Bank's ILM.

Internal capital

The Bank utilizes economic capital methodologies and measures to calculate internal capital. Internal capital is a measure of the unexpected losses inherent in the Bank's business activities. The calculation of internal capital relies on models that are subject to independent vetting and validation as required by the Bank's Model Risk Management Policy.

Management assesses its risk profile to determine those risks for which the Bank should attribute internal capital. The major risk categories included in internal capital are:

- Credit risk covers derivatives, repo-style transactions, securitizations, corporate and commercial loans and retail products. The measurement of internal capital mainly leverages the Bank's internal credit risk ratings and a Monte-Carlo simulation model calibrated based on the Bank's actual experience in probabilities of default, exposures at default, expected severity of loss in the event of default, concentration and diversification.

- Market risk for internal capital incorporates the higher of: a Market Risk VaR calibrated to a higher 99.95% confidence interval, and regulatory capital components under the new standardized approaches. For the banking book, structural interest rate and foreign exchange risks leverage a modelled approach based on Economic Value of Equity (EVE) sensitivities.
- Operational risk for internal capital is calculated based on an approach consistent with the Bank's regulatory capital requirements including a conservative forward-looking view of gross income.
- Other risks include additional risks for which internal capital is attributed, such as business risk, significant investments, insurance risk and real estate risk.

In addition, the Bank's measure of internal capital includes a diversification benefit which recognizes that all of the above risks will not occur simultaneously. The Bank also includes the full amount of goodwill and intangible assets in the internal capital amount.

For further discussion on risk management and details on credit, market and operational risks, refer to the Risk Management section.

Off-Balance Sheet Arrangements

In the normal course of business, the Bank enters into contractual arrangements that are either consolidated or not required to be consolidated in its financial statements but could have a current or future impact on the Bank's financial performance or financial condition. These arrangements can be classified into the following categories: structured entities, securitizations, guarantees and other commitments.

Structured entities

Structured entities are designed to accomplish certain well-defined objectives and for which voting or similar rights are not the dominant factor in deciding who controls the entity. The Bank may become involved with structured entities either at the formation stage or at a later date. The Bank controls an investee when it is exposed, or has rights, to variable returns from its involvement with the investee and has the ability to affect those returns through its power over the investee. The Bank's arrangements with structured entities include:

- Structured entities that are used to provide a wide range of services to customers, such as structured entities established to allow clients to securitize their financial assets while facilitating cost-efficient financing, and to provide certain investment opportunities.
- Structured entities that the Bank sponsors and actively manages.

The Bank consolidates all structured entities that it controls which includes a U.S. based multi-seller conduit and certain funding and other vehicles. For many of the structured entities that are used to provide services to customers, the Bank does not guarantee the performance of the structured entities' underlying assets and does not absorb any related losses. For other structured entities, such as securitization and investment vehicles, the Bank may be exposed to credit, market, liquidity, or operational risks. Noteholders of securitizations may also be exposed to these risks. The Bank may earn fees based on the nature of its association with a structured entity.

Unconsolidated structured entities

There are two primary types of association the Bank has with unconsolidated structured entities:

- Canadian multi-seller conduits administered by the Bank; and
- Structured finance entities.

The Bank earned total fees of \$73 million in 2024 (October 31, 2023 – \$51 million) from certain structured entities in which it had a significant interest at the end of the year but did not consolidate. More information with respect to the Bank's involvement with these unconsolidated structured entities, including details of liquidity facilities and maximum loss exposure by category is provided below and in Note 16(b) to the consolidated financial statements.

Canadian multi-seller conduits administered by the Bank

The Bank sponsors two Canadian-based multi-seller conduits that are not consolidated. The Bank earned commercial paper issuance fees, program management fees, liquidity fees and other fees from these multi-seller conduits, which totaled \$54 million in 2024, compared to \$47 million in 2023. These multi-seller conduits purchase high-quality financial assets and finance these assets through the issuance of highly-rated commercial paper.

As further described below, the Bank's exposure to these off-balance sheet conduits primarily consists of liquidity support and temporary holdings of commercial paper. Although the Bank has power over the relevant activities of the conduits, it has limited exposure to variability in returns, which results in the Bank not consolidating the two Canadian conduits. The Bank has a process to monitor these exposures and significant events impacting the conduits to ensure there is no change in control, which could require the Bank to consolidate the assets and liabilities of the conduits at fair value.

A significant portion of the conduits' assets have been structured to receive credit enhancements from the sellers, including overcollateralization protection and cash reserve accounts. Each asset purchased by the conduits is supported by a backstop liquidity facility provided by the Bank in the form of a liquidity asset purchase agreement (LAPA). The primary purpose of the backstop liquidity facility is to provide an alternative source of financing in the event the conduits are unable to access the commercial paper market. Under the terms of the LAPA, in most cases, the Bank is not obliged to purchase defaulted assets.

The Bank's primary exposure to the Canadian-based conduits is the liquidity support provided, with total liquidity facilities of \$7.7 billion as at October 31, 2024 (October 31, 2023 – \$7.1 billion). The year-over-year increase was due to normal business operations. As at October 31, 2024, total commercial paper outstanding for the Canadian-based conduits was \$6.4 billion (October 31, 2023 – \$5.4 billion) and the Bank held 0.1% (October 31, 2023 – 0.2%) of the total commercial paper issued by these conduits. Table T41 presents a summary of assets purchased and held by the Bank's two Canadian multi-seller conduits as at October 31, 2024 and 2023, by underlying exposure.

All of the funded assets have at least an equivalent rating of AA or higher based on the Bank's internal rating program; and assets held in these conduits were investment grade as at October 31, 2024 and 2023.

T41 Assets held by Bank-sponsored Canadian-based multi-seller conduits

	2024			2023		
	Funded assets	Unfunded commitments	Total exposure ⁽¹⁾	Funded assets	Unfunded commitments	Total exposure ⁽¹⁾
As at October 31 (\$ millions)						
Auto loans/leases	\$ 2,957	\$ 578	\$ 3,535	\$ 2,547	\$ 591	\$ 3,138
Trade receivables	–	459	459	–	459	459
Canadian residential mortgages	2,643	264	2,907	1,966	584	2,550
Equipment leases and rental contracts	607	39	646	700	59	759
Other	92	26	118	78	76	154
Total ⁽²⁾	\$ 6,299	\$ 1,366	\$ 7,665	\$ 5,291	\$ 1,769	\$ 7,060

(1) Exposure to the Bank is through global-style liquidity facilities.

(2) These assets are substantially sourced from Canada.

Structured finance entities

The Bank has interests in structured finance entities used to assist corporate clients in accessing cost-efficient financing through their securitization structures. The Bank's maximum exposure to loss from structured finance entities was \$11,469 million as at October 31, 2024 (October 31, 2023 – \$3,296 million). The year-over-year increase was due to normal business operations and new transactions.

The Bank provides senior credit facilities to unaffiliated structured entities that are established by third parties to acquire and/or originate loans for the purposes of issuing collateralized loan obligations (CLOs). These credit facilities benefit from subordinated capital provided by either the collateral manager or third-party investors via subordinated financing, capital injection or asset contribution. Subordinated capital represents the first loss tranche which absorbs losses prior to the Bank's senior exposure. The Bank's broker-dealer affiliate acts as the arranger and placement agent for the CLOs. Proceeds from the sale of the CLOs are used to repay the senior credit facilities. The Bank does not consolidate these entities as it does not have decision making power over their relevant activities, which include the acquisition and/or origination of loans and overall management of the underlying portfolio. The Bank's maximum exposure to loss was \$9,743 million as at October 31, 2024 (October 31, 2023 – \$1,511 million), relating to credit facilities extended to these entities, of which \$4,243 million was funded (October 31, 2023 – \$220 million). The increase in the Bank's maximum exposure to loss during the year was driven by the addition of new financing facilities.

Other funding vehicles

These entities are designed to pass the Bank's credit risk to the holders of the securities. Therefore, the Bank does not have exposure or rights to variable returns from these unconsolidated entities.

The Bank uses a funding vehicle to transfer credit exposure on certain loan assets and purchases credit protection against eligible credit events from this vehicle. The vehicle collateralizes its obligation using cash proceeds received through the issuance of guarantee-linked notes. Loan assets are not sold or assigned to the vehicle and remain on the Bank's Consolidated Statement of Financial Position. The total principal balance of guarantee-linked notes issued by this vehicle and outstanding was \$1,002 million as at October 31, 2024 (October 31, 2023 – \$998 million). These are included in Deposits – Business and government on the Bank's Consolidated Statement of Financial Position.

Other unconsolidated structured entities

The Bank sponsors unconsolidated structured entities including mutual funds, in which it has insignificant or no interest at the reporting date. The Bank is a sponsor when it is significantly involved in the design and formation at inception of the structured entity, and the Bank's name is used by the structured entity to create an awareness of the instruments being backed by the Bank's reputation and obligation. The Bank also considers other factors, such as its continuing involvement and obligations to determine if, in substance, the Bank is a sponsor. For the year ended October 31, 2024, the Bank earned \$2,547 million income from its involvement with the unconsolidated Bank-sponsored structured entities, all of which is from Bank-sponsored mutual funds (for the year ended October 31, 2023 – \$2,369 million).

Securitizations

The Bank securitizes fully insured residential mortgage loans, originated by the Bank and third parties, through the creation of mortgage-backed securities that are sold to Canada Housing Trust (CHT), Canada Mortgage and Housing Corporation (CMHC) or third-party investors, as an efficient source of financing. The sale of such mortgages does not meet the derecognition requirements where the Bank retains substantially all of the risks and rewards of ownership of the securitized mortgages. The transferred mortgages continue to be recognized on the Consolidated Statement of Financial Position, along with the proceeds from sale treated as secured borrowings. More details have been provided in Note 15 of the consolidated financial statements.

Third-party originated mortgages purchased by the Bank and social housing mortgage pools originated by the Bank that are securitized and sold, qualify for derecognition where the Bank transfers substantially all of the risks and rewards of ownership to third parties. As at October 31, 2024, the outstanding amount of off-balance sheet securitized third-party originated mortgages was \$24,837 million (October 31, 2023 – \$19,442 million) and off-balance sheet securitized social housing pools was \$1,148 million (October 31, 2023 – \$766 million).

The Bank securitizes a portion of its Canadian personal and small business credit card receivables (receivables) through Trillium Credit Card Trust II (Trillium), a consolidated Bank-sponsored structured entity. Trillium issues senior and subordinated notes to investors. The proceeds of such issuances are used to purchase co-ownership interests in the receivables originated by the Bank. The sale of such co-ownership interests does not qualify for derecognition and therefore the receivables continue to be recognized on the Bank's Consolidated Statement of Financial Position. Recourse of the noteholders is limited to the purchased co-ownership interests. During the year, \$585 million receivables were securitized through Trillium (2023 – \$2,412 million).

Guarantees and other commitments

Guarantees and other commitments are fee-based products that the Bank provides to its customers. These products can be categorized as follows:

- Standby letters of credit and letters of guarantee. As at October 31, 2024, these amounted to \$63 billion, compared to \$48 billion last year. These instruments are issued at the request of a Bank customer to secure the customer's payment or performance obligations to a third party.

- Liquidity facilities. These generally provide an alternate source of funding to asset-backed commercial paper conduits in the event a general market disruption prevents the conduits from issuing commercial paper or, in some cases, when certain specified conditions or performance measures are not met;
- Indemnification contracts. In the ordinary course of business, the Bank enters into many contracts where it may indemnify contract counterparties for certain aspects of its operations that are dependent on other parties' performance, or if certain events occur. The Bank cannot estimate, in all cases, the maximum potential future amount that may be payable, nor the amount of collateral or assets available under recourse provisions that would mitigate any such payments. Historically, the Bank has not made any significant payments under these indemnities;
- Loan commitments. The Bank has commitments to extend credit, subject to specific conditions, which represent undertakings to make credit available in the form of loans or other financings for specific amounts and maturities. As at October 31, 2024, these commitments amounted to \$273 billion, compared to \$284 billion last year. The lower year-over-year amount is primarily due to a decrease in business activity, partially offset by impact from foreign currency translation.

These guarantees and loan commitments may expose the Bank to credit or liquidity risks, and are subject to the Bank's standard review and approval processes. For the guaranteed products, the dollar amounts represent the maximum risk of loss in the event of a total default by the guaranteed parties, and are stated before any reduction for recoveries under recourse provisions, insurance policies or collateral held or pledged.

Detailed information on guarantees and loan commitments is disclosed in Note 35 in the consolidated financial statements.

Financial Instruments

Given the nature of the Bank's main business activities, financial instruments make up a substantial portion of the Bank's financial position and are integral to the Bank's business. Assets that are financial instruments include cash resources, securities, securities purchased under resale agreements, loans and customers' liability under acceptances. Financial instrument liabilities include deposits, acceptances, obligations related to securities sold under repurchase agreements, obligations related to securities sold short, subordinated debentures and capital instrument liabilities. In addition, the Bank uses derivative financial instruments for both trading and hedging purposes.

Financial instruments are generally carried at fair value, except for non-trading loans and receivables, certain securities and most financial liabilities, which are carried at amortized cost unless designated as fair value through profit and loss at inception.

Unrealized gains and losses on the following items are recorded in other comprehensive income (OCI):

- debt instruments measured at fair value through OCI,
- equity instruments measured at fair value through OCI,
- derivatives designated as cash flow hedges, and
- financial instruments designated as net investment hedges.

Gains and losses on derecognition of debt instruments at FVOCI are reclassified from OCI to the Consolidated Statement of Income under non-interest income. Gains and losses on derecognition of equity instruments designated at FVOCI are not reclassified from OCI to the Consolidated Statement of Income. Gains and losses on cash flow hedges and net investment hedges are recorded in the Consolidated Statement of Income when the hedged item affects income.

The Bank's accounting policies for derivatives and hedging activities are further described in Note 3 to the consolidated financial statements.

Interest income and expense on non-trading interest-bearing financial instruments are recorded in the Consolidated Statement of Income as part of net interest income. Credit losses related to loans are recorded in the provision for credit losses in the Consolidated Statement of Income. Interest income and expense, as well as gains and losses, on trading securities and trading loans are recorded in non-interest income – trading revenues.

Several risks arise from transacting financial instruments, including credit risk, liquidity risk, operational risk and market risk. The Bank manages these risks using extensive risk management policies and practices, including various Board-approved risk management limits.

A discussion of the Bank's risk management policies and practices can be found in the Risk Management section on pages 72 to 110. In addition, Note 36 to the consolidated financial statements presents the Bank's exposure to credit risk, liquidity risk and market risks arising from financial instruments as well as the Bank's corresponding risk management policies and procedures.

There are various measures that reflect the level of risk associated with the Bank's portfolio of financial instruments. For example, the interest rate risk arising from the Bank's financial instruments can be estimated by calculating the impact of a 100 basis point increase or decrease in interest rates on annual income, and the economic value of shareholders' equity, as described on page 93. For trading activities, Table T51 discloses the average one-day Value at Risk by risk factor. For derivatives, based on the maturity profile of the notional amount of the Bank's derivative financial instruments, only 19% (2023 – 20%) had a term to maturity greater than five years.

Note 11 to the consolidated financial statements provides details about derivatives used in trading and hedging activities, including notional amounts, remaining term to maturity, credit risk and fair values.

The fair value of the Bank's financial instruments is provided in Note 8 to the consolidated financial statements along with a description of how these amounts were determined.

The fair value of the Bank's financial instruments was unfavourable when compared to their carrying value by \$1.4 billion as at October 31, 2024 (October 31, 2023 – unfavourable \$4.2 billion). This difference relates mainly to loan assets, debt investment securities measured at amortized cost, deposit liabilities, subordinated debentures and other liabilities. These changes are primarily driven by movements in interest rates and by volume changes. Fair value estimates are based on market conditions as at October 31, 2024, and may not be reflective of future fair values. Further information on how fair values are estimated is contained in the section on critical accounting policies and estimates.

Disclosures specific to certain financial instruments designated at fair value through profit and loss can be found in Note 10 to the consolidated financial statements. These designations were made primarily to significantly reduce accounting mismatches.

Selected Credit Instruments – Publicly Known Risk Items

Mortgage-backed securities

Total mortgage-backed securities held in the Non-trading and Trading portfolios are shown in Table T42.

T42 Mortgage-backed securities

As at October 31 Carrying value (\$ millions)	2024		2023	
	Non-trading portfolio ⁽¹⁾	Trading portfolio	Non-trading portfolio ⁽¹⁾	Trading portfolio
Canadian NHA mortgage-backed securities ⁽²⁾	\$ 8,578	\$ 2,381	\$ 7,103	\$ 2,671
Canadian residential mortgage-backed securities	–	–	–	4
U.S. Agency mortgage-backed securities ⁽³⁾	25,223	–	23,751	–
Total	\$ 33,801	\$ 2,381	\$ 30,854	\$ 2,675

(1) The balances are comprised of securities under the amortized cost and FVOCI measurement categories.

(2) Canada Mortgage and Housing Corporation is a corporation of the Government of Canada that provides a guarantee of timely payment to NHA mortgage-backed security investors.

(3) The Government National Mortgage Association (Ginnie Mae) is a U.S. Government corporation that provides a guarantee of timely payment to U.S. Agency mortgage-backed security investors.

Other

As at October 31, 2024, the Bank has insignificant exposure to highly leveraged loans awaiting syndication, auction-rate securities, Alt-A type loans, monoline insurance and investments in structured investment vehicles.

Risk Management

Effective risk management is fundamental to the success and resilience of the Bank and is recognized as key in the Bank's overall approach to strategy management. Scotiabank has a strong, disciplined risk culture where managing risk is a responsibility shared by all of the Bank's employees.

Risk Management Framework

The primary goals of risk management are to ensure that the outcomes of risk-taking activities are consistent with the Bank's values, strategies and risk appetite, and that there is an appropriate balance between risk and reward to maximize shareholder value. Scotiabank's Enterprise-Wide Risk Management Framework articulates the foundation for achieving these goals.

The Enterprise-Wide Risk Management Framework is subject to routine review to keep pace with evolving risks and requirements of the global markets in which the Bank operates, including regulatory standards and industry best practices. The Framework is designed to identify, assess, and mitigate threats and vulnerabilities to which the Bank is exposed and serve to enhance its overall financial and operational resilience. The risk management programs of the Bank's subsidiaries align in all material respects to the Bank's risk management framework, although the actual execution of their programs may be different.

The Bank's risk management framework is applied on an enterprise-wide basis and consists of five key elements:

- Risk Governance
- Risk Appetite
- Risk Management Tools
- Risk Identification and Assessment
- Risk Culture

Risk Management Principles

Risk-taking and risk management activities across the enterprise are guided by the following principles:

Balancing Risk and Reward – business and risk decisions are consistent with strategies and risk appetite.

Understand the Risks – all material risks to which the Bank is exposed, including both financial and non-financial, are identified and managed.

Forward Thinking – emerging risks and potential vulnerabilities are proactively identified and managed.

Shared Accountability – every employee is responsible for managing risk.

Client Focus – understanding our clients and their needs is essential to all business and risk decision-making.

Protect our Brand – all risk-taking activities must be in line with the Bank's risk appetite, our Scotiabank Code of Conduct (our Code), values and behaviours and policy principles.

Controls – maintaining a robust and resilient control environment to protect our stakeholders.

Resilience – being prepared operationally and financially to respond to adverse events.

Compensation – performance and compensation structures reinforce the Bank's values and desired behaviours and promote sound risk taking behaviour taking into account the compensation-related regulatory environment.

Financial and Operational Resilience

Financial resilience reflects the Bank's ability to withstand financial stress. Capital and liquidity management are fundamental to financial resilience as they ensure the Bank can absorb shocks and meet its obligations during periods of stress.

The Bank defines operational resilience as the ability to effectively prepare for, respond to, and recover from operational disruptions to the provision of services that have the potential to cause intolerable harm to clients, or threaten the viability of the Bank, or cause instability to the financial system. This could in turn impact the Bank's financial resilience and its ability to meet obligations during periods of stress. Effective enterprise risk management requires an understanding of how risk types are interconnected which in turn supports financial and operational resilience.

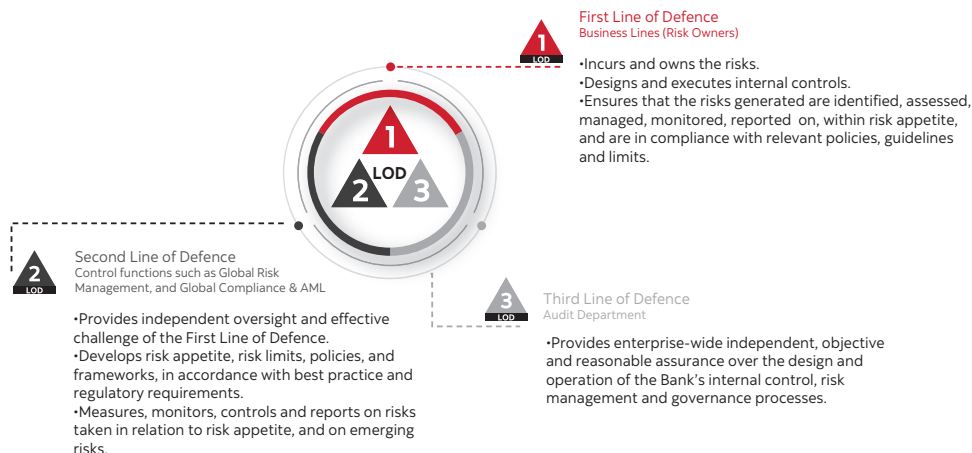

Identifying and prioritizing critical operations, assessing the potential impact of disruptions, and developing plans and capabilities to prevent, respond, and recover from them is a key aspect of operational resilience. Criticality refers to the level of importance an asset, such as processes, technology, third parties, people, data, and facilities, holds for the Bank's operations, financial stability, and reputation. Critical assets are those that, if compromised, disrupted, or destroyed, would significantly harm client and employees, jeopardize the Bank's viability, cause instability to the financial system, or materially impair the Bank's strategy, performance, or its continuing compliance obligations.

Risk Governance

Effective risk management begins with effective risk governance.

The Bank has a well-established risk governance structure, with an active and engaged Board of Directors supported by an experienced executive management team. Decision-making is highly centralized through several executive and senior risk management committees.

The Bank's risk management framework is predicated on the three lines of defence model. Within this model:

Governance Structure

The Bank's Board of Directors and its Committees provide oversight and governance over the Bank's risk management program which is supported by the President and Chief Executive Officer and Chief Risk Officer.

The Risk Governance Structure of the Bank is set out below.

Board of Directors: as the top of the Bank's risk management governance structure, provides oversight, either directly or through its committees, to satisfy itself that decision making is aligned with the Bank's strategies and risk appetite. The Board receives regular updates on the key risks of the Bank – including a quarterly comprehensive summary of the Bank's risk profile and performance of the portfolio against defined limits – and approves key risk policies, frameworks, and limits.

Corporate Governance Committee of the Board: acts in an advisory capacity to the Board to enhance the Bank's corporate governance through a continuing assessment of the Bank's approach to corporate governance and makes policy recommendations in support of the Bank's purpose, culture and strategy, including its ESG strategy.

Risk Committee of the Board: assists the Board in fulfilling its responsibilities for the review of the Bank's risk appetite and identifying and monitoring key financial and non-financial risks and the oversight of the promotion and maintenance of a strong risk culture throughout the Bank. The Committee assists the Board by providing oversight of the risk management function at the Bank. This includes periodically reviewing and approving the Bank's key risk management policies, frameworks and limits and satisfying itself that management is operating within the Bank's Enterprise Risk Appetite Framework. The Committee oversees the Bank's environmental, social, and governance (ESG) risks, including climate change risk. The Committee also oversees the independence of Global Risk Management, including the effectiveness of the head of this function, as well as the function itself.

Audit and Conduct Review Committee of the Board: assists the Board by providing oversight on the effectiveness of the Bank's system of internal controls. The Committee oversees the integrity of the Bank's consolidated financial statements and related quarterly results. This includes oversight of climate-change related disclosure as part of the Bank's financial reporting of ESG matters as well as the external auditor's qualifications, independence and performance. This Committee assists the Board in fulfilling its oversight responsibilities for setting standards of conduct and ethical behaviour, the oversight of conduct reviews, risk culture and conduct risk, and the oversight of compliance with the consumer protection provisions. The Committee also oversees the Bank's compliance with legal and regulatory requirements (including anti-money laundering (AML), anti-terrorist financing (ATF) and sanctions), and oversees the Global Finance, Global Compliance & AML and Audit Department functions at the Bank. The Committee also oversees the independence of each of these control functions, including the effectiveness of the heads of these functions, as well as the functions themselves.

Human Capital and Compensation Committee of the Board: in conjunction with the Risk Committee of the Board, satisfies itself that adequate procedures are in place to identify, assess and manage the risks (including Conduct Risk) associated with the Bank's material compensation programs and that such procedures are consistent with the Bank's risk management programs. The Committee has further responsibilities relating to talent management, succession planning and total rewards.

President and Chief Executive Officer (CEO): reports directly to the Board and is responsible for defining, communicating and implementing the strategic direction, goals and core values for Scotiabank that maximize long term shareholder value and returns, and meeting the needs of the Bank's other key stakeholders. The CEO oversees the establishment of the Bank's risk appetite, in collaboration with the CRO and CFO, which is consistent with the Bank's short- and long-term strategy, business and capital plans, as well as compensation programs.

Global Risk Management (GRM): is an independent second line of defence that provides oversight of enterprise-wide risk management and is led by the Group Head & Chief Risk Officer. The CRO reports jointly to the CEO and the Risk Committee of the Board and has unfettered access to the Risk Committee of the Board to ensure independence of the function. As a senior member of the Bank's executive management team, the CRO participates in strategic decisions related to where and how the Bank will deploy its various sources of capital to meet the performance targets of the business lines. GRM is responsible for providing effective challenge and reasonable assurance to executive management, the Board of Directors and shareholders that risks are actively identified, managed and communicated to all key stakeholders. GRM's accountability is to ensure that the outcomes of risk-taking activities optimize and protect long-term value by using insight and partnership to drive business impact and safeguard trust.

Global Compliance & AML: is an independent second line of defence that is responsible for managing Compliance Risk and ML/TF & Sanctions Risk and is led by the EVP & Chief Compliance Officer. Global Compliance provides effective challenge and oversight to business lines and corporate functions assessing the adequacy of adherence to and effectiveness of the Bank's day-to-day compliance controls, and for opining to the Board on whether, based on the independent monitoring and testing conducted, the controls are sufficiently robust to achieve compliance with the applicable regulatory requirements. It also provides oversight and effective challenge to the Bank's management of bribery and corruption risk. This group is responsible for maintaining the AML/ATF and Sanctions program which is designed to comply in all material respects with the regulation of which it is subject, and to protect the Bank from being used to launder illicit funds, finance terrorism, violate or evade sanctions. This group also develops AML/ATF and Sanctions policies and control standards to effectively manage money laundering, terrorist financing, and sanctions risks and provides risk-based independent oversight risk assessment and effective challenge to the first line of defence.

Global Finance: is led by the Group Head & Chief Financial Officer (CFO) and is responsible for setting enterprise-wide financial strategies which support the Bank's ability to maximize sustainable shareholder value. Global Finance actively manages the reliable and timely reporting of financial information to management, the Board of Directors, shareholders, regulators, as well as other stakeholders. This reporting includes the Bank's consolidated financial statements and related quarterly and annual results, as well as all financial reporting related regulatory filings. Global Finance executes the Bank's financial, liquidity and capital management strategies with appropriate governance and control, while ensuring its processes are efficient and effective.

Audit Department: reports functionally to the Audit and Conduct Review Committee of the Board on the design and operating effectiveness of the Bank's risk management processes. The mission of the Audit Department is to provide enterprise-wide independent, objective assurance of the Bank's internal controls, risk management and governance processes and to provide consulting services to improve the Bank's operations.

Business Lines: as the first line of defence, own the risks generated by their activities, are accountable for effective management of the risks within their business lines and functions through identifying, assessing, mitigating, monitoring and reporting the risks. Business lines and corporate functions actively design and implement effective internal controls as well as governance activities to manage risk and maintain activities within risk appetite and policies. Further, business lines have processes to be able to effectively identify, assess, monitor and report against allocated risk appetite limits and are in compliance with relevant policies, standards and guidelines. While business lines may rely on Corporate and Support functions to execute certain activities (i.e., technology, procurement, etc.), business lines ultimately maintain accountability for the risks generated by their activities and timely remediation of gaps.

Corporate & Support Functions: refers to the departments that execute activities supporting the overall operations of the organization and/or provide assistance and services to the core business operations. These functions typically include human resources, technology, operations, etc. that play a crucial role in ensuring the smooth functioning of the Bank.

Risk Appetite

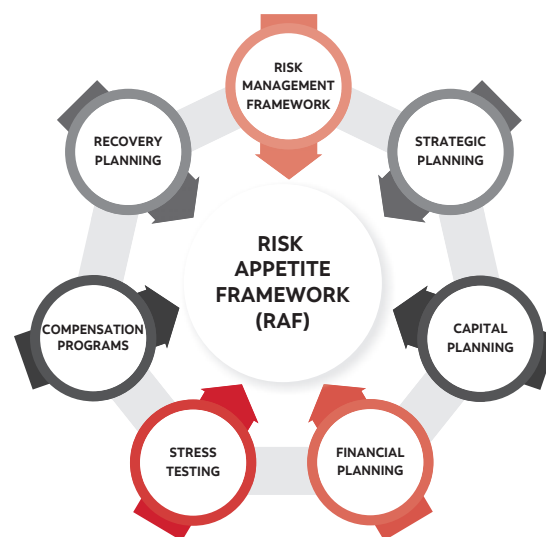

Effective risk management requires clear articulation of the Bank's risk appetite and how the Bank's risk profile will be managed in relation to that appetite.

The Enterprise Risk Appetite Framework ("Enterprise RAF") governs the risk activities undertaken by the Bank on an enterprise-wide basis. It articulates the amount and type of risk the Bank is willing to take to achieve its strategic and financial objectives. A clearly articulated and effectively embedded risk appetite supports a strong risk culture and helps to ensure that the Bank stays within the established risk boundaries, while finding an optimal balance between risk and return.

The Enterprise RAF is incorporated into the Bank's, strategic, capital, and financial planning processes, and compensation programs. Roles and responsibilities for development and implementation of the Enterprise RAF are well defined and are embedded in executive management mandates.

The Enterprise RAF is reviewed annually by senior management who recommend it to the Board for approval.

The Bank's four Business lines each have a standalone Risk Appetite Framework which is aligned with the Bank's Enterprise RAF. The Business Line RAFs are tailored to the operations of the respective business line and include business line specific risk appetite measures.

Risk Appetite Statement

The Bank's Enterprise RAF includes qualitative statements as well as quantitative measures and considers all of the Bank's Principal Risks. Risk appetite metrics help to articulate the Bank's risk appetite in quantitative terms and are critical to ensuring the Bank stays within its established risk appetite on an on-going basis. Risk appetite metrics are supported by management level limit structures and controls, as applicable.

The Bank's Risk Appetite Statement can be summarized as follows:

- The Bank has no appetite for breaches of our Scotiabank Code of Conduct, and consequences applied are commensurate with the severity of the breach. Bank officers and employees are expected to conduct business and interact with others in a legal, compliant, and ethical manner while upholding the Bank's values.
- The Bank favours businesses that generate sustainable, consistent, and predictable earnings over the business cycle.
- The Bank limits its risk-taking activities to those that are well understood and can be managed in line with its risk appetite, risk culture, values, and strategic objectives.
- The Bank strives to maintain a robust and resilient control environment to protect its stakeholders and be prepared operationally and financially to respond to adverse events.
- The Bank has no appetite for reputational, legal, or regulatory risk that would undermine the trust of our stakeholders.
- The Bank has no appetite for its products and services to be used to facilitate money laundering, terrorist financing, or sanctions evasion. The Bank takes appropriate action to prevent, detect, and report such activities to regulators in line with applicable laws and regulations.
- The Bank aims to maintain a strong capital and liquidity position to maintain its reputation as a safe and secure bank.
- The Bank will use a disciplined, enterprise-wide approach to capital allocation to drive sustainable, profitable growth and maximize shareholder returns.

Risk Appetite Metrics

Risk appetite metrics help to articulate the Bank's risk appetite in quantitative terms and are critical to ensuring the Bank stays within its established risk appetite on an on-going basis. Risk appetite metrics are supported by management level limit structures and controls, as applicable.

Other components of Scotiabank's risk appetite metrics:

- Set risk capacity and appetite in relation to regulatory constraints
- Use stress testing to provide forward-looking metrics, as applicable
- Minimize earnings volatility
- Limit exposure to operational events that can have an impact on earnings, including regulatory fines
- Ensure reputational risk is top of mind and strategy is being executed within operating parameters

Risk Management Tools

Effective risk management includes tools that are guided by the Bank's Enterprise Risk Appetite Framework and integrated with the Bank's strategies and business planning processes.

Scotiabank's risk management framework is supported by a variety of risk management tools that are used individually and/or jointly to manage enterprise-wide risks. Risk management tools are regularly reviewed and updated to ensure consistency with risk-taking activities, and relevance to the business and financial strategies of the Bank. Enterprise risk management processes should provide a view of the Bank's risks in a comprehensive and integrated manner and need to consider the relationships and interconnectivity of risks across the Bank.

Frameworks, Policies and Limits

Frameworks and Policies

The Bank develops and maintains frameworks and policies to manage risks and establish clear expectations to control bank activities. Frameworks and policies are designed taking into consideration industry best practices, requirements and guidelines of the Office of the Superintendent of Financial Institutions (OSFI), the Bank Act, as well as the requirements and expectations of other regulators in the jurisdictions where the Bank conducts business. They are developed in consultation with various stakeholders across risk management, other control and corporate functions, business lines and the Audit Department. Frameworks and policies are guided by the Bank's risk appetite, governance standards and set the limits and controls within which the Bank and its subsidiaries can operate. Risk frameworks and policies may be supported by standards, procedures, guidelines and manuals. The Bank also provides advice and counsel to its subsidiaries in respect of their local risk frameworks and policies to promote alignment within the Bank.

Limits

Limits govern and control risk-taking activities within the appetite and tolerances established by the Board and executive management. Limits also establish accountability for key tasks in the risk-taking process and establish the level or conditions under which transactions may be approved or executed.

Risk Measurement

The Bank's measurement of risk is a key component of its risk management framework. The measurement methodologies may apply to a group of risks or a single risk type and are supported by an assessment of qualitative risk factors to ensure the level of risks is within the Bank's risk appetite. The Bank utilizes various risk techniques such as: models; stress testing; scenario and sensitivity analysis; and back testing using data with forward-looking projections based on plausible and worst case economic and financial market events; to support its risk measurement activities.

Models

The use of quantitative risk methodologies and models is subject to effective oversight and a strong governance framework which includes the application of sound and experienced judgment. The development, design, independent review and testing, and approval of models are subject to the Model Risk Management Policy.

The Bank employs models for a number of important risk measurement and management processes including: regulatory and internal capital, internal risk management, valuation/pricing and financial reporting, meeting initial margin requirements, business decision-making for risk management, and stress testing.

Forward-Looking Exercises

Stress Testing

Stress testing programs at both the enterprise-wide level and individual risk level allow the Bank to estimate the potential impact on the Bank's performance resulting from significant changes in market conditions, credit environment, liquidity demands, or other risk factors. Enterprise-wide stress testing is also integrated with both the strategic and financial planning processes, as well as financial crisis management planning. The development, approval and on-going review of the Bank's stress testing programs are subject to policy, and the oversight of the Stress & Scenarios Committee (SSC) or other management committees as appropriate. The SSC is also responsible for reviewing and approving stress testing, climate risk, and IFRS 9 related scenarios for implementation and use. Each stress testing program is developed with input from a broad base of stakeholders, and results are integrated into management decision making processes for capital adequacy and/or allocation, funding requirements and strategy, risk appetite setting and limit determinations. The stress testing programs are designed to capture a number of stress scenarios with differing severities and time horizons.

Other stress tests are conducted, as required, at the enterprise-wide level and within specific functional areas to test the decision-making processes of the senior management team and key personnel, by simulating a potential stress scenario. Simulated stress scenarios may include several complexities and disruptions through which senior management are engaged to make certain key decisions. Generally, the objectives of the simulations can include testing (1) the executability of activation protocols, (2) operational readiness, (3) the flexibility of the executive decision-making process, and (4) the process by which actions to be taken are prioritized. The exercises may also be designed to test the applicability and relevance of available data and the timeliness of reporting for decision making under stressed/crisis conditions.

Monitoring and Reporting

The Bank monitors its risk exposures to ensure business activities are operating within approved risk appetite limits, thresholds or guidelines. Metric owners are responsible for regular monitoring, reporting and escalating breaches of early warning thresholds and risk appetite limits or any other deteriorating trends in risk profile to senior management and/or the Board, as appropriate.

Regular risk reporting to senior management and the Board of Directors provides aggregate measures of risk for all products and business lines, across the Bank's global footprint, and are used to ensure compliance with risk appetite, policies, limits, and guidelines. They also provide a clear statement on the types, amounts, and sensitivities of the various risks in the portfolio. Senior management and the Board use this information to understand the Bank's risk profile and the performance of the portfolios. A comprehensive summary of the Bank's risk profile and performance of the portfolios is presented to the Board of Directors on a quarterly basis.

Risk Identification and Assessment

Effective risk management requires a comprehensive process to identify risks and assess their materiality. The Bank defines Risk as the potential impact of deviations from expected outcomes on the Bank's earnings, capital, liquidity, reputation and resilience caused by internal and external vulnerabilities.

To support proper risk identification and assessment the risk areas in the Bank have developed specific risk taxonomies to assist in the management and governance of the various risks impacting the Bank. The risk identification and assessment processes are to comply with the naming conventions set out by the Enterprise Risk Taxonomy for effective data governance and lineage.

Risk identification and assessment are performed on an ongoing basis through the following:

- Transactions – risks, including credit and market exposures, are assessed by the business lines as risk owners with GRM providing review and effective challenge, as applicable
- Monitoring – risks are identified by constantly monitoring and reporting current trends and analysis, top and emerging risks and internal and external significant adverse events impacting the Bank
- New Products and Services – new or significant change to products, services and/or supporting technology are assessed for potential risks through the New Initiatives Risk Assessment Program
- Strategic Investments – investment transactions are thoroughly reviewed for risks and are approved by the Operating Committee with advice and counsel from the Strategic Transactions and Investment Committee who provides direction and guidance on effective allocation and prioritization of resources
- Self Assessments – operational risks through people, processes and systems are periodically self-assessed by the risk owners with the responsible second line of defense providing effective challenge

On an annual basis, the Bank undergoes a Bank-wide risk assessment that identifies the material risks faced by the Bank for the Internal Capital Adequacy Assessment Process (ICAAP) and the determination of internal capital. This process evaluates the risks and determines the pervasiveness of the risk across multiple business lines, the significance of the risk to a specific business line, the likelihood and potential impact of the risk and whether the risk may cause unexpected losses in income and therefore would be mitigated by internal capital. The process also reviews other evolving and emerging risks and includes qualitative considerations such as strategic, economic and ESG risk factors. The identified risks are ascribed a rating of how probable and impactful they may be and are used as an important input in the ICAAP process and the determination of internal capital.

As part of this annual risk assessment process, the Bank's Principal Risks for the year are identified through consultation with various risk owners and/or stakeholders and approved by the Operational Risk Committee and the Risk Management Committee.

Principal Risk Types

The Bank's Principal Risk types are reviewed annually as part of the Assessment of Risks process to determine that they adequately reflect the Bank's risk profile. Principal Risks are defined as:

Those risks which management considers of primary importance: i) having a significant impact or influence on the Bank's primary business and revenue generating activities (Financial Risks) or ii) inherent in the Bank's business and can have significant negative strategic, business, financial and/or reputational consequences (Non-Financial Risks).

Principal Risks are assessed on an annual basis considering, amongst other things, the following factors:

- Potential impact (direct or indirect) on the Bank's financial results, operations, management and strategy
- Effect on the Bank's long-term prospects and ongoing viability
- Regulatory focus and/or social concern
- Short to mid-term macroeconomic and market environment
- Financial and human resources required to manage and monitor the risk
- Establishment of key risk indicators, performance indicators or management limits to monitor and control the risk
- Peer identification and global best practices
- Regular monitoring and reporting to the Board on the risk is warranted

Once a Principal Risk has been identified, governance structures and mechanisms must be in place for that risk:

- Committee governance structures have been established to manage the risk
- Dedicated second line resources are in place providing effective challenge
- Frameworks and supporting policies, procedures and guidelines have been developed and implemented to manage the risk as appropriate
- Risk appetite limits have been established supported by management limits, early warning thresholds and key risk indicators as appropriate for the risk
- Adequate and effective monitoring and reporting has been established to the Board, executive and senior management, including from subsidiaries
- Board and executive management have clear roles and responsibilities in relation to risk identification, assessment, measurement, monitoring and reporting to support effective governance and oversight

Principal Risks are categorized into two main groups:

Financial Risks:

Credit, Liquidity, Market

These are risks that are directly associated with the Bank's primary business and revenue generating activities. The Bank understands these risks well and takes them on to generate sustainable, consistent and predictable earnings. Financial risks are generally quantifiable and are relatively predictable. The Bank has a higher risk appetite for financial risks which are a fundamental part of doing business; but only when they are well understood, within established limits, and meet the desired strategic priorities and risk return profile.

Non-Financial Risks:

Operational, Data, Compliance, Model, Money Laundering / Terrorist Financing and Sanctions, Environmental, Social & Governance (ESG), Cyber Security & Information Technology (IT), Strategic, Reputational

These are risks that are inherent in the Bank's business and can have significant negative strategic, business, financial and/or reputational consequences if not managed properly. In comparison to financial risks, non-financial risks are less predictable and more difficult to define and measure. The Bank has low risk appetite for non-financial risks and mitigates these accordingly.

Significant Adverse Events

The Bank defines a Significant Adverse Event (SAE) as an internally or externally occurring event that has resulted, or may result in, a significant impact on the Bank's financial performance, strategy, reputation, risk appetite, regulatory compliance, or operations. Significant is defined as the relative importance of a matter within the context in which it is being considered, including quantitative and qualitative factors, such as magnitude, nature, effect, relevance, and impact.

Risk Culture

Effective risk management requires a strong, robust, and pervasive risk culture where every Bank employee understands and recognizes their role as a risk manager and is responsible for identifying and managing risks.

The Bank's risk culture is influenced by numerous factors, including the interdependent relationship amongst the Bank's overarching Culture, risk governance structure, risk appetite, strategy, and risk management tools.

The Bank's Risk Culture program is based on four indicators of a strong risk culture: tone from the top, accountability, risk management and people management. A strong Risk Culture is fostered by an environment that encourages open communication, where employees feel secure to voice concerns, and we build trust by actively listening and seeking to understand diverse perspectives. It promotes behaviours that align to the Bank's Culture, values and desired behaviours and enables employees to identify risk taking activities that are beyond the established risk appetite.

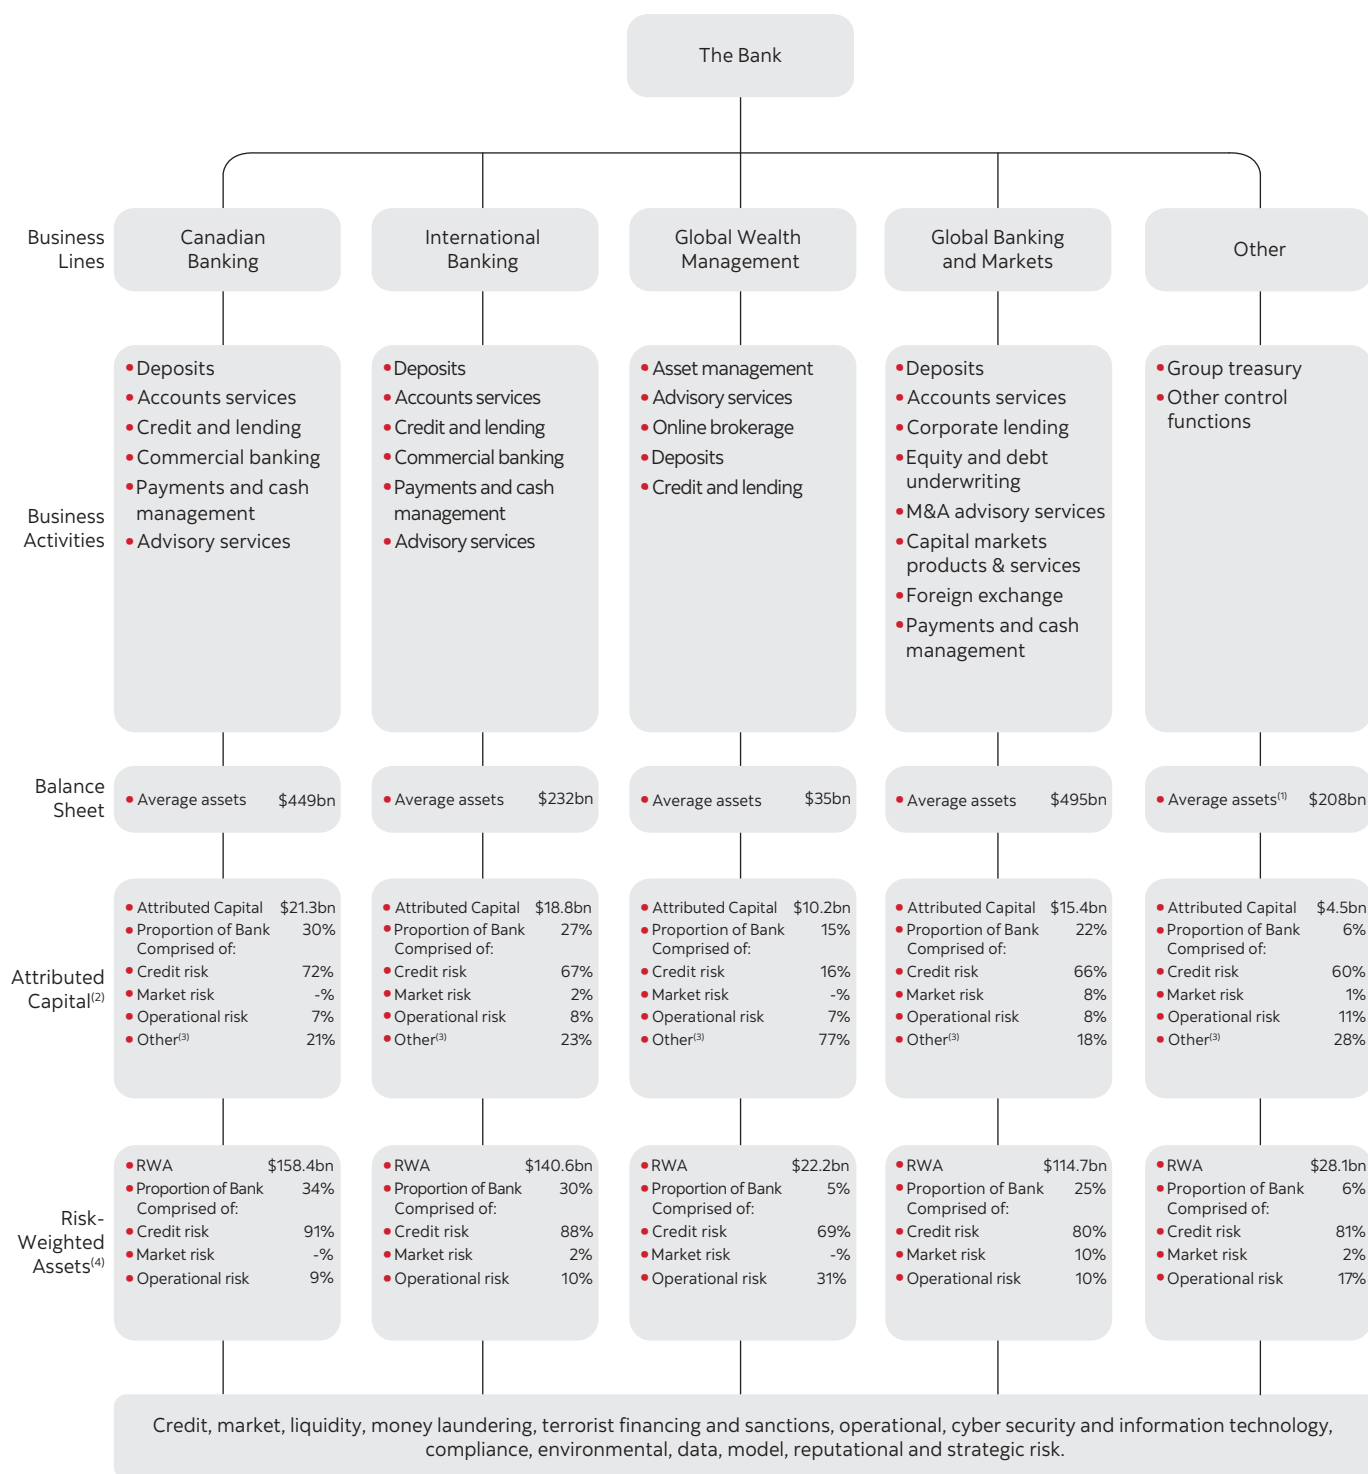

How are Culture, Risk Culture & Conduct Risk Connected?

Other elements that influence and support the Bank's risk culture:

- **Scotiabank Code of Conduct (our "Code"):** describes standards of conduct required of Employees, Contingent Workers, Directors and officers of the Bank. All Scotiabankers are required to receive, read and comply with our Code, and any other applicable Scotiabank policies and affirm their compliance within the required timeline on an annual basis
- **Values:** Client-centric – Deliver a differentiated experience that creates value for our clients; Integrity – Make the right decisions for our clients, each other, and our Bank; Inclusion – Value and leverage differences and diverse perspectives; Accountability – Take initiative to sustainably and profitably grow our Bank
- **Communication:** the Bank actively communicates risk appetite, and how it relates to Scotiabankers, to promote a sound risk culture
- **Compensation:** programs are structured to comply with compensation-related principles and regulations and discourage behaviours that are not aligned with the Bank's values and our Code and ensure that such behaviours are not rewarded
- **Training:** risk culture is continually reinforced by providing effective and informative mandatory and non-mandatory training modules for all employees on a variety of risk management topics
- **Decision-making on risk issues is highly centralized:** the flow of information and transactions to senior and executive committees keeps management well informed of the risks the Bank faces and ensures that transactions and risks are aligned with the Bank's risk appetite
- **Employee goals:** all employees are assigned an Accountability goal addressing how they execute on their performance goals and operate in alignment with Scotiabank's defined Culture, Values, Behaviours, and in compliance with all policies and procedures
- **Executive mandates:** all Executives across the Bank have risk management responsibilities within their mandates

T43 Exposure to risks arising from the activities of the Bank's businesses

(1) Average assets for the Other segment include certain non-earning assets related to the business lines.

(2) Attributed Capital is a combination of regulatory: (i) Risk-based capital and (ii) Leverage capital. Attributed Capital is reported on a quarterly average basis.

(3) Includes Attributed Capital for significant investments, goodwill, intangibles and leverage capital.

(4) Risk-weighted assets (RWA) are as at October 31, 2024 as measured for regulatory purposes in accordance with Revised Basel III.

Top and emerging risks

The Bank is exposed to a variety of top and emerging risks. These risks can potentially affect the Bank's business strategies, financial performance, and reputation. As part of our risk management approach, we monitor our operating environment to identify, assess, review, and manage a broad range of top and emerging risks to undertake appropriate risk mitigation strategies.

Risks are identified using a risk identification system whereby information is gathered and consolidated from a variety of internal and external sources including industry research and peer analysis, Senior Management expertise, and risk reporting from our international operations. The results of this research, in conjunction with internal impact assessments across the Bank's principal risks and other stakeholders, help identify top and emerging risks, which, along with mitigation activities, are summarized and reported to Executives and the Board of Directors on a quarterly basis.

The external risk environment is characterized by an unprecedented rate of change and interconnectivity on a global scale. Emerging risks are becoming less predictable and require a more agile approach to respond quickly to mitigate their impacts. While emerging risks continue to be concentrated in non-financial risks, they have the potential to interact and amplify other risks, including financial ones, in ways that can be difficult to predict.

The Bank's top and emerging risks are as follows:

Evolving Cyber Security Threats

As technology advances, cyber threats continue to evolve in sophistication and scope posing as a top risk to the Bank and/or its third-party service providers. This continues to be a top concern. These threats manifest as attacks on critical functions or infrastructure, including but not limited to, customer facing systems and may result in financial loss, data theft, regulatory consequences, reputational damage or operational disruption to the Bank. The inherent risk of cyber security threats continues to increase as attack surfaces grow with the adoption of new technologies and cloud services. Geopolitical conflicts have increased the severity and frequency of cyber threats and state-sanctioned cyber attacks on critical infrastructure, public facing services and emerging technologies. Advancements in Generative AI and Large Language Models (LLM) create additional attack vectors that enable new forms of fraud or are used to exfiltrate sensitive data and personal identifiable information.

The Bank's overall cyber security and IT program continues to adapt to the evolving and complex cyber threat landscape, and investments in cyber defences, including proactive and adaptive security measures, and IT infrastructure to strengthen its operational resilience. As threat actors look to exploit the weakest link in a system, frequent monitoring of critical suppliers and effective contingency planning helps mitigate the vulnerability to cyber attacks on third parties and safeguards critical assets to ensure business continuity. The Bank also maintains cyber insurance coverage to help mitigate potential losses linked to cyber incidents. The insurance coverage limit is regularly reviewed and evaluated to ensure it meets our needs.

Economic Uncertainty

After a period of elevated interest rates, most central banks have started easing their policy rates, which should support economic activity. However, the lag effects of higher interest rates may increase portfolio impacts, including provisions and delinquencies as clients continue to face higher refinancing costs. Liquidity and market risk uncertainty may result in stricter credit conditions, which can impact business growth, delinquencies, and collateral valuations.

The Bank's strategic shift places focus on allocating capital to more mature, priority markets with an emphasis on lower cost deposits and client primacy that helps reduce credit risk. Frequent monitoring of liquidity, deposit levels, and credit quality will keep the Bank adept in responding to a changing environment and protect against potential impacts of macroeconomic uncertainty. Portfolios are monitored for delinquency trends, and collections measures are being deployed to mitigate potential impacts to the Bank's most vulnerable borrowers.

Impacts from Climate Change Adaptation and Mitigation

Rising costs of climate change and new climate guidelines increase regulatory oversight and stakeholder expectations to demonstrate strong governance in managing climate risks. The increased intensity and frequency of severe weather events highlights the potential impacts of diverse physical risks due to climate change, which include damage to properties and disruptions to operations that can negatively impact profitability. Political uncertainty and changing government priorities could result in step-backs from environmental commitments and slow net-zero investments and client support to mitigate climate risks. Under current laws and evolving climate regulations, which include management of nature-related risks and their impacts, making exaggerated or misleading sustainability claims or "greenwashing", either intentionally or due to data collection and reporting challenges, can create legal and reputational risks. For further details please refer to the ESG Risk section on page 108.

The Bank has several mechanisms to identify, mitigate, and assess potential Bank losses from physical risks. Disaster recovery planning is focused on ensuring uninterrupted operations for localized disasters and weather-related events. The Bank has a public ESG policy that restricts lending to the Oil & Gas industry within the Arctic and for thermal coal mining or coal power generation. In fiscal 2024 the Bank also introduced additional exclusionary policies related to lending in UNESCO World Heritage sites and RAMSAR wetlands. The bank continues to support clients as they transition to net-zero, and has set emissions reduction targets by 2030 in Oil and Gas, Power and Utilities, and Automotive Manufacturing sectors as outlined in the Bank's 2024 Climate Report.

Economic Impacts of Geopolitical Tensions

The potential for political miscalculations and conflict escalations remains a key concern. Geopolitical uncertainty and a fracturing global economy, including a new U.S. administration, growing U.S.-China tensions, the continuing war in Ukraine, and ongoing conflicts in the Middle East, could add complexity to the geopolitical environment and pose fresh threats to the global economy by disrupting supply chains and increasing commodity prices. Trade disputes challenge the globalized economy, prompting some governments to promote manufacturing diversification among 'allies' for resource, technology, and product security. Though such measures seek to mitigate the economic impacts of geopolitical risk, such policies may raise costs and inefficiencies in capital deployment and allocation.

The Bank seeks to grow and do business in countries that have a track record of economic growth and institutional stability. The Bank monitors geopolitical developments through various pillars and threat intelligence coordination, and monitors regions with geopolitical conflicts to ensure sanctions related controls continue to be fully compliant with evolving laws. The Bank's stress testing programs help evaluate the potential impacts of severe economic scenarios, and the Bank can draw from its extensive experience operating in emerging markets across the globe to manage volatility, and right scaling exposure when necessary. The Bank's strong and varied client base, robust liquidity levels and diversified funding programs help manage disruptions or market dislocations.

Increased Regulatory Obligations and Government Policy Uncertainty

As a global financial institution, the Bank operates under various legal and regulatory frameworks that affect its businesses. The increasing volume, complexity, and pace of regulatory obligations, combined with changing government policies across the Bank's footprint is competing for limited resources and is a challenge when balancing compliance with innovation amidst growing competition in the non-regulated financial industry. The Bank strives to monitor and evaluate the emerging regulatory developments and to implement the necessary changes to ensure compliance. However, any inadvertent non-compliance may expose the Bank to fines, penalties, litigation, regulatory sanctions, enforcement actions and restrictions or prohibitions on its business activities. These consequences may adversely affect the Bank's financial performance, its business strategy execution and its reputation.

The Bank continues to monitor changes in regulatory guidance from regulators and to assess the impact of new regulations and increasing scrutiny across its operating footprint. It continues to coordinate examinations as part of its compliance program and work with peers to promote consistent guidance and requirements across jurisdictions.

To meet increasing regulatory obligations the Bank is investing in infrastructure to addresses immediate challenges while building resilience for the years ahead, supported by a robust funding model and risk culture with the appropriate regulatory talent. For additional information on some of the key regulatory developments that potentially impact the Bank's operations, see "Regulatory Developments" on page 116.

Resilience to Third Party Risks

The Bank continues to rely on third parties for the delivery of some critical services. The growing concentration of dominant third and nth parties for the delivery of these critical services, combined with attempts to keep up with technological advancements in a volatile macroeconomic and geopolitical environment, requires oversight and monitoring of complex third- and nth-party arrangements, and increases regulatory, operational, data and cyber risk for service providers. Using third-party service providers increases the risk of attacks, breaches, or disruptions due to the Bank's reduced oversight and control over their technology and security. This can interrupt critical functions or infrastructure, including but not limited to, customer facing systems and may result in financial loss, data theft, regulatory consequences, reputational damage or operational disruption to the Bank. Resiliency and preparedness for third party disruptions, including contingency planning and identification of alternative vendors, is an area of increasing focus as individual banks are expected to coordinate and manage the systemic risks associated with critical third parties notwithstanding disparate regulations.

The Bank aims to be "Resilient by Design" and has established an operational resilience program to support engagements with third party service providers, including defining critical suppliers, enhancing continuous monitoring and developing vendor disruption strategies. The Bank continues to invest in enhancing its governance of third parties, resourcing capabilities, and technology to ensure it manages third party risk prudently.

Increased Fraud Threats

Fraud risk arises from numerous sources, both internal and external, including service providers to the Bank and its customers. The Bank, and industry as a whole, continues to be exposed to the threat of increasing fraud given the uncertain economic climate, rapid digitization, and the adoption of new technologies. Despite the Bank's investments in fraud prevention and detection programs, capabilities, measures and defences, it may not successfully mitigate against all fraudulent activity which could result in financial loss, reputational damage or operational disruptions in the Bank's businesses.

The Bank is continuously enhancing its fraud oversight functions and governance structures to ensure a coordinated response to fraud attacks and to support future business growth in line with its strategy.

Reliance on Data and Models in Decision Making

The increasing role of models and data in decision making processes and operations, potential for bias, and increasing sensitivities and concerns on appropriate use of data in the decision-making process, can all result in reputational risk. Models leveraging data with poor quality can increase the likelihood of incorrect conclusions and inaccurate insights hindering the Bank's assessment and disclosure of key data needed to meet regulatory disclosure requirements, which could raise the Bank's compliance and operational costs. Adoption of new technology (e.g., Generative AI/Large Language Models) in financial services can create new risks, such as potential copyrights and intellectual property infringement, spread of misinformation, and inaccuracy of model output stability in model performance impacting reliability for decision making. New regulatory guidelines have expanded model definitions increasing model volumes and data governance requirements which could result in higher costs and new resource requirements.

The Bank has policies that outline guiding principles on how to manage the risks of using models and data, in alignment to the latest regulations on data and AI, while incorporating data ethics into its code of conduct and training. The Bank continues to modernize its model development and validation platforms following a risk-based approach, which includes cloud adoption, investing in better modeling tools and increasing automation to shorten model lifecycles and manage increasing regulatory oversight of models.

Failure to Adapt to Technological Change and Competitive Risks

Risks and impacts emanating from digital innovations such as cloud computing, Generative AI, machine learning and process automation, require continued investments by the Bank to adapt to these new technologies in order to respond to changing customer needs, regulatory expectations, and cyber threats, while staying competitive with peers and new entrants. Rapid digitalization has created greater dependency on technology to carry out critical business processes and as digital service usage continues to increase, stakeholder tolerance for downtime has reduced.

Technology is a focus for the Bank and is a key enabler for the Bank's clients to do business easily, for automating processes, and for driving innovation, including better risk analytics. Managing legacy IT platforms and complex change management processes is an increasing risk focus as adoption of new technologies requires increasing speed to keep pace with a rapidly changing digital landscape. The Bank is strategically increasing its technology investments to address legacy platforms, which should reduce system vulnerabilities and increase flexibility to adopt new technologies cost-effectively. Focus remains on ensuring sufficient resourcing for software updates and to accelerating the remediation of expired software, while cloud investments should support software modernization and application rationalization. The Bank is addressing the risks of adopting Generative AI, including malicious use, data vulnerabilities, and regulatory scrutiny, by establishing AI Risk Guidelines and leveraging existing data and model governance frameworks for ethical and sound adoption across business lines.

Failure to Adapt to Execute on Strategic Objectives

Execution of strategic objectives is contingent upon navigating an external environment driven by changing government priorities, increasing geopolitical tensions and the accelerating pace of regulatory scrutiny and obligations that could require strategic adjustments.

The Bank has aligned its operations to core strategic objectives while remaining agile to adapt to the evolving external environment to help ensure strategic goals are met, while continuing to communicate transparently with investors and other stakeholders.

Principal Risks – Financial

Credit Risk

Credit risk is the risk of loss resulting from the failure of a borrower or counterparty to honour its financial or contractual obligations to the Bank. Credit risk arises in the Bank's direct lending operations, and in its funding, investment and trading activities where counterparties have repayment or other obligations to the Bank.

Credit risk summary

- The Bank's overall loan book as of October 31, 2024 decreased to \$768 billion versus \$776 billion as of October 31, 2023, with changes reflected in Personal, and Business and Government lending. Residential mortgages were \$351 billion as of October 31, 2024, with 85% in Canada. The corporate loan book, which accounts for 38% of the total loan book is composed of 51% of loans with an investment grade rating as of October 31, 2024, compared to 55% of the total loan book in October 31, 2023.
- Loans and acceptances (Personal, and Business and Government lending) remained diversified by region, industry and customer. Regional exposure is spread across our key markets (Canada 68%, United States 8%, Chile 6%, Mexico 6% and Other 12%). Financial Services constitutes 4% of overall gross exposures (before consideration of collateral) and was \$31 billion. These exposures are predominately to highly rated counterparties and are generally collateralized.

The effective management of credit risk requires the establishment of an appropriate risk culture. Key credit risk policies and appetite statements are important elements used to create this culture.

The Board of Directors, either directly or through the Risk Committee (the Board), reviews and approves the Bank's Credit Risk Appetite limits annually and Credit Risk Policy limits and thresholds biennially.

- The objectives of the Credit Risk Appetite are to ensure that:
 - target markets and product offerings are well defined at both the enterprise-wide and business line levels;
 - the risk parameters for new underwritings and for the portfolios as a whole are clearly specified; and
 - transactions, including origination, syndication, loan sales and hedging, are managed in a manner that is consistent with the Bank's risk appetite.
- The Credit Risk Policy articulates the credit risk management framework, including:
 - credit risk management policies;
 - delegation of authority;
 - the credit risk management program;
 - credit risk management for trading and investment activities; and
 - Single Name and Aggregate limits, beyond which credit applications must be escalated to the Board for approval.

GRM develops the credit risk management framework and policies that detail, among other things, the credit risk rating systems and associated parameter estimates; the delegation of authority for granting credit; the methodology and calculation of the allowance for credit losses; and the authorization of write-offs.

Corporate and commercial credit exposures are segmented by various business lines and/or by major industry type. Aggregate credit risk limits for each of these segments are also reviewed and approved biennially by the Board. Portfolio management objectives and risk diversification are key factors in setting these limits.

Consistent with the Board-approved limits, borrower limits are set within the context of established lending criteria and guidelines for individual borrowers, particular industries, countries and certain types of lending, to ensure the Bank does not have excessive concentration to any single borrower, or related group of borrowers, particular industry sector or geographic region. Through the portfolio management process, loans may be syndicated to reduce overall exposure to a single name. For certain segments of the portfolio, credit derivative contracts are also used to mitigate the risk of loss due to borrower default. Risk is also mitigated through the selective sale of loans.

Banking units and GRM regularly review the various segments of the credit portfolio on an enterprise-wide basis to assess the impact of economic trends or specific events on the performance of the portfolio, and to determine whether corrective action is required. These reviews include the examination of the risk factors for particular products, industries and countries. The results of these reviews are reported to the Risk Management Committee and, when significant, to the Board.

Risk measures

The Bank's credit risk rating systems support the determination of key credit risk parameter estimates (Probability of Default (PD), Loss-Given-Default (LGD) and Exposure at Default (EAD)) that are applicable to both Retail and Business Banking portfolios and are designed to measure customer credit and transaction risk. The parameters are an integral part of enterprise-wide policies and procedures encompassing governance, risk management, and control structure, and are used in various internal and regulatory credit risk quantification calculations.

The Bank's credit risk rating system is subject to a comprehensive validation, governance and oversight framework. The objectives of this framework are to ensure that:

- Credit risk rating methodologies and parameters are appropriately designed and developed, independently validated, and regularly reviewed, and that the results of each process are adequately documented; and
- The validation process represents an effective challenge to the design and development process including an assessment of risk measures.

The Bank's credit risk rating methodologies and parameters are reviewed and validated at least annually. Units within GRM are responsible for design, and development of credit risk rating methodologies and parameters. Separate units within GRM are responsible for validation and review. The operation of these separate units is functionally independent from the business units responsible for originating exposures. Within GRM, these units are also independent from the units involved in risk rating approval and credit adjudication.

Business Banking credit risk ratings and associated risk parameters affect lending decisions, and loan pricing. Both Business Banking and Retail Banking's credit risk rating systems affect the computation of the allowance for credit losses, and regulatory capital.

Corporate and commercial

Corporate and commercial credit exposure arises in the Bank's business lines.

Risk ratings

The Bank's risk rating system utilizes internal grade (IG) ratings – a 17 point scale used to differentiate the risk of default of borrowers, and the risk of loss on facilities. The general relationship between the Bank's IG ratings and external agency ratings is shown in table T34.

IG ratings are also used to define credit adjudication authority levels appropriate to the size and risk of each credit application. Lower-rated credits require increasingly more senior management involvement depending upon the aggregate exposure. Where a credit exceeds the authority delegated to a credit unit, credit units will refer the request – with its recommendation – to a senior credit committee for adjudication. In certain cases, these must be referred to the Risk Committee of the Board of Directors.

Adjudication

Credit adjudication units within GRM analyze and evaluate all significant credit requests for corporate and commercial credit exposures, to ensure that risks are adequately assessed, properly approved, continually monitored and actively managed. The decision-making process begins with an assessment of the credit risk of the individual borrower or counterparty. Key factors considered in the assessment include:

- The borrower's management;
- The borrower's current and projected financial results and credit statistics;
- The industry in which the borrower operates;
- Environmental and Climate Change risks (including regulatory or reputational impacts);
- Economic trends; and
- Geopolitical risk.

Based on this assessment, a risk rating is assigned to the individual borrower or counterparty, using the Bank's risk rating systems.

A separate risk rating is also assigned at the facility level, taking into consideration additional factors, such as security, seniority of claim, structure, term and any other forms of credit risk mitigation that affect the amount of potential loss in the event of a default of the facility. Security typically takes the form of charges over inventory, receivables, real estate, and operating assets when lending to corporate and commercial borrowers; and cash or treasuries for trading lines such as securities lending, repurchase transactions, and derivatives. The types of acceptable collateral, and related valuation processes are documented in risk management policies and manuals.

Other forms of credit risk mitigation include third party guarantees and, in the case of derivatives facilities, master netting agreements.

Internal borrower and facility risk ratings are assigned when a facility is first authorized, and are promptly re-evaluated and adjusted, if necessary, as a result of changes to the customer's financial condition or business prospects. Re-evaluation is an ongoing process, and is done in the context of general economic changes, specific industry prospects, and event risks, such as revised financial projections, interim financial results and extraordinary announcements.

The internal credit risk ratings are also considered as part of the Bank's adjudication limits. Single borrower limits are much lower for higher risk borrowers than low risk borrowers.

The credit adjudication process also uses a risk-adjusted profitability model to ensure that the client and transaction structure offers an appropriate return for a given level of risk. For the corporate portfolio, and the large borrowers in International, the Loan Portfolio Management Group reviews the profitability model results, together with external benchmarks, and provides an opinion on the relative return and pricing of each transaction above a minimum threshold.

Individual credit exposures are regularly monitored by both the business line units and GRM for any signs of deterioration. In addition, the business line units and GRM conduct a review and risk analysis of each borrower annually, or more frequently for higher-risk borrowers. If, in the judgement of management, an account requires the expertise of specialists in workouts and restructurings, it will be transferred to a special accounts management group for monitoring and resolution.

Credit Risk Mitigation – Collateral/Security

Traditional Non-Retail Products (e.g. Operating lines of Credit, Term Loans)

Collateral values are accurately identified at the outset and throughout the tenure of a transaction by using standard evaluation methodologies. Collateral valuation estimates are conducted at a frequency that is appropriate to the frequency by which the market value fluctuates, using the collateral type and the borrower risk profile.

In addition, when it is not cost effective to monitor highly volatile collateral (e.g. accounts receivable, inventory), appropriate lending margins are applied to compensate (e.g. accounts receivable are capped at 80% of value, inventory at 50%). The frequency of collateral valuations is also increased when early warning signals of a borrower's deteriorating financial condition are identified.

Borrowers are required to confirm adherence to covenants including confirmation of collateral values on a periodic basis, which are used by the Bank to provide early warning signals of collateral value deterioration. Periodic inspections of physical collateral are performed where appropriate and where reasonable means of doing so are available.

Bank procedures require verification, including certification by banking officers during initial, annual, and periodic reviews, that collateral values/margins/etc. have been assessed and, where necessary, steps have been taken to mitigate any decreased collateral values.

The Bank does not use automated valuation models (AVMs) for valuation purposes for traditional non-retail products. GRM performs its own valuations of companies based on various factors such as book value, discounted book value, enterprise value etc.

Commercial/Corporate Real Estate

New or updated appraisals are generally obtained at inception of a new facility, as well as during loan modifications, loan workouts and troubled debt restructure. The primary reason for requiring a new appraisal is if, in the reasonable opinion of the banking execution unit, or GRM, there has been a material change in value. Additionally, none of the appraisal guidelines contained within the policies dissuade the Bank from requesting an appraisal more frequently if an adverse change in market conditions, sponsorship, credit worthiness, or other underwriting assumptions is realized or expected.

Appraisals must be in writing and must contain sufficient information and analysis to support the Bank's decision to make the loan. Moreover, in rendering an opinion of the property's market value, third party appraisers are responsible for establishing the scope of work necessary to develop credible assignment results. The appraisal must meet the regulatory and industry requirements which, depending on the type of property being appraised, contain any or all of the following three approaches to value:

- i. comparable sales approach
- ii. replacement cost approach
- iii. income approach

The appraiser must disclose the rationale for the omission of any valuation approach. Furthermore, the appraiser must disclose whether the subject property was physically inspected and whether anyone provided significant assistance to the person signing the appraisal report. The report must contain a presentation and explanation of the assumptions used in determining value under each of the above mentioned approaches.

Review of every appraisal is conducted by the banking units and GRM to confirm that the appraisal identifies all of the relevant issues for the specific asset class, location and economic environment and incorporates all appropriate valuation methodologies and assumptions. In most cases, the banking units also include comparable properties in addition to what is included in the appraisal to further justify value.

When third party assessors are used, they must be accredited and satisfactory to the Bank. In addition, GRM validates any third party valuations via internal desktop estimates either based on comparables or discounted income valuations.

Traded products

Traded products are transactions such as OTC derivatives (including foreign exchange and commodity based transactions), and Securities Financing Transactions (including repurchase/reverse repurchase agreements, and securities lending/borrowing). Credit risks arising from traded products cannot be determined with certainty at the outset, because during the tenure of a transaction the dollar value of the counterparty's obligation to the Bank will be affected by changes in the capital markets (such as changes in stock prices, interest rates, and exchange rates). The Bank adjudicates credit exposures arising from transacting in traded products by considering their current fair value plus an additional component to reflect potential future changes in their mark-to-market value. The credit adjudication process also includes an evaluation of potential wrong-way risk, which arises when the exposure to a counterparty is positively correlated to the probability of default of that counterparty.

Credit risk associated with traded products is managed within the same credit adjudication process as the lending business. The Bank considers the credit risk arising from lending activities, as well as the potential credit risk arising from transacting in traded products with that counterparty.

Credit risk mitigation – collateral/security

Derivatives are generally transacted under industry standard International Swaps and Derivatives Association (ISDA) master netting agreements, which allow for a single net settlement of all transactions covered by that agreement in the event of a default or early termination of the transactions. ISDA agreements are frequently accompanied by an ISDA Credit Support Annex (CSA), the terms of which may vary according to each party's view of the other party's creditworthiness. CSAs and regulation in some jurisdictions can require both parties to post initial margin (regulatory and non-regulatory). CSAs also allow for variation margin to be called if total uncollateralized mark-to-market exposure exceeds an agreed upon threshold. Such variation margin provisions can be one-way (only one party will ever post collateral) or bilateral (either party may post depending upon which party is in-the-money). The CSA will also detail the types of collateral that are acceptable to each party, and the haircuts that will be applied against each collateral type. The terms of the ISDA master netting agreements and CSAs are taken into consideration in the calculation of counterparty credit risk exposure.

For derivative transactions, investment grade counterparties account for approximately 89% of the credit risk. Approximately 41% of the Bank's derivative counterparty exposures are to bank counterparties, as defined under Basel III revision. After taking into consideration, where applicable, netting and collateral arrangements, no net credit risk amount arising from traded products transactions with any single counterparty was considered material to the financial position of the Bank as at October 31, 2024. No individual exposure to an investment grade bilateral counterparty exceeded \$1,855 million and no individual exposure to a corporate counterparty exceeded \$579 million.

Retail

Retail credit exposures arise in the Canadian Banking and International Banking business lines.

Adjudication

The decision-making process for retail loans ensures that credit risks are adequately assessed, properly approved, continually monitored and actively managed. Generally, credit decisions and limit assignments for consumer loans are processed by proprietary adjudication software and are based on strategies that utilize a robust combination of key financial and customer risk indicators and segmentation in addition to credit bureau information and internal risk ratings generated using predictive credit scoring models.

The Bank's credit adjudication and portfolio management methodologies are designed to ensure consistent underwriting and early identification of problem loans in line with our risk appetite. The Bank's rigorous credit underwriting and retail risk strategies and modeling methodologies are more customer focused than product focused. The Bank's view is that a customer-centric approach provides better risk assessment than product-based approaches, a more consistent experience to the customer, and should result in lower loan losses over time.

All credit scoring and policy changes are initiated by units within GRM that are functionally independent from the business units responsible for retail portfolios. Risk models and parameters are also subject to independent validation and review from the units involved in the design and development of models. The review process includes referral to the appropriate Senior Credit Committee for approval, where required. Consumer credit portfolios are reviewed at least monthly to identify emerging trends in loan quality and to assess whether corrective action is required.

Risk ratings

The Bank's consumer risk rating systems are oriented to borrower or transaction risk. Each retail exposure is assigned a risk grade based on the customer's credit history and/or internal credit score. The Bank's automated risk rating systems assess the ongoing credit-worthiness of individual customers on a monthly basis. This process provides for meaningful and timely identification and management of problem loans.

The risk rating system under the AIRB approach is subject to regular review and ongoing performance monitoring of key components. Risk model validations are conducted independently from the areas responsible for rating system development and implementation, to ensure effective independence in design and performance review.

Customer behavior characteristics which are used as inputs within the Bank's Basel III AIRB models are consistent with those used by the Bank's Canadian consumer risk rating systems. The International portfolios are subject to the Standardized approach at this time.

Credit risk mitigation – collateral/security

The property values for residential real estate secured exposures are confirmed at origination through a variety of validation methodologies, including AVM and full appraisals (in-person inspection). The appraisal is completed by a third party, Bank approved appraiser. For monitoring of material portfolios, property values are indexed quarterly to house prices. For loan impairment within material portfolios, residential property values are re-confirmed using third party AVMs.

Where AVM values are used, these AVM values are subject to routine validation through a continuous random sampling process that back-tests AVM values against available property appraisals (primarily third party AVMs). Where third party appraisals are obtained, the Bank relies on the professional industry accreditation of the appraiser. Samples of approved appraisal reports are reviewed by the Bank's senior appraisers to ensure consistent appraisal quality and satisfactory appraisal values. The third party appraisers are selected from a pre-approved list of Bank-vetted appraisers.

Credit Quality

IFRS 9 Financial Instruments, requires the consideration of past events, current conditions and reasonable and supportable forward-looking information over the life of the exposure to measure expected credit losses. Furthermore, to assess significant increases in credit risk, IFRS 9 requires that entities assess changes in the risk of a default occurring over the expected life of a financial instrument when determining staging. Consistent with the requirements of IFRS 9, the Bank considers both quantitative and qualitative information in the assessment of a significant increase in credit risk.

The Bank's models are calibrated to consider past performance and macroeconomic forward-looking variables as inputs, as further described below. In the current year, the Bank enhanced certain of its IFRS 9 models, with the enhanced models exhibiting higher sensitivity to changes in the macroeconomic outlook. Expert credit judgement may be applied in circumstances where, in the Bank's view, the inputs, assumptions, and/or modelling techniques do not capture all relevant risk factors, including the emergence of economic or political events of the market up to the date of the financial statements. Expert credit judgement is applied in the assessment of underlying credit deterioration and migration of balances to progressive stages.

The Bank has generated a forward-looking base case scenario and three alternate forward-looking scenarios (one optimistic and two pessimistic) as key inputs into the expected credit loss provisioning models.

Over the last year, the Canadian and U.S. economies continued to exhibit resilience in the face of restrictive monetary policy, supported by still strong labour markets and consumption, particularly in the U.S., with both economies on track to record stronger economic growth in 2024 than forecast last year. Notwithstanding the upward revision to growth, in Canada, more clear signs of slowing emerged over the past few months, with excess supply opening up room for the Bank of Canada to begin monetary policy easing earlier this year as inflation continued to decline. In the U.S., a more robust labour market and fiscal stimulus led to more substantial revisions to growth and slower progress on inflation, with the U.S. central bank cutting a quarter later than previously expected. It appears a soft-landing has been achieved, with a reacceleration of growth in 2025 expected in Canada from the orderly slowdown of 2024. In the U.S., a mild deceleration relative to 2024 is expected, yet it is still stronger than the forecast in 2023.

The optimistic scenario features somewhat stronger economic activity relative to the base case. The pessimistic scenario features a negative demand-type shock on the world economy with globally tighter private financial conditions, weaker growth and inflation, and lower monetary policy rates than in the baseline scenario. Lastly, the very pessimistic scenario features a strong stagflationary impulse that leads to a protracted period of financial market uncertainty. This results in higher inflation, requiring central banks to raise their policy rate to higher levels than in the base case in order to bring inflation under control, which is dampening economic activity.

The following section provides additional detail on certain key macroeconomic variables used to calculate the modelled estimate for the allowance for credit losses (see page 186 for all key variables). Further changes in these variables up to the date of the financial statements are incorporated through expert credit judgement.

- **Gross Domestic Product (GDP):** The base case scenario assumes a pickup in economic activity in Canada into 2025, compared with a slowdown in the U.S. after its remarkable performance in 2024. In Canada, we expect the economy will grow by about 1.1% in 2024 before reaccelerating to 1.9% in 2025. In the U.S., we expect an economic expansion of about 2.5% in 2024 before slowing to 1.6% in 2025. Relative to last year, the profile for Canada's GDP is lower starting in the second half of 2025, consistent with the disappointing productivity performance, leading to a lower level for potential and projected GDP. Conversely, a significantly better-than-expected productivity performance is resulting in an upward revision to our U.S. GDP over the forecast period.

- **Unemployment Rate:** The base case scenario assumes a modest increase in the unemployment rate in Canada into 2025. Unemployment rate projections for Canada are higher than they were last year, particularly in 2025. On the other hand the U.S. unemployment rate is no longer expected to increase into 2025 and beyond, owing to much more resilient labour markets than previously assessed.

T44 Allowance for credit losses by business line

Allowance for credit losses

The total allowance for credit losses as at October 31, 2024 was \$6,736 million compared to \$6,629 million in the prior year. The allowance for credit losses ratio was 88 basis points, an increase of three basis points. The allowance for credit losses for loans was \$6,536 million, an increase of \$164 million from October 31, 2023. The increase was driven by higher allowance for credit losses on impaired loans, due primarily to retail formations in International Banking and higher impaired provisions in Canadian Banking. This was partly offset by the impact of foreign currency translation.

The allowance for credit losses on performing loans was lower at \$4,482 million compared to \$4,491 million as at October 31, 2023. The allowance for performing loans ratio was 61 basis points. The decrease was due primarily to retail credit migration to impaired in International Banking, mainly in Mexico and Peru, and the impact of foreign currency translation. This was partly offset by provisions for credit migration in retail portfolios in Canadian Banking and retail portfolio growth, as well as higher commercial and corporate provisions due to credit migration and the macroeconomic outlook that continues to be unfavorable, yet improved from the prior year. The impact of foreign currency translation decreased the allowance by \$96 million.

The allowance on impaired loans increased by \$173 million to \$2,054 million from \$1,881 million last year. The allowance for impaired loans ratio was 27 basis points, an increase of three basis points. The increase was due primarily to higher retail formations in International Banking and higher provisions in Canadian Banking, partly offset by the \$59 million impact of foreign currency translation.

The allowance for credit losses on impaired loans in Canadian Banking increased by \$60 million to \$551 million, due primarily to higher commercial and retail formations. In International Banking, the allowance for credit losses on impaired loans increased by \$95 million to \$1,459 million, due primarily to higher retail provisions across most markets, partly offset by the impact of foreign currency translation. In Global Banking and Markets, the allowance for credit loss on impaired loans was \$23 million, an increase of \$7 million from last year. In Global Wealth Management, the allowance for credit loss on impaired loans increased by \$11 million to \$21 million due to higher formations.

Allowance against impaired loans as a % of gross impaired loans ⁽¹⁾	30%	33%

(1) Refer to Glossary on page 132 for the description of the measure.

Impaired loans

Gross impaired loans increased to \$6,739 million as at October 31, 2024, from \$5,726 million last year. The increase was due primarily to higher formations across portfolios, reflecting the impact of inflation and higher interest rates across all business lines, partly offset by the impact of foreign currency translation.

Impaired loans in Canadian Banking increased by \$612 million, due primarily to higher formations in the commercial and retail portfolios. In International Banking, impaired loans increased by \$303 million, due primarily to higher retail and commercial formations, partly offset by the impact of foreign currency translation. Impaired loans in Global Banking and Markets increased by \$59 million, due primarily to higher formations, related mainly to one account. Impaired loans in Global Wealth Management increased by \$39 million due to new formations. The gross impaired loan ratio was 88 basis points as at October 31, 2024, an increase of 14 basis points.

Net impaired loans, after deducting the allowance for credit losses, were \$4,685 million as at October 31, 2024, an increase of \$840 million from the prior year. Net impaired loans as a percentage of loans and acceptances were 0.61% as at October 31, 2024, an increase of 11 basis points from 0.50% last year.

Portfolio review

Canadian Banking

Gross impaired loans in the retail portfolio increased by \$247 million to \$1,212 million, due primarily to higher formations in the mortgage portfolio. The allowance for credit losses on impaired loans in the retail portfolio was \$365 million, up \$12 million or 3% from last year.

In the commercial loan portfolio, gross impaired loans increased \$365 million to \$840 million due primarily to higher formations in the Transportation and Food and Beverage sectors. The allowance for credit losses on impaired loans was \$186 million, up \$48 million or 35% from last year.

International Banking

In the retail portfolio, gross impaired loans increased by \$197 million to \$2,252 million, due primarily to higher formations, mainly in Mexico, Peru and Chile, partly offset by the impact of foreign currency translation. The allowance for credit losses on impaired loans in the retail portfolio was \$894 million, an increase of \$92 million or 11% from last year, due primarily to higher formations, partly offset by the impact of foreign currency translation.

In the commercial portfolio, gross impaired loans were \$2,208 million, an increase of \$106 million from last year, due primarily to new formations in Chile and Mexico, partly offset by the impact of foreign currency translation. The allowance for credit losses on impaired loans was \$565 million, an increase of \$3 million or 1% from last year.

Global Wealth Management

Gross impaired loans in Global Wealth Management were \$71 million, an increase of \$39 million from last year, due primarily to higher formations in Canada. The allowance for credit losses on impaired loans was \$21 million, an increase of \$11 million from last year due primarily to higher formations.

Global Banking and Markets

Gross impaired loans in Global Banking and Markets increased by \$59 million to \$156 million, due primarily to new formations related mainly to one account. The allowance for credit losses on impaired loans was \$23 million, an increase of \$7 million from last year.

Risk diversification

The Bank's exposure to various countries and types of borrowers are well diversified (see T64 and T67). Chart C27 shows loans and acceptances by geography. Ontario represents the largest Canadian exposure at 37% of the total. Latin America was 19% of the total exposure and the U.S. was 8%.

Chart C28 shows loans and acceptances by type of borrower (see T67). Corporate loans exposures were real estate and construction (9%), financial services (4% including banks and non-banks) and utilities (3%).

Risk mitigation

To mitigate exposures in its performing corporate portfolios, the Bank uses diversification by company, industry, and country, with loan sales and credit derivatives used sparingly. In 2024, loan sales totaled \$1.1 billion, compared to \$192 million in 2023. As at October 31, 2024, no credit derivatives were used to mitigate loan exposures in the portfolios (October 31, 2023 – nil). The Bank actively monitors industry and country concentrations. As in the case with all industry exposures, the Bank continues to closely follow developing trends and takes additional steps to mitigate risk as warranted.

Overview of loan portfolio

The Bank has a well-diversified portfolio by product, business and geography. Details of certain portfolios of current focus are highlighted below.

C27 Well diversified in Canada and internationally... loans and acceptances, October 2024

C28 ... and in household and business lending loans and acceptances, October 2024

Real estate secured lending

A large portion of the Bank's lending portfolio is comprised of residential mortgages and consumer loans, which are well diversified by borrower. As at October 31, 2024, these loans accounted for \$475 billion or 62% of the Bank's total loans and acceptances outstanding (October 31, 2023 – \$466 billion or 60%). Of these, \$374 billion or 79% are real estate secured loans (October 31, 2023 – \$367 billion or 79%). The tables below provide more details by portfolios.

Insured and uninsured residential mortgages and home equity lines of credit

The following table presents amounts of insured and uninsured residential mortgages and home equity lines of credit (HELOCs), by geographic area.

Alberta	65.3	66.0
British Columbia & Territories	60.8	60.4
Canada ⁽³⁾	61.7%	62.1%
International	71.1%	n/a
For the year ended October 31, 2023		
Canada ⁽³⁾	60.2%	62.9%
International	71.7%	n/a

(1) The measures in this section have been disclosed in this document as required by OSFI Guideline – B20 – Residential Mortgage Underwriting Practices and Procedures (January 2018).

(2) Includes all home equity lines of credit (HELOC). For Scotia Total Equity Plan HELOCs, LTV is calculated based on the sum of residential mortgages and the authorized limit for related HELOCs, divided by the value of the related residential property, and presented on a weighted average basis for newly originated mortgages and HELOCs.

(3) The province represents the location of the property in Canada.

Potential impact on residential mortgages and real estate home equity lines of credit in the event of an economic downturn

As part of its stress testing program, the Bank analyzes the impact of various combinations of home price declines and unemployment increases on the Bank's residential mortgage portfolios. Those results continue to show that credit losses and impacts on capital ratios are within a level the Bank considers manageable. In addition, the Bank has undertaken extensive all-Bank scenario analyses to assess the impact to the enterprise of different scenarios and is confident that it has the financial resources to withstand even a very negative outlook.

Commercial real estate exposures

The Bank's commercial real estate portfolio was \$66.0 billion (October 31, 2023 – \$67.4 billion), or 8.6% (October 31, 2023 – 8.7%) of the Bank's total loans and acceptances outstanding as at October 31, 2024. This portfolio is comprised of 73% of loans to the residential and industrial sector (October 31, 2023 – 73%) both with relatively stable fundamentals. Total exposure to the Office subsector (entities engaged in the construction, development, or ownership of office properties as a business) represents approximately 9% of the commercial real estate portfolio, of which approximately 60% are investment grade facilities, in line with the prior year. U.S. office exposure represents approximately 0.4% (October 31, 2023 – 0.6%) of the portfolio.

Loans to Canadian condominium developers

The Bank had loans outstanding to Canadian condominium developers of \$3,238 million as at October 31, 2024 (October 31, 2023 – \$3,259 million), representing approximately 5% of the commercial real estate portfolio, of which approximately 72% are investment grade facilities, in line with the prior year. This is a portfolio with developers who have long-term relationships with the Bank.

Regional non-retail exposures

The Bank's exposures outside Canada and the U.S. are diversified by region and product and are sized appropriately relative to the credit worthiness of the counterparties (60% of the exposures are to investment grade counterparties based on a combination of internal and external ratings). The Bank's exposures are carried at amortized cost or fair value using observable inputs, with negligible amounts valued using models with unobservable inputs (Level 3). There were no significant events during the year that materially impacted the Bank's exposures.

The Bank has no direct exposure to Russia or Ukraine. While some customers may be negatively impacted by the conflict in the region and by trade restrictions as a result of sanctions, the impact to the Bank, to date, is immaterial and appropriately mitigated.

The Bank's exposure to sovereigns was \$58.9 billion as at October 31, 2024 (October 31, 2023 – \$66.2 billion), \$15.5 billion to banks (October 31, 2023 – \$16.7 billion) and \$111.0 billion to corporates (October 31, 2023 – \$129.2 billion).

In addition to exposures detailed in the table below, the Bank had indirect exposures consisting of securities exposures to non-European entities whose parent company is domiciled in Europe of \$0.3 billion as at October 31, 2024 (October 31, 2023 – \$0.3 billion).

The Bank's regional credit exposures are distributed as follows:

T49 Bank's regional credit exposures distribution

As at October 31	2024							2023
	Loans and loan equivalents ⁽¹⁾	Deposits with financial institutions	Securities ⁽²⁾	SFT and derivatives ⁽³⁾	Funded Total	Undrawn Commitments ⁽⁴⁾	Total	Total

(1) Individual allowances for credit losses are \$570. Letters of credit and guarantees are included as funded exposure as they have been issued. Included in loans and loans equivalent are letters of credit and guarantees which total \$14,446 as at October 31, 2024 (October 31, 2023 – \$16,297).

(2) Exposures for securities are calculated taking into account derivative positions where the security is the underlying reference asset and short trading positions, with net short positions in brackets.

(3) SFT comprise of securities purchased under resale agreements, obligations related to securities sold under repurchase agreements and securities lending and borrowing transactions. Gross and net funded exposures represent all net positive positions after taking into account collateral. Collateral held against derivatives was \$5,568 and collateral held against SFT was \$129,192.

(4) Undrawn commitments represent an estimate of the contractual amount that may be drawn upon by the obligor and include commitments to issue letters of credit on behalf of other banks in a syndicated bank lending arrangement.

(5) Includes Mexico, Chile, Peru, Colombia, Brazil, Uruguay, Venezuela, Ecuador and Argentina.

(6) Includes Middle East and Africa.

Market Risk

Market risk is the risk of loss from changes in market prices and rates (including interest rates, credit spreads, equity prices, foreign exchange rates and commodity prices), the correlations between them, and their levels of volatility. Market risk includes trading risk, investment risk, structural interest rate risk and structural foreign exchange risk. Below is an index of market risk disclosures:

Market risk factors

Interest rate risk

The risk of loss due to changes in the level and/or the volatility of interest rates. This risk affects instruments such as, but not limited to, debt securities, loans, mortgages, deposits and derivatives.

Interest rate risks are managed through sensitivity analysis (including economic value of equity and net interest income), stress testing, and VaR limits and mitigated through portfolio diversification and hedges using interest rate derivatives and debt securities.

Credit spread risk

The risk of loss due to changes in the market price and volatility of credit, or the creditworthiness of issuers. This risk is mainly concentrated in loan and debt securities portfolios. Risk is managed through sensitivity, jump-to-default, stress testing and VaR limits and mitigated through hedges using credit derivatives.

Foreign currency risk

The risk of loss resulting from changes in currency exchange rates and exchange rate volatility. Foreign currency denominated debt and other securities as well as future cash flows in foreign currencies are exposed to this type of risk. Risk is managed through sensitivity, stress testing and VaR limits and mitigated through hedges using foreign exchange positions and derivatives.

Equity risk

The risk of loss due to changes in prices, volatility or any other equity related risk factor of individual equity or equity linked securities. This risk affects instruments such as, but not limited to, equities, exchange traded funds, mutual funds, derivatives and other equity linked products. Risk is managed through sensitivity, stress testing and VaR limits and mitigated through hedges using physical equity and derivatives instruments.

Commodity risk

The risk of loss due to changes in prices or volatility of metal, energy and agriculture products. Risk is managed through sensitivity, stress testing and VaR limits and mitigated through derivative hedges.

The following maps risk factors to trading and non-trading activities:

<u>Non-trading Funding</u>	<u>Investments</u>	<u>Trading</u>
Interest rate risk	Interest rate risk	Interest rate risk
Foreign currency risk	Credit spread risk	Credit spread risk
	Foreign currency risk	Foreign currency risk
	Equity risk	Equity risk
		Commodity risk

Market risk governance

Overview

The Board of Directors reviews and approves market risk policies and limits annually. The Bank's Asset-Liability Committee (ALCO) and Market Risk Management and Policy Committee (MRMPC) oversee the application of the framework set by the Board, and monitor the Bank's market risk exposures and the activities that give rise to these exposures. The MRMPC establishes specific operating policies and sets limits at the product, portfolio, business unit and business line levels, and for the Bank in total. Limits are reviewed at least annually.

Global Risk Management provides independent oversight of all significant market risks, supporting the MRMPC and ALCO with analysis, risk measurement, monitoring, reporting, proposals for standards and support for new product development. To ensure compliance with policies and limits, market risk exposures are independently monitored on a continuing basis, either by Global Risk Management or the back offices. They provide senior management, business units, the ALCO, and the MRMPC with a series of reports on market risk exposures by business line and risk type.

Market risk is also managed through the use of a variety of hedging instruments, including derivatives and securities. These instruments are approved for trading by Global Risk Management and the effectiveness of hedging activity is captured through limits on net exposure to risk factors.

The Bank uses a variety of metrics and models to measure and control market risk exposures. These measurements are selected based on an assessment of the nature of risks in a particular activity. The principal measurement techniques applied to market risk exposure are Value at Risk (VaR), stress testing, and sensitivity analysis. The use and attributes of each of these techniques are noted in the Risk Measurement Summary.

Risk measurement summary

Value at risk (VaR)

VaR is a statistical method of measuring potential loss due to market risk based upon a common confidence interval and time horizon. The Bank calculates VaR daily using a 99% confidence level, and a one-day holding period for its trading portfolios. This means that once in every 100 days, the trading positions are expected to lose more than the VaR estimate. VaR has two components: general market risk and debt specific risk. The Bank calculates general market risk VaR using historical simulation based on 300 days of market data. Obligor specific risk on debt instruments and credit derivatives not captured in general market risk VaR is calculated through the debt specific risk VaR, which uses historical resampling.

All material risk factors are captured in VaR. Where historical data is not available, proxies are used to establish the relevant volatility for VaR until sufficient data is available. Changes in VaR between reporting periods are generally due to changes in positions, volatilities and/or correlations

between asset classes. Backtesting is also an important and necessary part of the VaR process. The Bank backtests the actual trading profit and loss against the VaR result to validate the quality and accuracy of the Bank's VaR model. The Board reviews VaR results quarterly.

Stress testing

A limitation of VaR is that it only reflects the recent history of market volatility. To complement this measure, stress testing examines the impact that abnormally large changes in market factors and periods of prolonged inactivity might have on trading portfolios. Stress testing scenarios are designed to include large shifts in risk factors as well as historical and theoretical multi risk market events. Historical scenarios capture severe movements over periods that are significantly longer than the one-day holding period captured in VaR, such as the Silicon Valley Bank Crisis Scenario, COVID-19 Scenario or the 2008 Financial Crisis Scenario. Stress testing is a dynamic tool which provides management with information on potential losses due to tail events.

The Bank subjects its trading portfolios to a series of daily stress tests. The stress testing program is an essential component of the Bank's comprehensive risk management framework which complements the VaR methodology and other risk measures and controls employed by the Bank.

Sensitivity analysis

In trading portfolios, sensitivity analysis is used to measure the effect of changes in risk factors, including prices and volatility, on financial products and portfolios. These measures apply across product types and geographies and are used for limit monitoring and management reporting.

In non-trading portfolios, sensitivity analysis assesses the effect of changes in interest rates on current earnings and on the economic value of equity. It is applied globally to each of the major currencies within the Bank's operations. The Bank's sensitivity analysis for limit and disclosure purposes is measured through positive and negative parallel shifts in the underlying interest rate curves. These calculations are based on models that consider a number of inputs and are on a constant balance sheet and make no assumptions for management actions that may mitigate the risks. The Bank also performs sensitivity analysis using various non-parallel interest rate curve shifts, for example: curve steepeners, curve flatteners and curve twists.

Validation of market risk models

Prior to the implementation of new market risk models, rigorous validation and testing are conducted. Validation is conducted when the model is initially developed and when any significant changes are made to the model. The models are also subject to ongoing validation, the frequency of which is determined by model risk ratings. Models may also be triggered for earlier revalidation when there have been significant structural changes in the market or changes to the composition of the portfolio. Model validation includes backtesting, and additional analysis such as:

- Theoretical review or tests to demonstrate whether assumptions made within the internal model are appropriate; and
- Impact tests including stress testing that would occur under historical and hypothetical market conditions.

The validation process is governed by the Bank's Model Risk Management Policy.

Market risk from CVA

Credit Valuation Adjustment (CVA) is the adjustment to risk free mark-to-market value of transactions to account for the potential default of a counterparty. CVA risk is the risk of loss arising from changing CVA values in response to changes in counterparty credit spreads and market risk factors.

The CVA risk management framework is governed as part of the Bank's risk management policies which are designed to ensure effective oversight and control of market risk and CVA risks. Regular risk reporting to senior management provides aggregate measures of risk for CVA and is used to ensure compliance with risk appetite, policies, limits, and guidelines. The framework includes independent control units responsible for maintaining the integrity and effectiveness of CVA risk management practices. These units operate separately from the lines of business to ensure unbiased oversight. Regular independent reviews are conducted to assess the effectiveness of the CVA risk management and hedging framework. The governance structure and Bank policies ensure that data acquisition for CVA calculation is independent of the lines of business.

Senior management is actively involved in the risk control process. They oversee the implementation of policies and procedures to identify, measure, monitor, and control CVA risks. Updates to the CVA risk management framework and policies are approved by senior management committees. Senior management receives regular reports on CVA risk exposures and the effectiveness of hedging strategies. This continuous monitoring helps in making informed decisions and maintaining a robust risk management framework.

Non-trading market risk

Funding and investment activities

Market risk arising from the Bank's funding and investment activities is identified, managed and controlled through the Bank's asset-liability management processes. The Asset-Liability Committee meets monthly to review risks and opportunities, and evaluate performance including the effectiveness of hedging strategies.

Interest rate risk

Interest rate risk arising from the Bank's lending, funding and investment activities is managed in accordance with Board-approved policies and global limits, which are designed to control the risk to net interest income and economic value of equity. The net interest income (NII) sensitivity measures the effect of a specified change in interest rates on the Bank's annual net interest income over the next twelve months, while the economic value of equity (EVE) sensitivity measures the impact of a specified change in interest rates on the present value of the Bank's net assets. Limits for both measurements are set according to the documented risk appetite of the Bank. Board-level limit utilization is reported to both the Asset-Liability Committee and the Board on a regular basis. Any limit exceptions are reported according to the Limit Monitoring and Compliance Policy of the Bank.

The net interest income and the economic value of equity result from the differences between yields earned on the Bank's non-trading assets and interest expense paid on its liabilities. Net interest income and economic value of equity sensitivities measure the risk to the Bank's earnings and capital arising from adverse movements in interest rates that affect the Bank's banking book position. The Bank's banking book position reflects the mismatch of the maturity and re-pricing characteristics between the assets and liabilities and optional elements embedded in the Bank's structural balance sheet (e.g. mortgage prepayment). The mismatch and embedded optional elements are inherent in the non-trading operations of the Bank and exposes it to changes of interest rates. The Asset-Liability Committee provides strategic direction for the management of

structural interest rate risk within the risk appetite framework authorized by the Board of Directors. The asset/liability management strategy is executed by Group Treasury with the objective of protecting net interest income within established risk tolerances.

Simulation modeling, sensitivity analysis and stress testing are used to assess exposures and for limit monitoring of the Bank's interest rate risk in the banking book. The Bank's interest rate risk exposure is estimated by simulating the banking book position under a range of rate shocks. The simulations incorporate maturities, renewal, and repricing characteristics of the banking book along with prepayment and redemption behaviour of loans and cashable investment products. Calculations are generally based on the earlier of contractual re-pricing or maturity of on-balance sheet and off-balance sheet assets and liabilities, although certain assets and liabilities such as credit cards and deposits without a fixed maturity are assigned a maturity profile based on the longevity of the exposure. Expected prepayments from loans and cashable investment products are also incorporated into the exposure calculations.

Table T50 shows the pro-forma pre-tax impact on the Bank's net interest income over the next twelve months and economic value of equity of an immediate and sustained 100 basis points parallel increase and decrease in interest rate across major currencies as defined by the Bank. The interest rate sensitivities tabulated are based on models that consider a number of inputs and are on a constant balance sheet. There are no assumptions made for management actions that may mitigate risk. Based on the Bank's interest rate positions at year-end 2024, an immediate and sustained 100 basis point increase in interest rates across all major currencies and maturities would decrease pre-tax net interest income by approximately \$21 million over the next 12 months, assuming no further management actions. During fiscal 2024, this measure ranged between decrease of \$21 million and decrease of \$93 million.

This same increase in interest rates would result in a pre-tax decrease in the present value of the Bank's net assets of approximately \$1,338 million. During fiscal 2024, this measure ranged between \$1,131 million and \$1,587 million. The directional sensitivity of these two key metrics is largely determined by the difference in time horizons (net interest income captures the impact over the next twelve months only, whereas economic value considers the potential impact of interest rate changes on the present value of all future cash flows). The net interest income and economic value results are compared to the authorized Board limits. Both interest rate sensitivities remained within the Bank's approved consolidated limits in the reporting period.

T50 Structural interest sensitivity

	2024		2023	
	Economic Value of Equity	Net Interest Income	Economic Value of Equity	Net Interest Income
As at October 31 (\$ millions)				
Pre-tax impact of				
100bp increase in rates				
Non-trading risk	\$ (1,338)	\$ (21)	\$ (1,256)	\$ (99)
100bp decrease in rates				
Non-trading risk	\$ 780	\$ (31)	\$ 824	\$ 68

Internal risk transfer

As per OSFI Capital Adequacy Requirements (CAR), an internal risk transfer is defined as an internal record of a transfer of risk within the banking or trading book, or between the banking and trading book.

In certain cases, it is more efficient for the Bank to hedge a banking book's interest rate risk exposure through an internal risk transfer to a trading desk which can externalize the risk to the market. This activity is governed by regulatory defined parameters to ensure the market risk is externalized.

Foreign currency risk

Foreign currency risk in the Bank's unhedged funding and investment activities arises primarily from the Bank's net investments in foreign operations as well as foreign currency earnings in its domestic and remitting foreign branch operations.

The Bank's foreign currency exposure to its net investments in foreign operations is controlled by a Board-approved limit. This limit considers factors such as potential volatility to shareholders' equity as well as the potential impact on capital ratios from foreign exchange fluctuations. On a monthly basis, the Asset-Liability Committee reviews the Bank's foreign currency net investment exposures and determines the appropriate hedging strategies. These may include funding the investments in the same currency or using other financial instruments, including derivatives.

Foreign currency translation gains and losses from net investments in foreign operations, net of related hedging activities and tax effects, are recorded in accumulated other comprehensive income within shareholders' equity. However, the Bank's regulatory capital ratios are not materially affected by these foreign exchange fluctuations because the risk-weighted assets of the foreign operations tend to move in a similar direction.

The Bank is also subject to foreign currency translation risk on the earnings of its domestic and remitting foreign branch operations. The Bank forecasts foreign currency revenues and expenses, over a number of future fiscal quarters. The Asset-Liability Committee also assesses economic data trends and forecasts to determine if some or all of the estimated future foreign currency revenues and expenses should be hedged. Hedging instruments normally include foreign currency spot and forward contracts, as well as foreign currency options and swaps. Certain of these economic hedges may not qualify for hedge accounting resulting in a potential for a mismatch in the timing of the recognition of economic hedge gains/losses and the underlying foreign earnings translation gains/losses. In accordance with IFRS, foreign currency translation gains and losses relating to monetary and non-monetary items are recorded directly in earnings.

As at October 31, 2024, a one percent increase (decrease) in the Canadian dollar against all currencies in which the Bank operates decreases (increases) the Bank's before-tax annual earnings by approximately \$45 million (October 31, 2023 – \$63 million) in the absence of hedging activity, due primarily from exposure to U.S. dollars from the Bank's operations in the U.S. and activities conducted internationally in this currency and from exposures to Latin American currencies.

Investment portfolio risks

The Bank holds investment portfolios to meet liquidity and statutory reserve requirements and for investment purposes. These portfolios expose the Bank to interest rate, foreign currency, credit spread and equity risks. Debt investments primarily consist of government, agency, and corporate

bonds. Equity investments include common and preferred shares, as well as a diversified portfolio of third-party managed funds. The majority of these securities are valued using prices obtained from external sources. These portfolios are controlled by a Board-approved policy and limits.

Trading market risk

The Bank's policies, processes and controls for trading activities are designed to achieve a balance between pursuing profitable trading opportunities and managing earnings volatility within a framework of sound and prudent practices. Trading activities are primarily customer focused.

The designation of an instrument as a trading instrument is determined by the Bank's Market Risk Management policies. OSFI's Capital Adequacy Requirements (CAR) guideline prescribes a list of instrument types which are presumed to be part of a Bank's trading portfolio. To assign these instruments to the banking book, certain criteria must be met including OSFI's approval.

The Bank's list of these instruments include equity positions which are outside of the trading business and primarily held for investment, membership in exchanges or to manage the stock-based compensation program. There are also fixed income positions which include positions held for liquidity or regulatory purposes, positions within Wealth Management and loans held as available for sale. As of October 31, 2024, the market value of the instruments mentioned above is \$1,480 million in total.

There has been no case where instruments have been moved between the trading and banking book since the last reporting period.

Market risk arising from the Bank's trading activities is managed in accordance with Board-approved policies, and aggregate VaR and stress testing limits. The quality of the Bank's VaR is validated by regular backtesting analysis, in which the VaR is compared to both theoretical profit and loss results based on fixed end of day positions and actual reported profit and loss. A VaR at the 99% confidence interval is an indication of a 1% probability that losses will exceed the VaR if positions remain unchanged during the next business day. Trading positions are however managed dynamically and, as a result, actual profit/loss backtesting exceptions are uncommon. Aging reports are used to monitor the frequency of turnover of trading portfolio inventory.

Value at Risk (VaR) is a key measure of market risk in the Bank's trading activities. As a result of the implementation of the Fundamental Review of the Trading Book (FRTB) in Q1 2024, VaR, Stressed VaR (sVaR) and the Incremental Risk Charge (IRC) are no longer components of market risk capital. VaR remains a primary measure of market risk, with additional portfolios included in the calculation. Prior period has been revised to conform to the current calculation of VaR.

In fiscal 2024, the total VaR for trading activities averaged \$14.9 million, compared to \$16.4 million in 2023. The change was mainly driven by lower combined credit spread and interest rate risk as well as commodity exposure.

T51 Market risk measures

(\$ millions)	2024				2023			
	Year end	Avg	High	Low	Year end	Avg	High	Low
Credit Spread plus Interest Rate	\$ 12.5	\$ 13.6	\$ 34.3	\$ 6.8	\$ 13.7	\$ 14.6	\$ 23.9	\$ 9.3

Description of trading revenue components and graphical comparison of VaR to daily P&L

Chart C29 compares the daily trading revenue distribution to daily VaR results. Trading revenue includes changes in portfolio value as well as the impact of new trades, commissions, fees and reserves. Some components of revenue which are calculated less frequently are pro-rated. Trading revenue averaged \$13.0 million per day, decreased from \$13.4 million in 2023. Revenue was positive on 100% of trading days during the year, which was better than the level in 2023. The largest single-day trading revenue gain in 2024 was \$59.9 million which occurred on April 30, 2024.

C29 Daily trading revenue vs. VaR

\$ millions, November 1, 2023 to October 31, 2024

Credit valuation adjustment (CVA) risk

Credit Valuation Adjustment (CVA) is the difference between the risk free value of a portfolio and the true value of that portfolio, accounting for the possible default of a counterparty. The CVA adjustment aims to identify the impact of Counterparty Risk.

CVA risk management framework

The CVA risk management is part of the Bank's market risk management framework. The framework includes a market risk limit structure to control the level of risk taken by the Bank. This involves setting limits on various risk factors, such as interest rates, foreign exchange rates, and counterparty credit spreads. The Bank uses various tools to measure CVA risk, including stress testing and sensitivity analysis. Regular management reports are produced to monitor market risk exposure. These reports provide insights into the Bank's risk profile and help in making informed decisions.

Senior management role in the CVA risk management framework.

Senior management is actively involved in the risk control process. They oversee the implementation of policies and procedures to identify, measure, monitor, and control CVA risks. Updates to the CVA risk management framework are approved by senior management committees such as the Market Risk Management & Policy Committee (MRMPC) and the Senior Credit Committee (SCC). Material changes to policies and processes are reviewed and approved by senior executives. Senior management receives regular reports on CVA risk exposures and the effectiveness of hedging strategies. This continuous monitoring helps in making informed decisions and maintaining a robust risk management framework. Senior management ensures that adequate resources are allocated to CVA risk management. This includes staffing independent control units and providing the necessary tools and systems for effective risk management.

An overview of the governance of the CVA risk management framework

The CVA (Credit Valuation Adjustment) risk management framework is governed by the Bank's risk management policies which are designed to ensure effective oversight and control of market risk, including CVA risks. Regular risk reporting to senior management provides aggregate measures of risk for CVA and is used to ensure compliance with risk appetite, policies, limits, and guidelines. The framework includes independent control units responsible for maintaining the integrity and effectiveness of CVA risk management practices. These units operate separately from the lines of business to ensure unbiased oversight. Regular independent reviews are conducted to assess the effectiveness of the CVA risk management framework. These reviews help identify any gaps or areas for improvement and ensure that the framework remains robust and effective. The governance structure and Bank policies ensure that data acquisition for CVA calculation is independent of the lines of business. This independence is crucial for maintaining the accuracy and reliability of the data used in risk assessments.

Processes implemented to identify, measure, monitor and control CVA risks, including policies for hedging CVA risk and the processes for monitoring the continuing effectiveness of hedges

The Bank uses a variety of metrics and models to measure and control CVA risk exposures. These measurements are selected based on an assessment of the nature of risks of CVA. The principal measurement techniques are stress testing and sensitivity analysis.

To ensure compliance with policies and limits, CVA risk exposures are independently monitored on a continuing basis by Global Risk Management. They provide senior management, business units and the MRMPC with a series of reports on CVA risk exposures.

CVA risk is managed using a variety of hedging instruments, including derivatives and securities. These instruments are approved for trading by Global Risk Management and the effectiveness of hedging activity is captured through limits on net exposure to risk factors.

Market risk linkage to Consolidated Statement of Financial Position

Trading assets and liabilities are generally marked-to-market daily and included in trading risk measures and market risk capital. Derivatives captured under trading risk measures are related to market making and hedging of trading exposures. Commencing the first quarter of fiscal 2024, the Bank now calculates market risk capital based on the Standardized Approach under the new Fundamental Review of the Trading Book (FRTB) framework, including its Trading vs. Banking boundary requirements. Prior periods have not been restated. A comparison of Consolidated Statement of Financial Position items which are covered under the trading and non-trading risk measures is provided in the table below.

T52 Market risk linkage to Consolidated Statement of Financial Position of the Bank

As at October 31, 2024 (\$ millions) ⁽¹⁾	Market Risk Measure				Primary risk sensitivity of non-trading risk
	Consolidated Statement of Financial Position	Trading Risk	Non-trading risk	Not subject to market risk

(4) Gold and silver certificates and bullion included in other liabilities.

(5) Includes obligations related to securities sold under repurchase agreements and securities lent and other liabilities.

Derivative instruments and structured transactions

Derivatives

The Bank uses derivatives to meet customer needs, generate revenues from trading activities, manage market and credit risks arising from its lending, and for funding and investment activities. The Bank uses several types of derivative products, including interest rate swaps, futures and options, to hedge interest rate risk exposure. Forward contracts, swaps and options are used to manage foreign currency risk exposures. Credit

exposures in its lending and investment books may be managed using credit default swaps. As a dealer, the Bank markets a range of derivatives to its customers, including interest rate, foreign exchange, equity, commodity and credit derivatives.

Market risk arising from derivatives transactions is subject to the control, reporting and analytical techniques noted above. Additional controls and analytical techniques are applied to address certain market-related risks that are unique to derivative products.

Structured transactions

Structured transactions are specialized transactions that may involve combinations of cash, other financial assets and derivatives designed to meet the specific risk management or financial requirements of customers. These transactions are carefully evaluated by the Bank to identify and address the credit, market, legal, tax, reputational and other risks, and are subject to a cross-functional review and sign-off by Trading Management, Global Risk Management, Taxation, Finance and Legal departments. Large structured transactions are also subject to review by senior risk management committees and evaluated in accordance with the procedures described below in Reputational Risk.

The market risk in these transactions is usually minimal, and returns are earned by providing structuring expertise and by taking credit risk. Once executed, structured transactions are subject to the same ongoing credit reviews and market risk analysis as other types of derivatives transactions. This review and analysis includes careful monitoring of the quality of the reference assets, and ongoing valuation of the derivatives and reference assets.

Liquidity Risk

Liquidity risk is the risk that the Bank is unable to meet its financial obligations in a timely manner at reasonable prices. Financial obligations include liabilities to depositors, payments due under derivative contracts, settlement of securities borrowing and repurchase transactions, and lending and investment commitments.

Effective liquidity risk management is essential to maintain the confidence of depositors and counterparties, manage the Bank's cost of funds and to support core business activities, even under adverse circumstances.

Liquidity risk is managed within the framework of policies and limits that are approved by the Board of Directors. The Board receives reports on risk exposures and performance against approved limits. The Asset-Liability Committee (ALCO) provides senior management oversight of liquidity risk.

The key elements of the liquidity risk framework are:

- Measurement and modeling – the Bank's liquidity model measures and forecasts cash inflows and outflows, including off-balance sheet cash flows on a daily basis. Risk is managed by a set of key limits over the maximum net cash outflow by currency over specified short-term horizons (cash gaps), a minimum level of core liquidity, and liquidity stress tests.
- Reporting – Global Risk Management provides independent oversight of all significant liquidity risks, supporting the ALCO with analysis, risk measurement, stress testing, monitoring and reporting.
- Stress testing – the Bank performs liquidity stress testing on a regular basis, to evaluate the effect of both industry-wide and Bank-specific disruptions on the Bank's liquidity position. Liquidity stress testing has many purposes including:
 - Helping the Bank understand the potential behavior of various on-balance sheet and off-balance sheet positions in circumstances of stress; and
 - Based on this knowledge, facilitating the development of risk mitigation and contingency plans.

The Bank's liquidity stress tests consider the effect of changes in funding assumptions, depositor behavior and the market value of liquid assets. The Bank performs industry standard stress tests, the results of which are reviewed at senior levels of the organization and are considered in making liquidity management decisions.

- Contingency planning – the Bank maintains a liquidity contingency plan that specifies an approach for analyzing and responding to actual and potential liquidity events. The plan outlines an appropriate governance structure for the management and monitoring of liquidity events, processes for effective internal and external communication, and identifies potential counter measures to be considered at various stages of an event. A contingency plan is maintained both at the parent-level as well as for major subsidiaries.
- Funding diversification – the Bank actively manages the diversification of its deposit liabilities by source, type of depositor, instrument, term and geography.
- Core liquidity – the Bank maintains a pool of highly liquid, unencumbered assets that can be readily sold or pledged to secure borrowings under stressed market conditions or due to Bank-specific events. The Bank also maintains liquid assets to support its intra-day settlement obligations in payment, depository and clearing systems.

Liquid assets

Liquid assets are a key component of liquidity management and the Bank holds these types of assets in sufficient quantity to meet potential needs for liquidity management.

Liquid assets can be used to generate cash either through sale, repurchase transactions or other transactions where these assets can be used as collateral to generate cash, or by allowing the asset to mature. Liquid assets include deposits at central banks, deposits with financial institutions, call and other short-term loans, marketable securities, precious metals and securities received as collateral from securities financing and derivative transactions. Liquid assets do not include borrowing capacity from central bank facilities.

Marketable securities are securities traded in active markets, which can be converted to cash within a timeframe that is in accordance with the Bank's liquidity management framework. Assets are assessed considering a number of factors, including the expected time it would take to convert them to cash.

Marketable securities included in liquid assets are comprised of securities specifically held as a liquidity buffer or for asset liability management purposes; trading securities, which are primarily held by Global Banking and Markets; and collateral received for securities financing and derivative transactions.

The Bank maintains large holdings of unencumbered liquid assets to support its operations. These assets generally can be sold or pledged to meet the Bank's obligations. As at October 31, 2024, unencumbered liquid assets were \$310 billion (October 31, 2023 – \$319 billion). Securities, including National Housing Act (NHA) mortgage-backed securities, comprised 81% of liquid assets (October 31, 2023 – 73%). Other unencumbered liquid assets, comprising cash and deposits with central banks, deposits with financial institutions and precious metals, were 19% (October 31, 2023 – 27%). The decrease in total unencumbered liquid assets was primarily attributable to a decrease in cash and deposits with central banks, partly offset by an increase in NHA mortgage-backed securities, precious metals and other liquid securities.

The carrying values outlined in the liquid asset table are consistent with the carrying values in the Bank's Consolidated Statement of Financial Position as at October 31, 2024. The liquidity value of the portfolio will vary under different stress events as different assumptions are used for the stress scenarios.

The Bank's liquid asset pool is summarized in the following table:

T53 Liquid asset pool

As at October 31, 2024 (\$ millions)	Bank-owned liquid assets	Securities received as collateral from securities financing and derivative transactions	Total liquid assets	Encumbered liquid assets		Unencumbered liquid assets

(1) Assets which are restricted from being used to secure funding for legal or other reasons.

A summary of total unencumbered liquid assets held by the parent bank and its branches, and domestic and foreign subsidiaries, is presented below:

T54 Total unencumbered liquid assets held by the parent bank and its branches, and domestic and foreign subsidiaries

As at October 31 (\$ millions)	2024	2023
The Bank of Nova Scotia (Parent)	\$ 235,378	\$ 237,501
Bank domestic subsidiaries	32,769	39,988
Bank foreign subsidiaries	41,862	41,907
Total	\$ 310,009	\$ 319,396

The Bank's liquidity pool is held across major currencies, mostly comprised of Canadian and U.S. dollar holdings. As shown above, the vast majority (86%) of liquid assets are held by the Bank's corporate office, branches of the Bank, and Canadian subsidiaries of the Bank. The Bank monitors and ensures compliance in relation to minimum levels of liquidity required and assets held within each entity, and/or jurisdiction. Potential regulatory restrictions on the transferability of liquid assets held in Bank foreign subsidiaries are taken into consideration in the Bank's liquidity management framework.

Encumbered assets

In the course of the Bank's day-to-day activities, securities and other assets are pledged to secure an obligation, participate in clearing or settlement systems, or operate in a foreign jurisdiction. Securities are also pledged under repurchase agreements. A summary of encumbered and unencumbered assets is presented below:

T55 Asset encumbrance

As at October 31, 2024 (\$ millions) ⁽¹⁾	Bank-owned assets	Securities received as collateral from securities financing and derivative transactions	Total assets	Encumbered assets		Unencumbered assets

Non-financial assets	61,560	–	61,560	–	–	–	61,560
Total	\$ 1,411,043	\$ 98,174	\$ 1,509,217	\$ 322,379	\$ 94,844	\$ 332,460	\$ 759,534

(1) The Bank adopted IFRS 17 effective November 1, 2023. As required under the new accounting standard, prior period amounts have been restated. Refer to Note 4 of the consolidated financial statements.

(2) Assets which are restricted from being used to secure funding for legal or other reasons.

(3) Assets that are readily available in the normal course of business to secure funding or meet collateral needs including central bank borrowing immediately available.

(4) Other unencumbered assets are not subject to any restrictions on their use to secure funding or as collateral but the Bank would not consider them to be readily available. These include loans, a portion of which may be used to access central bank facilities outside of the normal course or to raise secured funding through the Bank's secured funding programs.

(5) Securities received as collateral against other financial assets are included within liquid securities and other securities.

As of October 31, 2024 total encumbered assets of the Bank were \$421 billion (October 31, 2023 – \$417 billion). Of the remaining \$1,066 billion (October 31, 2023 – \$1,092 billion) of unencumbered assets, \$327 billion (October 31, 2023 – \$332 billion) are considered readily available in the normal course of business to secure funding or meet collateral needs as detailed above.

In some over-the-counter derivative contracts, the Bank would be required to post additional collateral or receive less collateral in the event its credit rating was downgraded. The Bank maintains access to sufficient collateral to meet these obligations in the event of a downgrade of its ratings by one or more of the rating agencies. As at October 31, 2024 the potential adverse impact on derivatives collateral that would result from a one-notch or two-notch downgrade of the Bank's rating below its lowest current rating was \$17 million or \$1,230 million, respectively.

Encumbered liquid assets are not considered to be available for liquidity management purposes. Liquid assets which are used to hedge derivative positions in trading books or for hedging purposes are considered to be available for liquidity management provided they meet the criteria discussed in liquid assets above.

Liquidity coverage ratio

The Liquidity Coverage Ratio (LCR) measure is based on a 30-day liquidity stress scenario, with assumptions defined in the Liquidity Adequacy Requirements (LAR) Guideline issued by the Office of the Superintendent of Financial Institutions (OSFI). The LCR is calculated as the ratio of high quality liquid assets (HQLA) to net cash outflows. The Bank is subject to a regulatory minimum LCR of 100%.

HQLA are defined in the LAR Guideline and are grouped into three main categories with varying haircuts applied to arrive at the amount included in the total weighted value in the table that follows.

The total weighted values for net cash outflows for the next 30 days are derived by applying the assumptions specified in the LAR Guideline to specific items, including loans, deposits, maturing debt, derivative transactions and commitments to extend credit.

The following table presents the Bank's average LCR for the quarter ended October 31, 2024 based on the average daily position in the quarter.

T56 Bank's average LCR⁽¹⁾

For the quarter ended October 31, 2024 (\$ millions) ⁽²⁾	Total unweighted value (Average) ⁽³⁾	Total weighted value (Average) ⁽⁴⁾
High-quality liquid assets		
Total high-quality liquid assets (HQLA)	*	\$ 261,820
Cash outflows		
Retail deposits and deposits from small business customers, of which:	\$ 243,477	\$ 24,840
Stable deposits	100,986	3,246
Less stable deposits	142,492	21,594
Unsecured wholesale funding, of which:	296,528	126,887
Operational deposits (all counterparties) and deposits in networks of cooperative banks	114,881	27,720
Non-operational deposits (all counterparties)	169,414	86,934
Unsecured debt	12,233	12,233
Secured wholesale funding	*	64,556
Additional requirements, of which:	259,681	57,134
Outflows related to derivative exposures and other collateral requirements	38,803	20,732
Outflows related to loss of funding on debt products	6,260	6,260
Credit and liquidity facilities	214,618	30,142
Other contractual funding obligations	1,463	1,462
Other contingent funding obligations ⁽⁵⁾	570,464	8,384
Total cash outflows	*	\$ 283,263
Cash inflows		
Secured lending (e.g. reverse repos)	\$ 295,509	\$ 38,681
Inflows from fully performing exposures	34,775	20,439
Other cash inflows	23,757	23,757
Total cash inflows	\$ 354,041	\$ 82,877
		Total adjusted value ⁽⁶⁾
Total HQLA	*	\$ 261,820
Total net cash outflows	*	\$ 200,386
Liquidity coverage ratio (%)	*	131%

For the quarter ended October 31, 2023 (\$ millions)		Total adjusted value ⁽⁶⁾
Total HQLA	*	\$ 272,637
Total net cash outflows	*	\$ 201,155
Liquidity coverage ratio (%)	*	136%

* Disclosure is not required under regulatory guideline.

(1) This measure has been disclosed in this document in accordance with OSFI Guideline – Public Disclosure Requirements for Domestic Systemically Important Banks on Liquidity Coverage Ratio (April 2015).

(2) Based on the average daily positions of the 62 business days in the quarter.

(3) Unweighted values represent outstanding balances maturing or callable within the next 30 days.

(4) Weighted values represent balances calculated after the application of HQLA haircuts or inflow and outflow rates, as prescribed by the LAR Guideline.

(5) Total unweighted value includes uncommitted credit and liquidity facilities, guarantees and letters of credit, outstanding debt securities with remaining maturity greater than 30 days, and other contractual cash outflows.

(6) Total adjusted value represents balances calculated after the application of both haircuts and inflow and outflow rates and any applicable caps.

HQLA is substantially comprised of Level 1 assets (as defined in the LAR Guideline), such as cash, deposits with central banks available to the Bank in times of stress, and highly rated securities issued or guaranteed by governments, central banks and supranational entities.

The decrease in the Bank's average LCR for the quarter ended October 31, 2024 versus the quarter ended October 31, 2023 was mainly attributable to lower HQLA. Net cash outflows were largely unchanged as an increase in outflows from securities borrowing/lending was offset by a decrease in outflows from unsecured wholesale funding. The Bank monitors its significant currency exposures, Canadian and U.S. dollars, in accordance with its liquidity risk management framework and risk appetite.

Net stable funding ratio

The Net Stable Funding Ratio (NSFR) requires institutions to maintain a stable funding profile in relation to the composition of their assets and off-balance sheet exposures. It is calculated as the ratio of available stable funding (ASF) to required stable funding (RSF), with assumptions defined in the LAR Guideline. The Bank is subject to a regulatory minimum NSFR of 100%.

ASF is defined as the portion of capital and liabilities expected to be reliable over the time horizons considered by the NSFR. RSF is a function of the liquidity characteristics and residual maturities of the various assets held by the Bank as well as those of its off-balance sheet exposures.

The total weighted values for ASF and RSF included in the table that follows are derived by applying the assumptions specified in the LAR Guideline to balance sheet items, including capital instruments, wholesale funding, deposits, loans and mortgages, securities, derivatives and off-balance sheet items such as commitments to extend credit.

The following table presents the Bank's NSFR as at October 31, 2024.

T57 Bank's NSFR⁽¹⁾

As at October 31, 2024 (\$ millions)	Unweighted Value by Residual Maturity				Weighted value ⁽³⁾

Total RSF					\$ 656,747
Net Stable Funding Ratio (%)					119%

(1) This measure has been disclosed in this document in accordance with the LAR Guideline – Net Stable Funding Ratio Disclosure Requirements (January 2021).

(2) Items in the "no maturity" time bucket do not have a stated maturity. These may include, but are not limited to, items such as capital with perpetual maturity, non-maturity deposits, short positions, open maturity positions, non-HQLA equities, and physical traded commodities.

(3) Weighted values represent balances calculated after the application of ASF and RSF rates, as prescribed by the LAR Guideline.

(4) Interdependent assets and liabilities are primarily comprised of transactions related to the Canada Mortgage Bond program.

As at October 31, 2023 (\$ millions)	Weighted value
Total ASF	\$ 772,315
Total RSF	665,144
Net stable funding ratio (%)	116%

Available stable funding (ASF) is primarily provided by the Bank's large pool of retail, small business and corporate customer deposits; secured and unsecured wholesale funding and capital. Required stable funding (RSF) primarily originates from the Bank's loan and mortgage portfolio, securities holdings, off-balance sheet items and other assets.

The Bank's NSFR as at October 31, 2024 was higher than the previous year due to a combination of higher ASF and lower RSF. Higher ASF from retail deposits and deposits from small business customers were partly offset by lower ASF from wholesale funding. Lower RSF from performing loans were partly offset by higher RSF from high quality liquid assets and other assets.

Funding

The Bank ensures that its funding sources are well diversified. Funding concentrations are regularly monitored and analyzed by type. The sources of funding are capital, deposits from retail and commercial clients sourced through the Canadian and international branch network, deposits from financial institutions as well as wholesale debt issuances.

Capital and personal deposits are key components of the Bank's funding and these amounted to \$398 billion as at October 31, 2024 (October 31, 2023 – \$385 billion). The increase since October 31, 2023 is due to growth of \$10 billion in personal deposits and common equity of \$3 billion from earnings and the impact of the Shareholder Dividend and Share Purchase Plan. The Bank's funding is also comprised of commercial deposits, particularly those of an operating or relationship nature. Capital and customer deposit based funding is augmented by wholesale debt issuances, the longer term (original maturity over 1 year) portion of which amounts to \$206 billion (October 31, 2023 – \$216 billion). Longer term wholesale debt issuances include senior notes, mortgage securitizations, asset-backed securities and covered bonds.

The Bank operates in many different currencies and countries. From a funding perspective, the most significant currencies are Canadian and U.S. dollars. With respect to the Bank's operations outside Canada, there are different funding strategies depending on the nature of the activities in each country. For those countries where the Bank operates a branch banking subsidiary, the strategy is for the subsidiary to be substantially self-funding in its local market. For other subsidiaries or branches outside Canada where local deposit gathering capability is not sufficient, funding is provided through the wholesale funding activities of the Bank.

From an overall funding perspective, the Bank's objective is to achieve an appropriate balance between the cost and the stability of funding. Diversification of funding sources is a key element of the funding strategy.

The Bank's wholesale debt diversification strategy is primarily executed via the Bank's main wholesale funding centres, located in Toronto, New York, London and Singapore. The majority of these funds are sourced in Canadian and U.S. dollars. Where required, these funds are swapped to fund assets in different currencies. The funding strategy deployed by wholesale funding centres and the management of associated risks, such as geographic and currency risk, are managed centrally within the framework of policies and limits that are approved by the Board of Directors.

In the normal course, the Bank uses a mix of unsecured and secured wholesale funding instruments across a variety of markets. The choice of instruments and markets is based on a number of factors, including relative cost, market capacity and diversification of funding. Market conditions can change over time, impacting cost and capacity in particular markets or instruments. Changing market conditions can include periods of stress where the availability of funding in particular markets or instruments is constrained. In these circumstances, the Bank would increase its focus on sources of funding in functioning markets and secured funding instruments. Should a period of extreme stress exist such that all wholesale funding sources are constrained, the Bank maintains a pool of liquid assets to mitigate its liquidity risk. This pool includes cash, deposits with central banks and securities.

In Canada, the Bank raises short and longer-term wholesale debt through the issuance of senior unsecured notes. Additional longer-term wholesale debt may be generated through the Bank's Canadian Debt and Equity Shelf, the securitization of Canadian insured residential mortgages through CMHC programs (such as Canada Mortgage Bonds), uninsured residential mortgages through the Bank's Covered Bond Program, retail credit card receivables through the Trillium Credit Card Trust II program, retail indirect auto loan receivables through the Securitized Term Auto Receivables Trust program and unsecured personal lines of credit through the Halifax Receivables Trust program. CMHC securitization programs, while included in the Bank's view of wholesale debt issuance, do not entail the run-off risk that can be experienced in funding raised from capital markets.

Outside of Canada, short-term wholesale debt may be raised through the issuance of negotiable certificates of deposit in the United States, Hong Kong, the United Kingdom, and Australia and the issuance of commercial paper in the United States. The Bank operates longer-term wholesale debt issuance registered programs in the United States, such as its SEC Registered Debt and Equity Shelf, and non-registered programs, such as the securitization of retail indirect auto loan receivables through the Securitized Term Auto Receivables Trust program and retail credit card receivables through the Trillium Credit Card Trust II program. The Bank may issue its Covered Bond Program (listed with the U.K. Listing Authority and the Swiss Stock Exchange), in Europe, the United Kingdom, the United States, Australia and Switzerland. The Bank also raises longer-term funding across a variety of currencies through its Australian Medium Term Note Programme, European Medium Term Note Programme (listed with the U.K. Listing Authority and the Swiss Stock Exchange) and Singapore Medium Term Note Programme (listed with the Singapore Exchange and the Taiwan Exchange).

The Department of Finance's bail-in regulations under the Canada Deposit Insurance Corporation (CDIC) Act and the Bank Act, became effective September 23, 2018. Senior long-term debt issued by the Bank on or after September 23, 2018, that has an original term greater than 400 days and is marketable, subject to certain exceptions, is subject to the Canadian Bank Recapitalization (Bail-in) regime. Under the Bail-in regime, in circumstances when the Superintendent of Financial Institutions has determined that a bank may no longer be viable, the Governor in Council may, upon a recommendation of the Minister of Finance that they are of the opinion that it is in the public interest to do so, grant an order directing the CDIC to convert all or a portion of certain shares and liabilities of that bank into common shares.

The table below provides the remaining contractual maturities of funding raised through wholesale funding. In the Consolidated Statement of Financial Position, these liabilities are primarily included in Business & Government Deposits.

(1) Wholesale funding sources exclude obligations related to securities sold under repurchase agreements and bankers' acceptances, which are disclosed in the contractual maturities table below. Amounts are based on remaining term to maturity.

(2) Only includes commercial bank deposits.

(3) Wholesale funding sources also exclude asset-backed commercial paper (ABCP) issued by certain ABCP conduits that are not consolidated for financial reporting purposes.

(4) Not subject to bail-in.

(5) Includes structured notes issued to institutional investors.

(6) Represents residential mortgages funded through Canadian Federal Government agency sponsored programs. Funding accessed through such programs does not impact the funding capacity of the Bank in its own name.

(7) Although subordinated debentures are a component of regulatory capital, they are included in this table in accordance with EDTF recommended disclosures.

Wholesale funding generally bears a higher risk of run-off in a stressed environment than other sources of funding. The Bank mitigates this risk through funding diversification, ongoing engagement with investors and by maintaining a large holding of unencumbered liquid assets. Unencumbered liquid assets of \$310 billion as at October 31, 2024 (October 31, 2023 – \$319 billion) were well in excess of wholesale funding sources that mature in the next twelve months.

Contractual maturities and obligations

The table below provides the maturity of assets and liabilities as well as the off-balance sheet commitments as at October 31, 2024, based on the contractual maturity date.

From a liquidity risk perspective the Bank considers factors other than contractual maturity in the assessment of liquid assets or in determining expected future cash flows. In particular, for securities with a fixed maturity date, the ability and time horizon to raise cash from these securities is more relevant to liquidity management than contractual maturity. For other assets and deposits the Bank uses assumptions about rollover rates to assess liquidity risk for normal course and stress scenarios. Similarly, the Bank uses assumptions to assess the potential drawdown of credit commitments in various scenarios.

The Bank's contractual obligations include contracts and purchase obligations, including agreements to purchase goods and services that are enforceable, legally binding on the Bank and affect the Bank's liquidity and capital resource needs. The Bank leases a large number of its branches, offices and other locations. The majority of these leases are for a term of five years, with options to renew.

Guarantees and letters of credit ⁽⁵⁾	—	—	—	—	—	—	—	—	49,112	49,112
Outsourcing obligations ⁽⁶⁾	18	35	52	52	52	39	33	24	—	305

(1) The Bank adopted IFRS 17 effective November 1, 2023. As required under the new accounting standard, prior period amounts have been restated. Refer to Note 4 of the consolidated financial statements.

(2) Includes primarily impaired mortgages.

(3) Includes primarily overdrafts and impaired loans.

(4) Includes the undrawn component of committed credit and liquidity facilities.

(5) Includes outstanding balances of guarantees, standby letters of credit and commercial letters of credit which may expire undrawn.

(6) The Bank relies on outsourcing arrangements for certain support and/or business functions, including, but not limited to, computer operations and cheque and bill payment processing.

Principal Risks – Non-Financial

Money Laundering, Terrorist Financing and Sanctions Risk

Money Laundering / Terrorist Financing (ML/TF) and Sanctions risks are the susceptibility of Scotiabank to be used by individuals or organizations to launder the proceeds of crime, finance terrorism, or violate economic sanctions. It also includes the risk that Scotiabank does not comply with applicable Anti-Money Laundering (AML)/Anti-Terrorist Financing (ATF) or Sanctions legislation or does not apply adequate controls reasonably designed to deter and detect ML/TF and sanctions violations or to file required regulatory reports.

Money laundering, terrorist financing and sanctions risks are managed throughout the Bank via the operation of the Bank's AML/ATF and Sanctions Program ("the AML/ATF Program"). The Group Chief Anti-Money Laundering Officer is responsible for the AML/ATF Program, which includes the development and application of compliance policies, procedures, the assessment of money laundering, terrorist-financing and sanctions risks, and the maintenance of an ongoing training program. The effectiveness of the AML/ATF and Sanctions Program is subject to regular review and independent assessment conducted by the Audit Department. Global Compliance & AML establishes enterprise standards to assess clients for money laundering, terrorist financing and sanctions risk.

The Bank conducts an enterprise-wide annual self-assessment of the money laundering/terrorist financing (ML/TF) and sanctions risks inherent in its business units, as well as an assessment of the control measures in place to manage those risks. The process is led by Global Compliance & AML, the results of which are shared with the Bank's senior management. All active employees are provided with mandatory AML/ATF and Sanctions training on an annual basis. The Bank performs Client Due Diligence sufficient to form a reasonable belief that it knows the true identity of its clients, including in the case of an entity, its material ultimate beneficial owners.

The Bank will not maintain anonymous accounts, nor will it maintain accounts for shell banks. Consistent with a risk-based approach, the Bank assesses the risks of its clients and, where appropriate, conducts enhanced due diligence on those who are considered higher risk. The Bank also conducts ongoing risk tailored monitoring of its clients to detect and report suspicious transactions and activity, and conducts client and transaction screening against terrorist, sanctions, and other designated watch-lists.

Operational Risk

Operational risk is the risk of loss resulting from people, inadequate processes and systems, or from external events. Operational risk includes third party risk, fraud risk and legal risk. It exists in some form in each of the Bank's business and support activities, and third parties with whom the Bank has entered a business or strategic arrangement for outsourcing activities, the provision of products or services, or other benefits. It can result in financial loss, regulatory sanctions and damage to the Bank's reputation. Operational risk management refers to the discipline of systematic identification, assessment, measurement, mitigation, monitoring, and reporting of operational risk.

The Bank's Operational Risk Management Framework (ORMF) outlines a structured approach for the effective management of enterprise-wide operational risk in a manner consistent with best practices and regulatory requirements. The ORMF is supplemented by additional policies, processes, standards and methodologies. The ORMF supports the governance and management of all other non-financial risks. The Framework is approved by the Bank's Operational Risk Committee and addresses program governance, risk culture and risk appetite along with the following key program components:

Risk Identification and Assessment

Risk identification and assessment is a critical part of effectively managing operational risk. Risks are identified, classified and assessed. Their potential impact is evaluated and reported to management and the Board. Operational risk management tools and programs are in place to support the identification and assessment of operational risk with each having their defined methodology and/or standards. The key tools include Risk and Control Self-Assessment (RCSA), Scenario Analysis, and New Initiatives Risk Assessment (NIRA).

Risk Measurement

A key component of risk management is quantifying the size and scope of the Bank's operational risk exposure. The collection and analysis of operational risk event data and operational risk capital values provide meaningful information to measure operational risk. The data provides meaningful information for assessing and mitigating operational risk exposure at the Bank as a result of event root cause analysis and evaluation of internal controls. Timely, accurate and complete reporting of internal operational risk events, and their analyses, ensures that the Bank maintains a strong risk culture, promotes transparency, and enables the following:

- Monitoring risk exposure, and to assess if the Bank is operating within risk appetite.
- Contributes to the assessment of the effectiveness of the operational control environment.
- Causal analysis to identify deficiencies and control failures that can be mitigated to prevent recurrence of future events.
- Compliance with Basel III Standardized Approach (SA) requirements for the calculation of operational risk capital.

Operational Risk Capital refers to regulatory and internal capital which is quantified as a reserve for unexpected losses resulting from operational risk. Operational risk capital is a component of the total amount of risk capital that the Bank holds. Loss data from OREs are collected in the Bank's Operational Risk Management System (OpenPages) and used for reporting purposes. When combined with Business Indicator Component (BIC)¹ data, the loss data captured from OREs is a critical input for the calculation of the Bank's Internal Loss Multiplier (ILM)², which is included in the operational risk regulatory capital calculation.

Risk Mitigation and Control

Operational risk response decisions include mitigation, transfer, acceptance, and avoidance of operational risks. The appropriate response will be determined based on consideration of the nature of the risks, their potential impacts and the consideration of the Bank's Code of Conduct and risk appetite thresholds. Through the Bank's operational risk management tools, issues such as deficiencies in the design or operating effectiveness of a control may be identified. When issues are identified, action plans can be developed to address them, or, where appropriate, the risk associated with these issues can be accepted. Action plans are managed by action owners to ensure the detailed plans are executed timely and effectively.

¹ Business Indicator Component (BIC) is calculated by multiplying the Business Indicator (BI) by set of regulatory determined marginal coefficients. The BI is a financial statement-based proxy for operational risk.

² Internal Loss Multiplier (ILM) is a scaling factor that is based on an institution's average historical losses and the BIC.

Controls are identified and assessed through the various Operational Risk Management tools. In cases where controls are deemed deficient a response will be required which will in turn help to mitigate residual risk.

Risk Monitoring, Analytics, and Reporting

The Bank has processes in place for the ongoing monitoring of operational risk. These monitoring activities can provide an early warning of emerging issues, triggering timely management response. In addition, these activities allow for review and analysis of the risk profile in relation to risk appetite or other key indicators to identify when potential risk events may be approaching or exceeding thresholds, requiring action and/or escalation. Operational risk data is collected in risk systems and used for reporting. Operational risk reporting facilitates distribution and escalation of operational risk information to the relevant parties, including the Operational Risk Committee, as well as senior management and the Board via the Enterprise Risk Management report. It provides stakeholders involved in operational risk management activities access to reliable data in a consistent and timely manner to support risk-based decision making.

Cyber Security and Information Technology (IT) Risk

Cyber Security Risk is the risk of loss of confidentiality, integrity, or availability of information, data, or information systems and reflect the potential adverse impacts to organizational operations (i.e., mission, functions, image, or reputation) and assets, customers, and other stakeholders. Information Technology Risk is the risk of financial loss, disruption or damage to reputation from a failure of information technology systems.

The Cyber Security and IT risk landscape continues to evolve across the financial industry. The increasing use of digital delivery channels to deliver financial services exposes the Bank to various vectors of attack. Threat actors, including individuals, organized crime rings and nation state sponsored entities, continue to target financial institutions to steal data, money or to disrupt operations. These events can adversely impact the Bank's operational environment, our customers and other third parties.

The Board of Directors approves the Information Technology and Information Security Risk Summary Framework, which along with its respective policies and other frameworks are focused on safeguarding the Bank and its customers' information, ensuring the Bank's IT environment is secure and resilient in support of our business objectives. The Bank continues to expand its cyber security capabilities to defend against potential threats and minimize impact to the business.

Compliance Risk

Compliance Risk is the risk of an activity not being conducted in conformity with applicable laws, rules, regulations, and prescribed practices ("regulatory requirements"), and compliance-related internal policies and procedures and ethical standards expected by regulators, customers, investors, employees and other stakeholders. Compliance Risk includes Regulatory Compliance Risk, Conduct Risk, and Privacy Risk.

Regulatory compliance risk: the risk that business activity may not be conducted in conformity with all applicable regulatory requirements wherever the Bank does business.

Conduct Risk: an aggregation of risks arising from actions or behaviours of the Bank's officers, directors, employees, or the conduct of the Bank's business (directly or indirectly), not in conformity with the Bank's values or principles for ethical conduct and which has, or has the potential to have, an adverse impact on the Bank, the Bank's customers or employees, or integrity of the financial markets in which the Bank operates.

Privacy Risk: the risk that arises from contraventions of applicable privacy laws, regulations, standards, and regulatory expectations; ethical or operational standards set out in the Scotiabank Code of Conduct (our 'Code'), or other Bank policies, procedures, manuals, guidelines; and/or employees' responsibility to respectfully treat the Personally Identifiable Information (PII) of the Bank's customers, employees, and other stakeholders.

The Board approves the Compliance Risk Summary Framework which provides an overview of the key governance components, responsibilities and programs which support the Bank in effectively managing Compliance Risk as a part of the Bank's Compliance Program. The Bank is required to comply with E-13 guidelines as set out by the Office of the Superintendent of Financial Institution (OSFI) with respect to the management of regulatory compliance risk. Regulatory compliance management at the Bank is governed by the Compliance Management Framework (CMF). The primary objective of the Bank's CMF is to provide assurance that the Bank's business activities are being conducted in a manner compliant with all applicable regulations in the Bank's countries of operations and in line with the Bank's risk appetite.

Environmental, Social and Governance Risk

ESG Risk is the risk that an environmental (including climate risk), social, or governance event, or condition, which if occurs could cause an actual or potential negative impact to the Bank.

The Bank considers Environmental Risk to be the potential adverse impacts to the Bank because of climate change and/or damage to the natural environment or biodiversity, such as land, water, plants, natural resources, ecosystems, and the atmosphere. The physical and transition risks associated with climate change are a component of Environmental Risk.

Social Risk is the risk of potential adverse impacts to the Bank that can arise due to the mismanagement of social considerations that can cause actual or perceived negative impacts on people and communities. Social considerations include, but are not limited to, human rights (including human trafficking and modern slavery); Indigenous rights; labour standards and working conditions; diversity, equity, and inclusion; accessibility; community health, safety, and security; disadvantaged and vulnerable groups; cultural property and heritage; and land acquisition and involuntary resettlement.

Corporate governance refers to the oversight mechanisms and the way in which the Bank is governed. It encompasses the Bank's policies and processes, how decisions are made, and how it deals with the various interests of, and relationships with, its many stakeholders, including shareholders, customers, employees, regulators, and the broader community. Governance Risk is the risk of potential adverse impacts to the Bank stemming from poor or ineffective corporate governance mechanisms and controls.

Governance

Board Oversight

The Board of Directors and its committees provide oversight of ESG Risk to ensure alignment with the Bank's strategies and risk appetite. It also approves key risk policies, frameworks and limits. The following Board committees provide ongoing oversight:

- *Risk Committee*: Retains oversight of ESG Risks, including climate-related risks, and periodically reviews and approves the Bank's key risk management policies, frameworks, and limits to ensure that management is operating within the Bank's Enterprise Risk Appetite Framework.

- *Corporate Governance Committee*: Evaluates the Bank's environmental and social performance and assesses best practices for ESG disclosure; examines current and emerging ESG topics, considers their implications on the Bank's strategy and reviews the Bank's annual ESG Report; and acts in an advisory capacity through a continuing assessment of the Bank's approach to corporate governance and makes policy recommendations, including on topics such as human rights.
- *Audit & Conduct Review Committee*: Oversees climate-related disclosure as part of the Bank's financial reporting, sets standards of conduct for ethical behaviour and oversees conduct risk management, and consumer protection.
- *Human Capital & Compensation Committee*: Oversees human capital and compensation strategies related to diversity, equity and inclusion, employee health, safety, and well-being and other ESG policies and practices.

Management's Role

The Board of Directors is supported by the President and Chief Executive Officer (CEO) and Chief Risk Officer (CRO). The CRO has delegated their authority over the oversight of ESG risk to the Operational Risk Committee (ORC). The ORC provides effective oversight and challenge of the Bank's management of environmental and social risks. Its responsibilities include monitoring of the ESG risk profile, reviewing and approving ESG Risk frameworks, policies, risk appetite statements and limits.

The Bank actively monitors policy and legislative requirements through ongoing dialogue with government, industry, and stakeholders in the countries where it operates. Scotiabank regularly meets with various external stakeholders, including industry associations, with respect to roles that banks can play on ESG related issues and to share best practices.

Risk Management

The Bank's approach for the effective management of ESG risk is governed by our ESG Risk Management Framework in a manner consistent with the Enterprise-wide Risk Management Framework. The ESG Risk Management Framework describes the guiding principles, program elements, and roles and responsibilities relating to the Bank's management of ESG risk and establishes the minimum requirements for the integration of ESG risk considerations into the decision-making processes across other risk types and business strategies, activities and internal operations. This framework assists the Bank as we continue to advance our capabilities in managing ESG risks in a manner that is consistent with regulatory requirements, industry standards, best practices, and risk appetite.

The ESG Risk Management framework is supported by additional policies, processes, and guidelines, designed to help mitigate ESG Risk or advance responsible practices. For example, Scotiabank is a signatory to the Equator Principles (EPs) framework, which enables the Bank, in partnership with our clients, to identify, assess, manage and report environmental and social risks and impacts associated with the large-scale infrastructure and industrial development projects. We also have policies in place related to our financing activities to oil and gas projects in the Arctic Circle, and to projects related to thermal coal mining and power, UNESCO World Heritage Sites and Wetlands of International Importance, and illegal logging and wildlife trade. Our approach to respecting and promoting human rights is communicated in the Scotiabank Code of Conduct and in the Global Human Rights Statement.

The Bank has set a number of enterprise-wide commitments that aim to address climate-related risks and opportunities in the short, medium, and long term. Scotiabank is a member of the Net Zero Banking Alliance (NZBA), re-enforcing the Bank's commitment in playing a significant role to finance the climate transition to reach the goal of net-zero by 2050. As a member of the NZBA, we have committed to setting and disclosing interim emissions reduction targets for certain high-emitting sectors. The Bank has also committed to provide \$350 billion by 2030 in climate-related finance to support clients in their strategies to address climate change and other environmental goals. Our Climate Related Finance Framework outlines the financial product and services we offer in support of these objectives. Additional information on the Bank's approach to climate change risk management and strategy will be provided in our 2024 Climate Report.

Data Risk

Data risk is the risk of exposure to the adverse financial and non-financial consequences (e.g., revenue loss, reputational risk, regulatory risk, sub-optimal management decisions) caused by mismanagement, misunderstanding or misuse of the Bank's data assets. This risk may arise from poor data quality; inadequate data management or data architecture; and/or unethical data usage.

The Data Risk Management Framework (DRMF) outlines the overarching guiding principles for data risk management and defines the governance structure of the enterprise data risk management program, recognizing the collaborative nature of data risk management and oversight. The Data Risk Management Policy (DRMP) categorizes and explains risks associated with data, and outlines the interaction model and roles and responsibilities for key stakeholders involved in managing data risk across the organization.

Model Risk

Model risk is the risk of adverse financial (e.g., capital, losses, revenue) and reputational consequences arising from the design, development, implementation and/or use of a model. It can originate from, among other things, inappropriate specifications; incorrect parameter estimates; flawed hypotheses and/or assumptions; mathematical computation errors; inaccurate, inappropriate or incomplete data; inappropriate, improper or unintended usage; and inadequate monitoring and/or controls.

The Model Risk Management Framework outlines the Bank's approach for effective governance and oversight of model risk consistent with the policies and processes outlined in the Bank's Model Risk Management Policy (MRMP). The MRMP describes the overarching principles, policies, and procedures that provide the framework for managing model risk. All models, whether developed by the Bank or vendor-supplied, that meet the Bank's model definition are covered by this Policy. The MRMP also clearly defines roles and responsibilities for key stakeholders involved in the model risk management cycle.

Reputational Risk

Reputational risk is the risk that negative publicity or stakeholder sentiment regarding Scotiabank's conduct, business practices or associations, whether true or not, will adversely affect its revenues, operations or customer base, or require costly litigation or other defensive measures.

The Bank has an Enterprise Reputational Risk Policy, as well as other policies and procedures for managing suitability risk, and reputational and legal risk related to various transactions, relationships or other Bank activities. Reputational risk is managed and controlled by the Scotiabank Code

of Conduct, governance practices and risk management programs, policies, procedures, and training. All directors, officers and employees have a responsibility to conduct their activities in accordance with the Scotiabank Code of Conduct, and in a manner that minimizes reputational risk. The activities of the Legal; Global Tax; Corporate Secretary; Global Communications; Global Compliance & AML, and Global Risk Management departments, as well as the Reputational Risk Committee, are particularly oriented to the management of reputational risk.

Strategic Risk

Strategic risk is the risk that the enterprise, business lines or corporate functions will make strategic choices that are inappropriate or insufficiently resilient to changes in the business environment, or ineffectively execute such strategies.

The Board is ultimately responsible for oversight of strategic risk, by ensuring a robust strategic planning process and approving, on an annual basis, the strategic plan for the Bank. Changes in our business strategy can impact our risk appetite and therefore the Annual Strategy Report to the Board of Directors considers linkages between the Bank's Enterprise Risk Appetite Framework and the enterprise strategy, business line strategies and how the corporate functions support the business lines in the execution of their strategic plans. The Board reviews this material, along with other relevant strategic and financial presentations by management throughout the year in order to provide the appropriate governance.

The strategic planning process is managed by Enterprise Strategy which supports the management of strategic risk throughout the planning process by ensuring alignment across our business, financial, capital and risk planning. Global Risk Management also provides oversight of strategic risk by providing independent reviews throughout the strategic planning process, establishing enterprise risk frameworks, and independently monitoring and reporting on the level of risk established against our risk appetite metrics.

The development, evaluation and execution of the Bank's strategic plans is owned by the Management team of the Bank. They participate actively in the annual planning process and on an ongoing basis, Heads of Business Lines and Corporate Functions identify, manage, and assess the internal and external risks that could impede achievement of, or progress of, strategic objectives. The executive management team regularly meets to evaluate the effectiveness of the Bank's strategic plan, and consider what amendments, if any, are required.

Controls and Accounting Policies

Controls and Procedures

Management's responsibility for financial information contained in this annual report is described on page 136.

Disclosure controls and procedures

The Bank's disclosure controls and procedures are designed to provide reasonable assurance that information is accumulated and communicated to the Bank's management, including the President and Chief Executive Officer and the Group Head and Chief Financial Officer, as appropriate, to allow timely decisions regarding required disclosure.

As of October 31, 2024, the Bank's management, with the participation of the President and Chief Executive Officer and the Group Head and Chief Financial Officer, evaluated the effectiveness of its disclosure controls and procedures, as defined under the rules adopted by the U.S. Securities and Exchange Commission (SEC) and the Canadian securities regulatory authorities, and have concluded that the Bank's disclosure controls and procedures are effective.

Internal control over financial reporting

Management of the Bank is responsible for establishing and maintaining adequate internal control over financial reporting. These controls include policies and procedures that:

- pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the Bank;
- provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with International Financial Reporting Standards (IFRS) as issued by the International Accounting Standards Board (IASB), and that receipts and expenditures are being made only in accordance with authorizations of management and directors of the Bank; and
- provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of the Bank's assets that could have a material effect on the financial statements.

All control systems contain inherent limitations, no matter how well designed. As a result, the Bank's management acknowledges that its internal control over financial reporting will not prevent or detect all misstatements due to error or fraud. In addition, management's evaluation of controls can provide only reasonable, not absolute, assurance that all control issues that may result in material misstatements, if any, have been detected.

Management assessed the effectiveness of internal control over financial reporting, using the Internal Control-Integrated Framework 2013 issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO), and based on that assessment concluded that internal control over financial reporting was effective as of October 31, 2024. There are no material weaknesses that have been identified by management in this regard. KPMG LLP, the independent auditors appointed by the shareholders of the Bank, who have audited the consolidated financial statements, have also audited internal control over financial reporting as of October 31, 2024.

Changes in internal control over financial reporting

During the year ended October 31, 2024, there have been no changes in the Bank's internal control over financial reporting that have materially affected, or are reasonably likely to materially affect, the Bank's internal control over financial reporting.

Critical Accounting Policies and Estimates

The Bank's accounting policies are integral to understanding and interpreting the financial results reported in this annual report. Note 3 to the consolidated financial statements summarizes the material accounting policies used in preparing the Bank's consolidated financial statements. Certain of these policies require management to make estimates, assumptions and subjective judgments that are difficult, complex, and often relate to matters that are inherently uncertain. The policies discussed below are particularly important to the presentation of the Bank's financial position and results of operations, as changes in the estimates, assumptions and judgments could have a material impact on the Bank's consolidated financial statements. These estimates, assumptions and judgments are adjusted in the normal course of business to reflect changing underlying circumstances.

Allowance for credit losses

The allowance for credit losses, using an expected credit loss approach as required under IFRS 9, is estimated using valuation models and incorporates inputs, assumptions and techniques that involve a high degree of management judgment. Under IFRS 9 expected credit loss methodology, an allowance is recorded for expected credit losses on financial assets regardless of whether there has been an actual loss event. The Bank recognizes an allowance at an amount equal to 12 month expected credit losses if the credit risk at the reporting date has not increased significantly since initial recognition (Stage 1). When a financial asset experiences a significant increase in credit risk after origination but is not considered to be in default, it is included in Stage 2 and subject to lifetime expected credit losses. Financial assets that are in default are included in Stage 3. Similar to Stage 2, the allowance for credit losses for Stage 3 financial assets captures the lifetime expected credit losses.

The main drivers in allowance for credit loss changes that are subject to significant judgment include the following:

- Determination of point-in-time parameters such as probability of default (PD), loss given default (LGD) and exposure at default (EAD).
- Forecast of macroeconomic variables for multiple scenarios and probability weighting of the scenarios.
- Assessment of significant increase in credit risk.

Qualitative adjustments or overlays may also be made as temporary adjustments using expert credit judgment in circumstances where, in the Bank's view, the existing regulatory guidance, inputs, assumptions, and/or modelling techniques do not capture all relevant risk factors. The use of management overlays requires significant judgment that may impact the amount of allowance recognized.

Measurement of expected credit losses

The probability of default (PD), exposure at default (EAD), and loss given default (LGD) inputs used to estimate expected credit losses are modelled based on historical default and loss experience, and macroeconomic variables that are closely related with credit losses in the relevant portfolio.

Details of these statistical parameters/inputs are as follows:

- PD – The probability of default is an estimate of the likelihood of default over a given time horizon. A default may only happen at a certain time over the remaining estimated life, if the facility has not been previously derecognized and is still in the portfolio.
- EAD – The exposure at default is an estimate of the exposure at a future default date, considering expected changes in the exposure after the reporting date, including repayments of principal and interest, whether scheduled by contract or otherwise, expected drawdowns on committed facilities, and accrued interest from missed payments.
- LGD – The loss given default is an estimate of the loss arising in the case where a default occurs at a given time. It is based on the difference between the contractual cash flows due and those that the lender would expect to receive, including from the realization of any collateral. It is usually expressed as a percentage of the EAD.

Forward-looking macroeconomic scenarios

The Bank uses a broad range of forward-looking economic information as inputs to its models of expected credit losses and the related allowance. These include real GDP, unemployment rates, consumer price index, central bank interest rates, and house-price indices, amongst others. The allowance is determined using four probability-weighted, forward-looking scenarios. The Bank considers both internal and external sources of information and data in order to create unbiased projections and forecasts. The Bank prepares the scenarios using forecasts generated by Scotiabank Economics (SE). The forecasts are generated using both internally and externally developed models whose outputs are modified by SE as necessary to formulate a 'base case' view of the most probable future direction of economic developments; SE also develops a representative range of other alternative possible forecast scenarios. More specifically, the process involves the development of three additional economic scenarios to which relative probabilities are assigned. The development of the baseline and alternative scenarios is overseen by a governance committee that consists of internal stakeholders from across the Bank. The final baseline and alternative scenarios reflect significant review and oversight and incorporate judgment both in the determination of the scenarios' forecasts and the probability weights that are assigned to them.

Significant increase in credit risk (SIR)

The assessment of SIR since origination of a financial asset considers borrower-specific quantitative and qualitative information without consideration of collateral, and the impact of forward-looking information. Quantitative models may not always be able to capture all reasonable and supportable information that may indicate a significant increase in credit risk. Qualitative factors may be assessed to supplement the gap. Examples of situations include changes in adjudication criteria for a particular group of borrowers; changes in portfolio composition; and natural disaster events impacting certain portfolios.

For retail exposures, a significant increase in credit risk is assessed based on thresholds that exist by product which consider the change in PD. The thresholds used for PD migration are reviewed and assessed at least annually unless there is a significant change in credit risk management practices in which case the review is brought forward.

For Non-retail exposures the Bank uses an internal risk rating scale (IG codes). All non-retail exposures have an IG code assigned that reflects the probability of default of the borrower. Both borrower specific and non-borrower specific (i.e. macroeconomic) forward-looking information is considered and reflected in the IG rating. Significant increase in credit risk is evaluated based on the migration of the exposures among IG codes.

Fair value of financial instruments

All financial instruments are measured at fair value on initial recognition. Subsequent measurement of a financial instrument depends on its classification. The contractual cash flow characteristics of a financial instrument and the business model under which it is held determine such classification. Non-trading loans and receivables, certain securities and most financial liabilities are carried at amortized cost unless classified or designated as fair value through profit and loss or fair value through other comprehensive income at inception.

The fair value of a financial asset or liability is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants in the principal, or in its absence, the most advantageous market to which the Bank has access at the measurement date.

The Bank discloses the classification of all financial instruments carried at fair value in a hierarchy based on the determination of fair value. The best evidence of fair value for a financial instrument is the quoted price in an active market. Fair value based on unadjusted quoted market prices for identical instruments in active markets represents a Level 1 valuation. Quoted prices are not always available for over-the-counter (OTC) transactions, as well as transactions in inactive or illiquid markets. OTC transactions are valued using internal models that maximize the use of observable inputs to estimate fair value. The chosen valuation technique incorporates all the factors that market participants would consider in pricing a transaction. When fair value is based on all significant market observable inputs, the valuation is classified as Level 2. Financial instruments traded in a less active market can be valued using indicative market prices, the present value of cash flows or other valuation techniques. Fair value estimates normally do not consider forced or liquidation sales. Where financial instruments trade in inactive markets or when using models where observable parameters do not exist, significant management judgement is required for valuation methodologies and model inputs. Valuations that require the significant use of unobservable inputs are considered Level 3. The calculation of estimated fair value is based on market conditions at a specific point in time and therefore may not be reflective of future fair values.

The Bank has controls and processes in place to ensure that the valuation of financial instruments is appropriately determined. Global Risk Management (GRM) is responsible for the design and application of the Bank's risk management framework. GRM is independent of the Bank's business units and is overseen by Executive Management and the Board of Directors. Senior management committees within GRM oversee and establish standards that are critical in ensuring that appropriate valuation methodologies and policies are in place for determining fair value.

Where possible, valuations are based on quoted prices or observable inputs obtained from active markets. GRM oversees a monthly Independent Price Verification (IPV) process to ensure the reliability and accuracy of prices and inputs used in the determination of fair value. The IPV process is performed by price verification groups that are independent of the business. The Bank maintains an approved list of pricing sources that are used in the IPV process. These sources include, but are not limited to, brokers, dealers and consensus pricing services. The valuation policies relating to the IPV process require that all pricing or rate sources be external to the Bank. At least annually, an independent assessment of pricing or rate sources is performed by GRM to determine the market presence or market representative levels.

Where quoted prices are not readily available, such as for transactions in over-the-counter markets, internal models that maximize the use of observable inputs are used to estimate fair value. An independent second-line model risk management function within GRM oversees the initial

model validation, approval and ongoing validation and the performance monitoring of valuation models used in determining fair value. Model development and validation processes are governed by the Bank's Model Risk Management Policy.

In determining fair value for certain instruments or portfolios of instruments, valuation adjustments or reserves may be required to arrive at a more accurate representation of fair value. The Bank's policy of applying valuation reserves to a portfolio of instruments is approved by a senior management committee. These reserves can include adjustments for credit risk, bid-offer spreads, unobservable parameters, funding costs and constraints on prices in inactive or illiquid markets. The methodology for the calculation of valuation reserves is reviewed at least annually by senior management.

Valuation adjustments recorded against the fair value of financial assets and financial liabilities totaled \$81 million as at October 31, 2024 (2023 – \$153 million), net of any write-offs. The majority of the year-over-year change is due to tightening of counterparty credit spreads during the year.

As at October 31, 2024, a net funding valuation adjustment (FVA) representing an excess of funding benefit adjustment over funding cost adjustment of \$165 million (2023 – \$271 million), pre-tax, was recorded for uncollateralized derivative instruments.

Employee benefits

The Bank provides pension and other benefit plans for eligible employees in Canada and internationally. Pension benefits are offered in the form of defined benefit pension plans (generally based on an employee's length of service and earnings) and defined contribution pension plans (where the Bank's contribution is fixed and there is no legal or constructive obligation to pay further amounts). Other benefits include post-retirement health care, dental care and life insurance, along with other long-term employee benefits, such as long-term disability benefits.

The employee benefit expenses and related benefit obligation are calculated using actuarial methods and certain actuarial assumptions. These assumptions are based on management's best estimate and are reviewed and approved annually. The most significant assumption is the discount rate used to determine the defined benefit obligation, which is set by reference to the yields on high quality corporate bonds that have durations that match the terms of the Bank's obligations. Separate discount rates are used to determine the annual benefit expense in Canada and the U.S. These rates are determined with reference to the yields on high quality corporate bonds with durations that match the various components of the annual benefit expense. The discount rate used to determine the annual benefit expense for all other plans is the same as the rate used to determine the defined benefit obligation. Other key assumptions include future compensation, health care costs, employee turnover, retirement age and mortality. When making these estimates, management considers expectations of future economic trends and business conditions, including inflation rates, as well as other factors, such as plan-specific experience and best practices.

Actual experience that differs from assumptions made by management will result in a net actuarial gain or loss recognized immediately in other comprehensive income, except for other long-term employee benefits, where they are recognized in the Consolidated Statement of Income.

Note 29 of the consolidated financial statements contains details of the Bank's employee benefit plans, such as the disclosure of pension and other benefit amounts, management's key assumptions, and a sensitivity analysis of changes in these assumptions on the employee benefit obligation and expense.

Corporate income taxes

Management exercises judgment in determining the provision for income taxes and deferred income tax assets and liabilities. The provision is based on management's expectations regarding the income tax consequences of transactions and events during the period. Management interprets the tax legislation for each jurisdiction in which the Bank operates and makes assumptions about the expected timing of the reversal of deferred income tax assets and liabilities. If management's interpretations of the legislation differ from those of the tax authorities, or if the actual timing of the reversals of the deferred income tax assets and liabilities is not as anticipated, the provision for income taxes could increase or decrease in future periods.

The Bank maintains provisions for uncertain tax positions that it believes appropriately reflect the risk of tax positions under discussion, audit, dispute or appeal with tax authorities, or which are otherwise considered to involve uncertainty. These provisions are made using the Bank's best estimate of the amount expected to be paid based on an assessment of all relevant factors, which are reviewed at the end of each reporting period. It is possible that additional liability and income tax expense could arise in the future, depending on the acceptance of the Bank's tax positions by the relevant tax authorities in the jurisdictions in which the Bank operates.

Note 28 of the consolidated financial statements contains further details with respect to the Bank's provisions for income taxes.

Structured entities

In the normal course of business, the Bank enters arrangements with structured entities on behalf of its customers and for its own purposes. These structured entities can be generally categorized as multi-seller commercial paper conduits, Bank funding vehicles and structured finance entities. Further details are provided in the Off-balance sheet arrangements section on page 68.

Management is required to exercise judgement to determine whether a structured entity should be consolidated. This evaluation involves understanding the arrangements, determining whether decisions about the relevant activities are made by means of voting rights or other contractual arrangements, and determining whether the Bank controls the structured entity.

The Bank controls an investee when it is exposed, or has rights, to variable returns from its involvement with the investee and has the ability to affect those returns through its power over the investee. The three elements of control are:

- power over the investee;
- exposure, or rights, to variable returns from involvement with the investee; and
- the ability to use power over the investee to affect the amount of the Bank's returns.

This definition of control applies to circumstances:

- when voting rights or similar rights give the Bank power, including situations where the Bank holds less than a majority of voting rights or involving potential voting rights;
- when an investee is designed so that voting rights are not the dominant factor in deciding who controls the investee (i.e., relevant activities are directed by contractual arrangements);
- involving agency relationships; and
- when the Bank has control over specified assets of an investee.

The Bank does not control an investee when it is acting in an agent's capacity. The Bank assesses whether it is an agent by determining whether it is primarily engaged to act on behalf and for the benefit of another party or parties. Factors that the Bank considers in this assessment include the scope of its decision-making authority over the investee, the rights held by other parties, the remuneration to which it is entitled, and the Bank's exposure to variability of returns from other interests that it holds in the investee. The analysis uses both qualitative and quantitative analytical techniques and involves the use of a number of assumptions about the business environment in which the structured entity operates and the amount and timing of future cash flows. The Bank reassesses whether it controls an investee if facts and circumstances indicate that one or more of the three elements of control change. Management is required to exercise judgement to determine if a change in control event has occurred. During 2024, there were no change in control events that caused the Bank to change its control conclusion of its multi-seller conduits or other structured entities.

As described in Note 16 to the consolidated financial statements and in the discussion of off-balance sheet arrangements, the Bank does not control the two Canadian-based multi-seller conduits that it sponsors and they are not required to be consolidated on the Bank's Consolidated Statement of Financial Position. The Bank controls its U.S.-based multi-seller conduit and consolidates it on the Bank's Consolidated Statement of Financial Position.

Goodwill

For impairment testing, goodwill acquired in a business combination is, on the acquisition date, allocated to each of the Bank's group of cash-generating units (CGU) that are expected to benefit from the particular acquisition. Goodwill is not amortized but tested for impairment annually and when circumstances indicate that the carrying value may be impaired. At each reporting date, goodwill is reviewed to determine whether there is any indication of impairment. Each CGU to which goodwill is allocated for impairment testing reflects the lowest level at which goodwill is monitored for internal management purposes.

The Bank determines the carrying value of the CGU using a regulatory capital approach based on credit, market, operational risks and leverage, consistent with the Bank's capital attribution for business line performance measurement. Corporate capital that is not directly attributable is allocated to each CGU on a proportional basis. The recoverable amount is the greater of fair value less costs of disposal (FVLCD) and value in use (VIU). If either FVLCD or VIU exceeds the carrying amount, there is no need to determine the other. An impairment loss is recognized if the carrying amount of the CGU exceeds the recoverable amount. An impairment loss, in respect of goodwill, is not reversed.

FVLCD is the price that would be received from the sale of a CGU in an orderly transaction between market participants, less costs of disposal, at the measurement date. In determining FVLCD, an appropriate valuation model is used which considers various factors, including normalized net income, price earnings multiples, and control premiums. These calculations are corroborated by valuation multiples and quoted share prices for publicly traded subsidiaries or other available fair value indicators.

VIU is the present value of the future cash flows expected to be derived from a CGU. The determination of VIU involves judgment in estimating future cash flows, terminal growth rate and discount rate. The future cash flows are based on management approved budgets and plans which factor in market trends, macroeconomic conditions, forecasted earnings and business strategy for the CGU. The terminal growth rate is based on the long-term growth expectations in the relevant countries, while the discount rate is based on the cost of capital.

Significant judgment is applied in determining the recoverable amounts of the CGU and assessing whether certain events or circumstances constitute objective evidence of impairment.

Goodwill was assessed for annual impairment based on the methodology described above as at July 31, 2024, and no impairment was determined to exist. As of October 31, 2024, there were no significant changes to this assessment. For additional information, see Note 19 of the consolidated financial statements.

Intangible assets

Intangible assets with indefinite useful lives are not amortized but tested for impairment annually and when circumstances indicate that the carrying value may be impaired. Intangible assets with finite useful lives are amortized over the estimated useful life of the asset and are tested for impairment only when events and circumstances indicate impairment. Indefinite life and finite life intangible assets are reviewed at each reporting date to determine whether there is any indication of impairment.

The recoverable amount is the greater of fair value less costs of disposal (FVLCD) and value in use (VIU). If either FVLCD or VIU exceeds the carrying amount, there is no need to determine the other. The VIU method is used by the Bank to determine the recoverable amount of intangible assets. In determining VIU, a discounted cash flow valuation model is used which incorporates key assumptions, such as management-approved cash flow projections, terminal growth rate and the applicable discount rate. An impairment loss is recognized if the carrying amount of the intangible asset exceeds its recoverable amount. Impairment losses recognized in prior periods are reassessed at each reporting period for any indication that the loss has decreased or no longer exists. An impairment loss recognized in a prior period shall be reversed only if there has been a change in the estimates used to determine the asset's recoverable amount since the last impairment was recognized. The reversal of an impairment loss reflects an increase in the estimated service potential of an asset, either from use or from sale, and does not only result from the passage of time. An impairment loss is reversed only to the extent that the intangible asset's carrying amount does not exceed the carrying amount that would have been determined if no impairment loss had been recognized.

The recoverable amount is significantly impacted by the discount rate and the terminal value. Significant judgment is applied in determining the intangible asset's recoverable amount and assessing whether certain events or circumstances constitute objective evidence of impairment.

Indefinite life intangible assets were assessed for annual impairment based on the methodology described above as at July 31, 2024, and no impairment was determined to exist. As of October 31, 2024, there were no significant changes to this assessment. For additional information on both indefinite life and finite life intangible assets, see Note 19 of the consolidated financial statements.

Derecognition of financial assets

Financial assets are derecognized when the contractual rights to the cash flows from the asset have expired, which occurs with repayment by the borrower or upon substantial modification of the asset terms. Assets are also derecognized when the Bank transfers the contractual rights to receive the cash flows from the financial asset or has assumed an obligation to pay those cash flows to an independent third-party, and the Bank has transferred substantially all the risks and rewards of ownership of that asset to an independent third-party.

Management must apply judgement in determining whether a modification of the contractual terms of the financial asset is substantial. For loans, this includes the nature of the modification and the extent of changes to contractual terms including interest rate, authorized amount and term.

Management must also apply judgement in determining, based on specific facts and circumstances, whether the Bank has retained or transferred substantially all the risks and rewards of ownership of the financial asset. Where substantially all the risks and rewards of ownership of the financial asset are neither retained nor transferred, the Bank derecognizes the transferred asset only if it has lost control over that asset. If the Bank retains control over the asset, it will continue to recognize the asset to the extent of its continuing involvement.

Most assets transferred under repurchase agreements, securities lending agreements, securitizations of fully insured Canadian residential mortgages, and securitizations of credit card receivables do not qualify for derecognition. The Bank continues to record the transferred assets on the Consolidated Statement of Financial Position as secured financings.

Further information on derecognition of financial assets can be found in Note 15 of the consolidated financial statements.

Provisions

The Bank recognizes a provision if, because of a past event, the Bank has a present legal or constructive obligation that can be estimated reliably, and it is probable that an outflow of economic benefits will be required to settle the obligation. Probable in this context means more likely than not. Significant judgement is required in determining whether a present obligation exists and in estimating the probability, timing, and amount of any future outflows.

In the ordinary course of business, the Bank and its subsidiaries are routinely defendants in, or parties to a number of pending and threatened legal actions and regulatory proceedings, including actions brought on behalf of various classes of claimants. In view of the inherent difficulty of predicting the outcome of such matters, the Bank cannot state what the eventual outcome of such matters will be.

Legal provisions are established when it becomes probable that the Bank will incur an expense related to a legal action and the amount can be reliably estimated. Such provisions are recorded at the best estimate of the amount required to settle any obligation related to these legal actions as at the balance sheet date, considering the risks and uncertainties surrounding the obligation. Management and internal and external experts are involved in estimating any amounts that may be required. The actual costs of resolving these claims may vary significantly from the amount of the legal provisions. The Bank's estimate involves significant judgement, given the varying stages of the proceedings, the fact that the Bank's liability, if any, has yet to be determined and the fact that the underlying matters will change from time to time. As such, there is a possibility that the ultimate resolution of those legal actions may be material to the Bank's consolidated results of operations for any reporting period.

The Bank, through its Peruvian subsidiary, is engaged in legal actions related to certain value-added tax assessed amounts and associated interest totaling \$176 million, which arose from certain client transactions that occurred prior to the Bank's acquisition of the subsidiary. The legal action in Peru relating to the original assessed amount was heard by the Peruvian Constitutional Court in June 2023. That case was decided in favour of the Government of Peru in May 2024. Accordingly, the Bank paid \$34 million representing the principal and associated reasonable interest, which was recorded in non-interest expenses – other. In November 2021, the Peruvian Constitutional Court dismissed the matter relating to the accrued default interest for procedural reasons. With respect to this default interest component, and in relation to the Constitutional Court of Peru's treatment of Scotiabank Peru, in October 2022, the Bank filed a request for arbitration against the Republic of Peru before the International Centre for the Settlement of Investment Disputes (ICSID), pursuant to the provisions of the Canada-Peru Free Trade Agreement. In May 2024, the ICSID Tribunal issued a ruling that narrowed the scope of the Bank's case. This case is currently proceeding through the arbitration process. Following these developments, the Bank recorded a legal provision of \$142 million in other liabilities – provisions, representing the amount at issue in the arbitration. The Bank intends to continue to vigorously advance its position.

Future Accounting Developments

The Bank actively monitors developments and changes in accounting standards from the IASB, as well as requirements from the other regulatory bodies, including OSFI. The Bank is currently assessing the impact of adoption of new standards issued by the IASB on its consolidated financial statements and also evaluating the alternative elections available on transition.

Effective November 1, 2026

IFRS 9 Financial Instruments and IFRS 7 Financial Instruments – Amendments

On May 30, 2024, the IASB issued "Amendments to the Classification and Measurement of Financial Instruments (Amendments to IFRS 9 and IFRS 7)" to address post-implementation review findings of IFRS 9 Financial Instruments.

The amendments introduce an accounting policy choice to derecognize financial liabilities settled through an electronic payment system before the settlement date upon meeting certain conditions. The amendments clarify the assessment of contractual cash flow characteristics of financial assets based on contingent events, such as interest rates linked to environmental, social and governance (ESG) targets, the treatment of non-recourse assets, and contractually linked instruments. The amendments introduce new disclosure requirements for financial instruments with contractual terms that can change cash flows due to events not directly related to changes in basic lending risks, such as certain loans subject to ESG targets. Additionally, the amendments change some of the disclosure requirements for equity instruments designated at fair value through other comprehensive income.

The amendments are effective for the Bank on November 1, 2026, and early adoption is permitted. The Bank is required to apply the amendments retrospectively but is not required to restate prior periods. The Bank is currently assessing the impact of these amendments.

Effective November 1, 2027

IFRS 18 Presentation and Disclosure in Financial Statements

The IASB issued IFRS 18 Presentation and Disclosure in Financial Statements on April 9, 2024, to replace IAS 1 Presentation of Financial Statements and is effective for annual periods beginning on or after January 1, 2027. IFRS 18 introduces a defined structure for the presentation of the statement of income, including required totals and subtotals, as well as aggregating and disaggregating principles to categorize financial information. The standard also requires all Management-defined performance measures to be disclosed in the notes to the financial statements.

IFRS 18 will be effective for the Bank on November 1, 2027, with early adoption permitted. The Bank is currently assessing the impact of this new standard.

Regulatory Developments

The Bank continues to monitor global regulatory developments relating to a broad spectrum of topics, in order to ensure that control functions and business lines are responsive on a timely basis and business impacts, if any, are minimized. A high-level summary of some of the key regulatory developments that have the potential of impacting the Bank's operations is included below.

OSFI Draft Revised Guideline E-23 Model Risk

The E-23 Guideline, which is principles-based, sets out OSFI's expectations related to enterprise-wide model risk management (MRM). It applies to all federally regulated financial institutions, including private pension plans, insurance, and trust and loan companies, and to all models, whether they require formal regulatory approval or not. OSFI expects model risk to be managed through a risk-based approach and on an enterprise-wide basis. The consultation period is closed, and the final version is expected to be published in Summer 2025. The Bank is monitoring this proposed regulatory development.

OSFI Guideline B-15: Climate Risk Management

OSFI's Guideline B-15 – Climate Risk Management is effective as of October 31, 2024. This guideline aims to streamline climate disclosures and promote transparency of climate-related risks. OSFI also released new Climate Risk Returns that will collect standardized climate-related data on emissions and exposures from FRFIs. The Climate Risk Returns are due in December 2024.

Interest Rate Benchmark Reform

The publication of the 1-month, 2-month and 3-month Canadian Dollar Offered Rate (CDOR) tenors ceased as of June 28, 2024. The Bank has successfully transitioned all contracts referencing CDOR and Bankers Acceptances (BAs) to alternative rates such as Canadian Overnight Repo Rate Average (CORRA) or Prime.

Canadian Federal Tax Measures

On August 12, 2024, the Department of Finance released draft legislation on the proposed increase to the capital gains inclusion rate from 50% to 66.7% for gains or losses realized after June 24, 2024.

A Notice of Ways and Means Motion was tabled on September 23, 2024 to implement the draft legislation for the increased capital gains inclusion rate. This legislation is expected to be enacted in a future bill and its impact is not material to the Bank.

Global Minimum Tax

The Organisation for Economic Co-operation and Development (OECD) published Pillar Two model rules in December 2021 as part of its efforts toward international tax reform. The rules aim to have large multinational enterprises, with consolidated revenues in excess of €750 million, pay a minimum effective tax of 15% in each jurisdiction they operate. OECD member countries are in the process of developing domestic tax legislation to implement the rules. In June 2024, Canada enacted the Global Minimum Tax (GMT) Act as part of Bill C-69. During the year, certain countries have also enacted their local GMT legislation to introduce a domestic minimum top-up tax. These laws will apply to the Bank from fiscal year 2025 onwards.

The IASB previously issued amendments to IAS 12 Income Taxes for a temporary mandatory exception from the recognition and disclosure of deferred taxes related to the implementation of Pillar Two GMT rules, which the Bank has applied.

The Bank has performed an assessment of its potential GMT impact and continues to monitor relevant legislation and available guidance when released across various jurisdictions. GMT is expected to apply to earnings from jurisdictions including Bahamas, Barbados, Cayman Islands and Ireland. Based on the Bank's preliminary assessment, the Bank expects an increase in its effective tax rate by approximately 1% for the year ending October 31, 2025.

OSFI Draft Revised Guideline E-21: Operational Risk

On August 22, 2024, OSFI published the final revised Guideline E-21: Operational Risk Management and Resilience (Guideline E-21). Guideline E-21 sets out OSFI's expectations for financial institutions to prepare for and recover from adverse events, such as internal control failures, pandemics and technology failures. Expectations in the guideline are subject to phased implementation, with full adherence by September 1, 2026. The Bank is working on a multi-year plan to in respect of this regulatory development.

Consumer Protection (Quebec)

On September 12, 2024, the Quebec Government introduced Bill 72, An Act to protect consumers against abusive commercial practices and to offer better transparency with respect to prices and credit (Bill 72). Bill 72 amends Quebec's Consumer Protection Act and provides new protections for consumers, including with respect to the unauthorized use of a deposit account or fraud. The Bank is assessing the application of Bill 72.

Related Party Transactions

Compensation of key management personnel

Key management personnel are those persons having authority and responsibility for planning, directing and controlling the activities of the Bank, directly or indirectly, and comprise the directors of the Bank, the President and Chief Executive Officer, certain direct reports of the President and Chief Executive Officer and Group Heads.

T60 Compensation of key management personnel of the Bank

For the year ended October 31 (\$ millions)	2024	2023
Salaries and cash incentives ⁽¹⁾	\$ 25	\$ 23
Equity-based payment ⁽²⁾	29	32
Pension and other benefits ⁽¹⁾	2	2
Total	\$ 56	\$ 57

(1) Expensed during the year.

(2) Awarded during the year.

Directors can use some or all of their director fees earned to buy common shares of the Bank at market rates through the Director's Share Purchase Plan. Non-officer directors may elect to receive all or a portion of their fees in the form of deferred stock units which vest immediately. Refer to Note 27 – Share-based payments for further details of these plans.

T61 Loans and deposits of key management personnel

Loans are currently granted to key management personnel at market terms and conditions.

As at October 31 (\$ millions)	2024	2023
Loans	\$ 10	\$ 13
Deposits	5	6

The Bank's committed credit exposure to companies controlled by directors totaled \$267 million as at October 31, 2024 (October 31, 2023 – \$266 million) while actual utilized accounts were \$199 million (October 31, 2023 – \$165 million).

Transactions with associates and joint ventures

In the ordinary course of business, the Bank provides normal banking services and enters into transactions with its associated and other related corporations on terms similar to those offered to non-related parties. If these transactions are eliminated on consolidation, they are not disclosed as related party transactions. Transactions between the Bank and its associated companies and joint ventures also qualify as related party transactions and are as follows:

T62 Transactions with associates and joint ventures

As at and for the year ended October 31 (\$ millions)	2024	2023
Net income / (loss)	\$ (15)	\$ (22)
Loans	209	209
Deposits	253	277
Guarantees and commitments	46	55

Scotiabank principal pension plan

The Bank manages assets of \$6.0 billion (October 31, 2023 – \$5.2 billion) which is a portion of the Scotiabank principal pension plan assets and earned \$6.7 million (October 31, 2023 – \$6.9 million) in fees.

Oversight and governance

The oversight responsibilities of the Audit and Conduct Review Committee (ACRC) with respect to related party transactions include reviewing the Related Party Policy and transactions with related parties that may materially affect the Bank and to ensure compliance with the Bank Act. The Bank Act requirements encompass a broader definition of a related party and the transactions than is set out in International Accounting Standard 24 *Related Party Disclosures*. The Bank has various procedures in place to ensure that related party information is identified and reported to the ACRC on a semi-annual basis. The ACRC is provided with reports that reflect the Bank's compliance with its Policy.

The Bank's Internal Audit department carries out audit procedures as necessary to provide the ACRC with reasonable assurance that the Bank's policies and procedures to identify, authorize and report related party transactions are appropriately designed and operating effectively in compliance with the Bank Act.

(1) Geographic segmentation is based upon the location of the ultimate risk of the credit exposure. Includes all credit risk portfolios and excludes equities and other assets.

(2) Amounts represent exposure at default.

(3) Regulatory amounts reported in 2024 and 2023 are under Revised Basel III requirements.

(4) Includes off-balance sheet lending instruments such as letters of credit, letters of guarantee, derivatives, securitization and repo-style transactions after collateral.

(1) Regulatory amounts reported in 2024 and 2023 are under Revised Basel III requirements.

(2) Portfolios under the Standardized Approach are reported net of specific allowances for credit losses and net of collateral amounts treated under the Comprehensive Approach.

(3) Outstanding amount for on-balance sheet exposures and loan equivalent amount for off-balance sheet exposures, after credit risk mitigation.

(4) Other exposures include off-balance sheet lending instruments, such as letters of credit, letters of guarantee, non-trading derivatives and repo-style exposures, after collateral.

(5) Other assets include amounts related to central counterparties, net of capital deductions.

(1) The Bank adopted IFRS 17 effective November 1, 2023. As required under the new accounting standard, prior period amounts have been restated. Refer to Note 4 of the consolidated financial statements.

(2) Refer to Glossary on page 132 for the description of the measure.

(3) Refer to page 20 for a discussion of non-GAAP measures.

(4) Commencing Q1 2024, regulatory capital ratios are based on Revised Basel III requirements as determined in accordance with OSFI Guideline – Capital Adequacy Requirements (November 2023). The Q2 2023- Q4 2023 regulatory capital ratios were based on Revised Basel III requirements as determined in accordance with OSFI Guideline – Capital Adequacy Requirements (February 2023). The Q1 2023 regulatory capital ratios were prepared in accordance with OSFI Guideline – Capital Adequacy Requirements (November 2018).

(5) This measure has been disclosed in this document in accordance with OSFI Guideline – Total Loss Absorbing Capacity (September 2018).

(6) Commencing Q2 2023 leverage ratios are based on Revised Basel III requirements as determined in accordance with OSFI Guideline – Leverage Requirements (February 2023). Q1 2023 leverage ratios were prepared in accordance with OSFI Guideline – Leverage Requirements (November 2018).

(7) This measure has been disclosed in this document in accordance with OSFI Guideline – Public Disclosure Requirements for Domestic Systemically Important Banks on Liquidity Coverage Ratio (April 2015).

(8) This measure has been disclosed in this document in accordance with OSFI Guideline – Net Stable Funding Ratio Disclosure Requirements (January 2021).

(9) Includes allowance for credit losses on all financial assets – loans, acceptances, off-balance sheet exposures, debt securities, and deposits with financial institutions.

(10) Includes provision for credit losses on certain financial assets – loans, acceptances and off-balance sheet exposures.

Effect of foreign exchange and others	(68)	194	(709)	(494)	(221)	(40)	980
Balance at end of year	\$ 1,707	\$ 1,729	\$ 1,524	\$ 2,090	\$ 2,376	\$ 2,670	\$ 2,452
Total equity at end of year	\$ 84,076	\$ 78,571	\$ 74,749	\$ 72,892	\$ 70,503	\$ 70,192	\$ 67,680

- (1) The Bank adopted IFRS 17 effective November 1, 2023. As required under the new accounting standard, prior period amounts have been restated. Refer to Note 4 of the consolidated financial statements. Amounts for fiscal 2015 to 2022 have been prepared in accordance with IFRS 4 and have not been restated.
- (2) Includes retrospective adjustments primarily related to foreign currency translation on Allowance for Credit Losses with respect to periods prior to 2013 (\$152).
- (3) To reflect the adoption of the own credit risk provisions of IFRS 9 pertaining to financial liabilities designated at fair value through profit or loss.
- (4) Represents amounts on account of share-based payments (refer to Note 27 in the consolidated financial statements).

T86 Consolidated Statement of Comprehensive Income

For the year ended October 31 (\$ millions)	2024 ⁽¹⁾	2023 ⁽¹⁾	2022	2021	2020	2019	2018
Net income	\$ 7,892	\$ 7,450	\$ 10,174	\$ 9,955	\$ 6,853	\$ 8,798	\$ 8,724
Other comprehensive income (loss), net of income taxes:							
Items that will be reclassified subsequently to net income							
Net change in unrealized foreign currency translation gains (losses)	(1,865)	942	2,454	(3,520)	(2,239)	(819)	(606)
Net change in unrealized gains (losses) on available-for-sale securities (debt and equity) ⁽²⁾	n/a	n/a	n/a	n/a	n/a	n/a	n/a
Net change in fair value due to change in debt instruments measured at fair value through other comprehensive income ⁽²⁾	612	378	(1,212)	(600)	293	105	(252)

(1) The Bank adopted IFRS 17 effective November 1, 2023. As required under the new accounting standard, prior period amounts have been restated. Refer to Note 4 of the consolidated financial statements. Amounts for fiscal 2015 to 2022 have been prepared in accordance with IFRS 4 and have not been restated.

(2) Refer to Glossary on page 132 for the description of the measure.

(3) Refer to page 20 for a discussion of non-GAAP measures.

(4) 2024 regulatory capital ratios are based on Revised Basel III requirements as determined in accordance with OSFI Guideline – Capital Adequacy Requirements (November 2023). 2023 regulatory capital ratios were based on Revised Basel III requirements as determined in accordance with OSFI Guideline – Capital Adequacy Requirements (February 2023). Prior period regulatory capital ratios were prepared in accordance with OSFI Guideline – Capital Adequacy Requirements (November 2018).

(5) 2024 and 2023 leverage ratios are based on Revised Basel III requirements as determined in accordance with OSFI Guideline – Leverage Requirements (February 2023). Prior period leverage ratios were prepared in accordance with OSFI Guideline – Leverage Requirements (November 2018).

(6) Based on the average of the high and low common share price for the year.

Glossary

Allowance for Credit Losses: An allowance set aside which, in management's opinion, is adequate to absorb credit-related losses on all financial assets and off-balance sheet exposures subject to impairment assessment. It includes allowances for performing financial assets and impaired financial assets.

Allowance for Credit Losses Ratio: The ratio of period end total allowance for credit losses (excluding debt securities and deposits with financial institutions) divided by gross loans and acceptances.

Allowance for Impaired Loans Ratio: The ratio of period end impaired allowance for credit losses (excluding debt securities and deposits with financial institutions) divided by gross loans and acceptances.

Allowance for Performing Loans Ratio: The ratio of period end performing allowance for credit losses (excluding debt securities and deposits with financial institutions) divided by gross loans and acceptances.

Allowance against Impaired Loans as a % of Gross Impaired Loans: The ratio of allowance against impaired loans to gross impaired loans.

Assets Under Administration (AUA): Assets administered by the Bank which are beneficially owned by clients and therefore not reported on the Bank's Consolidated Statement of Financial Position. Services provided for AUA are of an administrative nature, such as trusteeship, custodial, safekeeping, income collection and distribution, securities trade settlements, customer reporting, and other similar services.

Assets Under Management (AUM): Assets managed by the Bank on a discretionary basis and in respect of which the Bank earns investment management fees. AUM are beneficially owned by clients and are therefore not reported on the Bank's Consolidated Statement of Financial Position. Some AUM are also administered assets and are therefore included in assets under administration.

Bankers' Acceptances (BAs): Negotiable, short-term debt securities, guaranteed for a fee by the issuer's bank.

Basis Point: A unit of measure defined as one-hundredth of one percent.

Book Value per Common Share: Common shareholders' equity divided by the number of outstanding common shares at the end of the period.

Canadian Overnight Repo Rate Average (CORRA): CORRA measures the cost of overnight general collateral funding in Canadian dollars using Government of Canada treasury bills and bonds as collateral for repurchase transactions.

Common Equity Tier 1 (CET1), Tier 1 and Total Capital Ratios: Under Revised Basel III, there are three primary regulatory capital ratios used to assess capital adequacy, CET1, Tier 1 and Total capital ratios, which are determined by dividing those capital components by their respective risk-weighted assets.

CET1 consists primarily of common shareholders' equity net of regulatory adjustments. These regulatory adjustments include goodwill, intangible assets net of deferred tax liabilities, deferred tax assets that rely on future profitability, defined-benefit pension fund net assets, shortfall of credit provision to expected losses and significant investments in common equity of other financial institutions.

Tier 1 includes CET1 and additional Tier 1 capital which consists primarily of qualifying non-cumulative preferred shares, non-cumulative subordinated additional Tier 1 capital notes and limited recourse capital notes. Tier 2 capital consists mainly of qualifying subordinated debentures and the eligible allowances for credit losses.

Total capital is comprised of CET1 capital, Tier 1 capital and Tier 2 capital.

Covered Bonds: Debt obligations of the Bank for which the payment of all amounts of interest and principal are unconditionally and irrevocably guaranteed by a limited partnership and secured by a pledge of the covered bond portfolio. The assets in the covered bond portfolio held by the limited partnership consist of first lien Canadian uninsured residential mortgages or first lien Canadian residential mortgages insured under CMHC Mortgage Insurance, respectively, and their related security interest.

Derivative Products: Financial contracts whose value is derived from an underlying price, interest rate, exchange rate or price index. Forwards, options and swaps are all derivative instruments.

Dividend Yield: Dividends per common share divided by the average of the high and low share price in the relevant period.

Effective Tax Rate: The effective tax rate is the overall tax rate paid by the Bank on its earned income. The effective tax rate is calculated by dividing the Bank's income tax expenses by the income before taxes.

Fair Value: The price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants in the principal, or in its absence, the most advantageous market to which the Bank has access at the measurement date.

Foreign Exchange Contracts: Commitments to buy or sell a specified amount of foreign currency on a set date and at a predetermined rate of exchange.

Forward Rate Agreement (FRA): A contract between two parties, whereby a designated interest rate, applied to a notional principal amount, is locked in for a specified period of time. The difference between the contracted rate and prevailing market rate is paid in cash on the settlement date. These agreements are used to protect against, or take advantage of, future interest rate movements.

Futures: Commitments to buy or sell designated amounts of commodities, securities or currencies on a specified date at a predetermined price. Futures are traded on recognized exchanges. Gains and losses on these contracts are settled daily, based on closing market prices.

Gross Impaired Loans as a % of Loans and Acceptances: The ratio of gross impaired loans, debt investments and off-balance sheet exposures expressed as a percentage of loans and acceptances.

Hedging: Protecting against price, interest rate or foreign exchange exposures by taking positions that are expected to react to market conditions in an offsetting manner.

Impaired Loans: Loans on which the Bank no longer has reasonable assurance as to the timely collection of interest and principal, or where a contractual payment is past due for a prescribed period or the customer is declared to be bankrupt.

Leverage Ratio: The ratio of Basel III Tier 1 capital to a leverage exposure measure which includes on-balance sheet assets and off-balance sheet commitments, derivatives and securities financing transactions, as defined within the OSFI Leverage Requirements Guideline.

Liquidity Coverage Ratio (LCR): The ratio of high quality liquid assets to stressed net cash outflows over a 30 calendar day time horizon, as defined within the OSFI Liquidity Adequacy Requirements Guideline.

Marked-To-Market: The valuation of certain financial instruments at fair value as of the Consolidated Statement of Financial Position date.

Market Value to Book Value Multiple: This financial valuation metric is calculated by dividing the current closing share price of the period by the book value per common share.

Net Impaired Loans as a % of Loans and Acceptances: The ratio of net impaired loans, debt investments and off-balance sheet exposures expressed as a percentage of loans and acceptances.

Net Interest Margin: Net interest margin is used to measure the return generated by the Bank's core earning assets, net of the cost of funding. Net interest margin is calculated as core net interest income divided by average core earning assets.

Net Stable Funding Ratio (NSFR): The ratio of available stable funding to required stable funding, as defined within the OSFI Liquidity Adequacy Requirements Guideline.

Net Write-offs as a % of Average Net Loans and Acceptances: The ratio of net write-offs expressed as a percentage of average net loans and acceptances.

Non-Viability Contingent Capital (NVCC): In order to qualify for inclusion in regulatory capital, all non-common Tier 1 and Tier 2 capital instruments must be capable of absorbing losses at the point of non-viability of a financial institution. This will ensure that investors in such instruments bear losses before taxpayers where the government determines that it is in the public interest to rescue a non-viable bank.

Notional Principal Amounts: The contract or principal amounts used to determine payments for certain off-balance sheet instruments and derivatives, such as FRAs, interest rate swaps and cross-currency swaps. The amounts are termed “notional” because they are not usually exchanged themselves, serving only as the basis for calculating amounts that do change hands.

Off-Balance Sheet Instruments: These are indirect credit commitments, including undrawn commitments to extend credit and derivative instruments, which are not recorded on the Bank’s balance sheet under IFRS.

Operating Leverage: This financial metric measures the rate of growth in total revenue less the rate of growth in non-interest expenses.

Options: Contracts between buyer and seller giving the buyer of the option the right, but not the obligation, to buy (call) or sell (put) a specified commodity, financial instrument or currency at a set price or rate on or before a specified future date.

OSFI: The Office of the Superintendent of Financial Institutions Canada, the regulator of Canadian banks.

Price to Earnings Multiple (Trailing 4 Quarters): Closing share price at period end divided by cumulative basic earnings per common share (EPS) of the past 4 quarters.

Productivity Ratio: This ratio represents non-interest expenses as a percentage of total revenue. Management uses the productivity ratio as a measure of the Bank’s efficiency.

Provision for Credit Losses (PCL) as a % of Average Net Loans and Acceptances: The ratio of PCL on loans, acceptances and off-balance sheet exposures expressed as a percentage of average net loans and acceptances.

Provision for Credit Losses (PCL) on Impaired Loans as a % of Average Net Loans and Acceptances: PCL on impaired loans ratio under IFRS 9 is calculated using PCL on impaired loans, acceptances and off-balance sheet exposures as a percentage of average net loans and acceptances.

Repos: Repos is short for “obligations related to securities sold under repurchase agreements” – a short-term transaction where the Bank sells assets, normally government bonds, to a client and simultaneously agrees to repurchase them on a specified date and at a specified price. It is a form of short-term funding.

Return on Assets (ROA): Net income expressed as a percentage of total average assets.

Return on Equity (ROE): Net income attributable to common shareholders, expressed as a percentage of average common shareholders’ equity. The Bank attributes capital to its business lines on a basis that approximates 11.5% of Basel III common equity capital requirements which includes credit, market and operational risks and leverage inherent in each operating segment. Return on equity for the operating segments is calculated as a ratio of net income attributable to common shareholders of the operating segment and the capital attributed.

Return on Tangible Common Equity (ROTCE): Return on Tangible Common Equity is calculated by dividing the net income attributable to common shareholders, adjusted for the amortization of intangibles (excluding software), by average tangible common equity. Tangible common equity is defined as common shareholders’ equity adjusted for goodwill and acquisition-related intangible assets (excluding software), net of deferred taxes.

Reverse Repos: Reverse repos is short for “securities purchased under resale agreements” – a short-term transaction where the Bank purchases assets, normally government bonds, from a client and simultaneously agrees to resell them on a specified date and at a specified price. It is a form of short-term collateralized lending.

Risk-Weighted Assets: Comprised of three broad categories including credit risk, market risk and operational risk, which are computed under the Revised Basel III Framework in accordance with OSFI Guideline – Capital Adequacy Requirements (November 2023). Risk-weighted assets for credit risk are calculated using modelled parameters, formulas and risk-weight requirements as specified by the Revised Basel III Framework. In addition, the Bank uses both internal models and standardized approaches to calculate market risk capital and standardized approaches for operational risk capital which are converted to risk-weighted assets.

Securitization: The process by which financial assets (typically loans) are transferred to a trust, which normally issues a series of different classes of asset-backed securities to investors to fund the purchase of loans.

Structured Entities: A structured entity is defined as an entity created to accomplish a narrow and well-defined objective. A structured entity may take the form of a corporation, trust, partnership or unincorporated entity. Structured entities are often created with legal arrangements that impose strict and sometimes permanent limits on the decision-making powers of their governing board, trustee or management over the operations of the entity.

Standby Letters of Credit and Letters of Guarantee: Written undertakings by the Bank, at the request of the customer, to provide assurance of payment to a third-party regarding the customer’s obligations and liabilities to that third-party.

Structured Credit Instruments: A wide range of financial products which includes Collateralized Debt Obligations, Collateralized Loan Obligations, Structured Investment Vehicles, and Asset-Backed Securities. These instruments represent investments in pools of credit-related assets, whose values are primarily dependent on the performance of the underlying pools.

Swaps: Interest rate swaps are agreements to exchange streams of interest payments, typically one at a floating rate, the other at a fixed rate, over a specified period of time, based on notional principal amounts. Cross-currency swaps are agreements to exchange payments in different currencies over predetermined periods of time.

Taxable Equivalent Basis (TEB): The Bank analyzes net interest income, non-interest income, and total revenue on a taxable equivalent basis (TEB). This methodology grosses up tax-exempt income earned on certain securities reported in either net interest income or non-interest income to an equivalent before tax basis. A corresponding increase is made to the provision for income taxes; hence, there is no impact on net income. Management believes that this basis for measurement provides a uniform comparability of net interest income and non-interest income arising from both taxable and non-taxable sources and facilitates a consistent basis of measurement. While other banks also use TEB, their methodology may not be comparable to the Bank’s methodology. For purposes of segmented reporting, a segment’s revenue and provision for income taxes are grossed up by the taxable equivalent amount. The elimination of the TEB gross-up is recorded in the Other segment.

Total Annual Shareholder Return (TSR): Total annual shareholder return is calculated as the overall change in share price, plus any dividends paid during the year; this sum is then divided by the share price at the beginning of the year to arrive at the TSR. Total annual shareholder return assumes reinvestment of quarterly dividends.

Total Loss Absorbing Capacity (TLAC): The aggregate of NVCC Tier 1 capital, NVCC Tier 2 capital, and other TLAC instruments that are subject to conversion in whole or in part into common shares under the CDIC Act and meet all of the eligibility criteria under the OSFI guideline – Total Loss Absorbing Capacity (September 2018).

Other TLAC Instruments include prescribed shares and liabilities that are subject to conversion into common shares pursuant to the CDIC Act and which meet all of the eligibility criteria set out in the Total Loss Absorbing Capacity (TLAC) Guidelines.

Basel III Glossary

Credit Risk Parameters

Exposure at Default (EAD): Generally represents the expected gross exposure – outstanding amount for on-balance sheet exposure and loan equivalent amount for off-balance sheet exposure at default.

Probability of Default (PD): Measures the likelihood that a borrower will default within a one-year time horizon, expressed as a percentage.

Loss Given Default (LGD): Measures the severity of loss on a facility in the event of a borrower's default, expressed as a percentage of exposure at default.

Exposure Types

Non-retail

Corporate: Defined as a debt obligation of a corporation, partnership, or proprietorship.

Bank: Defined as a debt obligation of a bank or bank equivalent.

Sovereign: Defined as a debt obligation of a sovereign, central bank, multi development banks and public sector entities (PSEs) as defined in the OSFI Guideline – Capital Adequacy Requirements (November 2023).

Securitization: On-balance sheet investments in asset-backed securities, mortgage-backed securities, collateralized loan obligations and collateralized debt obligations, off-balance sheet liquidity lines to the Bank's own sponsored and third-party conduits and credit enhancements.

Retail

Residential Mortgage: Loans to individuals against residential property (four units or less).

Secured Lines of Credit: Revolving personal lines of credit secured by residential real estate.

Qualifying Revolving Retail Exposures: Credit cards and unsecured lines of credit for individuals.

Other Retail: All other personal loans.

Exposure Sub-types

Drawn: Outstanding amounts for loans, leases, acceptances, deposits with banks and FVOCI debt securities.

Undrawn: Unutilized portion of authorized committed credit lines.

Value At Risk (VaR): An estimate of the potential loss that might result from holding a position for a specified period of time, with a given level of statistical confidence.

Yield Curve: A graph showing the term structure of interest rates, plotting the yields of similar quality bonds by term to maturity.

Other Exposures

Repo-Style Transactions: Reverse repurchase agreements (reverse repos) and repurchase agreements (repos), securities lending and borrowing.

OTC Derivatives: Over-the-counter derivatives contracts refers to financial instruments which are traded through a dealer network rather than through an exchange.

Other Off-balance Sheet: Direct credit substitutes, such as standby letters of credit and guarantees, trade letters of credit, and performance letters of credit and guarantees.

Exchange-Traded Derivative Contracts: Exchange-traded derivative contracts are derivative contracts (e.g., futures contracts and options) that are transacted on an organized futures exchange. These include futures contracts (both long and short positions), purchased options and written options.

Qualifying Central Counterparty (QCCP): A licensed central counterparty is considered "qualifying" when it is compliant with the International Organization of Securities Commissions (IOSCO) standards and is able to assist clearing member banks in properly capitalizing for CCP exposures.

Asset Value Correlation Multiplier (AVC): Revised Basel III has higher risk-weights on exposures to certain Financial Institutions (FIs) relative to the non-financial corporate sector by introducing an AVC. The correlation factor in the risk-weight formula is multiplied by this AVC factor of 1.25 for all exposures to regulated FIs whose total assets are greater than or equal to CAD \$150 billion and all exposures to unregulated FIs.

Specific Wrong-Way Risk (WWR): Specific Wrong-Way Risk arises when the exposure to a particular counterparty is positively correlated with the probability of default of the counterparty due to the nature of the transactions with the counterparty.

Basel III Regulatory Capital Floor: Since the introduction of Basel II in 2008, OSFI has prescribed a minimum regulatory capital floor for institutions that use the advanced internal ratings-based approach for credit risk. Effective Q2 2023, the capital floor add-on is determined under the Revised Basel III Framework by comparing RWA generated for IRB and standardized portfolios to RWA calculated under a standardized approach at the required capital floor calibration. A shortfall to the capital floor RWA requirement is added to the Bank's RWA.

MANAGEMENT'S RESPONSIBILITY FOR FINANCIAL INFORMATION

The management of The Bank of Nova Scotia (the Bank) is responsible for the integrity and fair presentation of the financial information contained in this Annual Report. The consolidated financial statements have been prepared in accordance with International Financial Reporting Standards (IFRS) as issued by the International Accounting Standards Board (IASB). The consolidated financial statements also comply with the accounting requirements of the Bank Act.

The consolidated financial statements, where necessary, include amounts which are based on the best estimates and judgment of management. Financial information presented elsewhere in this Annual Report is consistent with that shown in the consolidated financial statements.

Management has always recognized the importance of the Bank maintaining and reinforcing the highest possible standards of conduct in all of its actions, including the preparation and dissemination of statements fairly presenting the financial condition of the Bank. In this regard, management has developed and maintains a system of accounting and reporting which provides for the necessary internal controls to ensure that transactions are properly authorized and recorded, assets are safeguarded against unauthorized use or disposition, and liabilities are recognized. The system is augmented by written policies and procedures, the careful selection and training of qualified staff, the establishment of organizational structures providing an appropriate and well-defined division of responsibilities, and the communication of policies and guidelines of Scotiabank's Code of Conduct throughout the Bank.

Management, under the supervision of and the participation of the President and Chief Executive Officer and the Group Head and Chief Financial Officer, have a process in place to evaluate disclosure controls and procedures and internal control over financial reporting in line with Canadian and U.S. securities regulations.

The system of internal controls is further supported by a professional staff of internal auditors who conduct periodic audits of all aspects of the Bank's operations. As well, the Bank's Chief Auditor has full and free access to, and meets periodically with the Audit and Conduct Review Committee of the Board of Directors. In addition, the Bank's compliance function maintains policies, procedures and programs directed at ensuring compliance with regulatory requirements, including conflict of interest rules.

The Office of the Superintendent of Financial Institutions Canada, which is mandated to protect the rights and interests of the depositors and creditors of the Bank, examines and enquires into the business and affairs of the Bank, as deemed necessary, to determine whether the provisions of the Bank Act are being complied with, and that the Bank is in a sound financial condition.

The Audit and Conduct Review Committee, composed entirely of outside directors, reviews the consolidated financial statements with both management and the independent auditors before such statements are approved by the Board of Directors and submitted to the shareholders of the Bank.

The Audit and Conduct Review Committee reviews and reports its findings to the Board of Directors on all related party transactions that may have a material impact on the Bank.

KPMG LLP, the independent auditors appointed by the shareholders of the Bank, have audited the consolidated financial position of the Bank as at October 31, 2024 and October 31, 2023 and its consolidated financial performance and its consolidated cash flows for each of the years in the two-year period ended October 31, 2024 prepared in accordance with IFRS as issued by the International Accounting Standards Board (IASB) in accordance with Canadian generally accepted auditing standards and the standards of the Public Company Accounting Oversight Board (United States) and the effectiveness of internal control over financial reporting and have expressed their opinions upon completion of such audits in the reports to the shareholders. The Shareholders' Auditors have full and free access to, and meet periodically with, the Audit and Conduct Review Committee to discuss their audits, including any findings as to the integrity of the Bank's accounting, financial reporting and related matters.

INDEPENDENT AUDITOR'S REPORT

To the Shareholders and the Board of Directors of The Bank of Nova Scotia

Opinion

We have audited the consolidated financial statements of The Bank of Nova Scotia (the Bank), which comprise:

- the consolidated statements of financial position as at October 31, 2024 and October 31, 2023;
- the consolidated statements of income for the years then ended;
- the consolidated statements of comprehensive income for the years then ended;
- the consolidated statements of changes in equity for the years then ended;
- the consolidated statements of cash flows for the years then ended; and
- notes to the consolidated financial statements, including a summary of material accounting policy information.

(hereinafter referred to as the consolidated financial statements).

In our opinion, the consolidated financial statements present fairly, in all material respects, the consolidated financial position of the Bank as at October 31, 2024 and October 31, 2023, and its consolidated financial performance and its consolidated cash flows for the years then ended in accordance with International Financial Reporting Standards (IFRS) as issued by the International Accounting Standards Board (IASB).

Basis for Opinion

We conducted our audit in accordance with Canadian generally accepted auditing standards. Our responsibilities under those standards are further described in the "Auditor's Responsibilities for the Audit of the Consolidated Financial Statements" section of our auditor's report.

We are independent of the Bank in accordance with the ethical requirements that are relevant to our audit of the consolidated financial statements in Canada and we have fulfilled our other ethical responsibilities in accordance with these requirements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Key Audit Matters

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the consolidated financial statements for the year ended October 31, 2024. These matters were addressed in the context of our audit of the consolidated financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

We have determined the matters described below to be the key audit matters to be communicated in our auditor's report.

(i) Assessment of Allowance for Credit Losses (ACL)

Refer to Notes 3 and 14 to the consolidated financial statements.

The Bank's ACL on loans was \$6,536 million as at October 31, 2024. The Bank applies a three-stage approach to measure the ACL, using an expected credit loss (ECL) approach as required under IFRS 9 Financial Instruments. The Bank's ACL calculations are outputs of a set of complex models. The ACL calculations reflect probability-weighted outcomes that consider multiple scenarios based on reasonable and supportable forecasts. The probability of default (PD), loss given default (LGD) and exposure at default (EAD) inputs used to estimate ECL are modeled based on historical default and loss experience, and macroeconomic variables that are closely related with credit losses in the relevant portfolio. The Bank assesses whether there has been a significant increase in credit risk since origination or where the financial asset is in default. If there has been a significant increase in credit risk or the financial asset is in default, then lifetime ACL is recorded; otherwise, an ACL equal to 12 month expected credit losses is recorded. The estimation of ECL for each stage and the assessment of significant increases in credit risk consider information about past events and current conditions as well as forecasts of future events and economic conditions. The estimation and application of forward-looking information requires significant judgment. Qualitative adjustments or overlays may also be recorded as temporary adjustments using expert credit judgment where the inputs, assumptions and/or models do not capture all relevant risk factors. The use of management overlays requires significant judgment that may impact the amount of ACL recognized.

We identified the assessment of the ACL as a key audit matter. Significant auditor judgment was required because there was a high degree of measurement uncertainty due to the significant management judgments inherent in certain of the Bank's key modeled inputs and methodologies. These management judgments impact certain inputs, assumptions, qualitative adjustments or overlays, and the determination of when there has been a significant increase in credit risk. The assessment of the ACL also required significant auditor attention and complex auditor judgment to apply and evaluate the results of audit procedures. Further, specialized skills and knowledge, including experience in the industry, were required to apply audit procedures and evaluate the results of those procedures.

The following are the primary procedures we performed to address this key audit matter. With the involvement of our credit risk and economics professionals with specialized skills, industry knowledge and relevant experience, we evaluated the design and tested the operating effectiveness of certain internal controls related to the Bank's ACL process. These included internal controls related to: (1) initial and periodic validation and performance monitoring of models used to derive key modeled inputs into the ACL calculation being PD, LGD and EAD; (2) benchmarking of certain macroeconomic variables, model validation associated with the derivation of the remaining variables and the alternative scenarios and review of probability weights used in the ACL models; (3) the methodology used to determine whether there has been a significant increase in credit risk; and (4) the methodology and assumptions used in the determination of qualitative adjustments or overlays. Additionally, for non-retail loans, we tested certain internal controls related to loan reviews over the determination of loan risk grades. We involved credit risk and economics professionals with specialized skills, industry knowledge and relevant experience who assisted in: (1) evaluating the methodology and models used to derive key modeled inputs into the ACL calculation being PD, LGD and EAD and the determination of whether there has been a significant increase in credit risk; (2) assessing the appropriateness of certain underlying macroeconomic variables against external economic data, evaluating the models used to derive other macroeconomic variables and evaluating the assumptions associated with the alternative economic scenarios and the related probabilities; and (3) assessing the qualitative adjustments or overlays by applying our knowledge of the industry and credit judgment to evaluate the appropriateness of the Bank's underlying methodology and assumptions. Additionally for a selection of non-retail loans, we evaluated the Bank's assigned loan risk grades against the Bank's borrower risk rating methodology.

(ii) Assessment of the Measurement of Fair Value of Certain Financial Instruments

Refer to Notes 3 and 8 to the consolidated financial statements.

The Bank measures certain financial assets and financial liabilities at fair value on a recurring basis. Where such financial instruments trade in inactive markets or when using internal models where observable parameters do not exist, significant management judgment is required in the selection of valuation techniques and model inputs. The valuation techniques used in determining the fair value of financial instruments include internal models and net asset valuations. The significant unobservable inputs used in the Bank's valuation techniques include general partner valuations per net asset values (NAVs), interest rate volatility, equity volatility and equity correlation.

We identified the assessment of the measurement of fair value for certain financial instruments as a key audit matter. Significant auditor judgment was required because there was a high degree of measurement uncertainty due to significant judgments inherent in the Bank's valuation techniques and significant unobservable inputs used to develop the fair value of certain financial assets and financial liabilities. The assessment of the fair value also required significant auditor attention and complex auditor judgment to apply and evaluate the results of audit procedures. Further, specialized skills and knowledge, including experience in the industry, were required to apply audit procedures and evaluate the results of those procedures.

The following are the primary procedures we performed to address this key audit matter. We evaluated the design and tested the operating effectiveness of certain internal controls related to the Bank's processes to determine the fair value of certain financial instruments with the involvement of valuation and information technology professionals with specialized skills, industry knowledge and relevant experience. These included internal controls related to: (1) model validation at inception and periodically; (2) management's review of NAVs; (3) independent price verification, including assessment of rate sources; and (4) segregation of duties and access controls. With the involvement of valuation professionals with specialized skills, industry knowledge and relevant experience, we tested the fair value of a selection of certain financial instruments. Depending on the nature of the financial instruments, we did this by comparing the NAVs to external information or by developing an independent estimate of fair value and comparing it to the fair value determined by the Bank.

(iii) Assessment of Uncertain Tax Provisions

Refer to Notes 3 and 28 to the consolidated financial statements.

The Bank maintains provisions for uncertain tax positions that it believes appropriately reflect the risk of tax positions under discussion, audit, dispute, or appeal with tax authorities, or which are otherwise considered to involve uncertainty. These provisions are made using the Bank's best estimate of the amount expected to be paid based on an assessment of all relevant factors, which are reviewed at the end of each reporting period.

We identified the assessment of some uncertain tax provisions as a key audit matter. Significant auditor judgment was required because there was a high degree of measurement uncertainty due to the significant judgments inherent in the Bank's interpretation of tax legislation and its best estimate of the ultimate resolution of tax positions. This required significant auditor attention and complex auditor judgment to evaluate the results of audit procedures. Further, specialized skills, industry knowledge, and relevant experience were required to apply audit procedures and evaluate the results of those procedures.

The following are the primary procedures we performed to address this key audit matter. We evaluated the design and tested the operating effectiveness of certain internal controls related to the Bank's income tax uncertainties process with the involvement of taxation professionals with specialized skills, industry knowledge and relevant experience. These included internal controls related to: (1) the interpretation of tax legislation and the evaluation of the technical merits of tax positions; and (2) the determination of the best estimate of the provision required for these tax uncertainties. We involved tax professionals with specialized skills and knowledge, who assisted in (1) evaluating the Bank's interpretations of tax legislation based on our knowledge and experience; (2) reading and evaluating advice obtained by the Bank from external counsel, and considering its impact on the measurement, if applicable, of the uncertain tax provisions; and (3) inspecting correspondence with applicable taxation authorities.

Other Information

Management is responsible for the other information. Other information comprises:

- the information included in Management's Discussion and Analysis filed with the relevant Canadian Securities Commissions; and
- the information, other than the consolidated financial statements and the auditor's report thereon, included in a document entitled 2024 Annual Report.

Our opinion on the consolidated financial statements does not cover the other information and we do not and will not express any form of assurance conclusion thereon.

In connection with our audit of the consolidated financial statements, our responsibility is to read the other information identified above and, in doing so, consider whether the other information is materially inconsistent with the consolidated financial statements or our knowledge obtained in the audit and remain alert for indications that the other information appears to be materially misstated.

We obtained the information included in Management's Discussion and Analysis and 2024 Annual Report filed with the relevant Canadian Securities Commissions as at the date of this auditor's report. If, based on the work we have performed on this other information, we conclude that there is a material misstatement of this other information, we are required to report that fact in the auditor's report. We have nothing to report in this regard.

Responsibilities of Management and Those Charged with Governance for the Consolidated Financial Statements

Management is responsible for the preparation and fair presentation of the consolidated financial statements in accordance with IFRS as issued by the IASB, and for such internal control as management determines is necessary to enable the preparation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the consolidated financial statements, management is responsible for assessing the Bank's ability to continue as a going concern, disclosing as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Bank or to cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Bank's financial reporting process.

Auditor's Responsibilities for the Audit of the Consolidated Financial Statements

Our objectives are to obtain reasonable assurance about whether the consolidated financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion.

Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with Canadian generally accepted auditing standards will always detect a material misstatement when it exists.

Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of the consolidated financial statements.

As part of an audit in accordance with Canadian generally accepted auditing standards, we exercise professional judgment and maintain professional skepticism throughout the audit.

We also:

- Identify and assess the risks of material misstatement of the consolidated financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion.
The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Bank's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Bank's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the consolidated financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Bank to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the consolidated financial statements, including the disclosures, and whether the consolidated financial statements represent the underlying transactions and events in a manner that achieves fair presentation.
- Communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.
- Provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.
- Obtain sufficient appropriate audit evidence regarding the financial information of the entities or business activities within the Bank to express an opinion on the consolidated financial statements. We are responsible for the direction, supervision and performance of the group audit. We remain solely responsible for our audit opinion.
- Determine, from the matters communicated with those charged with governance, those matters that were of most significance in the audit of the consolidated financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our auditor's report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Shareholders and the Board of Directors of The Bank of Nova Scotia

Opinion on the Consolidated Financial Statements

We have audited the accompanying consolidated statements of financial position of The Bank of Nova Scotia (the Bank) as of October 31, 2024 and 2023, the related consolidated statements of income, comprehensive income, changes in equity and cash flows for the years then ended, and the related notes (collectively, the consolidated financial statements). In our opinion, the consolidated financial statements present fairly, in all material respects, the financial position of the Bank as of October 31, 2024 and 2023, and its financial performance and its cash flows for the years then ended, in conformity with International Financial Reporting Standards (IFRS) as issued by the International Accounting Standards Board (IASB).

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States) (PCAOB), the Bank's internal control over financial reporting as of October 31, 2024, based on criteria established in *Internal Control – Integrated Framework (2013)* issued by the Committee of Sponsoring Organizations of the Treadway Commission, and our report dated December 3, 2024 expressed an unqualified opinion on the effectiveness of the Bank's internal control over financial reporting.

Basis for Opinion

These consolidated financial statements are the responsibility of the Bank's management. Our responsibility is to express an opinion on these consolidated financial statements based on our audits. We are a public accounting firm registered with the PCAOB and are required to be independent with respect to the Bank in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the consolidated financial statements are free of material misstatement, whether due to error or fraud. Our audits included performing procedures to assess the risks of material misstatement of the consolidated financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the consolidated financial statements.

Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the consolidated financial statements. We believe that our audits provide a reasonable basis for our opinion.

Critical Audit Matters

The critical audit matters communicated below are matters arising from the current period audit of the consolidated financial statements that were communicated or required to be communicated to the Audit and Conduct Review Committee and that: (1) relate to accounts or disclosures that are material to the consolidated financial statements and (2) involved our especially challenging, subjective, or complex judgments. The communication of critical audit matters does not alter in any way our opinion on the consolidated financial statements, taken as a whole, and we are not, by communicating the critical audit matters below, providing separate opinions on the critical audit matters or on the accounts or disclosures to which they relate.

(i) Assessment of Allowance for Credit Losses (ACL)

Refer to Notes 3 and 14 to the consolidated financial statements.

The Bank's ACL on loans was \$6,536 million as at October 31, 2024. The Bank applies a three-stage approach to measure the ACL, using an expected credit loss (ECL) approach as required under IFRS 9 Financial Instruments. The Bank's ACL calculations are outputs of a set of complex models. The ACL calculations reflect probability-weighted outcomes that consider multiple scenarios based on reasonable and supportable forecasts. The probability of default (PD), loss given default (LGD) and exposure at default (EAD) inputs used to estimate ECL are modeled based on historical default and loss experience, and macroeconomic variables that are closely related with credit losses in the relevant portfolio. The Bank assesses whether there has been a significant increase in credit risk since origination or where the financial asset is in default. If there has been a significant increase in credit risk or the financial asset is in default, then lifetime ACL is recorded; otherwise, an ACL equal to 12 month expected credit losses is recorded. The estimation of ECL for each stage and the assessment of significant increases in credit risk consider information about past events and current conditions as well as forecasts of future events and economic conditions. The estimation and application of forward-looking information requires significant judgment. Qualitative adjustments or overlays may also be recorded as temporary adjustments using expert credit judgment where the inputs, assumptions and/or models do not capture all relevant risk factors. The use of management overlays requires significant judgment that may impact the amount of ACL recognized.

We identified the assessment of the ACL as a critical audit matter. Significant auditor judgment was required because there was a high degree of measurement uncertainty due to the significant management judgments inherent in certain of the Bank's key modeled inputs and methodologies. These management judgments impact certain inputs, assumptions, qualitative adjustments or overlays, and the determination of when there has been a significant increase in credit risk. The assessment of the ACL also required significant auditor attention and complex auditor judgment to apply and evaluate the results of audit procedures. Further, specialized skills and knowledge, including experience in the industry, were required to apply audit procedures and evaluate the results of those procedures.

The following are the primary procedures we performed to address this critical audit matter. With the involvement of our credit risk and economics professionals with specialized skills, industry knowledge and relevant experience, we evaluated the design and tested the operating effectiveness of certain internal controls related to the Bank's ACL process. These included internal controls related to: (1) initial and periodic validation and performance monitoring of models used to derive key modeled inputs into the ACL calculation being PD, LGD and EAD; (2) benchmarking of certain macroeconomic variables, model validation associated with the derivation of the remaining variables and the alternative scenarios and review of probability weights used in the ACL models; (3) the methodology used to determine whether there has been a significant increase in credit risk; and (4) the methodology and assumptions used in the determination of qualitative adjustments or overlays. Additionally, for non-retail loans, we tested certain internal controls related to loan reviews over the determination of loan risk grades. We involved credit risk and economics professionals with specialized skills, industry knowledge and relevant experience who assisted in: (1) evaluating the methodology and models used to derive key modeled inputs into the ACL calculation being PD, LGD and EAD and the determination of whether there has been a significant increase in credit risk; (2) assessing the appropriateness of certain underlying macroeconomic variables against external economic data, evaluating the models used to derive other macroeconomic variables and evaluating the assumptions associated with the alternative economic scenarios and

the related probabilities; and (3) assessing the qualitative adjustments or overlays by applying our knowledge of the industry and credit judgment to evaluate the appropriateness of the Bank's underlying methodology and assumptions. Additionally, for a selection of non-retail loans, we evaluated the Bank's assigned loan risk grades against the Bank's borrower risk rating methodology.

(ii) Assessment of the Measurement of Fair Value of Certain Financial Instruments

Refer to Notes 3 and 8 to the consolidated financial statements.

The Bank measures certain financial assets and financial liabilities at fair value on a recurring basis. Where such financial instruments trade in inactive markets or when using internal models where observable parameters do not exist, significant management judgment is required in the selection of valuation techniques and model inputs. The valuation techniques used in determining the fair value of financial instruments include internal models and net asset valuations. The significant unobservable inputs used in the Bank's valuation techniques include general partner valuations per net asset values (NAVs), interest rate volatility, equity volatility and equity correlation.

We identified the assessment of the measurement of fair value for certain financial instruments as a critical audit matter. Significant auditor judgment was required because there was a high degree of measurement uncertainty due to significant judgments inherent in the Bank's valuation techniques and significant unobservable inputs used to develop the fair value of certain financial assets and financial liabilities. The assessment of the fair value also required significant auditor attention and complex auditor judgment to apply and evaluate the results of audit procedures. Further, specialized skills and knowledge, including experience in the industry, were required to apply audit procedures and evaluate the results of those procedures.

The following are the primary procedures we performed to address this critical audit matter. We evaluated the design and tested the operating effectiveness of certain internal controls related to the Bank's processes to determine the fair value of certain financial instruments with the involvement of valuation and information technology professionals with specialized skills, industry knowledge and relevant experience. These included internal controls related to: (1) model validation at inception and periodically; (2) management's review of NAVs; (3) independent price verification, including assessment of rate sources; and (4) segregation of duties and access controls. With the involvement of valuation professionals with specialized skills, industry knowledge and relevant experience, we tested the fair value of a selection of certain financial instruments. Depending on the nature of the financial instruments, we did this by comparing the NAVs to external information or by developing an independent estimate of fair value and comparing it to the fair value determined by the Bank.

(iii) Assessment of Uncertain Tax Provisions

Refer to Notes 3 and 28 to the consolidated financial statements.

The Bank maintains provisions for uncertain tax positions that it believes appropriately reflect the risk of tax positions under discussion, audit, dispute, or appeal with tax authorities, or which are otherwise considered to involve uncertainty. These provisions are made using the Bank's best estimate of the amount expected to be paid based on an assessment of all relevant factors, which are reviewed at the end of each reporting period.

We identified the assessment of some uncertain tax provisions as a critical audit matter. Significant auditor judgment was required because there was a high degree of measurement uncertainty due to the significant judgments inherent in the Bank's interpretation of tax legislation and its best estimate of the ultimate resolution of tax positions. This required significant auditor attention and complex auditor judgment to evaluate the results of audit procedures. Further, specialized skills, industry knowledge, and relevant experience were required to apply audit procedures and evaluate the results of those procedures.

The following are the primary procedures we performed to address this critical audit matter. We evaluated the design and tested the operating effectiveness of certain internal controls related to the Bank's income tax uncertainties process with the involvement of taxation professionals with specialized skills, industry knowledge and relevant experience. These included internal controls related to: (1) the interpretation of tax legislation and the evaluation of the technical merits of tax positions; and (2) the determination of the best estimate of the provision required for these tax uncertainties. We involved tax professionals with specialized skills and knowledge, who assisted in: (1) evaluating the Bank's interpretations of tax legislation based on our knowledge and experience; (2) reading and evaluating advice obtained by the Bank from external counsel, and considering its impact on the measurement, if applicable, of the uncertain tax provisions; and (3) inspecting correspondence with applicable taxation authorities.

Toronto, Canada
December 3, 2024

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Shareholders and the Board of Directors of The Bank of Nova Scotia

Opinion on Internal Control Over Financial Reporting

We have audited The Bank of Nova Scotia's internal control over financial reporting as of October 31, 2024, based on the criteria established in *Internal Control – Integrated Framework (2013)* issued by the Committee of Sponsoring Organizations of the Treadway Commission. In our opinion, The Bank of Nova Scotia (the Bank) maintained, in all material respects, effective internal control over financial reporting as of October 31, 2024, based on the criteria established in *Internal Control – Integrated Framework (2013)* issued by the Committee of Sponsoring Organizations of the Treadway Commission.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States) (PCAOB), the consolidated statements of financial position of the Bank as of October 31, 2024, and 2023, the related consolidated statements of income, comprehensive income, changes in equity and cash flows for the years then ended, and the related notes (collectively, the consolidated financial statements) and our report dated December 3, 2024 expressed an unqualified opinion on those consolidated financial statements.

Basis for Opinion

The Bank's management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting, included in the Controls and Accounting Policies section of Management's Discussion and Analysis under the heading "Internal control over financial reporting". Our responsibility is to express an opinion on the Bank's internal control over financial reporting based on our audit. We are a public accounting firm registered with the PCAOB and are required to be independent with respect to the Bank in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audit in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit of internal control over financial reporting included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audit also included performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

Definition and Limitations of Internal Control Over Financial Reporting

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

1 Reporting Entity

The Bank of Nova Scotia (the Bank) is a chartered Schedule I bank under the Bank Act (Canada) (the Bank Act) and is regulated by the Office of the Superintendent of Financial Institutions (OSFI). The Bank is a global financial services provider offering a diverse range of products and services, including personal, commercial, corporate and investment banking. The head office of the Bank is located at 1709 Hollis Street, Halifax, Nova Scotia, Canada and its executive offices are at 40 Temperance Street, Toronto, Canada. The common shares of the Bank are listed on the Toronto Stock Exchange (TSX) and the New York Stock Exchange.

2 Basis of Preparation

Statement of compliance

These consolidated financial statements were prepared in accordance with International Financial Reporting Standards (IFRS) as issued by the International Accounting Standards Board (IASB) and accounting requirements of OSFI in accordance with Section 308 of the Bank Act. Section 308 states that, except as otherwise specified by OSFI, the financial statements are to be prepared in accordance with IFRS.

The consolidated financial statements for the year ended October 31, 2024 have been approved by the Board of Directors for issue on December 3, 2024.

Certain comparative amounts have been restated to conform with the basis of presentation in the current year.

Basis of measurement

The consolidated financial statements have been prepared on the historical cost basis except for the following material items that are measured at fair value in the Consolidated Statement of Financial Position:

- Financial assets and liabilities measured at fair value through profit or loss
- Financial assets and liabilities designated at fair value through profit or loss
- Derivative financial instruments
- Equity instruments designated at fair value through other comprehensive income
- Debt instruments measured at fair value through other comprehensive income

Functional and presentation currency

These consolidated financial statements are presented in Canadian dollars, which is the Bank's functional currency. All financial information presented in Canadian dollars has been rounded to the nearest million unless otherwise stated.

Management's use of estimates, assumptions and judgments

The Bank's accounting policies require estimates, assumptions and judgments that relate to matters that are inherently uncertain. The Bank has established procedures to ensure that accounting policies are applied consistently. Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognized in the year in which the estimates are revised.

Use of estimates and assumptions

The preparation of these consolidated financial statements, in conformity with IFRS, requires management to make estimates and assumptions that affect the reported amount of assets and liabilities at the date of the consolidated financial statements, and other comprehensive income and income and expenses during the reporting period. Estimates made by management are based on historical experience and other factors and assumptions that are believed to be reasonable. Key areas of estimation uncertainty include those relating to the allowance for credit losses, the fair value of financial instruments (including derivatives), corporate income taxes, employee benefits, goodwill and intangible assets, the fair value of all identifiable assets and liabilities as a result of business combinations, impairment of non-financial assets and provisions. The Bank has utilized estimates, assumptions and judgments that reflect this uncertainty. While management makes its best estimates and assumptions, actual results could differ from these and other estimates.

Significant judgments

In the preparation of these consolidated financial statements, management is required to make significant judgments in the classification and presentation of transactions and instruments and accounting for the Bank's involvement with other entities.

Consolidated Financial Statements

Significant estimates, assumptions and judgments have been made in the following areas and are discussed as noted in the consolidated financial statements:

Allowance for credit losses	Note 3 Note 14(e)
Fair value of financial instruments	Note 3 Note 8
Corporate income taxes	Note 3 Note 28
Employee benefits	Note 3 Note 29
Goodwill and intangible assets	Note 3 Note 19
Fair value of all identifiable assets and liabilities as a result of business combinations	Note 3 Note 37
Impairment of investment securities	Note 3 Note 13
Impairment of non-financial assets	Note 3 Note 17 Note 18 Note 19
Structured entities	Note 3 Note 16
De facto control of other entities	Note 3 Note 32
Derecognition of financial assets and liabilities	Note 3 Note 15
Provisions	Note 3 Note 24

3 Material Accounting Policies

The material accounting policies used in the preparation of these consolidated financial statements, including any additional accounting requirements of OSFI, as set out below, have been applied consistently to all periods presented in these consolidated financial statements.

Basis of consolidation

The consolidated financial statements include the assets, liabilities, financial performance and cash flows of the Bank and all of its subsidiaries, after elimination of intercompany transactions and balances. Subsidiaries are defined as entities controlled by the Bank. The Bank's subsidiaries can be classified as entities controlled through voting interests or structured entities. The Bank consolidates a subsidiary from the date it obtains control. For the Bank to control an entity, all three elements of control should be in existence:

- power over the investee;
- exposure, or rights, to variable returns from involvement with the investee; and
- the ability to use power over the investee to affect the amount of the Bank's returns.

The Bank does not control an investee when it is acting as an agent. The Bank assesses whether it is an agent by determining whether it is primarily engaged to act on behalf of and for the benefit of another party or parties. The Bank reassesses whether it controls an investee if facts and circumstances indicate that one or more of the elements of control has changed.

Voting-interest subsidiaries

Control is presumed with an ownership interest of more than 50% of the voting rights in an entity unless there are other factors that indicate that the Bank does not control the entity despite having more than 50% of voting rights.

The Bank may consolidate an entity when it owns less than 50% of the voting rights when it has one or more other attributes of power:

- by virtue of an agreement, over more than half of the voting rights;
- to govern the financial and operating policies of the entity under a statute or an agreement;
- to appoint or remove the majority of the members of the board of directors or equivalent governing body and control of the entity is by that board or body; or
- to govern the financial and operating policies of the entity through the size of its holding of voting rights relative to the size and dispersion of holding of the other vote holders and voting patterns at shareholder meetings (i.e., de facto control).

Non-controlling interests are presented within equity in the Consolidated Statement of Financial Position separate from equity attributable to equity holders of the Bank. The net income attributable to non-controlling interests is presented separately in the Consolidated Statement of Income. Partial sales and incremental purchases of interests in subsidiaries that do not result in a change of control are accounted for as equity transactions with non-controlling interest holders. Any difference between the carrying amount of the interest and the transaction amount is recorded as an adjustment to retained earnings.

Structured entities

Structured entities are designed to accomplish certain well-defined objectives and for which voting or similar rights are not the dominant factor in deciding who controls the entity. The Bank controls an entity when it is exposed, or has rights, to variable returns from its involvement with the investee and has the ability to affect those returns through its power over the investee.

The Bank consolidates all structured entities that it controls.

Investments in associates

An associate is an entity in which the Bank has significant influence, but not control, over the operating and financial policies of the entity.

Investments in associates are recognized initially at cost, which includes the purchase price and other costs directly attributable to the purchase. Associates are accounted for using the equity method which reflects the Bank's share of the increase or decrease of the post-acquisition earnings and other movements in the associate's equity.

Investments in associates are evaluated for impairment at the end of each financial reporting period, or more frequently if events or changes in circumstances indicate the existence of objective evidence of impairment.

For purposes of applying the equity method for an investment that has a different reporting period from the Bank, adjustments are made for the effects of any significant events or transactions that occur between the reporting date of the investment and the reporting date of the Bank.

Joint arrangements

The Bank's investments in joint arrangements over which the Bank has joint control are classified as either joint operations or joint ventures, depending on the contractual rights and obligations of each investor, rather than the legal structure of the joint arrangement.

Similar to accounting for investments in associates, for joint ventures, investments are recognized initially at cost and accounted for using the equity method, which reflects the Bank's share of the increase or decrease of the post-acquisition earnings and other movements in the joint venture's equity. Investments in joint ventures are evaluated for impairment at the end of each financial reporting period, or more frequently if events or changes in circumstances indicate the existence of objective evidence of impairment.

For joint operations, the Bank recognizes its direct rights to, and its share of jointly held assets, liabilities, revenues and expenses. These have been incorporated in the consolidated financial statements under the appropriate headings.

Translation of foreign currencies

The financial statements of each of the Bank's foreign operations are measured using its functional currency, being the currency of the primary economic environment of the foreign operation.

Translation gains and losses related to the Bank's monetary items are recognized in non-interest income in the Consolidated Statement of Income. Revenues and expenses denominated in foreign currencies are translated using average exchange rates. Foreign currency non-monetary items that are measured at historical cost are translated into the functional currency at historical rates. Foreign currency non-monetary items measured at fair value are translated into functional currency using the rate of exchange at the date the fair value was determined. Foreign currency gains and losses on non-monetary items are recognized in the Consolidated Statement of Income or Consolidated Statement of Comprehensive Income consistent with the gain or loss on the non-monetary item.

Unrealized gains and losses arising upon translation of foreign operations, together with any gains or losses arising from hedges of those net investment positions to the extent effective, are credited or charged to net change in unrealized foreign currency translation gains/losses in other comprehensive income in the Consolidated Statement of Comprehensive Income. On disposal or meeting the definition of partial disposal of a foreign operation, an appropriate portion of the translation differences previously recognized in other comprehensive income are recognized in the Consolidated Statement of Income.

Financial assets and liabilities*Recognition and initial measurement*

The Bank, on the date of origination or purchase, recognizes loans, debt and equity securities, deposits and subordinated debentures at the fair value of the consideration paid or received. Regular-way purchases and sales of financial assets are recognized on the settlement date. All other financial assets and liabilities, including derivatives, are initially recognized on the trade date at which the Bank becomes a party to the contractual provisions of the instrument.

The initial measurement of a financial asset or liability is at fair value plus transaction costs that are directly attributable to its purchase or issuance. For instruments measured at fair value through profit or loss, transaction costs are recognized immediately in profit or loss.

Classification and measurement, derecognition, and impairment of financial instruments**Classification and measurement***Classification and measurement of financial assets*

Financial assets include both debt and equity instruments, are classified into one of the following measurement categories:

- Amortized cost;
- Fair value through other comprehensive income (FVOCI);
- Fair value through profit or loss (FVTPL);
- Elected at fair value through other comprehensive income (Equities only); or
- Designated at FVTPL

Debt instruments

Debt instruments, including loans and debt securities, are classified into one of the following measurement categories:

- Amortized cost;
- Fair value through other comprehensive income (FVOCI);
- Fair value through profit or loss (FVTPL); or
- Designated at FVTPL

Classification of debt instruments is determined based on:

- (i) The business model under which the asset is held; and
- (ii) The contractual cash flow characteristics of the instrument.

Business model assessment

A business model assessment involves determining how financial assets are managed to generate cash flows. The Bank's business model assessment is based on the following categories:

- Held to collect: The objective of this business model is to hold assets and collect contractual cash flows. Any sales of the asset are incidental to the objective of the model.
- Held to collect and for sale: Both collecting contractual cash flows and sales are integral to achieving the objectives of the business model.
- Other business model: The business model is neither held-to-collect nor held-to-collect and for sale.

The Bank assesses the business model at a portfolio level reflective of how groups of assets are managed together to achieve a particular business objective. For the assessment of a business model, the Bank takes into consideration the following factors:

- How the performance of assets in a portfolio is evaluated and reported to group heads and other key decision makers within the Bank's business lines;
- How compensation is determined for the Bank's business lines' management that manages the assets;
- How the business lines' management is compensated for managing the Bank's assets based on the fair value or the contractual cash flows collected;
- Whether the assets are held for trading purposes;
- The risks that affect the performance of assets held within a business model and how those risks are managed; and
- The frequency and volume of sales in prior periods and expectations about future sales activity.

Contractual cash flow characteristics assessment

The contractual cash flow characteristics assessment involves assessing the contractual features of an instrument to determine if they give rise to cash flows that are consistent with a basic lending arrangement. Contractual cash flows are consistent with a basic lending arrangement if they represent cash flows that are solely payments of principal and interest on the principal amount outstanding (SPPI).

Principal is defined as the fair value of the instrument at initial recognition. Principal may change over the life of the instrument due to repayments or amortization of premium/discount.

Interest is defined as the consideration for the time value of money and the credit risk associated with the principal amount outstanding and for other basic lending risks and costs (liquidity risk and administrative costs), and a profit margin.

If the Bank identifies any contractual features that could significantly modify the cash flows of the instrument such that they are no longer consistent with a basic lending arrangement, the related financial asset is classified and measured at FVTPL.

Debt instruments measured at amortized cost

Debt instruments are measured at amortized cost if they are held within a business model whose objective is to hold for collection of contractual cash flows where those cash flows represent solely payments of principal and interest. After initial measurement, debt instruments in this category are carried at amortized cost. Interest income on these instruments is recognized in interest income using the effective interest rate method. The effective interest rate is the rate that discounts estimated future cash payments or receipts through the expected life of the financial asset to the gross carrying amount of a financial asset. Amortized cost is calculated by taking into account any discount or premium on the acquisition, transaction costs and fees that are an integral part of the effective interest rate.

Impairment on debt instruments measured at amortized cost is calculated using the expected credit loss approach. Loans and debt securities measured at amortized cost are presented net of the allowance for credit losses (ACL) in the Statement of Financial Position.

Debt instruments measured at FVOCI

Debt instruments are measured at FVOCI if they are held within a business model whose objective is to hold for collection of contractual cash flows and for selling financial assets, where the assets' cash flows represent payments that are solely payments of principal and interest.

Subsequent to initial recognition, unrealized gains and losses on debt instruments measured at FVOCI are recorded in other comprehensive income (OCI), unless the instrument is designated in a fair value hedge relationship. When designated in a fair value hedge relationship, any changes in fair value due to changes in the hedged risk are recognized in Non-interest income in the Consolidated Statement of Income, along with changes in fair value of the hedging instrument. Upon derecognition, realized gains and losses are reclassified from OCI and recorded in Non-interest income in the Consolidated Statement of Income. Foreign exchange gains and losses that relate to the amortized cost of the debt instrument are recognized in the Consolidated Statement of Income. Premiums, discounts and related transaction costs are amortized over the expected life of the instrument to Interest income in the Consolidated Statement of Income using the effective interest rate method.

Impairment on debt instruments measured at FVOCI is determined using the expected credit loss approach. The ACL on debt instruments measured at FVOCI does not reduce the carrying amount of the asset in the Consolidated Statement of Financial Position, which remains at its fair value. Instead, an amount equal to the allowance that would arise if the assets were measured at amortized cost is recognized in OCI with a corresponding charge to provision for credit losses in the Consolidated Statement of Income. The accumulated allowance recognized in OCI is recycled to the Consolidated Statement of Income upon derecognition of the debt instrument.

Debt instruments measured at FVTPL

Debt instruments are measured at FVTPL if assets:

- (i) are held for trading purposes;
- (ii) are held as part of a portfolio managed on a fair value basis; or
- (iii) whose cash flows do not represent payments that are solely payments of principal and interest.

These instruments are measured at fair value in the Consolidated Statement of Financial Position, with transaction costs recognized immediately in the Consolidated Statement of Income as part of Non-interest income. Realized and unrealized gains and losses are recognized as part of Non-interest income in the Consolidated Statement of Income.

Debt instruments designated at FVTPL

The Bank designates certain debt instruments at FVTPL upon initial recognition, and the designation is irrevocable. The FVTPL designation is available when a fair value is reliably estimated, and doing so eliminates or significantly reduces an accounting mismatch which would otherwise arise.

Debt instruments designated at FVTPL are recorded in the Consolidated Statement of Financial Position at fair value. Changes in fair value are recognized in Non-interest income in the Consolidated Statement of Income.

Equity instruments

Equity instruments are classified into one of the following measurement categories:

- Fair value through profit or loss (FVTPL); or
- Elected at fair value through other comprehensive income (FVOCI).

Equity instruments measured at FVTPL

Equity instruments are measured at FVTPL, unless an election is made to designate them at FVOCI upon purchase, with transaction costs recognized immediately in the Consolidated Statement of Income as part of Non-interest income. Subsequent to initial recognition, the changes in fair value and dividends received are recognized in the Consolidated Statement of Income.

Equity instruments measured at FVOCI

At initial recognition, the Bank has an option to classify non-trading equity instruments at FVOCI. This election is irrevocable and is made on an instrument-by-instrument basis.

Gains and losses on these instruments, including when derecognized/sold, are recorded in OCI and are not subsequently reclassified to the Consolidated Statement of Income. As such, there is no specific impairment requirement. Dividends received are recorded in Interest income in the Consolidated Statement of Income. Any transaction costs incurred upon purchase of the security are added to the cost basis of the security and are not reclassified to the Consolidated Statement of Income on sale of the security.

Classification and measurement of financial liabilities

Financial liabilities are classified into one of the following measurement categories:

- Fair value through profit or loss (FVTPL);
- Amortized cost; or
- Designated at FVTPL.

Financial liabilities measured at FVTPL

Financial liabilities measured at FVTPL are held principally for the purpose of repurchasing in the near term, or form part of a portfolio of identified financial instruments that are managed together and for which there is evidence of a recent actual pattern of short term profit-taking. Financial liabilities are recognized on a trade date basis and accounted for at fair value, with changes in fair value and any gains or losses recognized in the Consolidated Statement of Income as part of the non-interest income. Transaction costs are expensed as incurred.

Financial liabilities measured at amortized cost

Deposits, subordinated notes and debentures are accounted for at amortized cost. Interest on deposits, calculated using the effective interest rate method, is recognized as interest expense. Interest on subordinated notes and debentures, including capitalized transaction costs, is recognized using the effective interest rate method as interest expense.

Financial liabilities designated at FVTPL

The Bank designates certain financial liabilities at FVTPL upon initial recognition, and the designation is irrevocable. The FVTPL designation is available when a fair value is reliably estimated.

Financial liabilities are designated at FVTPL when it meets one of the following criteria:

- The designation eliminates or significantly reduces an accounting mismatch which would otherwise arise; or
- A group of financial liabilities are managed and their performance is evaluated on a fair value basis, in line with a documented risk management strategy; or
- The financial liability contains one or more embedded derivatives which significantly modify the cash flows otherwise required.

Financial liabilities designated at FVTPL are recorded in the Consolidated Statement of Financial Position at fair value. Any changes in fair value are recognized in Non-interest income in the Consolidated Statement of Income, except for changes in fair value arising from changes in the Bank's own credit risk which are recognized in OCI. Changes in fair value due to changes in the Bank's own credit risk are not subsequently reclassified to the Consolidated Statement of Income upon derecognition/extinguishment of the liabilities.

Determination of fair value

The fair value of a financial asset or liability is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants in the principal, or in its absence, the most advantageous market to which the Bank has access at the measurement date.

The Bank values instruments carried at fair value using quoted market prices, where available. Fair value based on unadjusted quoted market prices for identical instruments in active markets represents a Level 1 valuation. When quoted market prices are not available, the Bank maximizes the use of observable inputs within valuation models. When a fair value is based on all significant market observable inputs, the valuation is classified as Level 2. Valuations that require the significant use of unobservable inputs are considered Level 3.

Inception gains and losses are only recognized where the valuation is dependent on observable market data; otherwise, they are deferred and amortized over the life of the related contract or until the valuation inputs become observable.

IFRS 13, *Fair Value Measurement* permits a measurement exception that allows an entity to determine the fair value of a group of financial assets and liabilities with offsetting risks based on the sale or transfer of its net exposure to a particular risk (or risks). The Bank has adopted this exception through an accounting policy choice. Consequently, the fair values of certain portfolios of financial instruments are determined based on the net exposure of those instruments to market, credit or funding risk.

In determining fair value for certain instruments or portfolios of instruments, valuation adjustments or reserves may be required to arrive at a more accurate representation of fair value. These adjustments include those made for credit risk, bid-offer spreads, unobservable parameters, funding costs and constraints on prices in inactive or illiquid markets.

Derecognition of financial assets and liabilities

Derecognition of financial assets

A financial asset is derecognized when the contractual rights to the cash flows from the asset has expired; or the Bank transfers the contractual rights to receive the cash flows from the financial asset; or has assumed an obligation to pay those cash flows to an independent third-party; or the Bank has transferred substantially all the risks and rewards of ownership of that asset to an independent third-party. Management determines whether substantially all the risk and rewards of ownership have been transferred by quantitatively comparing the variability in cash flows before and after the transfer. If the variability in cash flows remains significantly similar subsequent to the transfer, the Bank has retained substantially all of the risks and rewards of ownership.

Where substantially all the risks and rewards of ownership of the financial asset are neither retained nor transferred, the Bank derecognizes the transferred asset only if it has lost control over that asset. Control over the asset is represented by the practical ability to sell the transferred asset. If the Bank retains control over the asset, it will continue to recognize the asset to the extent of its continuing involvement. At times such continuing involvement may be in the form of investment in senior or subordinated tranches of notes issued by non-consolidated structured entities.

On derecognition of a financial asset, the difference between the carrying amount and the sum of (i) the consideration received (including any new asset obtained less any new liability assumed) and (ii) any cumulative gain or loss that had been recognized in other comprehensive income is recognized in the Consolidated Statement of Income.

Transfers of financial assets that do not qualify for derecognition are reported as secured financings in the Consolidated Statement of Financial Position.

The derecognition criteria are applied to the transfer of part of an asset, rather than the asset as a whole, only if such part comprises specifically identified cash flows from the asset, a fully proportionate share of the cash flows from the asset, or a fully proportionate share of specifically identified cash flows from the asset.

Derecognition of financial liabilities

A financial liability is derecognized when the obligation under the liability is discharged, canceled or expires. If an existing financial liability is replaced by another from the same counterparty on substantially different terms, or the terms of the existing liability are substantially modified, such an exchange or modification is treated as a derecognition of the original liability and the recognition of a new liability at fair value. The difference in the respective carrying amount of the existing liability and the new liability is recognized as a gain/loss in the Consolidated Statement of Income.

Impairment

Scope

The Bank applies a three-stage approach to measure allowance for credit losses, using an expected credit loss approach as required under IFRS 9, for the following categories of financial instruments that are not measured at fair value through profit or loss:

- Amortized cost financial assets;
- Debt securities classified as at FVOCI;
- Off-balance sheet loan commitments; and
- Financial guarantee contracts.

Expected credit loss impairment model

The Bank's allowance for credit losses calculations are outputs of models with a number of underlying assumptions regarding the choice of variable inputs and their interdependencies. The expected credit loss impairment model reflects the present value of all cash shortfalls related to default events either (i) over the following twelve months or (ii) over the expected life of a financial instrument depending on credit deterioration from inception. The allowance for credit losses reflects an unbiased, probability-weighted outcome which considers multiple scenarios based on reasonable and supportable forecasts.

This impairment model measures credit loss allowances using a three-stage approach based on the extent of credit deterioration since origination:

- Stage 1 – Where there has not been a significant increase in credit risk (SIR) since initial recognition of a financial instrument, an amount equal to 12 months expected credit loss is recorded. The expected credit loss is computed using a probability of default occurring over the next 12 months. For those instruments with a remaining maturity of less than 12 months, a probability of default corresponding to remaining term to maturity is used.
- Stage 2 – When a financial instrument experiences a SIR subsequent to origination but is not considered to be in default, it is included in Stage 2. This requires the computation of expected credit loss based on the probability of default over the remaining estimated life of the financial instrument.
- Stage 3 – Financial instruments that are considered to be in default are included in this stage. Similar to Stage 2, the allowance for credit losses captures the lifetime expected credit losses.

Measurement of expected credit loss

The probability of default (PD), exposure at default (EAD), and loss given default (LGD) inputs used to estimate expected credit losses are modelled based on macroeconomic variables that are closely related with credit losses in the relevant portfolio.

Details of these statistical parameters/inputs are as follows:

- PD – The probability of default is an estimate of the likelihood of default over a given time horizon. A default may only happen at a certain time over the remaining estimated life if the facility has not been previously derecognized and is still in the portfolio.
- EAD – The exposure at default is an estimate of the exposure at a future default date, considering expected changes in the exposure after the reporting date, including repayments of principal and interest, whether scheduled by contract or otherwise, expected drawdowns on committed facilities, and accrued interest from missed payments.
- LGD – The loss given default is an estimate of the loss arising in the case where a default occurs at a given time. It is based on the difference between the contractual cash flows due and those that the lender would expect to receive, including from the realization of any collateral. It is usually expressed as a percentage of the EAD.

Forward-looking information

The estimation of expected credit losses for each stage and the assessment of significant increases in credit risk consider information about past events and current conditions as well as reasonable and supportable forecasts of future events and economic conditions. The estimation and application of forward-looking information may require significant judgment.

Macroeconomic factors

In its models, the Bank relies on a broad range of forward-looking economic information as inputs, such as: GDP growth, unemployment rates, central bank interest rates, and house-price indices. The inputs and models used for calculating expected credit losses may not always capture all characteristics of the market at the date of the financial statements. Qualitative adjustments or overlays may be made as temporary adjustments using expert credit judgment.

Multiple forward-looking scenarios

The Bank determines its allowance for credit losses using four probability-weighted forward-looking scenarios. The Bank considers both internal and external sources of information and data in order to achieve unbiased projections and forecasts. The Bank prepares the scenarios using forecasts generated by Scotiabank Economics (SE). The forecasts are created using internal and external models which are modified by SE as necessary to formulate a 'base case' view of the most probable future direction of relevant economic variables as well as a representative range of other possible forecast scenarios. The process involves the development of three additional economic scenarios and consideration of the relative probabilities of each outcome.

The 'base case' represents the most likely outcome and is aligned with information used by the Bank for other purposes such as strategic planning and budgeting. The other scenarios represent more optimistic and more pessimistic outcomes. The Bank has identified and documented key drivers of credit risk and credit losses for each portfolio of financial instruments and, using an analysis of historical data, has estimated relationships between macroeconomic variables, credit risk, and credit losses.

Assessment of significant increase in credit risk (SIR)

At each reporting date, the Bank assesses whether there has been a significant increase in credit risk for exposures since initial recognition by comparing the risk of default occurring over the remaining expected life from the reporting date and the date of initial recognition. The assessment considers borrower-specific quantitative and qualitative information without consideration of collateral, and the impact of forward-looking macroeconomic factors.

The common assessments for SIR on retail and non-retail portfolios include macroeconomic outlook, management judgement, and delinquency and monitoring. Forward-looking macroeconomic factors are a key component of the macroeconomic outlook. The importance and relevance of each specific macroeconomic factor depends on the type of product, characteristics of the financial instruments and the borrower and the geographical region. Quantitative models may not always be able to capture all reasonable and supportable information that may indicate a significant increase in credit risk. Qualitative factors may be assessed to supplement the gap. Examples of situations include changes in adjudication criteria for a particular group of borrowers; changes in portfolio composition; and natural disasters impacting certain portfolios. With regards to delinquency and monitoring, there is a rebuttable presumption that the credit risk of the financial instrument has increased since initial recognition when contractual payments are more than 30 days overdue.

Retail portfolio – For retail exposures, a significant increase in credit risk is assessed based on thresholds that exist by product which consider the change in PD. The thresholds used for PD migration are reviewed and assessed at least annually unless there is a significant change in credit risk management practices in which case the review is brought forward.

Non-retail portfolio – The Bank uses a risk rating scale (IG codes) for its non-retail exposures. All non-retail exposures have an IG code assigned that reflects the probability of default of the borrower. Both borrower specific and non-borrower specific (i.e. macroeconomic) forward looking information is considered and reflected in the IG rating. Significant increase in credit risk is evaluated based on the migration of the exposures among IG codes.

Expected life

When measuring expected credit loss, the Bank considers the maximum contractual period over which the Bank is exposed to credit risk. All contractual terms are considered when determining the expected life, including prepayment, and extension and rollover options. For certain revolving credit facilities, such as credit cards, the expected life is estimated based on the period over which the Bank is exposed to credit risk and how the credit losses are mitigated by management actions.

Presentation of allowance for credit losses in the Statement of Financial Position

- Financial assets measured at amortized cost: as a deduction from the gross carrying amount of the financial assets;
- Debt instruments measured at fair value through other comprehensive income: no allowance is recognized in the Statement of Financial Position because the carrying value of these assets is their fair value. However, the allowance determined is presented in the accumulated other comprehensive income;
- Off-balance sheet credit risks include undrawn lending commitments, letters of credit and letters of guarantee: as a provision in other liabilities.

Modified financial assets

If the terms of a financial asset are modified or an existing financial asset is replaced with a new one, an assessment is made to determine if the existing financial asset should be derecognized. Where a modification does not result in derecognition, the date of origination continues to be used to determine SIR. Where a modification results in derecognition, the new financial asset is recognized at its fair value on the modification date. The modification date is also the date of origination for this new asset.

The Bank may modify the contractual terms of loans for either commercial or credit reasons. The terms of a loan in good standing may be modified for commercial reasons to provide competitive pricing to borrowers. Loans are also modified for credit reasons where the contractual terms are modified to grant a concession to a borrower that may be experiencing financial difficulty.

For all financial assets modifications of the contractual terms may result in derecognition of the original asset when the changes to the terms of the loans are considered substantial. These terms include interest rate, authorized amount or term. The original loan is derecognized, and the new loan is recognized at its fair value. The difference between the carrying value of the derecognized asset and the fair value of the new asset is recognized in the Consolidated Statement of Income.

For all loans, performing and credit-impaired, where the modification of terms did not result in the derecognition of the loan, the gross carrying amount of the modified loan is recalculated based on the present value of the modified cash flows discounted at the original effective interest rate and any gain or loss from the modification is recorded in the provision for credit losses line in the Consolidated Statement of Income.

Definition of default

The Bank considers a financial instrument to be in default as a result of one or more loss events that occurred after the date of initial recognition of the instrument and the loss event has a negative impact on the estimated future cash flows of the instrument that can be reliably estimated. This includes events that indicate:

- significant financial difficulty of the borrower;
- default or delinquency in interest or principal payments;
- high probability of the borrower entering a phase of bankruptcy or a financial reorganization;
- measurable decrease in the estimated future cash flows from the loan or the underlying assets that back the loan.

The Bank considers that default has occurred and classifies the financial asset as impaired when it is more than 90 days past due, except for credit card receivables that are treated as defaulted when 180 days past due, unless reasonable and supportable information demonstrates that a more lagging default criterion is appropriate.

Write-off policy

The Bank writes off an impaired financial asset (and the related impairment allowance), either partially or in full, when there is no realistic prospect of recovery. Where financial assets are secured, write-off is generally after receipt of any proceeds from the realization of security. In circumstances where the net realizable value of any collateral has been determined and there is no reasonable expectation of further recovery, write-off may be earlier. Credit card receivables 180 days past due are written-off. In subsequent periods, any recoveries of amounts previously written off are credited to the provision for credit losses in the Consolidated Statement of Income.

Purchased loans

All purchased loans are initially measured at fair value on the date of acquisition. As a result, no allowance for credit losses would be recorded in the Consolidated Statement of Financial Position on the date of acquisition. Purchased loans may fit into either of the two categories: Performing loans or Purchased Credit-Impaired (PCI) loans.

Purchased performing loans follow the same accounting as originated performing loans and are reflected in Stage 1 on the date of the acquisition. They will be subject to a 12-month allowance for credit losses which is recorded as a provision for credit losses in the Consolidated Statement of Income. The fair value adjustment set up for these loans on the date of acquisition is amortized into interest income over the life of these loans.

PCI loans are reflected in Stage 3 and are always subject to lifetime allowance for credit losses. Any changes in the expected cash flows since the date of acquisition are recorded as a charge/recovery in the provision for credit losses in the Consolidated Statement of Income at the end of all reporting periods subsequent to the date of acquisition.

Modification of financial instruments in the context of interest rate benchmark reform – Phase 2 amendments

When the basis for determining the contractual cash flows of a financial asset or financial liability measured at amortized cost is changed as a result of interest rate benchmark reform (IBOR reform), the Bank updates the effective interest rate of the financial asset or financial liability similar to a floating rate financial instrument and does not derecognize or adjust the carrying amount (the practical expedient). The practical expedient is applied only when the modification is required as a direct consequence of IBOR reform, and the new basis for determining the contractual cash flows is economically equivalent to the previous basis. If changes are made to a financial asset or financial liability in addition to changes to the basis for determining the contractual cash flows required by the interest rate benchmark reform, then the Bank sequentially updates the effective interest first to reflect the change required by IBOR reform and then applies its policies on modification or derecognition of financial assets and financial liabilities.

Offsetting of financial instruments

Financial assets and financial liabilities with the same counterparty are offset, with the net amount reported in the Consolidated Statement of Financial Position, only if there is a legally enforceable right to offset the recognized amounts and there is an intention to settle on a net basis, or to realize the assets and settle the liabilities simultaneously. When financial assets and financial liabilities are offset in the Consolidated Statement of Financial Position, the related income and expense items will also be offset in the Consolidated Statement of Income, unless specifically prohibited by an applicable accounting standard.

Cash and deposits with financial institutions

Cash and deposits with financial institutions comprise cash, cash equivalents, demand deposits with banks and other financial institutions, and highly liquid investments that are readily convertible to cash, subject to an insignificant risk of changes in value. These investments are those with less than three months maturity from the date of acquisition.

Precious metals

Precious metals are carried at fair value less costs to sell, and any changes in value are credited or charged to non-interest income – trading revenues in the Consolidated Statement of Income.

Securities purchased and sold under resale agreements

Securities purchased under resale agreements (reverse repurchase agreements) require the purchase of securities by the Bank from a counterparty with an agreement entered to resell the securities at a fixed price at a future date. Since the Bank is reselling the securities at a fixed price at a future date, the risks and rewards have not been transferred to the Bank. The Bank has the right to liquidate the securities purchased in the event of counterparty default.

Whereas securities sold under agreements to repurchase (repurchase agreements) require the sale of securities by the Bank to a counterparty with an agreement entered simultaneously to purchase the securities back at a fixed price at a future date. Since the Bank is purchasing the securities back at a fixed price at a future date, the risks and rewards have not been transferred from the Bank. The counterparty has the right to use the collateral pledged by the Bank in the event of default.

These agreements are treated as collateralized financing arrangements and are initially recognized at amortized cost. The party disbursing the cash takes possession of the securities serving as collateral for the financing and having a market value equal to, or more than, the principal amount loaned. The securities received under reverse repurchase agreements and securities delivered under repurchase agreements are not recognized on, or derecognized from, the Consolidated Statement of Financial Position, unless the risks and rewards of ownership are obtained or relinquished. The related interest income and interest expense are recorded on an accrual basis using the effective interest rate in the Consolidated Statement of Income.

Obligations related to securities sold short

Obligations related to securities sold short arise in dealing and market-making activities where debt securities and equity shares are sold without possessing such securities.

Similarly, if securities purchased under an agreement to resell are subsequently sold to third parties, the obligation to return the securities is recorded as a short sale within obligations related to securities sold short in the Consolidated Statement of Financial Position. These trading liabilities are measured at fair value with any gains or losses included in non-interest income – trading revenues in the Consolidated Statement of Income. Interest expense accruing on debt securities sold short is recorded in the Consolidated Statement of Income.

Securities lending and borrowing

Securities lending and borrowing transactions are usually collateralized by securities or cash. The transfer of the securities to counterparties is only reflected on the Consolidated Statement of Financial Position if the risks and rewards of ownership are also transferred. For cash collateral advanced or received, the Bank presents these transactions as securities sold under a repurchase agreement or securities purchased under a reverse repurchase agreement, respectively. Interest income on cash collateral paid and interest expense on cash collateral received together with securities lending income and securities borrowing fee are reported in the Consolidated Statement of Income.

Securities borrowed are not recognized on the Consolidated Statement of Financial Position unless they are then sold to third parties, in which case the obligation to return the securities is recorded as a trading liability and measured at fair value with any gains or losses included in non-interest income – trading revenues, in the Consolidated Statement of Income.

Derivative instruments

Derivative instruments are contracts whose value is derived from interest rates, foreign exchange rates, commodity prices, equity prices or other financial variables. Most derivative instruments can be characterized as interest rate contracts, foreign exchange and gold contracts, commodity contracts, equity contracts or credit contracts. Derivative instruments are either exchange-traded contracts or negotiated over-the-counter contracts. Negotiated over-the-counter contracts include swaps, forwards and options.

The Bank enters into these derivative contracts for trading purposes, as well as to manage its risk exposures (i.e., to manage the Bank's non-trading interest rate, foreign currency and other risk exposures). Trading activities are undertaken to meet the needs of the Bank's customers, as well as for the Bank's own account.

Derivatives embedded in other financial liabilities or host contracts are treated as separate stand-alone derivatives when the following conditions are met:

- their economic characteristics and risks are not closely related to those of the host contract;
- a separate instrument with the same terms as the embedded derivative would meet the definition of a derivative; and
- the combined contract is not held for trading or designated at fair value through profit or loss.

Where an embedded derivative is separable from the host contract but the fair value, as at the acquisition or reporting date, cannot be reliably measured separately, the entire combined contract is measured at fair value. All embedded derivatives are presented on the Consolidated Statement of Financial Position on a combined basis with the host contracts. Changes in fair value of embedded derivatives that are separated from the host contract are recognized in non-interest income in the Consolidated Statement of Income.

All derivatives, including embedded derivatives that must be separately accounted for, are recorded at fair value in the Consolidated Statement of Financial Position. The determination of the fair value of derivatives includes consideration of credit risk, estimated funding costs and ongoing direct costs over the life of the instruments. Inception gains or losses on derivatives are only recognized where the valuation is dependent on observable market data; otherwise, they are deferred and amortized over the life of the related contract, or until the valuation inputs become observable.

The gains and losses resulting from changes in fair values of trading derivatives are included in non-interest income – trading revenues in the Consolidated Statement of Income.

Changes in the fair value of derivatives that do not qualify for hedge accounting are recorded in the Consolidated Statement of Income in non-interest income – other. Where derivative instruments are used to manage the volatility of share-based payment expense, these derivatives are carried at fair value with changes in the fair value in relation to units hedged included in non-interest expenses – salaries and employee benefits in the Consolidated Statement of Income.

Changes in the fair value of derivatives that qualify for hedge accounting are recorded as non-interest income – other in the Consolidated Statement of Income for fair value hedges and other comprehensive income in the Consolidated Statement of Comprehensive Income for cash flow hedges and net investment hedges.

Hedge accounting

The Bank has elected to continue to apply the hedge accounting requirements of IAS 39. Also, the Bank has implemented the additional hedge accounting disclosures that are required by the IFRS 9 related amendments to IFRS 7 *Financial Instruments: Disclosures*.

The Bank formally documents all hedging relationships and its risk management objective and strategy for undertaking these hedge transactions at inception. The hedge documentation includes identification of the asset, liability, firm commitment or highly probable forecasted transaction being hedged, the nature of the risk being hedged, the hedging instrument used, and the method used to assess the effectiveness of the hedge.

The Bank also formally assesses, both at each hedge's inception and on an ongoing basis, whether the hedging instruments are highly effective in offsetting changes in fair value or cash flows of the hedged items within an 80-125% range. This assessment incorporates a comparison of critical terms of the hedged and hedging item, and regression analysis, in order to determine (i) whether the hedge relationship is expected to be highly effective going forward (i.e. prospective effectiveness assessment) and (ii) whether the hedge was actually highly effective for the designated period (i.e. retrospective effectiveness assessment). In assessing prospective hedge effectiveness for a hedge relationship directly impacted by the IBOR reform, the Bank will assume that the benchmark interest rate is not altered as a result of the IBOR reform. In instances of assessing retrospective hedge effectiveness where a hedge relationship directly impacted by the IBOR reform falls outside of the 80-125% range solely as a result of the IBOR reform, the Bank will continue hedge accounting as long as other hedge accounting requirements are met.

Hedge ineffectiveness is measured and recorded in non-interest income – other in the Consolidated Statement of Income. When the basis for determining the contractual cash flows of existing hedge relationships changes as a result of the IBOR reform, the Bank updates the hedge documentation without discontinuing the hedging relationship. For cash flow hedges where the interest benchmark changes as a result of the IBOR reform, the Bank deems that the corresponding hedge reserve in OCI is based on the alternative benchmark rate to determine whether the hedged future cash flows are expected to occur. For changes that are in addition to those required by the IBOR reform, the Bank first determines whether the additional changes result in discontinuation of hedge relationships before applying the relief. In addition, when determining the hedged risk, the Bank may designate an alternative benchmark rate risk component that is not currently separately identifiable, as the Bank reasonably expects that the alternative benchmark rate will become separately identifiable within a 24-month period from its first designation.

There are three types of hedges: (i) fair value hedges, (ii) cash flow hedges and (iii) net investment hedges.

Fair value hedges

For fair value hedges, the change in fair value of the hedging instrument is offset in the Consolidated Statement of Income by the change in fair value of the hedged item attributable to the hedged risk. For hedges that are discontinued, the hedged item is no longer adjusted for changes in fair value. The cumulative fair value adjustment of the hedged item is amortized to interest income over its remaining term to maturity or written off to non-interest income directly if the hedged item ceases to exist. The Bank uses fair value hedges primarily to convert fixed rate financial instruments to floating rate financial instruments. Hedged items include debt securities, loans, deposit liabilities and subordinated debentures. Hedging instruments include single-currency interest rate swaps and cross-currency interest rate swaps.

Cash flow hedges

For cash flow hedges, the change in fair value of the hedging instrument, to the extent effective, is recorded in other comprehensive income until the corresponding gains and losses on the hedged item are recognized in income. For hedges that are discontinued, the cumulative unrealized gain or loss recognized in other comprehensive income is reclassified to interest income and/or salaries and employee benefits as the variability in the cash flows of hedged item affects income. However, if the hedged item is derecognized or the forecasted transaction is no longer expected to occur, the unrealized gain or loss is reclassified immediately to non-interest income and/or salaries and employee benefits. The Bank uses cash flow hedges primarily to hedge the variability in cash flows relating to floating rate financial instruments and highly probable forecasted revenues and expenses. Hedged items include debt securities, loans, deposit liabilities, subordinated debentures and highly probable forecasted transactions. Hedging instruments include single-currency interest rate swaps, cross-currency interest rate swaps, total return swaps, foreign currency forwards and foreign currency assets or liabilities.

For the Bank's cash flow hedges of forecasted transactions that are directly affected by the IBOR Reform, it is assumed that the benchmark interest rate will not be altered as a result of the IBOR Reform for purposes of assessing whether the transactions are highly probable or whether the transactions are still expected to occur.

Net investment hedges

For net investment hedges, the change in fair value of the hedging instrument, to the extent effective, is recorded in other comprehensive income until the corresponding cumulative translation adjustments on the hedged net investment are recognized in income. The Bank designates foreign currency liabilities and foreign currency forwards as hedging instruments to manage the foreign currency exposure and impact on capital ratios arising from foreign operations.

Property and equipment

Land is carried at cost. Buildings (including building fittings), equipment, and leasehold improvements are carried at cost less accumulated depreciation and accumulated impairment losses, if any. Cost includes expenditures that are directly attributable to the acquisition of the asset. Depreciation is calculated using the straight-line method over the estimated useful life of the related asset less any residual value as follows: buildings – up to 40 years, building fittings – up to 15 years, equipment 3 to 10 years, and leasehold improvements – lease term determined by the Bank. Depreciation expense is included in the Consolidated Statement of Income under non-interest expenses – depreciation and amortization. Depreciation methods, useful lives and residual values are reassessed at each financial year-end and adjusted as appropriate.

When major components of building and equipment have different useful lives, they are accounted for separately and depreciated over each component's estimated useful life.

Net gains and losses on disposal are included in non-interest income – other in the Consolidated Statement of Income in the year of disposal.

Assets held-for-sale

Non-current non-financial assets (and disposal groups) are classified as held-for-sale if their carrying amount will be recovered principally through a sale transaction rather than through continuing use. These assets meet the criteria for classification as held-for-sale if they are available for immediate sale in their present condition and their sale is considered highly probable to occur within one year.

Non-current non-financial assets classified as held-for-sale are measured at the lower of their carrying amount and fair value less costs to sell and are presented within other assets in the Consolidated Statement of Financial Position. Any subsequent write-down to fair value less costs to sell is recognized in the Consolidated Statement of Income, in non-interest income. Any subsequent increase in the fair value less costs to sell, to the extent this does not exceed the cumulative write-down, is also recognized in non-interest income, together with any realized gains or losses on disposal.

Non-financial assets acquired in exchange for loans as part of an orderly realization are recorded as assets held-for-sale or assets held-for-use. If the acquired asset does not meet the requirement to be considered held-for-sale, the asset is considered held-for-use, measured initially at cost which equals the carrying value of the loan and accounted for in the same manner as a similar asset acquired in the normal course of business.

Business combinations and goodwill

The Bank follows the acquisition method of accounting for the acquisition of a business. The Bank considers the date on which control is obtained and it legally transfers the consideration for the acquired assets and assumed liabilities of the subsidiary to be the date of acquisition. The cost of an acquisition is measured at the fair value of the consideration paid. The fair value of the consideration transferred by the Bank in a business combination is calculated as the sum of the acquisition date fair value of the assets transferred by the Bank, the liabilities incurred by the Bank to former owners of the acquiree, and the equity interests, including any options, issued by the Bank. The Bank recognizes the acquisition date fair values of any previously held investment in the subsidiary and contingent consideration as part of the consideration transferred in exchange for the acquisition. A gain or loss on any previously held investments of an acquiree is recognized in non-interest income – other in the Consolidated Statement of Income.

In general, all identifiable assets acquired (including intangible assets) and liabilities assumed (including any contingent liabilities) are measured at the acquisition date fair value. The Bank records identifiable intangible assets irrespective of whether the assets have been recognized by the acquiree before the business combination. Non-controlling interests, if any, are recognized at their proportionate share of the fair value of identifiable assets and liabilities, unless otherwise indicated. Where the Bank has an obligation to purchase a non-controlling interest for cash or another financial asset, a financial liability is recognized based on management's best estimate of the present value of the redemption amount. Where the Bank has a corresponding option to settle the purchase of a non-controlling interest by issuing its own common shares, no financial liability is recorded.

Any excess of the cost of acquisition over the Bank's share of the net fair value of the identifiable assets acquired and liabilities assumed is recorded as goodwill. If the cost of acquisition is less than the fair value of the Bank's share of the identifiable assets acquired and liabilities assumed, the resulting gain is recognized immediately in non-interest income – other in the Consolidated Statement of Income.

During the measurement period (which is within one year from the acquisition date), the Bank may, on a retrospective basis, adjust the amounts recognized at the acquisition date to reflect new information obtained about facts and circumstances that existed as of the acquisition date.

The Bank accounts for acquisition-related costs as expenses in the periods in which the costs are incurred and the services are received.

Subsequent to acquisition, the Bank accounts for the following assets and liabilities recognized in a business combination as described below:

- Contingent liabilities, until resolved, are measured at the higher of the amount that would be recognized as a provision or the amount initially recognized, with any change recognized in the Consolidated Statement of Income.
- Indemnification assets are measured on the same basis as the item to which the indemnification relates.
- Contingent consideration classified as a liability is measured at fair value, with any change recognized in the Consolidated Statement of Income.
- Liabilities to non-controlling interest holders when remeasured at the end of each reporting period, a corresponding change is recorded in equity.

After initial recognition of goodwill in a business combination, goodwill in aggregate is measured at cost less any accumulated impairment losses. Goodwill is not amortized but tested for impairment annually and when circumstances indicate that the carrying value may be impaired.

Goodwill is reviewed at each reporting date to determine whether there is any indication of impairment. For the purpose of impairment testing, goodwill acquired in a business combination is, on the acquisition date, allocated to each of the Bank's group of cash-generating units (CGUs) that is expected to benefit from the combination. CGUs to which goodwill has been allocated are aggregated so that the level at which impairment is tested reflects the lowest level at which goodwill is monitored for internal management purposes.

The Bank determines the carrying value of the CGU using a regulatory capital approach based on credit, market, operational risks and leverage, consistent with the Bank's capital attribution for business line performance measurement. Corporate capital that is not directly attributable is allocated to each CGU on a proportional basis, based on the relative attributed capital prior to the corporate capital allocation. The recoverable amount is the greater of fair value less costs of disposal (FVLCD) and value in use (VIU). If either FVLCD or VIU exceeds the carrying amount, there is no need to determine the other. An impairment loss is recognized if the carrying amount of the CGU exceeds the recoverable amount. An impairment loss, in respect of goodwill, is not reversed.

FVLCD is the price that would be received from the sale of a CGU in an orderly transaction between market participants, less cost of disposal, at the measurement date. In determining FVLCD, an appropriate valuation model is used which considers various factors, including normalized net income, control premiums and price earnings multiples. These calculations are corroborated by valuation multiples and quoted share prices for publicly traded subsidiaries or other available fair value indicators.

VIU is the present value of the future cash flows expected to be derived from a CGU. The determination of VIU involves judgment in estimating cash flow projections, discount rate and terminal growth rate. The future cash flows are based on management approved budgets and plans which factor in market trends, macroeconomic conditions, forecasted earnings and business strategy for the CGU. The discount rate is based on the cost of capital while the terminal growth rate is based on the long-term growth expectations in the relevant countries.

Intangible assets

Intangible assets represent identifiable non-monetary assets and are acquired either separately, through a business combination, or generated internally. The Bank's intangible assets are mainly comprised of computer software, customer relationships, contract intangibles, core deposit intangibles and fund management contracts.

The cost of a separately acquired intangible asset includes its purchase price and directly attributable costs of preparing the asset for its intended use. Intangibles acquired as part of a business combination are initially recognized at fair value.

In respect of internally generated intangible assets, initial measurement includes all directly attributable costs necessary to create, produce and prepare the asset to be capable of operating in the manner intended by management.

After initial recognition, an intangible asset is carried at its cost less any accumulated amortization and accumulated impairment losses.

Intangible assets that have finite useful lives are initially measured at cost and are amortized on a straight-line basis over their useful lives as follows: computer software – 5 to 10 years; and other intangible assets – 5 to 20 years. Amortization expense is included in the Consolidated Statement of Income under operating expenses – depreciation and amortization. As intangible assets are non-financial assets, the impairment model for non-financial assets is applied. Intangible assets with indefinite useful lives are not amortized but are tested for impairment annually and when circumstances indicate that the carrying value may be impaired. Intangible assets with finite useful lives are only tested for impairment when events or circumstances indicate that the carrying value may be impaired.

Impairment of non-financial assets

The carrying amount of the Bank's non-financial assets, other than goodwill, indefinite life intangible assets and deferred tax assets, which are separately addressed, is reviewed at each reporting date to determine whether there is any indication of impairment. For the purpose of impairment testing, non-financial assets that cannot be tested individually are grouped together into the smallest group of assets that generate cash inflows from continuing use that are largely independent from the cash inflows of other assets or groups of assets.

If any indication of impairment exists, the asset's recoverable amount is estimated. The recoverable amount of an asset or CGU is the greater of its value in use and its fair value less costs of disposal. The Bank's corporate assets do not generate separate cash inflows. If there is an indication that a corporate asset may be impaired, then the recoverable amount is determined for the CGU to which the corporate asset belongs.

An impairment loss is recognized if the carrying amount of an asset or a CGU exceeds its recoverable amount. Impairment losses of continuing operations are recognized in the Consolidated Statement of Income in those expense categories consistent with the nature of the impaired asset. Impairment losses recognized in prior periods are reassessed at each reporting date for any indication that the loss had decreased or no longer exists. An impairment loss is reversed if there has been a change in the estimates used to determine the recoverable amount. An impairment loss is reversed only to the extent that the asset's carrying amount does not exceed the carrying amount that would have been determined, net of depreciation or amortization, if no impairment loss had been recognized. Such reversal is recognized in the Consolidated Statement of Income.

Significant judgment is applied in determining the non-financial asset's recoverable amount and assessing whether certain events or circumstances constitute objective evidence of impairment.

Corporate income taxes

The Bank follows the balance sheet liability method for corporate income taxes. Under this method, deferred tax assets and liabilities represent the cumulative amount of tax applicable to temporary differences, which are the differences between the carrying amount of the assets and liabilities, and their values for tax purposes. Deferred tax assets are recognized only to the extent it is probable that sufficient taxable profits will be available against which the benefit of these deferred tax assets can be utilized.

Deferred tax assets and liabilities are measured using enacted or substantively enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled.

Deferred and current tax assets and liabilities are only offset when they arise in the same tax reporting group and where the Bank has both the legal right and the intention to settle on a net basis or to realize the asset and settle the liability simultaneously.

The Bank maintains provisions for uncertain tax positions that it believes appropriately reflect the risk of tax positions under discussion, audit, dispute or appeal with tax authorities, or which are otherwise considered to involve uncertainty. These provisions are made using the Bank's best estimate of the amount expected to be paid based on an assessment of all relevant factors, which are reviewed at the end of each reporting period. It is possible that additional liability and income tax expense could arise in the future, depending on the acceptance of the Bank's tax positions by the relevant tax authorities in the jurisdictions in which the Bank operates.

Income tax is recognized in the Consolidated Statement of Income, except where it relates to items recognized in other comprehensive income or directly in equity, in which case income tax is recognized in the same line as the related item.

Leases

At inception of a contract, the Bank assesses whether a contract is, or contains, a lease. A contract is a lease if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration. When the Bank is a lessee, it recognizes a right-of-use (ROU) asset and a lease liability, except for short-term leases for assets that have a lease term of 12 months or less and leases of low value items. For short-term leases and low value items, the Bank recognizes the lease payment associated with these leases as an expense on a straight-line basis over the lease term.

Asset

A ROU is an asset that represents a lessee's right to use an underlying asset for the lease term. The ROU asset is initially measured at cost, which is based on the initial amount of the lease liability, any direct costs incurred, any lease payments made at or before the commencement date net of lease incentives received and estimated decommissioning costs.

The ROU asset is subsequently measured at cost less accumulated depreciation and accumulated impairment losses, if any. The ROU asset is depreciated using the straight-line method from the commencement date to the earlier of the end of the useful life of the ROU asset or the end of the lease term. The depreciation is recorded in Depreciation and amortization in the Consolidated Statement of Income. In addition, the ROU asset is adjusted for certain remeasurements of the lease liability.

Liability

At commencement date, the Bank initially measures the lease liability at the present value of the future lease payments, discounted using the Bank's incremental borrowing rate that takes into account the Bank's credit risk and economic environment in which the lease is entered. The lease liability is subsequently measured at amortized cost using the effective interest method. It is re-measured if the Bank changes its assessment of whether it will exercise a purchase, extension or termination option. Interest expense is recorded in Interest expense – other in the Consolidated Statement of Income.

When the lease liability is re-measured in this way, a corresponding adjustment is made to the carrying amount of the ROU asset or is recorded in profit or loss if the carrying amount of the right-of-use asset has been reduced to zero.

Presentation

The Bank presents ROU assets in Property and equipment and lease liabilities in Other liabilities in the Consolidated Statement of Financial Position.

Determining lease term

The Bank's expectation of exercising the option to renew a lease is determined by assessing if the Bank is "reasonably certain" to exercise that option. The Bank will be reasonably certain to exercise an option when factors create a significant economic incentive to do so. This assessment considers the following criteria: key locations for its branch network, locations on which the Bank has spent significant capital on renovation work, contribution to profit, value of locations based on current economic environment and the remaining term of existing leases.

Provisions

A provision, including for restructuring, is recognized if, as a result of a past event, the Bank has a present legal or constructive obligation that can be estimated reliably, and it is probable that an outflow of economic benefits will be required to settle the obligation.

The amount recognized as a provision is the Bank's best estimate of the consideration required to settle the present obligation, taking into account the risks and uncertainties surrounding the obligation. If the effect of the time value of money is considered material, provisions are determined by discounting the expected future cash flows at a pre-tax rate that reflects current market assessments of the time value of money and, where appropriate, the risks specific to the liability. The increase in the provision due to the passage of time is recorded as interest expense – other in the Consolidated Statement of Income.

Insurance contracts

The Bank identifies its insurance contracts under which it accepts significant insurance risk from another party (the policyholder) by agreeing to compensate the policyholder if a specified uncertain future event (the insured event) adversely affects the policyholder. For short duration contracts, the Bank applies the premium allocation approach which requires that the expected premium be recognized into income over the coverage period and a liability for remaining coverage be established to the extent that cash inflows are received earlier than the recognition of premiums into insurance revenue. A liability for incurred claims is established based on expected claims and expenses, with a risk adjustment for non-financial risk, required to settle past insured events.

For long duration contracts, the Bank recognizes probability-weighted discounted fulfilment cashflows and a risk adjustment for non-financial risk for groups of contracts. To the extent that those groups of contracts are expected to be profitable, a contractual service margin liability is recognized on the Consolidated Statement of Financial Position which represents unearned profits that will be recognized in the Consolidated Statement of Income in the future over the life of the contract.

Insurance revenue is earned over the period the Bank provides insurance coverage and as risk is released. For all insurance contracts, losses on onerous contracts are recognized in income immediately.

Guarantees

A guarantee is a contract that contingently requires the Bank to make specified payments to reimburse the holder for a loss it incurs because a specified debtor failed to make payment when due in accordance with the original or modified terms of a debt instrument. Guarantees include standby letters of credit, letters of guarantee, indemnifications, credit enhancements and other similar contracts. Guarantees that qualify as a derivative are accounted for in accordance with the policy for derivative instruments. For guarantees that do not qualify as a derivative, a liability is recorded for the fair value of the obligation assumed at inception. The fair value of the obligation at inception is generally based on the discounted cash flow of the premium to be received for the guarantee, resulting in a corresponding asset. Subsequent to initial recognition, such guarantees are measured at the higher of the initial amount, less amortization to recognize any fee income earned over the period, and the best estimate of the amount required to settle any financial obligation arising as a result of the guarantee. Any increase in the liability is reported in the Consolidated Statement of Income.

Employee benefits

The Bank provides pension and other benefit plans for eligible employees in Canada and internationally. Pension benefits are offered in the form of defined benefit pension plans (generally based on an employee's length of service and earnings) and defined contribution pension plans (where the Bank's contribution is fixed and there is no legal or constructive obligation to pay further amounts). Other benefits provided include post-retirement health care, dental care and life insurance, along with other long-term employee benefits, such as long-term disability benefits.

Defined benefit pension plans and other post-retirement benefit plans

The cost of these employee benefits is actuarially determined each year using the projected unit credit method. The calculation uses management's best estimate of a number of assumptions, including the discount rate, future compensation, health care costs, mortality, as well as the retirement age of employees. The most significant assumption is the discount rate used to determine the defined benefit obligation, which is set by reference to the yields on high quality corporate bonds that have durations that match the terms of the Bank's obligations. Separate discount rates are used to determine the annual benefit expense in Canada and the U.S. These rates are determined with reference to the yields on high quality corporate bonds with durations that match the various components of the annual benefit expense. The discount rate used to determine the annual benefit expense for all other plans is the same as the rate used to determine the defined benefit obligation.

The Bank's net asset or liability in respect of employee benefit plans is calculated separately for each plan as the difference between the present value of future benefits earned in respect of service for prior periods and the fair value of plan assets. The net asset or liability is included in other assets and other liabilities, as appropriate, in the Consolidated Statement of Financial Position. When the net amount in the Consolidated Statement of Financial Position is an asset, the recognized asset is limited to the present value of any economic benefits available in the form of refunds from the plan or reductions in future contributions to the plan.

The current service cost, net interest expense (income), past service cost (credit), settlement gain (loss) and administrative expense are recognized in net income. Net interest expense (income) is calculated by applying the discount rate to the net defined benefit asset or liability. When the benefits of a plan are improved (reduced), a past service cost (credit) is recognized immediately in net income.

Remeasurements comprising of actuarial gains and losses, the effect of the asset ceiling and the return on plan assets in excess of or less than the interest income on the fair value of assets are recognized immediately in the Consolidated Statement of Financial Position with a charge or credit to the Statement of Other Comprehensive Income (OCI) in the period in which they occur. Amounts recorded in OCI are not recycled to the Consolidated Statement of Income.

Other long-term employee benefits

Other long-term employee benefits are accounted for similarly to defined benefit pension plans and other post-retirement benefit plans described above, except that remeasurements are recognized in the Consolidated Statement of Income in the period in which they arise.

Defined contribution plans

The costs of such plans are equal to contributions payable by the Bank to employees' accounts for service rendered during the period and expensed.

Short-term employee benefits

Short-term employee benefits are expensed as the related service is provided and a liability is measured on an undiscounted basis net of payments made.

Interest and similar income and expenses

For all non-trading interest-bearing financial instruments, interest income or expense is recorded in net interest income using the effective interest rate. This is the rate that exactly discounts estimated future cash payments or receipts through the expected life of the financial instrument or a shorter period, where appropriate, to the gross carrying amount of the financial asset or financial liability. The calculation takes into account all the contractual terms of the financial instrument (for example, prepayment options) and includes any fees or incremental costs that are directly attributable to the instrument and are an integral part of the effective interest rate, but not future credit losses.

For trading financial instruments, mark-to-market changes including related interest income or expense are recorded in non-interest income – trading revenues.

The carrying amount of interest-bearing financial instruments, measured at amortized cost or classified as FVOCI, is adjusted if the Bank revises its estimates of payments or receipts. The adjusted carrying amount is calculated based on the original effective interest rate and the change in carrying amount is recorded as non-interest income in the Consolidated Statement of Income.

Once the carrying value of a financial asset or a group of similar financial assets has been reduced due to an impairment loss, interest income continues to be recognized based on net effective interest rate inherent in the investment.

Loan origination costs are deferred and amortized into interest income using the effective interest method over the expected term of the loan. Loan fees are recognized in interest income over the appropriate lending or commitment period. Mortgage prepayment fees are recognized in interest income when received, unless they relate to a minor modification to the terms of the mortgage, in which case the fees are deferred and amortized using the effective interest method over the remaining period of the original mortgage.

Loan syndication fees are deferred and amortized in interest income over the term of the loan where the yield the Bank retains is less than that of the comparable lenders in the syndicate.

Loan commitment fees for loans that are likely to be drawn down and other credit related fees are deferred (together with any incremental costs) and recognized as part of the interest income on the loan. When it is unlikely that a loan will be drawn down, the loan commitment fees are recognized in non-interest income.

Fee and commission revenues

Revenue is recognized once the Bank's customer has obtained control of the service. The transfer of control occurs when the Bank's customer has the ability to direct the use of and obtain the benefits of the banking services and the contractual performance obligation to the customer has been satisfied. The Bank records revenue gross of expenses where it is the principal in performing a service to the customer and net of expenses where the Bank is an agent for these services. The assessment of principal or agent requires judgement on the basis of whether the Bank controls the services before they are transferred to the customer. From time to time, the Bank may receive variable consideration such as performance fees. These fees are only recognized when it is highly probable that the Bank will not need to reverse a significant amount of revenue.

Card revenues include interchange fees, annual fees and other card related fees. Interchange fees are calculated as a percentage of the transaction and are recognized on the transaction date. Annual fees are recognized in income over 12 months. Other card fees are transaction-based and are recognized on the transaction date.

The Bank operates various loyalty points programs, which allow customers to accumulate points when using the Bank's products and services. Loyalty point liabilities are subject to periodic remeasurement to reflect the expected cost of redemption. Where the customer has the option to redeem points for statement credits, the cost of the loyalty program is presented net of card fees. Where points can only be redeemed for goods or services, interchange revenue allocated to the loyalty rewards is recognized when the rewards are redeemed. Reward costs are recorded in non-interest expenses.

Banking services fees consist of fees earned on personal, business and government deposit activities. Personal deposit-related fees consist of account maintenance and various transaction-based services. Business and government deposit-related fees consist of commercial deposit and treasury management services and other cash management services. These fees are recognized on the transaction date or over time as services are provided to the customer.

Credit fees include fees earned for providing letters of credit and guarantee, loan commitments, bankers' acceptances, and for arranging loan syndications. These fees are recognized on the transaction date or over time as services are provided based on contractual agreements with the customer.

Mutual funds fees include management and administration fees which are earned in the Bank's wealth management business. These fees are calculated as a percentage of the fund's net asset value and recognized as the service is provided. From time to time, the Bank may also recognize performance fees from some funds. These fees are only recognized to the extent that it is highly probable that a significant reversal of revenue will not occur.

Brokerage fees relate to fees earned for providing full-service and discount brokerage services to clients. These fees are contractually agreed and can be asset-based or linked to individual transactions. Such fees are recognized as the service is provided to clients or on the trade date.

Investment management and trust fees include administration, trust services and other investment services provided to clients. These fees are contractually agreed upon and can be linked to portfolio values or individual transactions. Such fees are recognized as the service is provided to clients to the extent that it is highly probable that a significant reversal of revenue will not occur.

Underwriting and other advisory fees relate to fees earned for services provided to clients in relation to the placement of debt and equities. Such fees also include services to clients for mergers, acquisitions, financial restructurings and other corporate finance activities. These fees are recognized when the service has been performed and/or contractual milestones are completed. Performance and completion fees are variable consideration and generally contingent on the successful completion of a transaction.

Other fees and commissions include commissions earned on the sale of third party insurance products to the Bank's customers. Such fees and commissions are recognized when the performance obligation is completed.

Fee and commission expenses

Fee and commission expenses relate to transaction and service fees which are expensed as the services are received.

Dividend income

Dividend income on equity securities is recognized when the Bank's right to receive payment is established, which is on the ex-dividend date for listed equity securities.

Share-based payments

Share-based payments awarded to employees are recognized as compensation expense in the Consolidated Statement of Income over the vesting period based on the number of awards expected to vest, including the impact of expected forfeitures. For awards that are delivered in tranches, each tranche is considered a separate award and accounted for separately.

Plain vanilla options and other awards that must be settled for shares are classified as equity awards. Equity-classified awards are expensed based on the grant date fair value with a corresponding increase to equity – other reserves in the Consolidated Statement of Financial Position. If an option is exercised, both the exercise price proceeds together with the amount recorded in other reserves is credited to equity – common shares in the Consolidated Statement of Financial Position.

Stock appreciation rights and other awards that must be settled for cash are classified as liabilities. Liability-classified awards are remeasured to fair value at each reporting date while they remain outstanding, with any changes in fair value recognized in compensation expense in the period. The liability is expensed over the vesting period which incorporates the remeasurement of the fair value and a revised forfeiture rate that anticipates units expected to vest.

For plain vanilla options and stock appreciation rights, the Bank estimates fair value using an option pricing model. The option pricing model requires inputs such as the exercise price of the option, the current share price, the risk-free interest rate, expected dividends, expected volatility (calculated using an equal weighting of implied and historical volatility) and specific employee exercise behaviour patterns based on statistical data. For other awards, fair value is the quoted market price of the Bank's common shares at the reporting date.

Where derivatives are used to economically hedge share-based payment expense, related mark-to-market gains and losses are included in non-interest expenses – salaries and employee benefits in the Consolidated Statement of Income.

Dividends on shares

Dividends on common and preferred shares and other equity instruments are recognized as a liability and deducted from equity when they are declared and no longer at the discretion of the Bank.

Segment reporting

Management's internal view is the basis for the determination of operating segments. The operating segments are those whose operating results are regularly reviewed by the Bank's chief operating decision-maker to make decisions about resources to be allocated to the segment and assess its performance. The Bank has four operating segments: Canadian Banking, International Banking, Global Wealth Management and Global Banking and Markets. The Other category represents smaller operating segments, including Group Treasury and other corporate items, which are not allocated to an operating segment. These segments offer different products and services and are managed separately based on the Bank's management and internal reporting structure.

The results of these business segments are based upon the internal financial reporting systems of the Bank. The accounting policies used in these segments are generally consistent with those followed in the preparation of the consolidated financial statements by the Bank. The only notable accounting measurement difference is the grossing up of revenues which are tax-exempt and income from associate corporations to an equivalent before-tax basis for those affected segments. This change in measurement enables comparison of income arising from taxable and tax-exempt sources.

Given the complexity of the Bank, various estimates and allocation methodologies are used in the preparation of the business segment financial information. The funding value of assets and liabilities is transfer-priced at wholesale market rates, and corporate expenses are allocated to each segment on an equitable basis using various parameters. As well, capital is apportioned to the business segments on a risk-based methodology. Transactions between segments are recorded within segment results as if conducted with a third-party and are eliminated on consolidation.

Earnings per share (EPS)

Basic EPS is computed by dividing net income for the period attributable to the Bank's common shareholders by the weighted-average number of common shares outstanding during the period.

Diluted EPS is calculated by dividing adjusted net income for the period attributable to common shareholders by the weighted-average number of diluted common shares outstanding for the period. In the calculation of diluted earnings per share, earnings are adjusted for changes in income or expenses that would result from the issuance of dilutive shares. The weighted-average number of diluted common shares outstanding for the period reflects the potential dilution that would occur if options, securities or other contracts that entitle their holders to obtain common shares had been outstanding from the beginning of the period (or a later date) to the end of the period (or an earlier date). Instruments determined to have an antidilutive impact for the period are excluded from the calculation of diluted EPS.

The number of additional shares for inclusion in diluted EPS for share-based payment options is determined using the treasury share method. Under this method, the net number of incremental common shares is determined by assuming that in-the-money stock options are exercised and the proceeds are used to purchase common shares at the average market price during the period.

The number of additional shares associated with capital instruments that potentially result in the issuance of common shares is based on the terms of the contract. On occurrence of contingencies as specified in the Non-Viability Contingent Capital (NVCC) instruments, the number of additional common shares associated with the NVCC subordinated debentures, NVCC subordinated additional Tier 1 capital notes, NVCC limited recourse capital notes and NVCC preferred shares is based on an automatic conversion formula as set out in the respective prospectus supplements.

4 Transition to IFRS 17

On November 1, 2023, the Bank adopted IFRS 17 Insurance Contracts which provides a comprehensive principle-based framework for the recognition, measurement, presentation, and disclosure of insurance contracts. IFRS 17 provides three models to apply to all insurance contracts: the general measurement model, the variable fee approach, and the premium allocation approach.

On transition, IFRS 17 is applied on a full retrospective basis unless impractical, where either the modified retrospective or fair value method may be used. The Bank assessed the data and assumptions required to apply IFRS 17 and determined that the full retrospective approach could be applied for its short duration contracts and the fair value approach was applied for its longer duration contracts. The Bank has restated the comparative year results from the transition date of November 1, 2022, in accordance with the standard. The impact of adopting IFRS 17 was not significant to the Bank.

5 Interest Rate Benchmark Reform

The publication of the 1-month, 2-month and 3-month Canadian Dollar Offered Rate (CDOR) tenors ceased as of June 28, 2024. The Bank has successfully transitioned all contracts referencing CDOR and Bankers Acceptances (BAs) to alternative rates such as Canadian Overnight Repo Rate Average (CORRA) or Prime.

6 Future Accounting Developments

The Bank actively monitors developments and changes in accounting standards from the IASB, as well as requirements from the other regulatory bodies, including OSFI. The Bank is currently assessing the impact of adoption of new standards issued by the IASB on its consolidated financial statements and also evaluating the alternative elections available on transition.

Effective November 1, 2026

IFRS 9 Financial Instruments and IFRS 7 Financial Instruments – Amendments

On May 30, 2024, the IASB issued “Amendments to the Classification and Measurement of Financial Instruments (Amendments to IFRS 9 and IFRS 7)” to address post-implementation review findings of IFRS 9 *Financial Instruments*.

The amendments introduce an accounting policy choice to derecognize financial liabilities settled through an electronic payment system before the settlement date upon meeting certain conditions. The amendments clarify the assessment of contractual cash flow characteristics of financial assets based on contingent events, such as interest rates linked to environmental, social and governance (ESG) targets, the treatment of non-recourse assets, and contractually linked instruments. The amendments introduce new disclosure requirements for financial instruments with contractual terms that can change cash flows due to events not directly related to changes in basic lending risks, such as certain loans subject to ESG targets. Additionally, the amendments change some of the disclosure requirements for equity instruments designated at fair value through other comprehensive income.

The amendments are effective for the Bank on November 1, 2026, and early adoption is permitted. The Bank is required to apply the amendments retrospectively but is not required to restate prior periods. The Bank is currently assessing the impact of these amendments.

Effective November 1, 2027

IFRS 18 Presentation and Disclosure in Financial Statements

The IASB issued IFRS 18 *Presentation and Disclosure in Financial Statements* on April 9, 2024, to replace IAS 1 *Presentation of Financial Statements* and is effective for annual periods beginning on or after January 1, 2027. IFRS 18 introduces a defined structure for the presentation of the statement of income, including required totals and subtotals, as well as aggregating and disaggregating principles to categorize financial information. The standard also requires all Management-defined performance measures to be disclosed in the notes to the financial statements. IFRS 18 will be effective for the Bank on November 1, 2027, with early adoption permitted. The Bank is currently assessing the impact of this new standard.

7 Cash and Deposits with Financial Institutions

As at October 31 (\$ millions)

	2024	2023
Cash and non-interest-bearing deposits with financial institutions	\$ 9,406	\$ 10,173
Interest-bearing deposits with financial institutions	54,454	80,139
Total	\$ 63,860 ⁽¹⁾	\$ 90,312 ⁽¹⁾

⁽¹⁾ Net of allowances of \$3 (2023 – \$7).

The Bank is required to maintain balances with central banks, other regulatory authorities and certain counterparties, and these amounted to \$5,322 million (2023 – \$5,758 million) and are included above.

8 Fair Value of Financial Instruments

Determination of fair value

The calculation of fair value is based on market conditions at a specific point in time and therefore may not be reflective of future fair values. The Bank has controls and processes in place to ensure that the valuation of financial instruments is appropriately determined.

The Bank discloses the classification of all financial instruments carried at fair value in a hierarchy based on the determination of fair value. The best evidence of fair value for a financial instrument is the quoted price in an active market. Fair value based on unadjusted quoted market prices for identical instruments in active markets represents a Level 1 valuation. Where possible, valuations are based on quoted prices or observable inputs obtained from active markets.

Independent Price Verification (IPV) is undertaken to assess the accuracy of prices and inputs used in the determination of fair value. The IPV process is performed by price verification groups that are independent of the business. The Bank maintains a list of approved pricing sources that

are used in the IPV process. These sources include, but are not limited to, brokers, exchanges and pricing services. The valuation policies relating to the IPV process require that all pricing or rate sources used be external to the Bank. At least annually, an independent assessment of pricing or rate sources is performed to determine the market presence and reliability of market levels.

Quoted prices are not always available for over-the-counter (OTC) transactions as well as for transactions in inactive or illiquid markets. OTC transactions are valued using internal models that maximize the use of observable inputs to estimate fair value. The chosen valuation technique incorporates all the factors that market participants would take into account in pricing a transaction. When fair value is based on all significant market observable inputs, the valuation is classified as Level 2. Financial instruments traded in a less active market can be valued using indicative market prices, the present value of cash flows or other valuation techniques. Fair value estimates normally do not consider forced or liquidation sales.

Where financial instruments trade in inactive markets or when using models where observable parameters do not exist, significant management judgment is required for valuation methodologies and model inputs. Valuations that require the significant use of unobservable inputs are considered Level 3.

The specific inputs and valuation techniques used in determining the fair value of financial instruments are noted below. For Level 3 instruments, additional information is disclosed in the Level 3 sensitivity analysis on page 169.

The fair values of cash and deposits with banks, securities purchased under resale agreements and securities borrowed, customers' liability under acceptances, obligations related to securities sold under repurchase agreements and securities lent, acceptances, and obligations related to securities sold short are assumed to approximate their carrying values, either due to their short-term nature or because they are frequently repriced to current market rates.

Trading loans

Trading loans are comprised of loans that serve as hedges to total return swaps, hedges for precious metal certificate liabilities and loans subject to sale through syndication. Trading loans that serve as hedges to loan-based credit total return swaps and precious metals certificate liabilities are valued using consensus prices from Bank approved independent pricing services. The fair value of loans subject to sale through syndication approximates their carrying value due to the short-term nature of these loans.

Government issued or guaranteed securities

The fair values of government issued or guaranteed debt securities are primarily based on unadjusted quoted prices in active markets, where available. Where quoted prices in active markets are not available, the fair value is determined by utilizing recent transaction prices, reliable broker quotes, or pricing services, which derive fair values using only observable valuation inputs, which are significant to the fair values.

For securities for which quoted prices are not available, the Bank uses a discounted cash flow method, using the effective yield of a similar instrument adjusted for instrument-specific risk factors that are observable inputs such as credit spread and contracted features.

Corporate and other debt

Corporate and other debt securities are valued using unadjusted quoted prices from independent market data providers or third-party broker quotes from an active market. Where direct prices from active markets are not available, the valuation is performed with a yield-based valuation approach. In some instances, interpolated yields of similar bonds are used to price securities. The Bank uses pricing models with observable inputs from market sources such as credit spread, and interest rate curves. These inputs are verified through an IPV process on a monthly basis.

For certain securities where there is no active market, no consensus market pricing and no indicative or executable independent third-party quotes, the Bank uses pricing by third-party providers or internal pricing models and cannot readily observe the significant inputs used to price such instruments.

Mortgage-backed securities

The fair value of residential mortgage-backed securities is primarily determined using broker quotes and independent market data providers. In limited circumstances, an internal price-based model may be used with the unobservable inputs that are significant to the fair value.

Equity securities

The fair value of equity securities is based on unadjusted quoted prices in active markets, where available. Where equity securities are less frequently traded, the most recent exchange-quoted pricing is used to determine fair value.

For private equity securities, where quoted prices in active markets are not readily available, the fair value is determined as a multiple of the underlying earnings or percentage of underlying net asset value obtained from third-party general partner statements.

Derivatives

Fair values of exchange-traded derivatives are based on unadjusted quoted market prices from an active market. Fair values of over-the-counter (OTC) derivatives or inactive exchange-traded derivatives are determined using pricing models, which take into account observable valuation inputs such as current market and contractual prices of the underlying instruments, as well as time value and yield curve or volatility factors underlying the positions. The determination of the fair value of derivatives includes consideration of credit risk, estimated funding costs and ongoing direct costs over the life of the instruments.

Derivative products valued using a valuation technique with market-observable inputs mainly include interest rate swaps and options, currency swaps and forward foreign exchange contracts. The most frequently applied valuation techniques include forward pricing and swap models, using present value calculations. The models incorporate various inputs including foreign exchange spot, forward rates and interest rate curves.

Derivative products valued using a valuation technique with significant unobservable inputs, such as volatility, correlation, and forward curves, may include long dated contracts (interest rate swaps, currency swaps, option contracts, commodity contracts and certain credit default swaps) and other derivative products that reference a basket of assets.

Loans

The estimated fair value of loans carried at amortized cost reflects changes in the general level of interest rates and creditworthiness of borrowers that have occurred since the loans were originated or purchased. The particular valuation methods used are as follows:

- Canadian fixed rate residential mortgages are fair valued by discounting the expected future contractual cash flows, taking into account expected prepayments and using management's best estimate of average market interest rates currently offered for mortgages with similar remaining terms.

- For fixed rate business and government loans, fair value is determined by discounting the expected future contractual cash flows at market interest rates for loans with similar credit risks.
- For all other fixed rate loans, fair value is determined by discounting the expected future contractual cash flows of these loans at market interest rates.
- For all floating rate loans fair value is assumed to equal carrying value.

The fair value of loans is not adjusted for the value of any credit protection the Bank has purchased to mitigate credit risk.

Deposits

The fair values of deposits payable on demand or after notice or floating rate deposits payable on a fixed date is assumed to equal carrying value.

The estimated fair values of Canadian personal fixed rate deposits payable on a fixed date are fair valued by discounting the expected future contractual cash outflows, using management's best estimate of average market interest rates currently offered for deposits with similar remaining terms.

Deposits under the Canada Mortgage Bond (CMB) program are fair valued by discounting expected future contractual cash flows using market observable inputs.

For all other fixed rate deposits, fair value is determined by discounting the expected future contractual cash flows of these deposits at interest rates currently offered for deposits with similar terms.

For structured notes containing embedded features that are bifurcated from plain vanilla notes, the fair value of the embedded derivatives is determined using option pricing models with observable inputs similar to other interest rate or equity derivative contracts.

Certain deposits that are designated at FVTPL are structured notes. Their coupon or repayment terms can be linked to the performance of market parameters such as interest rates, equities, and foreign currencies. The fair value of these structured notes is determined using models which incorporate observable market inputs, such as interest rate curves, equity prices, equity volatility and foreign exchange rates. Some structured notes may have significant unobservable inputs to model valuation such as interest rate volatility and equity correlation.

Obligations related to securities sold short

The fair values of these obligations are based on the fair value of the underlying securities, which can include debt or equity securities. The method used to determine fair value is based on the quoted market prices where available in an active market.

Subordinated debentures and other liabilities

The fair values of subordinated debentures, including debentures issued by subsidiaries which are included in other liabilities, are determined by reference to quoted market prices where available or market prices for debt with similar terms and risks. The fair values of other liabilities are determined by the discounted contractual cash flow method with appropriate currency swap curves for the remaining term or market prices for instruments with similar terms and risks.

Fair value of financial instruments

The following table sets out the fair values of financial instruments of the Bank using the valuation methods and assumptions described above.

The fair values disclosed do not include non-financial assets, such as property and equipment, investments in associates, precious metals, goodwill and other intangible assets.

	2024 ⁽¹⁾		2023 ⁽¹⁾	
	Total fair value	Total carrying value	Total fair value	Total carrying value
As at October 31 (\$ millions)				
Assets:				
Cash and deposits with financial institutions	\$ 63,860	\$ 63,860	\$ 90,312	\$ 90,312

Subordinated debentures	7,814	7,833	9,358	9,693
Other financial liabilities	53,342	53,387	49,363	51,302

(1) The Bank adopted IFRS 17 effective November 1, 2023. As required under the new accounting standard, prior period amounts have been restated. Refer to Note 4 of the consolidated financial statements.

Changes in interest rates, credit spreads and liquidity costs are the main cause of changes in the fair value of the Bank's financial instruments resulting in a favourable or unfavourable variance compared to carrying value. For the Bank's financial instruments carried at cost or amortized cost, the carrying value is not adjusted to reflect increases or decreases in fair value due to market fluctuations, including those due to interest rate changes. For FVOCI investment securities, derivatives and financial instruments measured at FVTPL or designated as fair value through profit or loss, the carrying value is adjusted regularly to reflect the fair value.

Fair value hierarchy

The following table outlines the fair value hierarchy of instruments carried at fair value on a recurring basis and of instruments not carried at fair value.

As at October 31 (\$ millions)	2024				2023			
	Level 1	Level 2	Level 3	Total	Level 1	Level 2	Level 3	Total
Instruments carried at fair value on a recurring basis:

Instruments not carried at fair value⁽⁴⁾:								
Assets:								
Investment securities – amortized cost	\$ 1,127	\$ 27,295	\$ –	\$ 28,422	\$ 1,627	\$ 28,189	\$ –	\$ 29,816
Loans ⁽⁵⁾	–	–	399,139	399,139	–	–	415,738	415,738
Liabilities:								
Deposits ⁽⁵⁾	–	411,838	–	411,838	–	425,251	–	425,251
Subordinated debentures	–	7,814	–	7,814	–	9,358	–	9,358
Other liabilities	–	21,563	499	22,062	–	24,651	–	24,651

(1) The fair value of precious metals is determined based on quoted market prices and forward spot prices, where applicable, less the cost to sell.

(2) Excludes debt investment securities measured at amortized cost of \$29,412 (October 31, 2023 – \$31,984).

(3) These amounts represent embedded derivatives bifurcated from structured note liabilities measured at amortized cost.

(4) Represents the fair value of financial assets and liabilities where the carrying amount is not a reasonable approximation of fair value.

(5) Represents fixed rate instruments.

Level 3 instrument fair value changes

Financial instruments categorized as Level 3 in the fair value hierarchy as at October 31, 2024, comprised of loans, structured corporate bonds, equity securities, derivatives, and obligations related to securities sold short.

The following table summarizes the changes in Level 3 instruments carried at fair value for the year ended October 31, 2024.

All positive balances represent assets and negative balances represent liabilities. Consequently, positive amounts indicate purchases of assets or settlements of liabilities and negative amounts indicate sales of assets or issuances of liabilities.

(\$ millions)	As at October 31, 2024							Change in unrealized gains/(losses) recorded in income for instruments still held ⁽²⁾
	Fair value November 1 2023	Gains/(losses) recorded in income ⁽¹⁾	Gains/(losses) recorded in OCI	Purchases/ Issuances	Sales/ Settlements	Transfers into/out of Level 3	Fair value October 31 2024	
Trading assets								
Loans	\$ 4	\$ –	\$ –	\$ 27	\$ –	\$ (31)	\$ –	\$ –
Corporate and other debt	–	–	–	8	–	(4)	4	–
Equity securities	16	(1)	–	9	(22)	19	21	(1)
	20	(1)	–	44	(22)	(16)	25	(1)
Investment securities								
Corporate and other debt	40	(9)	4	7	–	(7)	35	(9)
Equity securities	1,709	109	(29)	244	(207)	40	1,866	109
	1,749	100	(25)	251	(207)	33	1,901	100
Derivative financial instruments – assets								
Interest rate contracts	–	–	–	8	(8)	–	–	–
Foreign exchange and gold contracts	2	–	–	–	–	(2)	–	–
Equity contracts	27	(7)	–	17	–	7	44	(7) ⁽³⁾
Credit contracts	2	1	–	–	(1)	–	2	1
Commodity contracts	10	(3)	–	–	–	–	7	(3)
Derivative financial instruments – liabilities								
Interest rate contracts	(2)	(1)	–	(12)	–	2	(13)	(1)
Equity contracts	(17)	2	–	(4)	1	(1)	(19)	2 ⁽³⁾
Credit contracts	(1)	1	–	–	(1)	–	(1)	1
Commodity contracts	(6)	(4)	–	–	–	–	(10)	(4)
	15	(11)	–	9	(9)	6	10	(11)
Obligations related to securities sold short								
	–	–	–	–	–	(2)	(2)	–
Total	\$ 1,784	\$ 88	\$ (25)	\$ 304	\$ (238)	\$ 21	\$ 1,934	\$ 88

(1) Gains or losses for items in Level 3 may be offset with losses or gains on related hedges in Level 1 or Level 2.

(2) These amounts represent the unrealized gains and losses from fair value changes of Level 3 instruments still held at the end of the period that are recorded in the Consolidated Statement of Income.

(3) Certain unrealized gains and losses on derivative assets and liabilities are largely offset by mark-to-market changes on other instruments included in trading revenues in the Consolidated Statement of Income, since these instruments act as an economic hedge to certain derivative assets and liabilities.

The following table summarizes the changes in Level 3 instruments carried at fair value for the year ended October 31, 2023.

(\$ millions)	As at October 31, 2023						
	Fair value November 1 2022	Gains/(losses) recorded in income ⁽¹⁾	Gains/(losses) recorded in OCI	Purchases/ Issuances	Sales/ Settlements	Transfers into/out of Level 3	Fair value October 31 2023
Trading assets	12	–	–	8	(33)	33	20
Investment securities	1,688	56	16	233	(143)	(101)	1,749
Derivative financial instruments	10	(11)	–	(7)	(1)	24	15
Obligations related to securities sold short	(3)	–	–	–	3	–	–

(1) Gains or losses for items in Level 3 may be offset with losses or gains on related hedges in Level 1 or Level 2.

Significant transfers

Significant transfers can occur between the fair value hierarchy levels when additional or new information regarding valuation inputs and their refinement and observability becomes available. The Bank recognizes transfers between levels of the fair value hierarchy at the end of the reporting period during which the change has occurred.

The following significant transfers made between Levels 1 and 2 were based on whether the fair value was determined using quoted market prices from an active market.

During the year ended October 31, 2024:

- Trading assets of \$1,867 million, investment securities of \$3,010 million and obligations related to securities sold short of \$396 million were transferred out of Level 2 into Level 1.

- Trading assets of \$712 million, investment securities of \$698 million and obligations related to securities sold short of \$6 million were transferred out of Level 1 into Level 2.

During the year ended October 31, 2023:

- Trading assets of \$1,413 million, investment securities of \$1,204 million and obligations related to securities sold short of \$114 million were transferred out of Level 2 into Level 1.
- Trading assets of \$758 million, investment securities of \$752 million and obligations related to securities sold short of \$169 million were transferred out of Level 1 into Level 2.

The following significant transfers made between Levels 2 and 3 were based on whether the fair value was determined using significant unobservable inputs.

During the year ended October 31, 2024:

- There were no significant transfers into and out of Level 3.

During the year ended October 31, 2023:

- Investment in equity securities of \$101 million were transferred out of Level 3 into Level 2.

Level 3 sensitivity analysis

The table below sets out information about significant unobservable inputs used in measuring financial instruments categorized as Level 3 in the fair value hierarchy.

	Valuation technique	Significant unobservable inputs	Range of estimates for unobservable inputs ⁽¹⁾	Changes in fair value from reasonably possible alternatives (\$ millions)
Investment securities				
Private equity securities ⁽²⁾	Market comparable	General Partner valuations per net asset value	n/a	(79)/79
Derivative financial instruments				
Interest rate contracts	Option pricing model	Interest rate volatility	80% - 220%	(2)/2
Equity contracts	Option pricing model	Equity volatility Equity correlation	8% - 414% (36%) - 94%	(28)/28
Commodity contracts	Discounted cash flow	Forward curves	6% - 15%	(4)/4

(1) The range of estimates represents the actual lowest and highest level inputs used to fair value financial instruments within each financial statement category.

(2) The valuation of private equity securities utilizes net asset values as reported by fund managers. Net asset values are not considered observable as the Bank cannot redeem these instruments at such values. The range for net asset values per unit or price per share has not been disclosed for these instruments since the valuations are not model-based.

The Bank applies judgment in determining unobservable inputs used to calculate the fair value of Level 3 instruments.

The following section discusses the significant unobservable inputs for Level 3 instruments.

General Partner (GP) Valuations per Net Asset Value

Net asset values provided by GPs represent the fair value of investments in private equity securities.

Correlation

Correlation becomes an input into equity derivative pricing when the relationship between price movements of two or more of the underlying assets is relevant.

Volatility

Volatility for equity derivatives is a measure of the underlying price fluctuation. Interest rate volatility measures variability of a security yield or interest rate. Historic volatility is often calculated as the annualized standard deviation of daily price or yield variation for a given time period. Implied volatility is such that, when input into an option pricing model, returns a value equal to the current market value of the option.

Forward curves

Monthly forward curves for commodity contracts are required inputs to valuation. A portion of the forward curves are unobservable.

9 Trading Assets

(a) Trading securities

An analysis of the carrying value of trading securities is as follows:

As at October 31, 2024 (\$ millions)		Remaining term to maturity					
	Within three months	Three to twelve months	One to five years	Five to ten years	Over ten years	No specific maturity	Carrying value
Trading securities:							
Canadian federal government issued or guaranteed debt	\$ 352	\$ 1,646	\$ 6,182	\$ 3,626	\$ 3,165	\$ –	\$ 14,971

(b) Trading loans

The following table provides the geographic breakdown of trading loans:

As at October 31 (\$ millions)	2024	2023
Trading loans⁽¹⁾⁽²⁾		
U.S. ⁽³⁾	\$ 6,154	\$ 5,844
Europe ⁽⁴⁾	458	601
Canada ⁽⁴⁾	980	1,068
Other ⁽⁴⁾	57	31
Total	\$ 7,649	\$ 7,544

(1) Geographic segmentation of trading loans is based upon the location of the ultimate risk of the underlying asset.

(2) Loans are primarily denominated in U.S. dollars.

(3) Includes trading loans that serve as a hedge to loan-based credit total return swaps.

(4) Includes trading loans that serve as hedges to total return swaps, hedges for precious metal certificate liabilities and loans subject to sale through syndication.

10 Financial Instruments Designated at Fair Value Through Profit or Loss

In accordance with its risk management strategy, the Bank has elected to designate certain senior note liabilities at fair value through profit or loss to reduce an accounting mismatch between fair value changes in these instruments and fair value changes in related derivatives, and where a hybrid financial liability contains one or more embedded derivatives that are not closely related to the host contract. Changes in fair value of financial liabilities arising from the Bank's own credit risk are recognized in other comprehensive income, without subsequent reclassification to net income.

The cumulative fair value adjustment due to own credit risk is determined at a point in time by comparing the present value of expected future cash flows over the term of these liabilities discounted at the Bank's effective funding rate, and the present value of expected future cash flows discounted at a benchmark rate.

The following table presents the fair value of financial liabilities designated at fair value through profit or loss and their changes in fair value.

	Fair value		Change in fair value ⁽¹⁾ Gains/(Losses)		Cumulative change in FV ⁽²⁾ Gains/(Losses)	
	As at		For the year ended			
	2024	2023	2024	2023	2024	2023
October 31 (\$ millions)						
Liabilities:						
Senior note liabilities ⁽³⁾	\$ 36,341	\$ 26,779	\$ (4,515)	\$ 762	\$ 4,140	\$ 8,655

(1) Change in the difference between the contractual maturity amount and the carrying value.

(2) The cumulative change in fair value is measured from the instrument's date of initial recognition.

(3) Changes in fair value attributable to changes in the Bank's own credit risk are recorded in other comprehensive income. Other changes in fair value are recorded in non-interest income – trading revenues. The offsetting fair value changes from associated derivatives is also recorded in non-interest income – trading revenues.

The following table presents the changes in fair value attributable to changes in the Bank's own credit risk for financial liabilities designated at fair value through profit or loss as well as their contractual maturity and carrying amounts.

	Senior Note Liabilities				
	Contractual maturity amount	Carrying Value	Difference between contractual maturity amount and carrying value	Changes in fair value for the period attributable to changes in own credit risk recorded in other comprehensive income	Cumulative changes in fair value attributable to changes in own credit risk ⁽¹⁾
				Gains/(Losses)	Gains/(Losses)
(\$ millions)					
As at October 31, 2024	\$ 40,481	\$ 36,341	\$ 4,140	\$ (804)	\$ (913)
As at October 31, 2023	\$ 35,434	\$ 26,779	\$ 8,655	\$ (1,338)	\$ (109)

(1) The cumulative change in fair value is measured from the instrument's date of initial recognition.

11 Derivative Financial Instruments

(a) Notional amounts⁽¹⁾

The following table provides the aggregate notional amounts of derivative financial instruments outstanding by type and segregated between those used by the Bank in its dealer capacity (Trading) and those derivatives designated in hedging relationships. The notional amounts of these contracts represent the derivatives volume outstanding and do not represent the potential gain or loss associated with the market risk or credit risk of such instruments. Credit derivatives within other derivative contracts are comprised primarily of purchased and sold credit default swap transactions. To a lesser extent, this category also includes total return swaps referenced to loans and debt securities. Commodity and other contracts includes energy, precious metals other than gold and other commodities.

As at October 31 (\$ millions)	2024			2023

(c) Credit risk

As with other financial assets, derivative instruments are subject to credit risk. Credit risk arises from the possibility that counterparties may default on their obligations to the Bank. However, whereas the credit risk of other financial assets is represented by the principal amount net of any applicable allowance for credit losses, the credit risk associated with derivatives is normally a small fraction of the notional amount of the derivative instrument.

Derivative contracts generally expose the Bank to credit loss if changes in market rates affect a counterparty's position unfavourably and the counterparty defaults on payment. Accordingly, exposure to credit risk of derivatives is represented by the positive fair value of the instrument.

Negotiated over-the-counter derivatives generally present greater credit exposure than exchange-traded contracts. The net change in the exchange-traded contracts is normally settled daily in cash with the exchange. Holders of these contracts look to the exchange for performance under the contract.

The Bank strives to limit credit risk by dealing with counterparties that it believes are creditworthy, and investment grade counterparties account for a significant portion of the credit risk exposure arising from the Bank's derivative transactions as at October 31, 2024. To control credit risk associated with derivatives, the Bank uses similar credit risk management activities and procedures to the approaches used in the lending business in assessing and adjudicating exposure. The Bank utilizes a risk metric, potential future exposure (PFE) for derivatives, to measure utilization

against established credit limits to the counterparty. PFE measures the effect that changes in the market have on derivative exposures throughout the lifetime of the counterparties' trades. Additionally, PFE considers risk mitigants such as netting and collateralization. PFE limits and utilization for derivatives counterparties are authorized and monitored by the Bank's risk management unit.

The Bank obtains the benefit of netting by entering into master netting arrangements with counterparties (typically industry standard International Swaps and Derivatives Association (ISDA) agreements), which allow for a single net settlement of all transactions covered by that agreement in the event of a default or early termination of the transactions. In this manner, the credit risk associated with favourable contracts is eliminated by the master netting arrangement to the extent that unfavourable contracts with the same counterparty are not settled before favourable contracts.

Collateralization is typically documented by way of an ISDA Credit Support Annex (CSA), the terms of which may vary according to each party's view of the other party's creditworthiness. CSAs can require one party to post initial margin at the onset of each transaction. CSAs also allow for variation margin to be called if total uncollateralized mark-to-market exposure exceeds an agreed upon threshold. Such variation margin provisions can be one way (only one party will ever post collateral) or bi-lateral (either party may post collateral depending upon which party is in-the-money). The CSA will also detail the types of collateral that are acceptable to each party, and the adjustments that will be applied against each collateral type. The terms of the ISDA master netting agreements and CSAs are taken into consideration in the calculation of counterparty credit risk exposure (see also page 84 of the 2024 Annual Report).

Derivative instruments used by the Bank include credit derivatives in its investment and loan portfolios: credit protection is sold as an alternative to acquiring exposure to bond or loan assets, and bought to manage or mitigate credit exposures.

The following table summarizes the credit exposure of the Bank's derivative financial instruments. The credit risk amount (CRA) represents the estimated replacement cost, or positive fair value, for all contracts. CRA takes into account master netting or collateral arrangements that have been made¹. CRA does not reflect actual or expected losses.

The credit equivalent amount (CEA) is the exposure at default (EAD) prescribed in the Capital Adequacy Requirements (CAR) Guidelines of the Office of the Superintendent of Financial Institutions (OSFI). The risk-weighted asset is calculated by multiplying the CEA by the capital requirement (K) times 12.5, where K is a function of the probability of default (PD), loss given default (LGD), maturity and prescribed correlation factors. Commodity and other contracts includes energy, precious metals other than gold, and other commodities.

	\$ 6,838,861	\$ –	\$ 6,221	\$ 138	\$ 5,973,809	\$ –	\$ 8,334	\$ 178

(1) Regulatory amounts reported in 2024 and 2023 are under Revised Basel III requirements.

(2) The amounts presented are net of collateral and master netting agreements at the product level. The total amounts relating to netting and collateral were \$35,510 (2023 – \$40,516) for CRA, and \$87,284 (2023 – \$87,034) for CEA.

(3) Amounts are included under total derivatives above. Amounts include exposures settled directly through central counterparties and exposures settled through clearing members of central counterparties.

¹ Regulatory haircuts prescribed by the OSFI CAR Guidelines are applied to the collateral balances of the CRA measure.

(d) Fair value

The following table summarizes the fair value of derivatives segregated by type and segregated between trading and those derivatives designated in hedging relationships.

As at October 31 (\$ millions)

	2024		2024		2023

Total derivative financial instruments as per Statement of Financial Position			\$ 44,379	\$ 51,260	\$ 51,340	\$ 58,660

(1) The average fair value of trading derivatives' market valuation for the year ended October 31, 2023 was: favourable \$35,211 and unfavourable \$33,414. Average fair value amounts are based on the latest 13 month-end balances.

(e) Hedging activities

The Bank manages interest rate risk, foreign currency risk and equity risk through hedge accounting transactions.

Interest rate risk

Single-currency interest rate swaps are used to hedge interest rate risk exposure. In fair value hedges of interest rate risk, the interest rate exposure from fixed rate assets and liabilities is converted from fixed to floating rate exposure. In cash flow hedges of interest rate risk, the interest rate exposure from floating rate assets and liabilities is converted from floating to fixed rate exposure. The Bank generally hedges interest rate risk only to the extent of benchmark interest rates.

Foreign currency risk

In fair value hedges, cross-currency swaps and single-currency interest rate swaps are used to manage foreign currency exposure in conjunction with interest rate exposure. Cross-currency interest rate swaps or a combination of cross-currency basis swaps and single-currency interest rate swaps are mainly used to convert a foreign currency fixed rate exposure to a functional currency floating rate exposure. In hedges of both foreign currency and interest rate exposure, the interest rate risk is generally hedged only to the extent of the benchmark interest rate.

In cash flow hedges, cross-currency interest rate swaps, single-currency interest rate swaps, foreign currency forwards and foreign currency assets or liabilities are used to manage foreign currency exposure, or a combined foreign currency and interest rate exposure. Cross-currency interest rate swaps are used to offset the foreign currency exposure by exchanging the interest cash flows in one currency to another currency. Single-currency interest rate swaps may be used in conjunction with cross-currency swaps to convert the foreign currency exposure or resulting functional currency exposure from floating to fixed. Foreign currency forwards and foreign currency denominated assets and liabilities are used to offset the exposure arising from highly probable future cash flows, including purchase considerations for business acquisitions and sale proceeds for business divestitures that are denominated in a foreign currency. In hedges of both foreign currency and interest rate exposure, the interest rate risk is generally hedged only to the extent of the benchmark interest rate.

In net investment hedges, the Bank designates foreign currency liabilities and foreign currency forwards as hedging instruments to manage foreign currency exposure. The designated non-derivative liabilities are denominated in the functional currency of the net investment, such that the foreign currency translation impact from the net investment will be offset by the foreign currency impact from the designated liabilities. The foreign currency forward contracts are structured to sell the functional currency of the net investment in return for the Bank's functional currency.

Equity risk

Equity risk is created by the Bank's share-based compensation plans awarded to employees. In cash flow hedges, total return swaps are mainly used to offset the equity exposure by exchanging interest payments for payments based on the returns on the underlying shares.

For all of the risks identified above, the economic relationship and hedge ratio are determined using a qualitative and quantitative assessment. This assessment incorporates comparison of critical terms of the hedged and hedging item, and regression analysis. For regression analysis, a hedging relationship is considered highly effective when all of the following criteria are met: correlation between the variables in the regression is at least 0.8 or greater; slope of the regression is within a 0.8-1.25 range; and confidence level of the slope is at least 95%. The main sources of hedge ineffectiveness include the following:

- The use of different discount curves to value the hedged item and the hedging derivative in fair value hedges, in order to reflect the reduced credit risk of collateralized derivatives;
- Differences in key terms such as the underlying reference interest rate tenor, reset/settlement frequency and floating spread between the hedging instruments and the hedged item.

The Bank has elected to continue to apply the hedge accounting requirements of IAS 39. However, the Bank has implemented the additional hedge accounting disclosures that are required by the IFRS 9 related amendments to IFRS 7 "Financial Instruments: Disclosures".

The following table summarizes the notional amounts of derivatives and carrying amounts of cash and deposit liabilities designated as hedging instruments.

As at October 31 (\$ millions)	2024				2023

(1) Amounts reclassified from the cash flow hedge and net investment hedge reserves to net income are recorded in non-interest income-other except for amortization, which is recorded in interest income.

12 Offsetting Financial Assets and Financial Liabilities

The Bank is eligible to present certain financial assets and financial liabilities as listed in the table below on a net basis on the Consolidated Statement of Financial Position pursuant to criteria described in Note 3 – Material accounting policies.

The following tables provide information on the impact of offsetting on the Bank's Consolidated Statement of Financial Position, as well as the financial impact of netting for instruments that are subject to enforceable master netting arrangements or similar agreements, but do not qualify for offsetting in the Consolidated Statement of Financial Position, as well as available cash and financial instrument collateral.

As at October 31, 2024 (\$ millions)

Types of financial assets	Gross amounts of recognized financial instruments	Gross amounts of recognized financial instruments offset in the Consolidated Statement of Financial Position	Net amounts of financial instruments presented in the Consolidated Statement of Financial Position	Related amounts not offset in the Consolidated Statement of Financial Position		
				Impact of master netting arrangements or similar agreements ⁽¹⁾	Collateral ⁽²⁾⁽⁴⁾	Net amount ⁽³⁾
Derivative financial instruments	\$ 44,379	\$ –	\$ 44,379	\$ (29,949)	\$ (5,559)	\$ 8,871
Securities purchased under resale agreements and securities borrowed	318,531	(117,988)	200,543	(19,551)	(178,816)	2,176
Total	\$ 362,910	\$ (117,988)	\$ 244,922	\$ (49,500)	\$ (184,375)	\$ 11,047
Types of financial liabilities						
Derivative financial instruments	\$ 51,260	\$ –	\$ 51,260	\$ (29,949)	\$ (11,565)	\$ 9,746
Obligations related to securities sold under repurchase agreements and securities lent	308,437	(117,988)	190,449	(19,551)	(166,734)	4,164
Total	\$ 359,697	\$ (117,988)	\$ 241,709	\$ (49,500)	\$ (178,299)	\$ 13,910

As at October 31, 2023 (\$ millions)

Types of financial assets	Gross amounts of recognized financial instruments	Gross amounts of recognized financial instruments offset in the Consolidated Statement of Financial Position	Net amounts of financial instruments presented in the Consolidated Statement of Financial Position	Related amounts not offset in the Consolidated statement of Financial Position		
				Impact of master netting arrangements or similar agreements ⁽¹⁾	Collateral ⁽²⁾⁽⁴⁾	Net amount ⁽³⁾
Derivative financial instruments	\$ 51,340	\$ –	\$ 51,340	\$ (33,899)	\$ (6,479)	\$ 10,962
Securities purchased under resale agreements and securities borrowed	272,667	(73,342)	199,325	(17,356)	(179,466)	2,503
Total	\$ 324,007	\$ (73,342)	\$ 250,665	\$ (51,255)	\$ (185,945)	\$ 13,465
Types of financial liabilities						
Derivative financial instruments	\$ 58,660	\$ –	\$ 58,660	\$ (33,899)	\$ (14,515)	\$ 10,246
Obligations related to securities sold under repurchase agreements and securities lent	233,349	(73,342)	160,007	(17,356)	(140,215)	2,436
Total	\$ 292,009	\$ (73,342)	\$ 218,667	\$ (51,255)	\$ (154,730)	\$ 12,682

(1) Amounts that are subject to master netting arrangements or similar agreements but were not offset in the Consolidated Statement of Financial Position because they did not meet the net settlement/simultaneous settlement criteria; or because the rights of set off are conditional upon the default of the counterparty only.

(2) Cash and financial instrument collateral amounts received or pledged in relation to the total amounts of financial assets and financial liabilities, including those that were not offset in the Consolidated Statement of Financial Position. These amounts are disclosed at fair value and the rights of set off are conditional upon the default of the counterparty.

(3) Not intended to represent the Bank's actual exposure to credit risk, as a variety of credit mitigation strategies are employed in addition to offsetting and collateral arrangements.

(4) Derivative financial instruments assets include cash collateral of \$4,505 million (2023 – \$4,511 million) and non-cash collateral of \$1,054 million (2023 – \$1,968 million). Derivative financial instruments liabilities include cash collateral of \$10,847 million (2023 – \$13,889 million) and non-cash collateral of \$718 million (2023 – \$626 million).

13 Investment Securities

The following table presents the carrying amounts of the Bank's investment securities per measurement category.

As at October 31 (\$ millions)	2024	2023
Debt investment securities measured at FVOCI	\$ 118,226	\$ 82,150
Debt investment securities measured at amortized cost	29,412	31,984
Equity investment securities designated at FVOCI	3,162	2,164
Equity investment securities measured at FVTPL	2,004	1,888
Debt investment securities measured at FVTPL	28	51
Total investment securities	\$ 152,832	\$ 118,237

(a) Debt investment securities measured at fair value through other comprehensive income (FVOCI)

As at October 31 (\$ millions)	2024				2023

(1) Balances are net of allowances of \$1 (2023 – \$1).

(c) Equity investment securities designated at fair value through other comprehensive income (FVOCI)

The Bank has designated certain equity securities at FVOCI shown in the following table as these investments are held for strategic purposes.

As at October 31, 2024 (\$ millions)	Cost	Gross unrealized gains	Gross unrealized losses	Fair value
Common shares	\$ 2,522	\$ 713	\$ 73	\$ 3,162
Total	\$ 2,522	\$ 713	\$ 73	\$ 3,162

As at October 31, 2023 (\$ millions)	Cost	Gross unrealized gains	Gross unrealized losses	Fair value
Common shares	\$ 1,947	\$ 390	\$ 173	\$ 2,164
Total	\$ 1,947	\$ 390	\$ 173	\$ 2,164

Dividend income on equity securities designated at FVOCI of \$122 million for the year ended October 31, 2024 (2023 – \$137 million) has been recognized in interest income.

During the year ended October 31, 2024, the Bank has disposed of certain equity securities designated at FVOCI with a fair value of \$938 million (2023 – \$1,738 million) for economic reasons and according to its investment strategy. These dispositions have resulted in a cumulative gain of \$21 million (2023 – cumulative loss of \$205 million) that remains in OCI.

(d) An analysis of the carrying value of investment securities is as follows:

(1) Interest income recognized on impaired loans during the year ended October 31, 2024 was \$84 (2023 – \$57).

(e) Allowance for credit losses

(i) Key inputs and assumptions

The Bank's allowance for credit losses is measured using a three-stage approach based on the extent of credit deterioration since origination. The calculation of the Bank's allowance for credit losses is an output of a set of complex models with a number of underlying assumptions regarding the choice of variable inputs and their interdependencies. Some of the key drivers include the following:

- Changes in risk ratings of the borrower or instrument reflecting changes in their credit quality;
- Changes in the volumes of transactions;
- Changes in the forward-looking macroeconomic environment reflected in the variables used in the models such as GDP growth, unemployment rates, commodity prices, interest rates and house price indices, which are closely related with credit losses in the relevant portfolio;
- Changes in macroeconomic scenarios and the probability weights assigned to each scenario; and
- Borrower migration between the three stages.

The Bank determines its allowance for credit losses using four probability-weighted forward-looking scenarios (base case, optimistic, pessimistic and very pessimistic).

The Bank considers both internal and external sources of information and data to achieve unbiased projections and forecasts in determining the allowance for credit losses. The Bank prepares the scenarios using forecasts generated by Scotiabank Economics (SE). The forecasts are generated using models whose outputs are modified by SE as necessary to formulate a 'base case' view of the most probable future direction of economic developments. The development of the base case and alternative scenarios is overseen by a governance committee that consists of internal stakeholders from across the Bank. The final base case and alternative scenarios reflect significant review and oversight, and incorporate judgment both in the determination of the scenarios' forecasts and the probability weights that are assigned to them.

(ii) Key macroeconomic variables

The inputs and models used for calculating expected credit losses may not always capture all characteristics of the market at the date of the financial statements. Qualitative adjustments or overlays may be made for certain portfolios or geographies as temporary adjustments in circumstances where, in the Bank's view, the inputs, assumptions, and/or modelling techniques do not capture all relevant risk factors, including the emergence of economic or geopolitical events, up to the date of financial statements.

The Bank has applied expert credit judgement in the determination of the allowance for credit losses to capture, as described above, all relevant risk factors up to the end of the reporting period. The Bank considered both quantitative and qualitative information in the assessment of significant increase in credit risk.

Over the last year, the Canadian and U.S. economies continued to exhibit resilience in the face of restrictive monetary policy, supported by still strong labour markets and consumption, particularly in the U.S., with both economies on track to record stronger economic growth in 2024 than forecast last year. Notwithstanding the upward revision to growth, in Canada, more clear signs of slowing emerged over the past few months, with excess supply opening up room for the Bank of Canada to begin monetary policy easing earlier this year as inflation continued to decline. In the U.S., a more robust labour market and fiscal stimulus led to more substantial revisions to growth and slower progress on inflation, with the U.S. central bank cutting a quarter later than previously expected. It appears a soft-landing has been achieved, with a reacceleration of growth in 2025 expected in Canada from the orderly slowdown of 2024. In the U.S. a mild deceleration relative to 2024 is expected, yet it is still stronger than the forecast in 2023.

The optimistic scenario features somewhat stronger economic activity relative to the base case. The pessimistic scenario features a negative demand-type shock on the world economy with globally tighter private financial conditions, weaker growth and inflation, and lower monetary policy rates than in the baseline scenario. Lastly, the very pessimistic scenario features a strong stagflationary impulse that leads to a protracted period of financial market uncertainty. This results in higher inflation, requiring central banks to raise their policy rate to higher levels than in the base case in order to bring inflation under control, which is dampening economic activity.

The following tables show certain key macroeconomic variables used to calculate the modelled estimate for the allowance for credit losses. Further changes in these variables up to the date of the financial statements is incorporated through expert credit judgment. For the base case, optimistic and pessimistic scenarios, the projections are provided for the next 12 months and for the remaining forecast period, which represents a medium-term view.

October 31, 2024	Base Case Scenario		Alternative Scenario – Optimistic		Alternative Scenario – Pessimistic		Alternative Scenario – Very Pessimistic

(iii) Sensitivity

Relative to the base case scenario, the weighting of these multiple scenarios increased the reported allowance for credit losses for financial assets in Stage 1 and Stage 2 to \$4,682 million (2023 – \$4,719 million) from \$4,316 million (2023 – \$4,510 million).

The Bank enhanced certain of its IFRS 9 models in the current year, with the enhanced models exhibiting higher sensitivity to changes in the macroeconomic outlook. If the Bank was to apply a probability weighted average of its two pessimistic scenarios for the measurement of allowance for credit losses for such assets, the allowance for credit losses on performing financial instruments would be \$942 million higher than the reported allowance for credit losses as at October 31, 2024 (October 31, 2023 – \$436 million), excluding the consideration of changes in qualitative overlays or expert credit judgement. Actual results will differ as this does not consider the migration of exposures or incorporate changes that would occur in the portfolio due to risk mitigation actions and other factors.

Under our current probability-weighted scenarios, if all of our performing financial assets were in Stage 1, reflecting a 12 month expected loss period, the allowance for credit losses would be \$693 million (2023 – \$553 million) lower than the reported allowance for credit losses on performing financial assets.

(iv) Allowance for credit losses

(\$ millions)	Balance as at November 1, 2023	Provision for credit losses ⁽¹⁾	Net write-offs	Other, including foreign currency adjustment	Balance as at October 31, 2024
Residential mortgages	\$ 1,084	\$ 257	\$ (76)	\$ (57)	\$ 1,208

(1) Includes credit risk changes as a result of significant increases in credit risk, changes in credit risk that did not result in a transfer between stages, changes in model inputs and assumptions and changes due to drawdowns of undrawn commitments.

(2) Interest income on impaired loans for residential mortgages, personal loans, credit cards, and business and government loans totaled \$443 (2023 – \$378).

(3) Allowance for credit losses on off-balance sheet exposures is recorded in other liabilities in the Consolidated Statement of Financial Position.

(4) Allowance for credit losses on acceptances are recorded against the financial asset in the Consolidated Statement of Financial Position.

(5) During the year ended October 31, 2024, the contractual terms of certain financial assets were modified where the modification did not result in derecognition. The carrying value of such loans that were modified in Stage 2 and Stage 3 was \$3,504 (2023 – \$2,096) and \$726 (2023 – \$798) respectively, before the modification.

(6) Divestitures are included in the foreign exchange and other movements.

(7) Comprises changes due to enhanced IFRS 9 models, including changes to reflect previously established expert credit judgment overlays that are now incorporated in the model.

(f) Carrying value of exposures by risk rating

(g) Loans past due but not impaired⁽¹⁾

A loan is considered past due when a counterparty has not made a payment by the contractual due date. The following table presents the carrying value of loans that are contractually past due but not classified as impaired because they are either less than 90 days past due or fully secured and collection efforts are reasonably expected to result in repayment or restoring it to a current status in accordance with the Bank's policy. In cases where borrowers have opted to participate in payment deferral programs, deferral of payments is not considered past due and such loans are not aged further during the deferral period.

	2024 ⁽²⁾				2023 ⁽²⁾			
	31 – 60 days	61 – 90 days	91 days and greater ⁽³⁾	Total	31 – 60 days	61 – 90 days	91 days and greater ⁽³⁾	Total
As at October 31 (\$ millions)								
Residential mortgages	\$ 1,418	\$ 718	\$ –	\$ 2,136	\$ 1,329	\$ 617	\$ –	\$ 1,946
Personal loans	647	343	–	990	648	360	–	1,008

Business and government	192	48	–	240	159	57	–	216
Total	\$ 2,499	\$ 1,281	\$ 398	\$ 4,178	\$ 2,374	\$ 1,191	\$ 345	\$ 3,910

(1) Loans past due 30 days or less are not presented in this analysis as they are not administratively considered past due.

(2) For loans where payment deferrals were granted, deferred payments are not considered past due and such loans are not aged further during the deferral period. Regular aging of the loans resumes, after the end of the deferral period.

(3) All loans that are over 90 days past due are considered impaired with the exception of credit card receivables which are considered impaired when 180 days past due.

(h) Purchased credit-impaired loans

Certain financial assets including loans are credit-impaired on initial recognition either through acquisition or origination. The following table provides details of such assets:

As at October 31 (\$ millions)	2024	2023
Unpaid principal balance ⁽¹⁾	\$ 243	\$ 307
Credit-related fair value adjustments	(29)	(87)
Carrying value	214	220

Carrying value net of related allowance	\$ 213	\$ 219

(1) Represents principal amount owed net of write-offs.

15 Derecognition of Financial Assets*Securitization of residential mortgage loans*

The Bank securitizes fully insured residential mortgage loans, Bank originated and others, through the creation of mortgage-backed securities (MBS) under the National Housing Act (NHA) MBS program, sponsored by Canada Mortgage and Housing Corporation (CMHC). MBS created under the program are primarily sold to Canada Housing Trust (the Trust), a government sponsored entity, under the Canada Mortgage Bond (CMB) program, and/or third-party investors. The Trust issues securities to third-party investors. The CMHC also previously purchased insured mortgage pools from the Bank under the Insured Mortgage Purchase Program (IMPP).

Sale of mortgages under the above programs does not meet the derecognition requirements, where the Bank retains the pre-payment and interest rate risk associated with the mortgages, which represent substantially all the risks and rewards associated with the transferred assets.

The transferred mortgages continue to be recognized on the Consolidated Statement of Financial Position as residential mortgage loans. Cash proceeds from the transfer are treated as secured borrowings and included in Deposits – Business and government on the Consolidated Statement of Financial Position.

The following table provides the carrying amount of transferred assets that do not qualify for derecognition and the associated liabilities:

As at October 31 (\$ millions)	2024 ⁽¹⁾	2023 ⁽¹⁾
Assets		
Carrying value of residential mortgage loans	\$ 11,190	\$ 13,508
Other related assets ⁽²⁾	7,202	8,600
Liabilities		
Carrying value of associated liabilities	17,923	20,222

(1) The fair value of the transferred assets is \$18,092 (2023 – \$20,264) and the fair value of the associated liabilities is \$17,692 (2023 – \$19,265), for a net position of \$400 (2023 – \$999).

(2) These include cash held in trust and trust permitted investment assets, including repurchase style transactions of mortgage-backed securities, acquired as part of principal reinvestment account that the Bank is required to maintain in order to participate in the programs.

Securitization of credit card receivables

The Bank securitizes a portion of its credit card receivables through a consolidated structured entity. These receivables continue to be recognized on the Consolidated Statement of Financial Position as credit card loans. For further details, refer to Note 16.

Securities sold under repurchase agreements and securities lent

The Bank enters into transactions, such as repurchase agreements and securities lending agreements, where the Bank transfers assets under agreements to repurchase them on a future date and retains all the substantial risks and rewards associated with the assets. The transferred assets remain on the Consolidated Statement of Financial Position.

The following table provides the carrying amount of the transferred assets and the associated liabilities:

As at October 31 (\$ millions)	2024 ⁽¹⁾	2023 ⁽¹⁾
Carrying value of assets associated with:		
Repurchase agreements ⁽²⁾	\$ 174,334	\$ 140,296
Securities lending agreements	58,477	56,174
Total	232,811	196,470
Carrying value of associated liabilities ⁽³⁾	\$ 190,449	\$ 160,007

(1) The fair value of transferred assets is \$232,811 (2023 – \$196,470) and the fair value of the associated liabilities is \$190,449 (2023 – \$160,007), for a net position of \$42,362 (2023 – \$36,463).

(2) Does not include over-collateralization of assets pledged.

(3) Liabilities for securities lending arrangements only include amounts related to cash collateral received. For securities received as collateral, refer to Note 36(a)(iv) – Financial Instruments – Risk Management.

16 Structured Entities

(a) Consolidated structured entities

U.S. multi-seller conduit

The Bank-sponsored U.S. multi-seller conduit purchases high-quality financial assets from independent third parties (the sellers) funded by the issuance of highly rated asset-backed commercial paper. The sellers continue to service the financial assets and provide credit enhancements through overcollateralization protection and cash reserves.

Each asset purchased by the conduit has a deal-specific liquidity facility provided by the Bank in the form of a Liquidity Asset Purchase Agreement (LAPA). The primary purpose of the LAPA is to provide an alternative source of financing in the event the conduit is unable to access the asset-backed commercial paper market. The administration agent can require the Bank in its capacity as liquidity provider to purchase an interest in the related assets owned by the conduit. The Bank is not obligated to perform under the LAPA agreements in the event the conduit itself is insolvent.

The Bank's liquidity agreements with the conduit call for the Bank to fund full par value of the assets, including defaulted assets, if any, of the conduit. This facility is available to absorb the losses on defaulted assets, if any, in excess of losses absorbed by deal-specific seller credit enhancements. Further, the Bank holds the subordinated note issued by the conduit.

The Bank's exposure from the U.S. conduit through the LAPA, including the obligation to purchase defaulted assets and investment in the conduit's subordinated note, give the Bank the obligation to absorb losses that could potentially be significant to the conduit, which in conjunction with power to direct the conduit's activities, result in the Bank consolidating the U.S. multi-seller conduit.

The conduit's assets of \$11 billion (2023 – \$13 billion) are primarily included in Business and government loans on the Bank's Consolidated Statement of Financial Position.

There are contractual restrictions on the ability of the Bank's consolidated U.S. multi-seller conduit to transfer funds to the Bank. The Bank is restricted from accessing the conduit's assets under the relevant arrangements. The Bank has no rights to the assets owned by the conduit. In the normal course of business, the assets of the conduit can only be used to settle the obligations of the conduit.

Bank funding vehicles and capital vehicles

The Bank uses funding and capital vehicles to facilitate cost-efficient financing of its own operations, including the issuance of covered bonds and notes. Activities of funding structured entities are generally limited to holding an interest in a pool of assets or receivables generated by the Bank. Capital vehicles include Scotiabank LRCN Trust which was established in connection with the Bank's issuance of qualifying regulatory capital instruments. These structured entities are consolidated due to the Bank's decision-making power and ability to use that power to affect the returns.

Covered bonds

The Bank has a registered covered bond program through which it issues debt that is guaranteed by Scotiabank Covered Bond Guarantor Limited Partnership (the "LP"). Under this program, the LP purchases uninsured residential mortgages from the Bank, which it acquires with funding provided by the Bank.

As at October 31, 2024, \$47.0 billion (2023 – \$50.0 billion) covered bonds were outstanding and included in Deposits – Business and government on the Consolidated Statement of Financial Position. The Bank's outstanding covered bonds are denominated in U.S. dollars, Australian dollars, British pounds, Swiss francs, Euros, Canadian Dollars, and Norwegian Kroner. As at October 31, 2024, assets pledged in relation to these covered bonds were uninsured residential mortgages denominated in Canadian dollars of \$48.0 billion (2023 – \$51.5 billion). These figures exclude activities in connection with covered bonds held by the Bank and that are eliminated upon consolidation.

Credit card receivables securitization trust

The Bank securitizes a portion of its Canadian credit card receivables through a Bank-sponsored structured entity. This entity issues senior and subordinated notes to third-party investors and the proceeds of such issuance are used to purchase co-ownership interests in credit card receivables originated by the Bank. Recourse of the note holders is limited to the purchased interest.

The Bank is responsible for servicing the transferred credit card receivables as well as performing administrative functions for this entity. As at October 31, 2024, U.S. \$2.4 billion (\$3.3 billion Canadian dollar equivalent) (2023 – U.S. \$2.0 billion, \$2.8 billion Canadian dollar equivalent) Class A notes; and U.S. \$209 million (\$291 million Canadian dollar equivalent) (2023 – U.S. \$174 million, \$241 million Canadian dollar equivalent) subordinated Class B and Class C notes were outstanding and included in Deposits – Business and government on the Consolidated Statement of Financial Position. As at October 31, 2024 assets pledged in relation to these notes were credit card receivables, denominated in Canadian dollars, of \$3.8 billion (2023 – \$3.2 billion).

Scotiabank LRCN Trust

The Bank sponsors the Scotiabank LRCN Trust established in connection with the issuance of limited recourse capital notes. As at October 31, 2024, \$5.5 billion (2023 – \$4.5 billion) of externally-issued limited recourse capital notes were outstanding and included in Preferred shares and other equity instruments on the Consolidated Statement of Financial Position. Refer to Note 25(b) – Preferred shares and other equity instruments for further information.

Other

Assets of other consolidated structured entities are comprised of securities, deposits with banks and other assets to meet the Bank's and customer needs.

(b) Unconsolidated structured entities

The following table provides information about other structured entities which the Bank does not control and therefore does not consolidate.

(\$ millions)	As at October 31, 2024			
	Canadian multi-seller conduits that the Bank administers	Structured finance entities	Other funding vehicles	Total
Total assets on structured entity's financial statements	\$ 6,299	\$ 13,695	\$ 1,870	\$ 21,864
Assets recognized on the Bank's financial statements:				
Trading assets	8	306	–	314
Investment securities	–	842	–	842
Loans ⁽¹⁾	–	4,757	–	4,757
Other	–	35	93	128
	8	5,940	93	6,041
Liabilities recognized on the Bank's financial statements:				
Deposits – Business and government	–	–	1,842	1,842
Other	–	–	28	28
	–	–	1,870	1,870
Bank's maximum exposure to loss	\$ 6,307	\$ 11,469	\$ 76	\$ 17,852

(\$ millions)	As at October 31, 2023			
	Canadian multi-seller conduits that the Bank administers	Structured finance entities	Other funding vehicles	Total
Total assets (on structured entity's financial statements)	\$ 5,291	\$ 3,683	\$ 1,872	\$ 10,846
Assets recognized on the Bank's financial statements:				
Trading assets	8	18	–	26
Investment securities	–	804	10	814
Loans ⁽¹⁾	–	1,182	61	1,243
Other	–	2	9	11
	8	2,006	80	2,094
Liabilities recognized on the Bank's financial statements:				
Deposits – Business and government	–	–	1,834	1,834
Derivative financial instruments	–	–	38	38
	–	–	1,872	1,872
Bank's maximum exposure to loss	\$ 5,299	\$ 3,296	\$ 71	\$ 8,666

(1) Loan balances are presented net of allowance for credit losses.

The Bank's maximum exposure to loss represents the notional amounts of guarantees, liquidity facilities, and other credit support relationships with the structured entities, the credit risk amount for certain derivative contracts with the entities and the amount invested where the Bank holds an ownership interest in the structured entities. Of the aggregate amount of maximum exposure to loss as at October 31, 2024, the Bank has recorded \$6.1 billion (2023 – \$2.1 billion), primarily loans issued to structured entities, on the Consolidated Statement of Financial Position.

Canadian multi-seller conduits that the Bank administers

The Bank sponsors two Canadian multi-seller conduits. The conduits purchase assets from independent third parties (the sellers) funded by the issuance of asset-backed commercial paper. The sellers continue to service the assets and provide credit enhancements through overcollateralization protection and cash reserves. The Bank has no rights to these assets as they are available to support the obligations of the respective programs but manages for a fee the commercial paper selling programs. To ensure timely repayment of the commercial paper, each asset pool financed by the multi-seller conduits has a deal-specific LAPA with the Bank. Pursuant to the terms of the LAPA, the Bank as the liquidity provider is obligated to purchase non-defaulted assets, transferred by the conduit at the conduit's original cost as reflected in the table above. In most cases, the liquidity agreements do not require the Bank to purchase defaulted assets. Additionally, the Bank has not provided any program-wide credit enhancement to these conduits. The Bank provides additional liquidity facilities to these multi-seller conduits to a maximum amount of \$1.4 billion (2023 – \$1.8 billion) based on future asset purchases by these conduits.

Although the Bank has power over the relevant activities of the conduits, it has limited exposure to variability in returns, which results in the Bank not consolidating the two Canadian conduits.

Structured finance entities

The Bank has interests in structured entities used to assist corporate clients in accessing cost-efficient financing through their securitization structures. The Bank may act as an administrator, an investor or a combination of both in these types of structures.

The Bank provides senior credit facilities to unaffiliated structured entities that are established by third parties to acquire and/or originate loans for the purposes of issuing collateralized loan obligations (CLOs). These credit facilities benefit from subordinated capital provided by either the collateral manager or third-party investors via subordinated financing, capital injection or asset contribution. Subordinated capital represents the first loss tranche which absorbs losses prior to the Bank's senior exposure. The Bank's broker-dealer affiliate acts as the arranger and placement agent for the CLOs. Proceeds from the sale of the CLOs are used to repay the senior credit facilities. The Bank does not consolidate these entities as it does not have decision making power over their relevant activities, which include the acquisition and/or origination of loans and overall management of the underlying portfolio. As at October 31, 2024, the Bank has funded \$4,243 million of the credit facilities provided to these structured entities (October 31, 2023 – \$220 million).

Other funding vehicles

These entities are designed to pass the Bank's credit risk to the holders of the securities. Therefore, the Bank does not have exposure or rights to variable returns from these unconsolidated entities.

The Bank uses a funding vehicle to transfer credit exposure on certain loan assets and purchases credit protection against eligible credit events from this vehicle. The vehicle collateralizes its obligation using cash proceeds received through the issuance of guarantee-linked notes. Loan assets are not sold or assigned to the vehicle and remain on the Bank's Consolidated Statement of Financial Position. The total principal balance of guarantee-linked notes issued by this vehicle and outstanding was \$1,002 million as at October 31, 2024 (October 31, 2023 – \$998 million). These are included in Deposits – Business and government on the Bank's Consolidated Statement of Financial Position.

Although the Bank has power over the relevant activities of these vehicles, it has limited exposure to variability in returns, which results in the Bank not consolidating these vehicles.

(c) Other unconsolidated Bank-sponsored entities

The Bank sponsors unconsolidated structured entities including mutual funds, in which it has insignificant or no interest at the reporting date. The Bank is a sponsor when it is significantly involved in the design and formation at inception of the structured entities, and the Bank's name is used by the structured entities to create an awareness of the instruments being backed by the Bank's reputation and obligation. The Bank also considers other factors, such as its continuing involvement and obligations to determine if, in substance, the Bank is a sponsor.

As at October 31, 2024, the Bank earned \$2,547 million (2023 – \$2,369 million) in revenue from unconsolidated Bank-sponsored mutual fund entities.

18 Investments in Associates

The Bank had significant investments in the following associates:

As at October 31 (\$ millions)	2024					2023
	Country of incorporation	Nature of business	Ownership percentage	Date of financial statements ⁽¹⁾	Carrying value	Carrying value
Bank of Xi'an Co. Ltd. ⁽²⁾⁽³⁾	China	Banking	18.11%	September 30, 2024	\$ 658	\$ 895
Maduro & Curiel's Bank N.V. ⁽⁴⁾	Curacao	Banking	48.10%	September 30, 2024	527	489

(1) Represents the date of the most recent financial statements. Where available, financial statements prepared by the associates' management or other published information is used to estimate the change in the Bank's interest since the most recent financial statements.

(2) Based on the quoted price on the Shanghai Stock Exchange, the Bank's investment in Bank of Xi'an Co. Ltd. was \$570 as at October 31, 2024 (October 31, 2023 – \$529).

(3) The Bank has significant influence over the Bank of Xi'an Co. Ltd. through a combination of its ownership interest and board representation.

(4) The local regulator requires financial institutions to set aside reserves for general banking risks. These reserves are not required under IFRS and represent undistributed retained earnings related to a foreign associated corporation, which are subject to local regulatory restrictions. As of October 31, 2024 these reserves amounted to \$74 (2023 – \$71).

Impairment testing of Bank of Xi'an Co. Ltd.

As at October 31, 2024, the market value of the Bank's investment in Bank of Xi'an Co. Ltd. based on the quoted price on the Shanghai Stock Exchange continues to be below its carrying value. The Bank has been performing quarterly impairment testing on this investment due to the prolonged period in which its market value has remained below the carrying amount. The impairment test involves comparing the carrying value of the investment to its recoverable amount based on value in use (VIU). In estimating VIU, the Bank uses a discounted cash flows valuation model which incorporates key assumptions, including a 5-year forecast of after-tax cash flows for the underlying entity, the estimated terminal growth rate beyond 5 years, and the applicable discount rate. As at October 31, 2024, the estimate of VIU was determined using a terminal growth rate of 2% (2023 – 3%) and an after-tax discount rate of 12% (2023 – 12%).

The VIU methodology resulted in an impairment charge of \$343 million (\$309 million after-tax) recorded in non-interest expenses – other in the Other operating segment, driven primarily by the continued weakening of the economic outlook in China (2023 – \$185 million or \$159 million after-tax).

Summarized financial information

Summarized financial information of the Bank's significant associates are as follows.

(\$ millions)	For the twelve months ended ⁽¹⁾		As at October 31, 2024	
	Revenue	Net income	Total assets	Total liabilities
Bank of Xi'an Co. Ltd.	\$ 1,457	\$ 471	\$ 87,974	\$ 81,577
Maduro & Curiel's Bank N.V.	457	170	8,057	6,959

(\$ millions)	For the twelve months ended ⁽¹⁾		As at October 31, 2023	
	Revenue	Net income	Total assets	Total liabilities
Canadian Tire's Financial Services business (CTFS) ⁽²⁾	\$ 1,347	\$ 368	\$ n/a	\$ n/a
Bank of Xi'an Co. Ltd.	1,277	487	80,803	75,027
Maduro & Curiel's Bank N.V.	416	165	7,636	6,616

(1) Based on the most recent available financial statements.

(2) On October 31, 2023, the Bank closed the sale of its 20% interest in CTFS to Canadian Tire Corporation. Refer to Note 37 – Acquisitions and Divestitures.

19 Goodwill and Other Intangible Assets

Goodwill

The changes in the carrying amounts of goodwill by groups of cash-generating units (CGU) are as follows:

(\$ millions)	Canadian Banking	Global Wealth Management	Global Banking and Markets	Latin America	Caribbean and Central America	Total
Balance as at October 31, 2022	\$ 1,690	\$ 3,599	\$ 243	\$ 2,401	\$ 941	\$ 8,874
Acquisitions	–	–	–	–	–	–
Dispositions	–	–	–	–	–	–
Foreign currency adjustments and other	–	11	3	229	64	307
Balance as at October 31, 2023	1,690	3,610	246	2,630	1,005	9,181

Dispositions ⁽¹⁾	–	–	–	(92)	–	(92)
Foreign currency adjustments and other	–	4	–	(138)	6	(128)
Balance as at October 31, 2024	\$ 1,690	\$ 3,614	\$ 246	\$ 2,400	\$ 1,011	\$ 8,961

(1) In the current year, the Bank recognized a net impairment loss of \$136 million pre-tax in relation to its agreement to sell CrediScotia Financiera, a subsidiary in Peru within the Latin America CGU, of which \$92 million related to goodwill. Refer to Note 37 – Acquisitions and Divestitures for details.

Impairment testing of goodwill

Goodwill acquired in business combinations is allocated to each of the Bank's groups of CGUs that are expected to benefit from the synergies of the particular acquisition. Goodwill is assessed for impairment annually or more frequently if events or circumstances occur that may indicate impairment.

The Bank determines the carrying values of its CGUs using a regulatory capital approach based on credit, market, operational risks and leverage, consistent with the Bank's capital attribution for business line performance measurement. Corporate capital that is not directly attributable is allocated to each CGU on a proportional basis, based on the relative attributed capital prior to the corporate capital allocation. The resulting carrying amount determined for the CGU is then compared to its respective recoverable amount to identify any impairment.

Annual impairment testing for goodwill was performed as at July 31, 2024 and 2023, and no impairment was determined to exist. As of October 31, 2024 and 2023, there were no significant changes to this assessment.

Fair value less costs of disposal

For all CGUs other than Latin America, the recoverable amount was determined using the fair value less costs of disposal (FVLCD) method. In arriving at FVLCD, the Bank estimates the fair value of the CGU using price earnings (P/E) multiples applied to normalized net income for the last four quarters as of the test date, applies a control premium based on a weighted average of acquisition premiums paid globally in the banking industry over the past five years for comparable companies, and deducts the estimated costs of disposal. The fair value measurement is categorized as Level 3 due to significant inputs being unobservable. For the 2024 annual impairment test, P/E multiples ranging from 11 to 11.5 times (2023 – 9 to 10 times) were used.

The Bank has performed sensitivity analysis on the key assumptions used in estimating FVLCD. The estimate of reasonably possible changes to the key assumptions are based on available evidence in respect of each input, such as risks associated with the normalized net income projections, and range of P/E multiples observed externally. Reasonable negative changes in the net income outlook (decrease of 5%) or P/E multiples (decrease of 1x), each in isolation, holding other factors constant, would not result in impairment for all CGUs using the FVLCD method.

Value in use

The Latin America CGU's recoverable amount was determined using the value in use (VIU) method, consistent with the prior year. In estimating VIU, the Bank uses a discounted cash flow valuation model based on a 5-year forecast of after-tax cash flows, the estimated terminal growth rate beyond 5 years, and the applicable discount rate. The 5-year cash flow forecast is based on management approved budgets and plans which consider market trends, macroeconomic conditions, forecasted earnings and the business strategy for the CGU. The terminal growth rate is based on long-term growth expectations in Latin America, and the discount rate is based on the cost of capital of comparable companies. For the 2024 annual impairment test, a terminal growth rate of 3% (2023 – 3%) and a discount rate of 12% (2023 – 13%) was used.

The Bank has performed sensitivity analysis on the key assumptions used in estimating the Latin America CGU's VIU. The estimate of reasonably possible changes to the key assumptions is based on available evidence in respect of each input such as historical performance against forecasts, risks associated with the underlying cash flow projections, and range of discount rates observed externally. Reasonable negative changes in any one key assumption, holding other factors constant, would not result in impairment for the Latin America CGU.

Intangible assets

Intangible assets consist of assets with indefinite and finite useful lives. Indefinite life intangible assets consist substantially of fund management contracts. The fund management contracts are for the management of open-ended funds. Finite life intangible assets include assets such as computer software, customer relationships and core deposit intangibles.

(1) Fund management contracts are attributable to the previously acquired Dynamic Funds business (formerly DundeeWealth Inc.), MD Financial Management Inc., and Jarislowsky Fraser Limited.

(2) Computer software comprises purchased software of \$194 (2023 – \$429), internally generated software of \$1,939 (2023 – \$1,711), and in process software not subject to amortization of \$900 (2023 – \$933).

Impairment testing of intangible assets

Indefinite life intangible assets are not amortized and are assessed for impairment annually or more frequently if events or changes in circumstances indicate that the asset may be impaired. Impairment is assessed by comparing the carrying value of the indefinite life intangible asset to its recoverable amount. The recoverable amount of fund management contracts is based on a value in use approach using the multi-period excess earnings method. This approach uses cash flow projections from management-approved financial budgets, which include key assumptions related to market appreciation, net sales of funds, and operating margins, taking into consideration past experience and market expectations. The forecast cash flows cover a 5-year period, with a terminal growth rate of 4.5% (2023 – 4.5%) applied thereafter. These cash flows have been discounted at 10% (2023 – 10%). Fund management contracts were assessed for annual impairment using data as at July 31, 2024 and 2023, and no impairment was determined to exist. As of October 31, 2024 and 2023, there were no significant changes to this assessment. In addition, reasonable negative changes in any one key assumption, holding other factors constant, would not result in impairment.

Finite life intangible assets are only assessed for impairment if events or circumstances indicate that the asset may be impaired. When required, impairment is assessed by comparing the carrying value of the finite life intangible asset to its recoverable amount, which is generally determined using a value in use approach. In fiscal 2024, computer software with a net book value of \$97 million was assessed as impaired. In fiscal 2023, finite life intangible assets with a net book value of \$126 million were assessed as impaired, of which \$76 million related to the full write-off of a contract-based intangible asset in Peru and \$50 million related to computer software.

(1) The majority of foreign term deposits are in excess of \$100,000.

22 Subordinated Debentures

These debentures are direct, unsecured obligations of the Bank and are subordinate to the claims of the Bank's depositors and other creditors. The Bank, where appropriate, enters into interest rate and cross-currency swaps to hedge the related risks.

As at October 31 (\$ millions)			2024	2023
Maturity date	Interest rate (%)	Terms ⁽¹⁾	Carrying value ⁽²⁾	Carrying value ⁽²⁾
June 2025	8.90	Redeemable at any time.	\$ 251	\$ 252
December 2025 ⁽³⁾	4.50	U.S.\$1,250 million. Interest will be payable semi-annually in arrears on June 16 and December 16 of each year, until maturity in December 2025.	1,740	1,714
January 2029 ⁽³⁾	3.89	\$1,750 million. On January 18, 2024, the Bank redeemed these notes at 100% of their principal amount plus accrued and unpaid interest.	—	1,752
July 2029 ⁽³⁾	2.836	\$1,500 million. On July 3, 2024, the Bank redeemed these notes at 100% of their principal amount plus accrued and unpaid interest.	—	1,339
May 2037 ⁽³⁾	4.588	U.S.\$1,250 million. Redeemable between April 12, 2027, and May 4, 2032. On May 4, 2032, interest will reset at the then prevailing 5-year U.S. treasury rate plus 2.050%.	1,704	1,676
May 2032 ⁽³⁾	3.934	Redeemable on or after May 3, 2027. After May 3, 2027, interest will be payable quarterly at the then prevailing three-month bankers' acceptance rate plus 1.52%.	1,713	1,587
December 2032 ⁽³⁾	1.800	JPY 33,000 million. Redeemable on December 20, 2027. After December 20, 2027, interest will be payable semi-annually at the reference Japanese Government Bond rate plus 1.681% on the reset date.	301	301
August 2033 ⁽³⁾	5.679	Redeemable on or after August 2, 2028. After August 2, 2028, interest will be payable at an annual rate equal to Daily Compounded CORRA plus 2.100%.	1,016	962
December 2033 ⁽³⁾	1.830	JPY 12,000 million. Redeemable on December 1, 2028. After December 1, 2028, interest rate on the debentures will be reset to the prevailing yield of Japanese Government Bond rate plus 1.477% on the reset date.	110	110
August 2034 ⁽³⁾	4.959	Redeemable on or after August 1, 2029. After August 1, 2029, interest will be payable at Daily Compounded CORRA plus 1.55%.	998	—
			\$ 7,833	\$ 9,693

(1) In accordance with the provisions of the Capital Adequacy Guideline of the Superintendent, all redemptions are subject to regulatory approval and subject to the terms in the relevant prospectus.

(2) The carrying value of subordinated debentures may differ from par value due to the impact of fair value hedges used for managing interest rate risk and subordinated debentures held for market-making purposes.

(3) These debentures contain non-viability contingent capital (NVCC) provisions. Under such NVCC provisions, outstanding debentures are convertible into a variable number of common shares if OSFI announces that the Bank has ceased, or is about to cease, to be viable, or if a federal or provincial government in Canada publicly announces that the Bank has accepted or agreed to accept a capital injection, or equivalent support, from the federal government or any provincial government or political subdivision or agent thereof without which the Bank would have been determined by OSFI to be non-viable. If such a conversion were to occur, the debentures would be converted into common shares pursuant to an automatic conversion formula defined as 150% of the par value plus accrued and unpaid interest divided by the conversion price and, where applicable, subject to translation at foreign exchange rates in effect at the time of conversion. The conversion price is based on the greater of: (i) a floor price of \$5.00 (subject to adjustments in certain events as set out in the respective prospectus supplements), and (ii) the current market price of the Bank's common shares at the time of the trigger event (10-day weighted average).

23 Other Liabilities

Legal

In the ordinary course of business, the Bank and its subsidiaries are and have been subject to a variety of pending and threatened legal proceedings, including civil claims and lawsuits, regulatory examinations, investigations, audits, and requests for information by various governmental regulatory agencies and law enforcement authorities in various jurisdictions. Some of these matters may involve novel legal theories and interpretations and may be advanced under criminal as well as civil statutes, and some proceedings could result in the imposition of civil, regulatory enforcement or criminal penalties. The Bank reviews the status of all proceedings on an ongoing basis and will exercise judgment in resolving them in such manner as the Bank believes to be in its best interest. In view of the inherent difficulty of predicting the outcome of such matters, the Bank cannot state what the eventual outcome of such matters will be. However, based on current knowledge, management does not believe that liabilities, if any, arising from pending litigation or regulatory proceedings will have a material adverse effect on the Consolidated Statement of Financial Position or results of operations of the Bank.

Legal provisions are established when it becomes probable that the Bank will incur an expense related to a legal action or regulatory proceeding and the amount can be reliably estimated. Such provisions are recorded at the best estimate of the amount required to settle any obligation related to these legal actions as at the balance sheet date, taking into account the risks and uncertainties surrounding the obligation. Management and internal and external experts are involved in estimating any amounts that may be required. The actual costs of resolving these claims may vary significantly from the amount of the legal provisions. The Bank's estimate involves significant judgement, given the varying stages of the proceedings, the fact that the Bank's liability, if any, has yet to be determined and the fact that the underlying matters will change from time to time. As such, there is a possibility that the ultimate resolution of those legal actions may be material to the Bank's consolidated results of operations for any particular reporting period.

The Bank, through its Peruvian subsidiary, is engaged in legal actions related to certain value-added tax assessed amounts and associated interest totaling \$176 million, which arose from certain client transactions that occurred prior to the Bank's acquisition of the subsidiary. The legal action in Peru relating to the original assessed amount was heard by the Peruvian Constitutional Court in June 2023. That case was decided in favour of the Government of Peru in May 2024. Accordingly, the Bank paid \$34 million representing the principal and associated reasonable interest, which was recorded in non-interest expenses – other. In November 2021, the Peruvian Constitutional Court dismissed the matter relating to the accrued default interest for procedural reasons. With respect to this default interest component, and in relation to the Constitutional Court of Peru's treatment of Scotiabank Peru, in October 2022, the Bank filed a request for arbitration against the Republic of Peru before the International Centre for the Settlement of Investment Disputes (ICSID), pursuant to the provisions of the Canada-Peru Free Trade Agreement. In May 2024, the ICSID Tribunal issued a ruling that narrowed the scope of the Bank's case. This case is currently proceeding through the arbitration process. Following these developments, the Bank recorded a legal provision of \$142 million in other liabilities – provisions, representing the amount at issue in the arbitration. The Bank intends to continue to vigorously advance its position.

Restructuring Charge

Prior Year

In the prior year, the Bank recorded a restructuring charge and severance provisions of \$354 million related to workforce reductions as a result of the Bank's end-to-end digitization, automation, changes in customers' day-to-day banking preferences, as well as the ongoing efforts to streamline operational processes and optimize distribution channels. Of these amounts, which were all recorded in the Other operating segment, \$316 million was the restructuring charge included in other liabilities – provisions.

25 Common shares, preferred shares and other equity instruments

(a) Common shares

Authorized:

An unlimited number of common shares without nominal or par value.

Issued and fully paid:

As at October 31 (\$ millions)	2024		2023	
	Number of shares	Amount	Number of shares	Amount
Outstanding at beginning of year	1,214,044,420	\$ 20,109	1,191,375,095	\$ 18,707
Issued in relation to share-based payments, net (Note 27)	497,930	37	415,247	28
Issued in relation to the Shareholder Dividend and Share Purchase Plan ⁽¹⁾	29,893,336	1,908	22,254,078	1,374
Outstanding at end of year	1,244,435,686⁽²⁾	\$ 22,054	1,214,044,420 ⁽²⁾	\$ 20,109

- (1) Commencing with the dividend declared on February 28, 2023 and paid on April 26, 2023, the Bank issued to participants of the Shareholder Dividend and Share Purchase Plan (the Plan), common shares from treasury with a discount of 2% to the average market price (as defined in the Plan). Prior to the dividend paid on April 26, 2023, common shares received by participants under the Plan were shares purchased from the open market at prevailing market prices. Further, effective November 1, 2024, and until such time as the Bank elects otherwise, the Bank has suspended the discount to the Average Market Price (as defined in the Plan) for dividend reinvestments and stock dividends under the Plan and will discontinue issuances of common shares from treasury under the Plan. Additionally, effective November 1, 2024, and until such time as the Bank elects otherwise, purchases of common shares under the Plan will be made in the secondary market in accordance with the provisions of the Plan.
- (2) In the normal course of business, the Bank's regulated Dealer subsidiary purchases and sells the Bank's common shares to facilitate trading/institutional client activity. During fiscal 2024, the number of such shares bought was 26,564,849 and sold was 26,566,901 (2023 – 19,133,834 bought and 19,132,702 sold).

Dividend

The dividends paid on common shares in fiscal 2024 and 2023 were \$5,198 million (\$4.24 per share) and \$5,003 million (\$4.18 per share), respectively. The Board of Directors approved a quarterly dividend of \$1.06 per common share at its meeting on December 2, 2024. This quarterly dividend applies to shareholders of record at the close of business on January 7, 2025, and is payable January 29, 2025. Refer to Note 25(c) – Restriction on payment of dividends and retirement of shares.

Normal Course Issuer Bid

The Bank currently does not have an active normal course issuer bid and did not repurchase any common shares during the year ended October 31, 2024.

Non-viability Contingent Capital

The maximum number of common shares issuable on conversion of NVCC subordinated debentures, NVCC subordinated additional tier 1 capital notes, including those issued to Scotiabank LRCN Trust as recourse assets in respect of NVCC limited recourse capital notes, and NVCC preferred shares as at October 31, 2024 would be 4,582 million common shares (2023 – 5,046 million common shares) based on the floor price and excluding the impact of any accrued and unpaid interest and any declared but unpaid dividends (refer to Note 22 – Subordinated debentures and Note 25(b) – Preferred shares and other equity instruments for further details).

(b) Preferred shares and other equity instruments

Preferred shares

Authorized:

An unlimited number of preferred shares without nominal or par value.

Issued and fully paid:

As at October 31 (\$ millions)	2024				2023

(1) Each security is redeemable at the sole discretion of the Bank on the first reset date and every quarter or five years, as applicable, thereafter. Limited Recourse Capital Notes (LRCN) Series 1 and Series 3 are also redeemable in the one month period preceding each reset date. The securities are also redeemable following a regulatory or tax event, as described in the offering documents. All redemptions are subject to regulatory consent and occur at a redemption price of par plus accrued and unpaid interest (unless canceled, where applicable).

(2) Distributions paid from November 1 to October 31 in the relevant fiscal year per face amount of \$1,000 or U.S.\$1,000, as applicable.

(3) The securities rank pari passu to each other and are the Bank's direct unsecured obligations, ranking subordinate to Bank's other subordinated indebtedness.

(4) While interest is payable on the securities when it becomes due, the Bank may, at its sole discretion and with notice, cancel interest payments. Refer to Note 25(c) – Restriction on payment of dividends and retirement of shares.

(5) CME 3-month Term SOFR. In respect of these securities, on June 28, 2023, the Bank announced the interest rate transition from three-month USD LIBOR to three-month Term SOFR, plus a spread adjustment of 26.161 bps, for interest periods commencing on or after July 12, 2023.

(6) The then-prevailing five-year U.S. Treasury Rate.

(7) Interest on LRCN is non-deferrable, however, non-payment of interest that is not cured within five business days results in a Recourse Event. A Recourse Event of the respective Series occurs if (a) there is non-payment in cash by the Bank of the principal amount, together with any accrued and unpaid interest, on the maturity date, (b) there is non-payment in cash of interest which is not cured within 5 business days, (c) there is non-payment in cash of the redemption price in connection with the redemption of the LRCNs, (d) an event of default occurs (i.e. bankruptcy, insolvency, or liquidation of the Bank), or (e) there is an NVCC Trigger Event. Upon the occurrence of a Recourse Event, the noteholder's sole recourse will be limited to their proportionate share of the Series' respective assets held in Scotiabank LRCN Trust, a consolidated entity, which consist initially of the respective AT1 Notes or, following an NVCC Trigger Event, common shares. Refer to Note 25(c) – Restriction on payment of dividends and retirement of shares.

(8) On June 15, 2021, the Bank issued \$1,250 million 3.70% Fixed Rate Resetting Limited Recourse Capital Notes Series 1 (NVCC) ("LRCN Series 1"). In connection with the issuance of LRCN Series 1, the Bank issued \$1,250 million of Fixed Rate Resetting Perpetual Subordinated Additional Tier 1 Capital Notes (NVCC) ("the Series 1 AT1 Notes") to Scotiabank LRCN Trust to be held as trust assets in connection with the LRCN structure.

(9) The then-prevailing five-year Government of Canada yield.

(10) On October 7, 2021, the Bank issued U.S.\$600 million 3.625% Fixed Rate Resetting Limited Recourse Capital Notes Series 2 (NVCC) ("LRCN Series 2"). In connection with the issuance of LRCN Series 2, the Bank issued U.S.\$600 million of Fixed Rate Resetting Perpetual Subordinated Additional Tier 1 Capital Notes (NVCC) ("the Series 2 AT1 Notes") to Scotiabank LRCN Trust to be held as trust assets in connection with the LRCN structure.

(11) On June 16, 2022, the Bank issued \$1,500 million 7.023% Fixed Rate Resetting Limited Recourse Capital Notes Series 3 (NVCC) ("LRCN Series 3"). In connection with the issuance of LRCN Series 3, the Bank issued \$1,500 million of Fixed Rate Resetting Perpetual Subordinated Additional Tier 1 Capital Notes (NVCC) ("the Series 3 AT1 Notes") to Scotiabank LRCN Trust to be held as trust assets in connection with the LRCN structure.

(12) On October 25, 2022, the Bank issued U.S.\$750 million 8.625% Fixed Rate Resetting Limited Recourse Capital Notes Series 4 (NVCC) ("LRCN Series 4"). In connection with the issuance of LRCN Series 4, the Bank issued U.S.\$750 million of Fixed Rate Resetting Perpetual Subordinated Additional Tier 1 Capital Notes (NVCC) ("the Series 4 AT1 Notes") to Scotiabank LRCN Trust to be held as trust assets in connection with the LRCN structure.

(13) On January 12, 2024, the Bank issued U.S.\$750 million 8.000% Fixed Rate Resetting Limited Recourse Capital Notes Series 5 (NVCC) ("LRCN Series 5"). In connection with the issuance of LRCN Series 5, the Bank issued U.S.\$750 million of Fixed Rate Resetting Perpetual Subordinated Additional Tier 1 Capital Notes (NVCC) ("the Series 5 AT1 Notes") to Scotiabank LRCN Trust to be held as trust assets in connection with the LRCN structure.

Contractual NVCC provisions contained in the Bank's Subordinated Additional Tier 1 Capital Notes, including those issued to Scotiabank LRCN Trust as recourse assets in respect of the LRCNs, trigger conversion of these securities into a variable number of common shares if OSFI announces that the Bank has ceased, or is about to cease, to be viable, or if a federal or provincial government in Canada publicly announces that the Bank has accepted or agreed to accept a capital injection, or equivalent support, from the federal government or any provincial government or political subdivision or agent thereof without which the Bank would have been determined by OSFI to be non-viable. If such a conversion were to occur, outstanding Subordinated Additional Tier 1 Capital Notes (NVCC), would be converted into common shares pursuant to an automatic conversion formula defined as 125% of the par value plus accrued and unpaid interest divided by the conversion price. The conversion price is based on the greater of: (i) \$5.00 (subject to adjustments in certain events and converted to U.S. dollar-equivalent, where applicable, each as set out in their respective prospectus supplements), and (ii) the current market price of the Bank's common shares at the time of the trigger event (10-day weighted average and converted to U.S. dollar-equivalent, where applicable). U.S. dollar equivalents of the floor price and the current market price, where applicable, are based on the CAD/USD exchange rate on the day prior to the trigger event.

The notes above have been determined to be compound instruments that have both equity and liability features. At inception, the fair value of the liability component is initially measured with any residual amount assigned to the equity component. On the respective dates of issuance, the Bank has assigned an insignificant value to each liability component of the notes and, as a result, the proceeds received upon issuance of the notes have been presented as equity. The Bank will continue to monitor events that could impact the value of the liability component.

During the year ended October 31, 2024, the Bank paid aggregate distributions on these notes of \$469 million (2023 – \$405 million), net of income taxes of \$93 million (2023 – \$75 million), based on exchange rates in effect on the payment dates, where applicable.

(c) Restrictions on payment of dividends and retirement of shares

Under the Bank Act, the Bank is prohibited from declaring or paying any dividends on its common or preferred shares or redeeming, purchasing or otherwise retiring such shares when the Bank is, or would be placed by such a declaration or retirement, in contravention of the capital adequacy, liquidity or any other regulatory directives issued under the Bank Act.

In the event that applicable cash distributions on any of the Scotiabank Trust Securities are not paid on a regular distribution date, the Bank has undertaken not to pay dividends of any kind on its preferred or common shares until such distributions are made in full or the twelfth month following the non-payment of such distributions. Similarly, should the Bank fail to declare regular dividends on any of its directly issued and outstanding preferred or common shares, cash distributions will also not be made on any of the Scotiabank Trust Securities.

In the event that distributions are not paid in full on the Bank's Subordinated Additional Tier 1 Capital Notes (NVCC), including those issued as recourse assets in respect of LRCNs to Scotiabank LRCN Trust where the trustee has not waived such distributions or no longer holds the respective AT1 Notes, the Bank has undertaken not to declare dividends on its common or preferred shares or redeem, purchase or otherwise retire such shares until the month commencing after such distributions have been made in full.

In the event that dividends to which preferred shareholders are then entitled have not been paid or sufficient funds have not been set aside to do so, the Bank has undertaken not to declare dividends on its common shares or redeem, purchase or otherwise retire its common shares.

Currently, the above limitations do not restrict the payment of dividends on or retirement of preferred or common shares.

26 Capital Management

The primary regulator over the Bank's consolidated capital adequacy is the Office of the Superintendent of Financial Institutions, Canada (OSFI). The capital adequacy regulations in Canada are largely consistent with international standards set by the Basel Committee on Banking Supervision (BCBS). OSFI requires Canadian deposit-taking institutions to fully implement the Basel III reforms and achieve minimums of 7%, 8.5% and 10.5% for CET1, Tier 1 and Total Capital, respectively. OSFI has also designated the Bank as a domestic systemically important bank (D-SIB), increasing its minimum capital ratio requirements by 1% across all tiers of capital, in line with the requirements for global systemically important banks.

In addition, OSFI expects D-SIBs to hold a Domestic Stability Buffer (DSB). In December 2022 OSFI announced that the DSB will increase to 3.0% of total risk-weighted assets (RWA), effective February 1, 2023, and has increased the DSB's range from 0% to 4.0%. In June 2023, OSFI announced that the DSB will increase to 3.5% of total risk-weighted assets (RWA), effective November 1, 2023. In addition, in June 2024, OSFI maintained the DSB at 3.5% of RWA. OSFI's minimum regulatory capital ratio requirements, including the D-SIB 1.0% surcharge and its DSB are: 11.5%, 13.0% and 15.0% for Common Equity Tier 1 (CET1), Tier 1 and Total capital ratios, respectively.

In addition to risk-based capital requirements, the Basel III reforms introduced a simpler, non risk-based Leverage ratio requirement to act as a supplementary measure to its risk-based capital requirements. Institutions are expected to maintain an operating buffer above the 3.5% minimum, including the D-SIB surcharge of 0.5%, effective Q2 2023.

The Bank's regulatory capital ratios were as follows:

As at October 31 (\$ millions)	2024	2023
Capital⁽¹⁾		
Common Equity Tier 1 capital	\$ 60,631	\$ 57,041
Net Tier 1 capital	69,499	65,223
Total regulatory capital	77,708	75,651
Total loss absorbing capacity (TLAC) ⁽²⁾	137,752	134,504
Risk-weighted assets/exposures used in calculation of capital ratios		
Risk-weighted assets ⁽¹⁾	\$ 463,992	\$ 440,017
Leverage exposures ⁽³⁾	1,563,140	1,562,963
Regulatory ratios⁽¹⁾		
Common Equity Tier 1 capital ratio	13.1%	13.0%
Tier 1 capital ratio	15.0%	14.8%
Total capital ratio	16.7%	17.2%
Total loss absorbing capacity ratio ⁽²⁾	29.7%	30.6%
Leverage ratio ⁽³⁾	4.4%	4.2%
Total loss absorbing capacity leverage ratio ⁽²⁾	8.8%	8.6%

(1) 2024 regulatory capital ratios are based on Revised Basel III requirements as determined in accordance with OSFI Guideline – Capital Adequacy Requirements (November 2023). Prior year regulatory capital ratios were prepared in accordance with OSFI Guideline – Capital Adequacy Requirements (February 2023).

(2) This measure has been disclosed in this document in accordance with OSFI Guideline – Total Loss Absorbing Capacity (September 2018).

(3) The leverage ratios are based on Revised Basel III requirements as determined in accordance with OSFI Guideline – Leverage Requirements (February 2023).

The Bank exceeded the OSFI regulatory minimum capital ratios as at October 31, 2024.

27 Share-Based Payments

(a) Stock option plans

The Bank grants stock options as part of the Employee Stock Option Plan as well as stand-alone stock appreciation rights (SARs). Options to purchase common shares and/or to receive an equivalent cash payment, as applicable, may be granted to select employees at an exercise price of the higher of the closing price of the Bank's common shares on the TSX on the trading day prior to the grant date or the volume weighted average trading price for the five trading days immediately preceding the grant date.

Stock options granted since December 2014 vest 50% at the end of the third year and 50% at the end of the fourth year. This change is prospective and does not impact prior period grants. Stock options are exercisable no later than 10 years after the grant date. In the event that the expiry date falls within an insider trading blackout period, the expiry date will be extended for 10 business days after the end of the blackout period. There is a total of 141 million common shares which have been reserved for issuance under the Bank's Employee Stock Option Plan of which 118 million common shares have been issued as a result of the exercise of options and 11 million common shares are committed under outstanding options, leaving 12 million common shares available for issuance as options. Outstanding options expire on dates ranging from December 8, 2024 to December 7, 2033.

The cost of these options is recognized on a graded vesting basis except where the employee is eligible to retire prior to a tranche's vesting date, in which case the cost is recognized between the grant date and the date the employee is eligible to retire.

The Stock Option Plan includes:

- **Stock options**

Employee stock options granted are equity-classified stock options which call for settlement in shares.

The amount recorded in equity – other reserves for vested stock options as at October 31, 2024 was \$124 million (2023 – \$115 million).

In 2024, an expense of \$13 million (2023 – \$14 million) was recorded in salaries and employee benefits in the Consolidated Statement of Income. As at October 31, 2024, future unrecognized compensation cost for non-vested stock options was \$10 million (2023 – \$9 million) which is to be recognized over a weighted-average period of 2.03 years (2023 – 2.06 years).

- **Stock appreciation rights**

Stand-alone SARs are granted instead of stock options to select employees in countries where local laws may restrict the Bank from issuing shares. When a SAR is exercised, the Bank pays the appreciation amount in cash equal to the rise in the market price of the Bank's common shares since the grant date.

During fiscal 2024, 81,414 SARs were granted (2023 – 111,692) and as at October 31, 2024, 570,156 SARs were outstanding (2023 – 609,406), of which 566,349 SARs were vested (2023 – 604,748).

The impact to the Bank's financial statements of vested and outstanding SARs was not material.

Determination of fair values

The share-based payment expense for stock options was quantified using the Black-Scholes option pricing model on the date of grant. The fiscal 2024 and 2023 stock option grants were fair valued using the following weighted-average assumptions and resulting fair value per award:

	2024 Grant	2023 Grant
Assumptions		
Risk-free interest rate %	3.26%	3.33%
Expected dividend yield	4.47%	5.79%
Expected price volatility	19.76%	20.58%
Expected life of option	6.90 Years	6.93 Years
Fair value		
Weighted-average fair value	\$ 7.68	\$ 6.81

The risk-free rate is based on Canadian treasury bond rates interpolated for the maturity equal to the expected life until exercise of the options. Expected dividend yield is based on historical dividend payout. Expected price volatility is determined based on the historical volatility for compensation. For accounting purposes, an average of the market consensus implied volatility for traded options on our common shares and the historical volatility is used.

Details of the Bank's Employee Stock Option Plan are as follows⁽¹⁾:

As at October 31	2024		2023	
	Number of stock options (000's)	Weighted average exercise price	Number of stock options (000's)	Weighted average exercise price
Outstanding at beginning of year	11,558	\$ 72.74	9,907	\$ 73.24
Granted	2,676	59.99	2,478	68.58
Exercised as options	(498)	66.04	(415)	59.07
Exercised as SARs	–	–	(7)	55.63
Forfeited	(600)	70.34	(272)	74.07
Expired	(1,680)	68.84	(133)	72.92
Outstanding at end of year	11,456	\$ 70.75	11,558	\$ 72.74
Exercisable at end of year	4,737	\$ 73.10	5,088	\$ 71.90
Available for grant	11,902		12,480	

As at October 31, 2024	Options Outstanding			Options Exercisable	
	Number of stock options ('000's)	Weighted average remaining contractual life (years)	Weighted average exercise price	Number of stock options ('000's)	Weighted average exercise price
Range of exercise prices					
\$55.63 to \$68.32	2,892	7.62	\$ 60.59	494	\$ 63.49
\$68.33 to \$74.34	6,405	5.63	\$ 70.80	3,520	\$ 72.66
\$74.35 to \$85.46	2,159	5.56	\$ 84.24	723	\$ 81.81
	11,456	6.12	\$ 70.75	4,737	\$ 73.10

(1) Excludes SARs.

(b) Employee share ownership plans

Eligible employees can contribute up to a specified percentage of salary towards the purchase of common shares of the Bank. In general, the Bank matches 50-60% of eligible contributions, depending on the region, up to a maximum dollar amount, which is expensed in salaries and employee benefits. During 2024, the Bank's contributions totalled \$94 million (2023 – \$87 million). Contributions, which are used to purchase common shares in the open market, do not result in a subsequent expense to the Bank from share price appreciation.

As at October 31, 2024, an aggregate of 21 million common shares were held under the employee share ownership plans (2023 – 20 million). The shares in the employee share ownership plans are considered outstanding for computing the Bank's basic and diluted earnings per share.

(c) Other share-based payment plans

Other share-based payment plans use notional units that are valued based on the Bank's common share price on the TSX. Most grants of units accumulate dividend equivalents in the form of additional units based on the dividends paid on the Bank's common shares. These plans are settled in cash and, as a result, are liability-classified. Fluctuations in the Bank's share price change the value of the units, which affects the Bank's share-based payment expense. As described below, the value of the Performance Share Units also varies based on Bank performance. Upon exercise or redemption, payments are made to the employees with a corresponding reduction in the accrued liability.

In 2024, an aggregate expense of \$357 million (2023 – \$320 million) was recorded in salaries and employee benefits in the Consolidated Statement of Income for these plans. This expense includes gains from derivatives used to manage the volatility of share-based payments of \$196 million (2023 – \$131 million losses).

As at October 31, 2024, the share-based payment liability recognized for vested awards under these plans was \$1,010 million (2023 – \$741 million). Details of these other share-based payment plans are as follows:

Deferred Stock Unit Plan (DSU)

Under the DSU Plan, senior executives may elect to receive all or a portion of their cash bonus under the Annual Incentive Plan (which is expensed for the year awarded in salaries and employee benefits in the Consolidated Statement of Income) in the form of deferred stock units which vest immediately. In addition the DSU plan allows for eligible executives of the Bank to participate in grants that are not allocated from the Annual Incentive Plan election. These grants are subject to specific vesting schedules. Units are redeemable in cash only when an executive ceases to be a Bank employee, and must be redeemed by December 31 of the year following that event. As at October 31, 2024, there were 2,732,877 units (2023 – 2,243,413) awarded and outstanding of which 1,893,903 units were vested (2023 – 1,579,420).

Directors' Deferred Stock Unit Plan (DDSU)

Under the DDSU Plan, non-officer directors of the Bank may elect to receive all or a portion of their fee for that fiscal year (which is expensed by the Bank in other expenses in the Consolidated Statement of Income) in the form of deferred stock units which vest immediately. Units are redeemable in cash, only following resignation or retirement, and must be redeemed by December 31 of the year following that event. As at October 31, 2024, there were 420,889 units outstanding (2023 – 336,929).

Restricted Share Unit Plan (RSU)

Under the RSU Plan, select employees receive an award of restricted share units which, for the majority of grants, vest at the end of three years. There are certain grants that provide for a graduated vesting schedule. Upon vesting, all RSU units are paid in cash to the employee. The share-based payment expense is recognized evenly over the vesting period except where the employee is eligible to retire prior to the vesting date in which case, the expense is recognized between the grant date and the date the employee is eligible to retire. As at October 31, 2024, there were 8,478,453 units (2023 – 6,717,498) awarded and outstanding of which 5,665,778 units were vested (2023 – 4,804,239).

Performance Share Unit Plan (PSU)

Eligible executives receive an award of performance share units which, for the majority of grants, vest at the end of three years. Certain grants provide for a graduated vesting schedule which includes a specific performance factor calculation. PSU awards are subject to performance criteria measured over a three-year period whereby a multiplier factor is applied which impacts the incremental number of units due to employees. The three-year performance measures include return on equity compared to target and total shareholder return relative to a comparator group selected prior to the granting of the award. The Bank uses a probability-weighted-average of potential outcomes to estimate the multiplier impact. The share-based payment expense is recognized over the vesting period except where the employee is eligible to retire prior to the vesting date; in which case, the expense is recognized between the grant date and the date the employee is eligible to retire. This expense varies based on changes in the Bank's share price and the Bank's performance compared to the performance measures. Upon vesting, the units are paid in cash to the employee. As at October 31, 2024, there were 6,766,501 units (2023 – 7,382,945) outstanding subject to performance criteria, of which 4,843,892 units were vested (2023 – 6,059,966).

28 Corporate Income Taxes

Corporate income taxes recorded in the Bank's consolidated financial statements for the years ended October 31 are as follows:

(a) Components of income tax provision

For the year ended October 31 (\$ millions)	2024 ⁽¹⁾	2023 ⁽¹⁾
Provision for income taxes in the Consolidated Statement of Income:		
Current income taxes:		
Domestic:		
Federal	\$ 138	\$ 736
Provincial	275	626
Adjustments related to prior periods	(40)	715
Foreign	1,219	1,053
Adjustments related to prior periods	2	(6)
	1,594	3,124
Deferred income taxes:		
Domestic:		
Federal	388	(604)
Provincial	181	(274)
Foreign	(131)	(25)
	438	(903)
Total provision for income taxes in the Consolidated Statement of Income	\$ 2,032	\$ 2,221
Provision for income taxes in the Consolidated Statement of Changes in Equity:		
Current income taxes	\$ 1,019	\$ (168)
Deferred income taxes	41	(331)
	1,060	(499)
Reported in:		
Other Comprehensive Income	1,156	(420)
Retained earnings	(96)	(79)
Other reserves	—	—
Total provision for income taxes in the Consolidated Statement of Changes in Equity	1,060	(499)
Total provision for income taxes	\$ 3,092	\$ 1,722
Provision for income taxes in the Consolidated Statement of Income includes:		
Deferred tax expense (benefit) relating to origination/reversal of temporary differences	\$ 438	\$ (833)
Deferred tax expense (benefit) of tax rate changes	—	(70)
	\$ 438	\$ (903)

(1) The Bank adopted IFRS 17 effective November 1, 2023. As required under the new accounting standard, prior period amounts have been restated. Refer to Note 4 of the consolidated financial statements.

(b) Reconciliation to statutory rate

Income taxes in the Consolidated Statement of Income vary from the amounts that would be computed by applying the composite federal and provincial statutory income tax rate for the following reasons:

For the year ended October 31 (\$ millions)	2024 ⁽¹⁾		2023 ⁽¹⁾	
	Amount	Percent of pre-tax income	Amount	Percent of pre-tax income
Income taxes at Canadian statutory rate	\$ 2,755	27.8%	\$ 2,682	27.7%
Increase (decrease) in income taxes resulting from:				
Lower average tax rate applicable to subsidiaries and foreign branches	(746)	(7.5)	(692)	(7.1)
Tax-exempt income from securities	(28)	(0.3)	(341)	(3.5)
Other, net ⁽²⁾	51	0.5	572	5.9
Total income taxes and effective tax rate	\$ 2,032	20.5%	\$ 2,221	23.0%

(1) The Bank adopted IFRS 17 effective November 1, 2023. As required under the new accounting standard, prior period amounts have been restated. Refer to Note 4 of the consolidated financial statements.

(2) Fiscal 2023 includes \$579 tax expense for the CRD and \$48 tax benefit from the non-taxable gain related to the divestiture of the equity interest in CTFs.

(c) Deferred taxes

Significant components of the Bank's deferred tax assets and liabilities are as follows:

October 31 (\$ millions)	Statement of Income		Statement of Financial Position	
	For the year ended ⁽¹⁾		As at ⁽¹⁾	
	2024	2023	2024	2023
Deferred tax assets:				
Loss carryforwards	\$ 29	\$ (201)	\$ 930	\$ 1,281
Allowance for credit losses	54	(172)	1,076	1,155
Deferred compensation	(100)	(77)	317	274
Deferred income	(137)	(100)	255	138
Property and equipment	(10)	(19)	262	339
Pension and other post-retirement benefits	(48)	(48)	387	321
Securities	(17)	(15)	260	386
Lease liabilities	28	(1)	891	936
Own credit risk	–	–	250	31
Other	(57)	(177)	673	542
Total deferred tax assets	\$ (258)	\$ (810)	\$ 5,301	\$ 5,403
Deferred tax liabilities:				
Cash flow hedges	\$ –	\$ –	\$ 57	\$ 127
Deferred compensation	(24)	(19)	187	180
Deferred income	(20)	(23)	50	36
Property and equipment	(243)	174	684	569
Pension and other post-retirement benefits	1	1	82	120
Securities	(14)	(152)	354	385
Investment in subsidiaries and associates	52	43	29	67
Intangible assets	(344)	160	1,809	1,454
Other	(104)	(91)	504	370
Total deferred tax liabilities	\$ (696)	\$ 93	\$ 3,756	\$ 3,308
Net deferred tax assets (liabilities) ⁽²⁾	\$ 438	\$ (903)	\$ 1,545	\$ 2,095

(1) The Bank adopted IFRS 17 effective November 1, 2023. As required under the new accounting standard, prior period amounts have been restated. Refer to Note 4 of the consolidated financial statements.

(2) For Consolidated Statement of Financial Position presentation, deferred tax assets and liabilities are assessed by legal entity. As a result, the net deferred tax assets of \$1,545 (2023 – \$2,095) are represented by deferred tax assets of \$2,942 (2023 – \$3,541), and deferred tax liabilities of \$1,397 (2023 – \$1,446) on the Consolidated Statement of Financial Position.

The major changes to net deferred taxes were as follows:

For the year ended October 31 (\$ millions)	2024	2023
Balance at beginning of year	\$ 2,095	\$ 803
Deferred tax benefit (expense) for the year recorded in income	(438)	903
Deferred tax benefit (expense) for the year recorded in equity	(41)	331
Disposed in divestitures	–	–
Other	(71)	58
Balance at end of year	\$ 1,545	\$ 2,095

The tax related to temporary differences, unused tax losses and unused tax credits for which no deferred tax asset is recognized in the Consolidated Statement of Financial Position amounts to \$18 million (October 31, 2023 – \$10 million). The amount related to unrecognized losses is \$18 million, which will expire as follows: \$3 million between 2024 and 2033 and \$15 million has no expiry.

Included in the net deferred tax asset are tax benefits of \$73 million (2023 – \$2,563 million) that have been recognized in the Canadian bank and certain Canadian and foreign subsidiaries that have incurred losses in either the current or the preceding year. In determining if it is appropriate to recognize these tax benefits, the Bank relied on projections of future taxable profits which are expected to generate sufficient taxable income to utilize the deferred tax assets.

The amount of taxable temporary differences associated with investments in subsidiaries, associates and interests in joint ventures for which deferred tax liabilities have not been recognized at October 31, 2024 is approximately \$57 billion (2023 – \$50 billion).

Tax Assessments

The Bank received reassessments totaling \$1,634 million of tax and interest as a result of the Canada Revenue Agency (CRA) denying the tax deductibility of certain Canadian dividends received during the 2011-2019 taxation years. The dividends subject to these reassessments are similar to those prospectively addressed by tax rules introduced in 2015 and 2018. The Bank has filed Notices of Appeal with the Tax Court of Canada against the federal reassessment in respect of its 2011 and 2012 taxation years. In addition, a subsidiary of the Bank received reassessments on the same matter in respect of its 2018 and 2019 taxation years totaling \$3 million of tax and interest.

A subsidiary of the Bank received withholding tax assessments from the CRA in respect of certain of its securities lending transactions for its 2014-2019 taxation years totaling \$637 million of tax, penalties and interest. The subsidiary has filed a Notice of Appeal with the Tax Court of Canada against the federal assessment in respect of its 2014-2018 taxation years and intends to file a Notice of Objection in respect of its 2019 taxation year assessment.

In respect of both matters, the Bank is confident that its tax filing position was appropriate and in accordance with the relevant provisions of the Income Tax Act (Canada) and intends to vigorously defend its position.

Canada Recovery Dividend

In prior year, the Bank recognized an additional income tax expense of \$579 million reflecting the present value of the amount payable for the Canada Recovery Dividend (CRD). The CRD is a Canadian federal tax measure which requires the Bank to pay a one-time tax of 15% on taxable income in excess of \$1 billion, based on the average taxable income for the 2020 and 2021 taxation years.

Canadian Federal Tax Measures

On August 12, 2024, the Department of Finance released draft legislation on the proposed increase to the capital gains inclusion rate from 50% to 66.7% for gains or losses realized after June 24, 2024.

A Notice of Ways and Means Motion was tabled on September 23, 2024 to implement the draft legislation for the increased capital gains inclusion rate. This legislation is expected to be enacted in a future bill and its impact is not material to the Bank.

Global Minimum Tax

The Organisation for Economic Co-operation and Development (OECD) published Pillar Two model rules in December 2021 as part of its efforts toward international tax reform. The rules aim to have large multinational enterprises, with consolidated revenues in excess of €750 million, pay a minimum effective tax of 15% in each jurisdiction they operate. OECD member countries are in the process of developing domestic tax legislation to implement the rules. In June 2024, Canada enacted the Global Minimum Tax (GMT) Act as part of Bill C-69. During the year, certain countries have also enacted their local GMT legislation to introduce a domestic minimum top-up tax. These laws will apply to the Bank from fiscal year 2025 onwards.

The IASB previously issued amendments to IAS 12 Income Taxes for a temporary mandatory exception from the recognition and disclosure of deferred taxes related to the implementation of Pillar Two GMT rules, which the Bank has applied.

The Bank has performed an assessment of its potential GMT impact and continues to monitor relevant legislation and available guidance when released across various jurisdictions. GMT is expected to apply to earnings from jurisdictions including Bahamas, Barbados, Cayman Islands and Ireland. Based on the Bank's preliminary assessment, the Bank expects an increase in its effective tax rate by approximately 1% for the year ending October 31, 2025.

29 Employee Benefits

The Bank sponsors a number of employee benefit plans, including pensions (defined benefit and defined contribution) and other benefit plans (post-retirement benefits and other long-term employee benefits) for most of its employees globally. The information presented below relates to the Bank's principal plans; other plans operated by certain subsidiaries of the Bank are not considered material and are not included in these disclosures.

Global pension plans

The principal pension plans include plans in Canada, U.S., Mexico, UK, Ireland, Jamaica, Trinidad & Tobago and other countries in the Caribbean in which the Bank operates. The Bank has a strong and well-defined governance structure to manage these global obligations. The investment policy for each principal plan is reviewed periodically and all plans are in good standing with respect to legislation and local regulations.

Actuarial valuations for funding purposes for the Bank's funded pension plans are conducted as required by applicable legislation. The purpose of the actuarial valuation is to determine the funded status of the plans on a going-concern and statutory basis and to determine the required contributions. The plans are funded in accordance with applicable pension legislation and the Bank's funding policies such that future benefit promises based on plan provisions are well secured. The assumptions used for the funding valuations are set by independent plan actuaries on the basis of the requirements of the local actuarial standards of practice and statutes.

Scotiabank Pension Plan (Canada)

The most significant pension plan is the Scotiabank Pension Plan (SPP) in Canada, which includes a closed defined benefit (DB) component. Employees hired in Canada on or after May 1, 2018, participate in a defined contribution (DC) component only. As the administrator of the SPP, the Bank has established a well-defined governance structure and policies to maintain compliance with legislative and regulatory requirements under OSFI and the Canada Revenue Agency. The Bank appoints a number of committees to oversee and make decisions related to the administration of the SPP. Certain committees are also responsible for the investment of the assets of the SPP Fund and for monitoring the investment managers and performance.

- The Human Capital and Compensation Committee (HCOB) of the Board approves the charter of the Pension Administration and Investment Committee (PAIC), reviews reports, and approves the investment policy. The HCOB also reviews and recommends any amendments to the SPP to the Board of Directors.
- PAIC is responsible for recommending the investment policy to the HCOB, for appointing and monitoring investment managers, and for reviewing auditor and actuary reports. PAIC also monitors the administration of member pension benefits.
- The Scotiabank Master Trust Committee (MTC) invests assets in accordance with the investment policy and all applicable legislation. The MTC assigns specific mandates to investment managers.
- The Capital Accumulation Plans (CAP) Committee is responsible for the administration and investment of the DC component of the SPP including the selection and monitoring of investment options available to DC participants.

Actuarial valuations for funding purposes for the SPP are conducted on an annual basis. The most recent funding valuation was conducted as of November 1, 2023. Contributions are being made to the SPP in accordance with this valuation and are shown in the table in b) below. The assumptions used for the funding valuation are set by independent plan actuaries on the basis of the requirements of the Canadian Institute of Actuaries and applicable regulation.

Other benefit plans

The principal other benefit plans include plans in Canada, U.S., Mexico, Uruguay, UK, Jamaica, Trinidad & Tobago, Colombia and other countries in the Caribbean in which the Bank operates. The most significant other benefit plans provided by the Bank are in Canada.

Key assumptions

The financial information reported below in respect of pension and other benefit plans is based on a number of assumptions. The most significant assumption is the discount rate used to determine the defined benefit obligation, which is set by reference to the yields on high quality corporate bonds that have durations that match the terms of the Bank's obligations. Separate discount rates are used to determine the annual benefit expense in Canada and the U.S. These rates are determined with reference to the yields on high quality corporate bonds with durations that match the various components of the annual benefit expense. The discount rate used to determine the annual benefit expense for all other plans continues to be the same as the rate used to determine the defined benefit obligation. Other assumptions set by management are determined in reference to market conditions, plan-level experience, best practices and future expectations. The key weighted-average assumptions used by the Bank for the measurement of the benefit obligation and benefit expense for all of the Bank's principal plans are summarized in the table in f) below.

Risk management

The Bank's defined benefit pension plans and other benefit plans expose the Bank to a number of risks. Some of the more significant risks include interest rate risk, investment risk, longevity risk and health care cost increases, among others. These risks could result in higher defined benefit expense and a higher defined benefit obligation to the extent that:

- there is a decline in discount rates; and/or
- plan assets returns are less than expected; and/or
- plan members live longer than expected; and/or
- health care costs are higher than assumed.

In addition to the governance structure and policies in place, the Bank manages risks by regularly monitoring market developments and asset investment performance. The Bank also monitors regulatory and legislative changes along with demographic trends and revisits the investment strategy and/or plan design as warranted.

a) Relative size of plan obligations and assets

	Pension plans			Other benefit plans	
	Canada				
	SPP	Other	International	Canada	International
For the year ended October 31, 2024					
Percentage of total benefit obligations	72%	15%	13%	50%	50%
Percentage of total plan assets	74%	11%	15%	–%	100%
Percentage of total benefit expense ⁽¹⁾	73%	27%	–%	46%	54%
	Pension plans			Other benefit plans	
	Canada				
	SPP	Other	International	Canada	International
For the year ended October 31, 2023					
Percentage of total benefit obligations	71%	15%	14%	48%	52%
Percentage of total plan assets	73%	11%	16%	–%	100%
Percentage of total benefit expense ⁽¹⁾	71%	26%	3%	42%	58%

(1) Excludes non-routine benefit expense items such as past service costs, curtailment charges and settlement charges.

b) Cash contributions and payments

The table below shows the cash contributions and payments made by the Bank to its principal plans in 2024, and the prior year.

Contributions to the principal plans for the year ended October 31 (\$ millions)	2024	2023
Defined benefit pension plans (cash contributions to fund the plans, including paying beneficiaries under the unfunded pension arrangements)		
SPP (excluding DC provision)	\$ 69	\$ 15
All other plans	47	103
Other benefit plans (cash contributions mainly in the form of benefit payments to beneficiaries)	62	64
Defined contribution pension and other benefit plans (cash contributions)	184	159
DC pension contributions funded from pension plan surplus	(54)	(59)
Total contributions ⁽¹⁾	\$ 308	\$ 282

(1) Based on preliminary estimates, the Bank expects to make contributions of \$137 to the SPP (excluding the DC provision), \$63 to all other defined benefit pension plans, \$67 to other benefit plans and \$194 to all defined contribution plans for the year ending October 31, 2025.

c) Funded and unfunded plans

The excess (deficit) of the fair value of assets over the benefit obligation at the end of the year includes the following amounts for plans that are wholly unfunded and plans that are wholly or partly funded.

As at October 31 (\$ millions)	Pension plans		Other benefit plans	
	2024	2023	2024	2023
Benefit obligation				
Benefit obligation of plans that are wholly unfunded	\$ 362	\$ 339	\$ 930	\$ 873
Benefit obligation of plans that are wholly or partly funded	8,529	7,330	217	241
Funded status				
Benefit obligation of plans that are wholly or partly funded	\$ 8,529	\$ 7,330	\$ 217	\$ 241
Fair value of assets	9,260	8,139	84	113
Excess (deficit) of fair value of assets over benefit obligation of wholly or partly funded plans	\$ 731	\$ 809	\$ (133)	\$ (128)
Benefit obligation of plans that are wholly unfunded	362	339	930	873
Excess (deficit) of fair value of assets over total benefit obligation	\$ 369	\$ 470	\$ (1,063)	\$ (1,001)
Effect of asset limitation and minimum funding requirement	(208)	(55)	–	–
Net asset (liability) at end of year	\$ 161	\$ 415	\$ (1,063)	\$ (1,001)

d) Financial information

The following tables present financial information related to the Bank's principal plans.

For the year ended October 31 (\$ millions)	Pension plans		Other benefit plans	
	2024	2023	2024	2023
Change in benefit obligation

Life expectancy at 65, for future pensioners currently aged 45 – female	24.8	24.8	24.8	24.8

(1) The weighted-average rates of increase in future compensation shown for other benefit plans do not include Canadian flexible post-retirement benefits plans established in fiscal 2005, as they are not impacted by future compensation increases.

g) Sensitivity analysis

The sensitivity analysis represents the impact of a change in a single assumption with other assumptions left unchanged. For purposes of the sensitivity analysis, the present value of the defined benefit obligation has been calculated using the projected unit credit method at the end of the reporting period, which is the same as that applied in calculating the defined benefit obligation recognized in the statement of financial position.

For the year ended October 31, 2024 (\$ millions)	Pension plans		Other benefit plans	
	Benefit obligation	Benefit expense	Benefit obligation	Benefit expense
Impact of the following changes:				
1% decrease in discount rate	\$ 1,360	\$ 98	\$ 132	\$ 6
0.25% increase in rate of increase in future compensation	72	3	–	–
1% increase in health care cost trend rate	n/a	n/a	99	12
1% decrease in health care cost trend rate	n/a	n/a	(82)	(10)
1 year increase in Canadian life expectancy	156	9	17	1
1 year increase in Mexican life expectancy	2	–	3	–
1 year increase in the United States life expectancy	2	–	3	–

h) Assets

The Bank's principal pension plans' assets are generally invested with the long-term objective of maximizing overall expected returns, at an acceptable level of risk relative to the benefit obligation. A key factor in managing long-term investment risk is asset mix. Investing the pension assets across different asset classes and geographic regions helps to mitigate risk and to minimize the impact of declines in any single asset class, particular region or type of investment. Investment managers – including related-party managers – are typically hired and assigned specific mandates within each asset class.

Pension plan asset mix guidelines are set for the long term and are documented in each plan's investment policy. Asset mix policy typically also reflects the nature of the plan's benefit obligations. Legislation places certain restrictions on asset mix – for example, there are usually limits on concentration in any one investment. Other concentration and quality limits are also set forth in the investment policies. Derivatives cannot be used without specific authorization; currently, the main uses of derivatives are for duration management and currency hedging. Asset mix guidelines are reviewed at least once each year, and adjusted, where appropriate, based on market conditions and opportunities. However, large asset class shifts are not common, and typically reflect a change in the pension plan's situation (e.g. plan amendments) and/or in the investment strategy. Actual asset mix is reviewed regularly and rebalancing back to target asset mix is considered – as needed – generally on a semi-annual basis. The Bank's other benefit plans are generally not funded, with the exception of certain programs in Mexico.

The tables below show the weighted-average actual and target asset allocations for the Bank's principal plans at October 31, by asset category.

Asset category %	Pension plans		Other benefit plans

30 Operating Segments

Scotiabank is a diversified financial services institution that provides a wide range of financial products and services to retail, commercial and corporate customers around the world. The Bank's businesses are grouped into four business lines: Canadian Banking, International Banking, Global Banking and Markets and Global Wealth Management. Other smaller business segments are included in the Other segment. The results of these business segments are based upon the internal financial reporting systems of the Bank. The accounting policies used in these segments are generally consistent with those followed in the preparation of the consolidated financial statements as disclosed in Note 3. Notable accounting measurement differences are:

- tax normalization adjustments related to the gross-up of income from associated corporations. This adjustment normalizes the effective tax rate in the divisions to better present the contribution of the associated companies to the divisional results.
- the grossing up of tax-exempt net interest income and non-interest income to an equivalent before-tax basis for those affected segments.

These differences in measurement enable comparison of net interest income and non-interest income arising from taxable and tax-exempt sources.

Scotiabank's results, and average assets and liabilities, allocated by these operating segments, are as follows:

For the year ended October 31, 2024

Taxable equivalent basis (\$ millions)	Canadian Banking ⁽¹⁾⁽²⁾	International Banking ⁽¹⁾⁽²⁾	Global Wealth Management ⁽¹⁾	Global Banking and Markets ⁽¹⁾	Other ⁽¹⁾⁽³⁾	Total ⁽²⁾
Net interest income ⁽⁴⁾	\$ 10,842	\$ 8,889	\$ 936	\$ 1,441	\$ (2,856)	\$ 19,252
Non-interest income ⁽⁵⁾⁽⁶⁾	2,848	3,100	4,826	3,972	(328)	14,418
Total revenues	13,690	11,989	5,762	5,413	(3,184)	33,670
Provision for credit losses	1,691	2,285	27	47	1	4,051
Depreciation and amortization ⁽⁷⁾	568	568	187	258	179	1,760
Other non-interest expenses	5,550	5,563	3,423	2,941	458	17,935
Income tax expense	1,607	734	539	479	(1,327)	2,032
Net income	\$ 4,274	\$ 2,839	\$ 1,586	\$ 1,688	\$ (2,495)	\$ 7,892
Net income attributable to non-controlling interests in subsidiaries	–	125	10	–	(1)	134
Net income attributable to equity holders of the Bank	\$ 4,274	\$ 2,714	\$ 1,576	\$ 1,688	\$ (2,494)	\$ 7,758
Average assets (\$ billions)	449	232	35	495	208	1,419
Average liabilities (\$ billions)	389	180	40	475	254	1,338

(1) Business line revenues and provision for income taxes are reported on a taxable equivalent basis, with the offset in the Other segment. Effective January 1, 2024, the Bank no longer claims the dividend received deduction on Canadian shares that are mark-to-market property, which has resulted in a lower TEB gross-up for fiscal 2024.

(2) The Bank adopted IFRS 17 effective November 1, 2023. As required under the new accounting standard, prior period amounts have been restated. Refer to Note 4 of the consolidated financial statements.

(3) Includes all other smaller operating segments and corporate adjustments, such as the elimination of the tax-exempt income gross-up reported in net interest income and non-interest income and provision for income taxes for the year ended October 31, 2024 amounting to \$55 to arrive at the amounts reported in the Consolidated Statement of Income, differences in the actual amount of costs incurred and charged to the operating segments.

(4) Interest income is reported net of interest expense as management relies primarily on net interest income as a performance measure.

(5) Card revenues and Banking services fees are mainly earned in Canadian and International Banking. Mutual fund, Brokerage fees and Investment management and trust fees are primarily earned in Global Wealth Management. Underwriting and other advisory fees are predominantly earned in Global Banking and Markets.

(6) Includes net income (on a taxable equivalent basis) from investments in associated corporations for Canadian Banking – \$(9); International Banking – \$248; Global Wealth Management – \$18; and Other – \$(59).

(7) Includes impairment charge on software intangible assets in the Other segment.

For the year ended October 31, 2023

Taxable equivalent basis (\$ millions)	Canadian Banking ⁽¹⁾⁽²⁾	International Banking ⁽¹⁾⁽²⁾	Global Wealth Management ⁽¹⁾	Global Banking and Markets ⁽¹⁾	Other ⁽¹⁾⁽³⁾	Total ⁽²⁾

(2) Includes net income from investments in associated corporations for Canada – \$(115), Peru – \$3, Chile – \$10, Colombia – \$(2), Caribbean and Central America – \$117, and Other International – \$140.

(3) Revenues are attributed to countries based on where services are performed or assets are recorded.

31 Related Party Transactions

Compensation of key management personnel of the Bank

Key management personnel are those persons having authority and responsibility for planning, directing and controlling the activities of the Bank, directly or indirectly, and comprise the directors of the Bank, the President and Chief Executive Officer, certain direct reports of the President and Chief Executive Officer and Group Heads.

For the year ended October 31 (\$ millions)	2024	2023
Salaries and cash incentives ⁽¹⁾	\$ 25	\$ 23
Equity-based payment ⁽²⁾	29	32
Pension and other benefits ⁽¹⁾	2	2
Total	\$ 56	\$ 57

(1) Expensed during the year.

(2) Awarded during the year.

Directors can use some or all of their director fees earned to buy common shares of the Bank at market rates through the Director's Share Purchase Plan. Non-officer directors may elect to receive all or a portion of their fees in the form of deferred stock units which vest immediately. Refer to Note 27 for further details of these plans.

Loans and deposits of key management personnel

As at October 31 (\$ millions)	2024	2023
Loans	\$ 10	\$ 13
Deposits	5	6

The Bank's committed credit exposure to companies controlled by directors totaled \$267 million as at October 31, 2024 (October 31, 2023 – \$266 million), while actual utilized amounts were \$199 million (October 31, 2023 – \$165 million).

Transactions with associates and joint ventures

In the ordinary course of business, the Bank provides normal banking services and enters into transactions with its associated and other related corporations on terms similar to those offered to non-related parties. If these transactions are eliminated on consolidation, they are not disclosed as related party transactions. Transactions between the Bank and its associated companies and joint ventures also qualify as related party transactions and were recorded as follows:

As at and for the year ended October 31 (\$ millions)	2024	2023
Net income / (loss)	\$ (15)	\$ (22)
Loans	209	209
Deposits	253	277
Guarantees and commitments	46	55

Scotiabank principal pension plan

The Bank manages assets of \$6.0 billion (October 31, 2023 – \$5.2 billion) which is a portion of the Scotiabank principal pension plan assets and earned \$6.7 million (October 31, 2023 – \$6.9 million) in fees.

32 Principal Subsidiaries and Non-Controlling Interests in Subsidiaries

(a) Principal subsidiaries⁽¹⁾

The following table presents certain operating subsidiaries the Bank owns, directly or indirectly. All of these subsidiaries are included in the Bank's consolidated financial statements.

Grupo BNS de Costa Rica, S.A.	San Jose, Costa Rica		
Scotiabank (Ireland) Designated Activity Company	Dublin, Ireland		

(1) The Bank (or immediate parent of an entity) owns 100% of the outstanding voting shares of each subsidiary unless otherwise noted.

(2) The Bank adopted IFRS 17 effective November 1, 2023. As required under the new accounting standard, prior period amounts have been restated. Refer to Note 4.

(3) Effective July 1, 2023, Scotia Holdings (U.S.) Inc. converted to a Limited Liability Company and changed its name to Scotia Holdings (USA) LLC.

(4) The Bank made a capital contribution to Scotiabank Colpatría S.A. in July 2023 which increased its ownership interest to 55.98% following the subsequent issuance of additional shares.

Subsidiaries may have a different reporting date from that of the Bank of October 31. Dates may differ for a variety of reasons including local reporting requirements or tax laws. In accordance with the Bank's accounting policies, for the purpose of inclusion in the consolidated financial statements of the Bank, adjustments are made where significant for subsidiaries with different reporting dates.

(b) Non-controlling interests in subsidiaries

The Bank's significant non-controlling interests in subsidiaries are comprised of the following entities:

	As at and for the year ended				
	2024 ⁽¹⁾			2023 ⁽¹⁾	
	Non-controlling interest %	Non-controlling interests in subsidiaries	Dividends paid to non-controlling interest	Non-controlling interests in subsidiaries	Dividends paid to non-controlling interest
Scotiabank Chile S.A.	0.21% – 49.10%	\$ 256	\$ 24	\$ 248	\$ 17
Scotiabank Colpatría S.A. ⁽²⁾⁽³⁾	44.02%	405	–	483	–
Scotia Group Jamaica Limited	28.22%	350	13	326	11
Scotiabank Trinidad and Tobago Limited	49.10%	464	49	449	53
Other	0.0005% – 49.35% ⁽⁴⁾	232	2	223	20
Total		\$ 1,707	\$ 88	\$ 1,729	\$ 101

(1) The Bank adopted IFRS 17 effective November 1, 2023. As required under the new accounting standard, prior period amounts have been restated. Refer to Note 4 of the consolidated financial statements.

(2) Non-controlling interest holders for Scotiabank Colpatría S.A. have a right to sell their holding to the Bank after the end of the 7th anniversary (January 17, 2019) and at subsequent pre-agreed intervals, into the future, at fair market value that can be settled at the Bank's discretion, by issuance of common shares or cash.

(3) The Bank made a capital contribution to Scotiabank Colpatría S.A. in July 2023 which increased its ownership interest to 55.98% following the subsequent issuance of additional shares.

(4) Range of non-controlling interest % for other subsidiaries.

Summarized financial information of the Bank's subsidiaries with significant non-controlling interests are as follows:

(\$ millions)	As at and for the year ended October 31, 2024				As at and for the year ended October 31, 2023			
	Revenue	Total comprehensive income (loss)	Total assets	Total liabilities	Revenue	Total comprehensive income (loss)	Total assets	Total liabilities
Total	\$ 4,455	\$ 226	\$ 93,051	\$ 82,223	\$ 4,176	\$ 1,901	\$ 102,652	\$ 91,928

33 Interest Income and Expense

For the year ended October 31 (\$ millions)

	2024 ⁽¹⁾		2023 ⁽¹⁾	
	Interest income	Interest expense	Interest income	Interest expense
Measured at amortized cost ⁽²⁾	\$ 53,966	\$ 42,177	\$ 51,013	\$ 38,348
Measured at FVOCI ⁽²⁾	5,905	–	3,811	–
	59,871	42,177	54,824	38,348
Other	1,788 ⁽³⁾	230 ⁽⁴⁾	2,000 ⁽³⁾	214 ⁽⁴⁾
Total	\$ 61,659	\$ 42,407	\$ 56,824	\$ 38,562

(1) The Bank adopted IFRS 17 effective November 1, 2023. As required under the new accounting standard, prior period amounts have been restated. Refer to Note 4.

(2) The interest income/expense on financial assets/liabilities are calculated using the effective interest method.

(3) Includes dividend income on equity securities.

(4) Includes interest on lease liabilities of \$119 (2023 – \$114) and insurance finance expense of \$30 (2023 – \$25).

34 Earnings Per Share

For the year ended October 31 (\$ millions)

	2024 ⁽¹⁾	2023 ⁽¹⁾
Basic earnings per common share		
Net income attributable to common shareholders	\$ 7,286	\$ 6,919
Weighted average number of common shares outstanding (millions)	1,226	1,197
Basic earnings per common share ⁽²⁾ (in dollars)	\$ 5.94	\$ 5.78
Diluted earnings per common share		
Net income attributable to common shareholders	\$ 7,286	\$ 6,919
Dilutive impact of share-based payment options and others ⁽³⁾	(49)	(36)
Net income attributable to common shareholders (diluted)	\$ 7,237	\$ 6,883
Weighted average number of common shares outstanding (millions)	1,226	1,197
Dilutive impact of share-based payment options and others ⁽³⁾ (millions)	6	7
Weighted average number of diluted common shares outstanding (millions)	1,232	1,204
Diluted earnings per common share ⁽²⁾ (in dollars)	\$ 5.87	\$ 5.72

(1) The Bank adopted IFRS 17 effective November 1, 2023. As required under the new accounting standard, prior period amounts have been restated. Refer to Note 4.

(2) Earnings per share calculations are based on full dollar and share amounts.

(3) Certain options as well as acquisition-related put/call options that the Bank may settle at its own discretion by issuing common shares were not included in the calculation of diluted earnings per share as they were anti-dilutive.

35 Guarantees, Commitments and Pledged Assets

(a) Guarantees

The Bank enters into various types of guarantees and indemnifications in the normal course of business. Guarantees represent an undertaking to another party to make a payment to that party when certain specified events occur. The various guarantees and indemnifications that the Bank provides with respect to its customers and other third parties are presented below:

	2024	2023
	Maximum potential amount of future payments ⁽¹⁾	Maximum potential amount of future payments ⁽¹⁾
As at October 31 (\$ millions)		
Standby letters of credit and letters of guarantee	\$ 62,966	\$ 48,417
Liquidity facilities	7,665	7,060
Indemnifications	791	940

(1) The maximum potential amount of future payments represents those guarantees that can be quantified and excludes other guarantees that cannot be quantified. As many of these guarantees will not be drawn upon and the maximum potential amount of future payments listed above does not consider the possibility of recovery under recourse or collateral provisions, the above amounts are not indicative of future cash requirements, credit risk, or the Bank's expected losses from these arrangements.

(i) Standby letters of credit and letters of guarantee

Standby letters of credit and letters of guarantee are irrevocable undertakings by the Bank on behalf of a customer, to make payments to a third party in the event that the customer is unable to meet its obligations to the third party. Generally, the term of these guarantees does not exceed four years. The types and amounts of collateral security held by the Bank for these guarantees is generally the same as for loans.

(ii) Liquidity facilities

The Bank's backstop liquidity facilities are committed liquidity and provided to asset-backed commercial paper conduits, administered by the Bank. These facilities generally provide an alternative source of financing in the event market disruption prevents the conduit from issuing commercial paper or, in some cases, when certain specified conditions or performance measures are not met. These facilities generally have a term of up to three years.

(iii) Indemnifications

In the ordinary course of business, the Bank enters into many contracts which contain indemnification provisions, such as purchase contracts, service agreements, trademark licensing agreements, director / officer contracts, escrow arrangements, sales of assets or businesses, outsourcing agreements, leasing arrangements, clearing system arrangements, securities lending agency agreements and structured transactions. The Bank cannot estimate the maximum potential future amount that may be payable. The Bank has not made any significant payments under such indemnifications.

(b) Other indirect commitments

In the normal course of business, various other indirect commitments are outstanding which are not reflected on the Consolidated Statement of Financial Position. These may include:

- Commercial letters of credit which require the Bank to honour drafts presented by a third-party when specific activities are completed;
- Commitments to extend credit which represent undertakings to make credit available in the form of loans or other financings for specific amounts and maturities, subject to specific conditions;
- Securities lending transactions under which the Bank, acting as principal or agent, agrees to lend securities to a borrower. The borrower must fully collateralize the security loan at all times. The market value of the collateral is monitored relative to the amounts due under the agreements, and where necessary, additional collateral is obtained; and
- Security purchase commitments which require the Bank to fund future investments.

These financial instruments are subject to normal credit standards, financial controls and monitoring procedures.

The table below provides a detailed breakdown of the Bank's other indirect commitments expressed in terms of the contractual amounts of the related commitment or contract which are not reflected on the Consolidated Statement of Financial Position.

As at October 31 (\$ millions)	2024	2023
Commercial letters of credit	\$ 1,049	\$ 695
Commitments to extend credit ⁽¹⁾		
Original term to maturity of one year or less	30,304	61,338
Original term to maturity of more than one year	242,489	222,705
Securities lending	58,477	56,174
Securities purchase and other commitments	844	736
Total	\$ 333,163	\$ 341,648

(1) Includes liquidity facilities, and excludes commitments which are unconditionally cancellable at the Bank's discretion at any time.

(c) Assets pledged and repurchase agreements

In the ordinary course of business, securities and other assets are pledged against liabilities. As well, securities are sold under repurchase agreements. The carrying value of pledged assets and details of related activities are shown below.

As at October 31 (\$ millions)	2024	2023
Assets pledged to:		
Bank of Canada ⁽¹⁾	\$ 229	\$ 133
Foreign governments and central banks ⁽¹⁾	2,020	763
Clearing systems, payment systems and depositories ⁽¹⁾	2,460	1,810
Assets pledged in relation to exchange-traded derivative transactions	5,334	8,403
Assets pledged in relation to over-the-counter derivative transactions	25,487	26,871
Assets pledged as collateral related to securities borrowing and lending	149,669	150,698
Assets pledged in relation to covered bond program (Note 16) ⁽²⁾	47,560	51,538
Assets pledged in relation to other securitization programs (Note 16)	4,022	3,169
Assets pledged under CMHC programs (Note 15)	18,392	22,108
Other	228	521
Total assets pledged	\$ 255,401	\$ 266,014
Obligations related to securities sold under repurchase agreements	174,335	140,296
Total ⁽³⁾	\$ 429,736	\$ 406,310

(1) Includes assets pledged in order to participate in clearing and payment systems and depositories, or pledged to have access to the facilities of central banks in foreign jurisdictions.

(2) Excludes mortgages related to covered bonds held by the Bank or used for securities lending transactions.

(3) Includes assets that have been received from counterparties through normal course of business in securities financing and derivative transactions.

(d) Other executory contracts

Effective July 2018, the Bank has entered into an \$800 million contract for naming rights of an arena for 20 years.

The Bank and its subsidiaries have also entered into other long-term executory contracts, relating to outsourced services. The significant outsourcing arrangements have variable pricing based on utilization and are cancellable with notice.

36 Financial Instruments – Risk Management

The Bank's principal business activities result in a balance sheet that consists primarily of financial instruments. In addition, the Bank uses derivative financial instruments for both trading and hedging purposes. The principal financial risks that arise from transacting financial instruments include credit risk, liquidity risk and market risk. The Bank's framework to monitor, evaluate and manage these risks is consistent with that in place as at October 31, 2024:

- extensive risk management policies define the Bank's risk appetite, set the limits and controls within which the Bank and its subsidiaries can operate, and reflect the requirements of regulatory authorities. Risk appetite is approved by the Bank's Board of Directors, either directly or through the Risk Committee of the Board (the Board);
- guidelines are developed to clarify risk limits and conditions under which the Bank's risk policies are implemented;
- processes are implemented to identify, evaluate, document, report and control risk. Standards define the breadth and quality of information required to make a decision; and
- compliance with risk policies, limits and guidelines is measured, monitored and reported to ensure consistency against defined goals.

Further details on the fair value of financial instruments and how these amounts were determined are provided in Note 8. Note 11 provides details on the terms and conditions of the Bank's derivative financial instruments including notional amounts, remaining term to maturity, credit risk, and fair values of derivatives used in trading and hedging activities.

(a) Credit risk

Credit risk is the risk of loss resulting from the failure of a borrower or counterparty to honour its financial or contractual obligations to the Bank. The Bank's Credit Risk Appetite and Credit Risk Policy are developed by its Global Risk Management (GRM) department and limits are reviewed and approved by the Board on an annual and biennial basis, respectively. The Credit Risk Appetite defines target markets and risk tolerances that are developed at an all-Bank level, and then further refined at the business line level. The objectives of the Credit Risk Appetite are to ensure that, for the Bank, including the individual business lines:

- target markets and product offerings are well defined;
- the risk parameters for new underwritings and for the portfolios as a whole are clearly specified; and
- transactions, including origination, syndication, loan sales and hedging, are managed in a manner to ensure the goals for the overall portfolio are met.

The Credit Risk Policy sets out, among other things, the credit risk rating systems and associated parameter estimates, the delegation of authority for granting credit, and the calculation of allowance for credit losses. It forms an integral part of enterprise-wide policies and procedures that encompass governance, risk management and control structure.

The Bank's credit risk rating systems are designed to support the determination of key credit risk parameter estimates which measure credit and transaction risk. For non-retail exposures, parameters are associated with each credit facility through the assignment of borrower and facility ratings. Borrower risk is evaluated using methodologies that are specific to particular industry sectors and/or business lines. The risk associated with facilities of a given borrower is assessed by considering the facilities' structural and collateral-related elements. For retail portfolios, product specific models assign accounts into homogeneous segments using internal and external borrower/facility-level credit experience. This process provides for a meaningful differentiation of risk and allows for appropriate and consistent estimation of loss characteristics at the model and segment level. Further details on credit risk relating to derivatives are provided in Note 11(c).

(i) Credit risk exposures

Credit risk exposures disclosed below are presented based on the Basel framework utilized by the Bank i.e., exposures subject to credit risk capital. The Bank uses the Internal Ratings Based approach (IRB) for all material Canadian, U.S., European portfolios, and for a significant portion of all international corporate and commercial portfolios. Under the Advanced Internal Ratings Based (AIRB) approach, the Bank uses internal risk parameter estimates, based on historical experience and appropriate margin of conservatism, for probability of default (PD), loss given default (LGD) and exposure at default (EAD). Under revised Basel III rules, there are new IRB requirements for internally developed model parameters under AIRB, including scope restrictions which limit certain asset classes to only the Foundation Internal Ratings Based (FIRB) approach. For those asset classes (e.g., Large Corporates, Banks, etc.) the FIRB approach utilizes the Bank's internally modeled PD parameters combined with internationally prescribed LGD and EAD parameters. The remaining portfolios, including other individual portfolios, are treated under the standardized approach.

Under the standardized approach, credit risk is estimated using the risk weights as prescribed by the Basel framework either based on credit assessments by external rating agencies or based on the counterparty type for non-retail exposures and product type for retail exposures. Standardized risk weights also take into account other factors such as specific provisions for defaulted exposures, eligible collateral, and loan-to-value for real estate secured retail exposures.

(1) Regulatory amounts reported in 2024 and 2023 are under Revised Basel III requirements.

(2) Exposure at default is presented after credit risk mitigation. Exposures exclude equity securities and other assets. Portfolios under the Standardized Approach are reported net of specific allowances for credit losses and net of collateral amounts treated under the Comprehensive Approach.

(3) Non-retail drawn includes loans, acceptances, deposits with financial institutions and FVOCI debt securities. Retail drawn includes residential mortgages, credit cards, lines of credit, other personal loans and small business treated as other regulatory retail.

(4) Other exposures include off-balance sheet lending instruments such as letters of credit, letters of guarantees, securitizations, derivatives and repo-style transactions (reverse repurchase agreements, repurchase agreements, securities lending and securities borrowing), net of related collateral.

(5) Geographic segmentation is based upon the location of the ultimate risk of the credit exposure.

Consolidated Statement of Financial Position asset categories cross-referenced to credit risk exposures

The table below provides mapping of on-balance sheet asset categories that are included in the various Basel III exposure categories as presented in the credit risk exposure summary table of these consolidated financial statements. In addition, it also provides other exposures which are subject to market risk and/or other assets which are not subject to market and credit risk with a reconciliation to the Consolidated Statement of Financial Position. Commencing the first quarter of fiscal 2024, the Bank now calculates market risk capital based on the Standardized Approach under the new Fundamental Review of the Trading Book (FRTB) framework, including its Trading vs. Banking boundary requirements. Prior periods have not been restated to conform to the new FRTB requirements. The credit risk exposures on certain assets such as cash, precious metals, investment securities (equities) and other assets are not included in the credit risk exposure summary table. Also excluded from the credit risk exposures are certain trading assets and all assets of the Bank's insurance subsidiaries.

(1) Includes the Bank's insurance subsidiaries' assets and all other assets which are not subject to credit and market risks.

(2) Includes \$60.2 billion in mortgages guaranteed by Canada Mortgage Housing Corporation and federally backed privately insured mortgages.

(3) Amounts for IRB exposures are reported gross of allowances and amounts for standardized exposures are reported net of allowances.

(ii) Credit quality of non-retail exposures

Credit decisions are made based upon an assessment of the credit risk of the individual borrower or counterparty. Key factors considered in the assessment include: the borrower's management; the borrower's current and projected financial results and credit statistics; the industry in which the borrower operates; economic trends; and geopolitical risk. Banking units and Global Risk Management also review the credit quality of the credit portfolio across the organization on a regular basis to assess whether economic trends or specific events may affect the performance of the portfolio.

The Bank's non-retail portfolio is well diversified by industry. As at October 31, 2024, and October 31, 2023, a significant portion of the authorized corporate and commercial lending portfolio was internally assessed at a grade that would generally equate to an investment grade rating by external rating agencies. There has not been a significant change in concentrations of credit risk since October 31, 2023.

Internal grades (IG) are used to differentiate the risk of default of a borrower. The following table cross references the Bank's internal borrower grades with equivalent ratings categories utilized by external rating agencies:

Cross referencing of internal ratings to external ratings⁽¹⁾

Equivalent External Rating			Internal Grade	Internal Grade Code	PD Range ⁽²⁾
S&P and Fitch	Moody's	Morningstar DBRS			
AAA to AA+	Aaa to Aa1	AAA to AA (high)	Investment grade	99 – 98	0.0000% – 0.0565%
AA to A+	Aa2 to A1	AA to A (high)		95	0.0565% – 0.0689%
A to A-	A2 to A3	A to A (low)		90	0.0689% – 0.0813%
BBB+	Baa1	BBB (high)		87	0.0813% – 0.1185%

Total		\$ 413,200	\$ 93,451	\$ 113,136	\$ 619,787	\$ 643,523
Government guaranteed residential mortgages ⁽⁴⁾		53,319	–	–	53,319	56,441
Total		\$ 466,519	\$ 93,451	\$ 113,136	\$ 673,106	\$ 699,964

(1) Regulatory amounts reported in 2024 and 2023 are under Revised Basel III requirements.

(2) After credit risk mitigation.

(3) Includes off-balance sheet lending instruments such as letters of credit, letters of guarantees, securitizations, derivatives and repo-style transactions (reverse repurchase agreements, repurchase agreements and securities lending and borrowing), net of related collateral.

(4) These exposures are classified as sovereign exposures and are included in the non-retail category.

Non-retail standardized portfolio

The non-retail standardized portfolio relies on external credit ratings (e.g. S&P, Fitch, Morningstar DBRS, etc.) of the borrower, if available, to compute regulatory capital for credit risk. Exposures are risk weighted based on prescribed percentages and a mapping process as defined within OSFI's Capital Adequacy Requirements Guideline. Non-retail standardized portfolio as at October 31, 2024 comprised of drawn, undrawn and other exposures to corporate, bank and sovereign counterparties amounted to \$93 billion (October 31, 2023 – \$87 billion). Within this portfolio, the majority of Corporate/Commercial exposures are to unrated counterparties, mainly in Canada, U.S., Mexico, Chile, Peru and Colombia.

(iii) Credit quality of retail exposures

The Bank's retail portfolios consist of a number of relatively small loans to a large number of borrowers. The portfolios are distributed across Canada and a wide range of countries. As such, the portfolios inherently have a high degree of diversification. In addition, as of October 31, 2024, 24% of the Canadian banking residential mortgage portfolio is insured and the average loan-to-value ratio of the uninsured portion of the portfolio is 51%.

Retail AIRB portfolio

The data in the table below provides a distribution of the retail AIRB exposures within each PD range by asset class:

As at October 31 (\$ millions)	2024 ⁽¹⁾						2023 ⁽¹⁾
	Exposure at default ⁽²⁾						
	Real estate secured						
Category of (PD) grades	PD range	Mortgages	HELOC	Qualifying revolving	Other retail	Total	Total
Exceptionally Low ⁽³⁾	0.0000% – 0.0500%	\$ 78,914	\$ 53,982	\$ 11,735	\$ 612	\$ 145,243	\$ 123,755
Very Low	0.0501% – 0.1999%	93,065	19,270	29,997	6,587	148,919	145,654
Low	0.2000% – 0.9999%	40,708	5,502	12,655	20,146	79,011	80,470
Medium Low	1.0000% – 2.9999%	10,400	–	8,818	6,260	25,478	24,230
Medium	3.0000% – 9.9999%	28	617	3,349	3,530	7,524	7,506
High	10.0000% – 19.9999%	1,969	152	339	772	3,232	1,882
Extremely High	20.0000% – 99.9999%	971	134	583	575	2,263	2,363
Default	100%	568	115	109	183	975	751
Total		\$ 226,623	\$ 79,772	\$ 67,585	\$ 38,665	\$ 412,645	\$ 386,611

(1) Regulatory amounts reported in 2024 and 2023 are under Revised Basel III requirements.

(2) After credit risk mitigation.

(3) OSFI revised the Retail Probability of Default floor from 0.03% to 0.05% in 2023, under the Revised Basel III framework.

Retail standardized portfolio

The retail standardized portfolio of \$127 billion as at October 31, 2024 (2023 – \$125 billion) was comprised of residential mortgages, personal loans, credit cards and lines of credit to individuals, mainly in the Latin American and Caribbean region. Of the total retail standardized exposures, \$64 billion (2023 – \$65 billion) was represented by mortgages and loans secured by residential real estate, mostly with a loan-to-value ratio of below 80%.

(iv) Collateral

Collateral held

In the normal course of business, to reduce its exposure to counterparty credit risk, the Bank receives collateral for capital markets related activities. The following are examples of the terms and conditions customary to collateral for these types of transactions:

- The risks and rewards of the pledged assets reside with the pledgor.
- Additional collateral is required when the market value of the transaction exceeds thresholds agreed upon with the pledgor.
- The Bank is normally permitted to sell or repledge the collateral it receives, although this right is specific to each agreement under which the collateral is pledged.
- Upon satisfaction of the obligation, the Bank must return the pledged assets, unless the Bank has the right to sell or repledge the collateral it receives, in which case the Bank must return comparable collateral to the pledgor.

As at October 31, 2024, the approximate market value of cash and securities collateral accepted that may be sold or repledged by the Bank was \$359 billion (2023 – \$315 billion). This collateral is held primarily in connection with reverse repurchase agreements, margin loans, securities lending and derivative transactions. The Bank also borrows securities under standard securities borrowing agreements that it is able to re-pledge. Including these borrowed securities, the approximate market value of securities collateral accepted that may be sold or re-pledged was \$300 billion (2023 – \$313 billion), of which approximately \$60 billion was not sold or re-pledged (2023 – \$75 billion).

Collateral pledged

In the normal course of business, securities and other assets are pledged to secure an obligation, participate in clearing or settlement systems, or operate in a foreign jurisdiction. Note 35(c) details the nature and extent of the Bank's asset pledging activities. Asset pledging transactions are conducted under terms that are common and customary to standard derivative, securities financing, and other borrowing activities. Standard risk management controls are applied with respect to asset pledging.

Assets acquired in exchange for loans

The carrying value of assets acquired in exchange for loans as at October 31, 2024 was \$312 million (2023 – \$334 million) mainly comprised of real estate and was classified as either held for sale or held for use as appropriate.

(b) Liquidity risk

Liquidity risk is the risk that the Bank is unable to meet its financial obligations in a timely manner at reasonable prices. The Bank's liquidity risk is subject to extensive risk management controls and is managed within the framework of policies and limits approved by the Board. The Board receives reports on risk exposures and performance against approved limits. The Asset-Liability Committee (ALCO) provides senior management oversight of liquidity risk.

The key elements of the Bank's liquidity risk management framework include:

- liquidity risk measurement and management limits, including limits on maximum net cash outflow by currency over specified short-term horizons;
- prudent diversification of its wholesale funding activities by using a number of different funding programs to access the global financial markets and manage its maturity profile, as appropriate;
- large holdings of liquid assets to support its operations, which can generally be sold or pledged to meet the Bank's obligations;
- liquidity stress testing, including Bank-specific, global-systemic, and combination systemic/Bank-specific scenarios; and
- liquidity contingency planning.

The Bank's foreign operations have liquidity management frameworks that are similar to the Bank's framework. Local deposits are managed from a liquidity risk perspective based on the local management frameworks and regulatory requirements.

(i) Commitments to extend credit

In the normal course of business, the Bank enters into commitments to extend credit in the form of loans or other financings for specific amounts and maturities, subject to specific conditions. These commitments, which are not reflected on the Consolidated Statement of Financial Position, are subject to normal credit standards, financial controls and monitoring procedures.

(ii) Derivative instruments

The Bank is subject to liquidity risk relating to its use of derivatives to meet customer needs, generate revenues from trading activities, manage market and credit risks arising from its lending, funding and investment activities, and lower its cost of capital. The maturity profile of the notional amounts of the Bank's derivative instruments is summarized in Note 11(b).

(c) Market risk

Market risk arises from changes in market prices and rates (including interest rates, credit spreads, equity prices, foreign exchange rates and commodity prices), the correlations between them, and their levels of volatility. Market risk is subject to extensive risk management controls, and is managed within the framework of market risk policies and limits approved by the Board. The ALCO and Market Risk Management and Policy Committee oversee the application of the framework set by the Board, and monitor the Bank's market risk exposures and the activities that give rise to these exposures.

The Bank uses a variety of metrics and models to measure and control market risk exposures. The measurements used are selected based on an assessment of the nature of risks in a particular activity. The principal measurement techniques are Value at Risk (VaR), stress testing, sensitivity analysis and simulation modeling. The Board reviews results from these metrics quarterly. Models are independently validated internally prior to implementation and are subject to formal periodic review.

VaR is a statistical measure that estimates the potential loss in value of the Bank's trading positions due to adverse market movements over a defined time horizon with a specified confidence level. The quality of the Bank's VaR is validated by regular back testing analysis, in which the VaR is compared to theoretical and actual profit and loss results. To complement VaR, the Bank also uses stress testing to examine the impact that abnormally large swings in market factors and periods of prolonged inactivity might have on trading portfolios. The stress testing program is designed to identify key risks and ensure that the Bank's capital can absorb potential losses from abnormal events. The Bank subjects its trading portfolios to a series of stress tests on a daily basis.

In trading portfolios, sensitivity analysis is used to measure the effect of changes in risk factors, including prices and volatility, on financial products and portfolios. In non-trading portfolios, sensitivity analysis assesses the effect of changes in interest rates on current earnings and on the economic value of equity. Simulation modeling under various scenarios is particularly important for managing risk in the deposit, lending and investment products the Bank offers to its retail customers.

(i) Non-trading interest rate risk

Interest rate risk is the risk of loss due to the following: changes in the level, slope and curvature of the yield curve; the volatility of interest rates and changes in customer preferences (e.g. mortgage prepayment rates). The Bank actively manages its interest rate exposures with the objective of protecting net interest income within established risk tolerances. Interest rate risk arising from the Bank's funding and investment activities is managed in accordance with Board-approved policies and global limits, which are designed to control the risk to net interest income and economic value of equity. The income limit measures the effect of a specified shift in interest rates on the Bank's annual net interest income over the next twelve months, while the economic value limit measures the impact of a specified change in interest rates on the present value of the Bank's net assets. These calculations are based on models that consider a number of inputs and are on a constant balance sheet and make no assumptions for management actions that may mitigate the risk.

Interest rate sensitivity

Based on the Bank's interest rate positions, the following table shows the pro-forma pre-tax impact on the Bank's net interest income over the next twelve months and economic value of equity of an immediate and sustained 100 basis points increase and decrease in interest rates across major currencies as defined by the Bank. These calculations are based on models that consider a number of inputs and are on a constant balance sheet and make no assumptions for management actions to mitigate the risk.

	2024						2023	
	Net interest income			Economic value of equity			Net interest income	Economic value of equity
	Canadian dollar	Other currencies	Total	Canadian dollar	Other currencies	Total		
100 bp increase	\$ 26	\$ (47)	\$ (21)	\$ (332)	\$ (1,006)	\$ (1,338)	\$ (99)	\$ (1,256)
100 bp decrease	\$ (63)	\$ 32	\$ (31)	\$ 26	\$ 754	\$ 780	\$ 68	\$ 824

(ii) Non-trading foreign currency risk

Foreign currency risk is the risk of loss due to changes in spot and forward rates, and the volatility of currency exchange rates. Non-trading foreign currency risk, also referred to as structural foreign exchange risk, arises primarily from the Bank's net investments in self-sustaining foreign operations and is controlled by a Board-approved limit. This limit considers potential volatility to shareholders' equity as well as the potential impact on capital ratios from foreign exchange fluctuations. On a quarterly basis, the Asset-Liability Committee (ALCO) reviews the Bank's exposures to these net investments. The Bank may fully or partially hedge this exposure by funding the investments in the same currency, or by using other financial instruments, including derivatives.

The Bank is subject to foreign currency risk on the earnings of its foreign operations. To manage this risk, foreign currency revenues and expenses, which are primarily denominated in U.S. dollars, are projected over a number of future fiscal quarters. The ALCO assesses economic data and forecasts to decide on the portion of the estimated future foreign currency revenues and expenses to hedge. Hedging instruments normally include foreign currency spot and forward contracts, as well as foreign currency options and swaps.

As at October 31, 2024, a one percent increase (decrease) in the Canadian dollar against all currencies in which the Bank operates decreases (increases) the Bank's before-tax annual earnings by approximately \$45 million (October 31, 2023 – \$63 million) in the absence of hedging activity, due primarily from exposure to U.S. dollars from the Bank's operations in the U.S. and activities conducted internationally in this currency and from exposures to Latin American currencies. A similar change in the Canadian dollar as at October 31, 2024 would increase (decrease) the unrealized foreign currency translation losses in the accumulated other comprehensive income in equity by approximately \$324 million (2023 – \$356 million), net of hedging.

(iii) Non-trading equity risk

Equity risk is the risk of loss due to adverse movements in equity prices. Equity price risk is often classified into two categories: general equity risk, which refers to the sensitivity of an instrument or portfolio's value to changes in the overall level of equity prices, and specific equity risk, which refers to that portion of an individual equity instrument's price volatility that is determined by entity-specific characteristics.

The Bank is exposed to equity risk through its equity investment portfolios, which are controlled by Board-approved portfolio and VaR limits. Equity investments include common and preferred shares, as well as a diversified portfolio of third-party managed funds.

The majority of the Bank's equity investment portfolios are managed by Group Treasury under the strategic direction of the ALCO. Group Treasury delegates the management of a portion of equity and equity-related portfolios to other external fund managers to take advantage of these fund managers' expertise in particular market niches and products.

The fair value of equity securities designated at FVOCI is shown in Note 13.

(iv) Trading portfolio risk management

The Bank's policies, processes and controls for trading activities are designed to achieve a balance between pursuing profitable trading opportunities and managing earnings volatility within a framework of sound and prudent practices. Trading activities are primarily customer focused.

Market risk arising from the Bank's trading activities is managed in accordance with Board-approved policies and limits, including the Enterprise VaR limit.

Trading portfolios are marked-to-market in accordance with the Bank's valuation policies. Positions are marked-to-market daily and valuations are independently reviewed by back office, GRM or finance units on a regular basis. These units also provide profit and loss reporting, as well as VaR and limit compliance reporting to business unit management and executive management for evaluation and action as appropriate. VaR is calculated daily using a 99% confidence level, and a one-day holding period. This means that, once in every 100 days, the trading positions are expected to lose more than the VaR estimate. The Bank calculates general market risk VaR using historical simulation based on 300 days of market data. In conjunction with the Bank's implementation of the Fundamental Review of the Trading Book (FRTB) in Q1 2024, additional portfolios have been included in the VaR calculation. Prior period has been revised to reflect this change. The table below shows the Bank's VaR by risk factor:

(\$ millions)	As at October 31, 2024	For the year ended October 31, 2024			As at October 31, 2023
		Average	High	Low	
Credit spread plus interest rate	\$ 12.5	\$ 13.6	\$ 34.3	\$ 6.8	\$ 13.7
Credit spread	7.3	8.4	13.6	5.9	8.1
Interest rate	17.5	12.3	26.9	5.8	15.2
Equities	5.4	5.1	10.1	3.0	4.9
Foreign exchange	2.9	3.2	9.4	1.1	3.0
Commodities	2.8	2.6	4.6	1.3	2.9
Debt specific	3.6	3.4	4.8	2.3	3.7
Diversification effect	(15.0)	(13.1)	n/a	n/a	(11.0)
All-Bank VaR	\$ 12.1	\$ 14.9	\$ 24.2	\$ 8.3	\$ 17.3

(d) Operational risk

Operational risk is the risk of loss resulting from people, inadequate processes and systems, or from external events. Operational risk includes third party risk, fraud risk and legal risk. It exists in some form in each of the Bank's business and support activities, and third parties with whom the Bank has entered a business or strategic arrangement for outsourcing activities, the provision of products or services, or other benefits. It can result in financial loss, regulatory sanctions and damage to the Bank's reputation. Operational risk management refers to the discipline of systematic identification, assessment, measurement, mitigation, monitoring, and reporting of operational risk.

37 Acquisitions and Divestitures

Acquisitions

Acquisition announced that is expected to close in a future period

KeyCorp

On August 12, 2024, the Bank announced an agreement to acquire an approximate 14.9% pro-forma ownership interest in KeyCorp for approximately U.S. \$2.8 billion through an all-cash purchase of newly issued voting common shares, at a fixed price of U.S. \$17.17 per share. The transaction will be completed in two stages, an initial investment of 4.9% (Initial Investment) and an additional investment of approximately 10% (Additional Investment), for a total pro-forma ownership of approximately 14.9%, subject to receipt of regulatory approvals. Upon completion of the Additional Investment, the Bank will have the right to designate two individuals to serve on KeyCorp's Board of Directors.

Acquisition of the Initial Investment of approximately 47.8 million shares was completed on August 30, 2024 for cash of U.S. \$0.8 billion and recorded as an equity investment at fair value, with subsequent mark-to-market changes recorded in other comprehensive income.

Subject to regulatory approvals, the Additional Investment is expected to close in fiscal 2025. Upon completion of the Additional Investment, the Bank's total interest in KeyCorp of approximately 14.9% will be accounted for as an investment in associate as the Bank will have significant influence over KeyCorp as defined under IFRS, given its board representation and ownership interest.

Any difference between the fixed transaction price and the quoted share price of KeyCorp at the date of acquisition of the Additional Investment will be recognized as a gain (loss) within profit or loss in the period of closing, with a corresponding increase (decrease) in the carrying value of the investment in associate.

Upon completion of the Additional Investment, the total impact to the Bank's CET1 ratio from both stages of the transaction is expected to be approximately 55 basis points.

Divestitures

Divestiture announced that is expected to close in a future period

CrediScotia Financiera

On May 6, 2024, the Bank entered into an agreement to sell CrediScotia Financiera, a wholly-owned consumer finance subsidiary in Peru, to Banco Santander. The transaction is subject to regulatory approvals and customary closing conditions.

The Bank recorded an impairment loss of \$143 million in non-interest income and a credit of \$7 million in non-interest expenses (collectively \$90 million after-tax) this year, of which the majority relates to goodwill. The loss was recorded in the Other operating segment. Upon closing, the Bank's CET1 capital ratio will increase by approximately three basis points.

Closed divestitures impacting the prior fiscal year

Canadian Tire's Financial Services business ("CTFS")

On October 31, 2023, the Bank signed and closed the sale of its 20% equity interest in CTFS to Canadian Tire Corporation.

The investment held by the Bank in CTFS was classified as an investment in associate. The carrying value of the Bank's interest in the investment of \$543 million was derecognized on the date of close and a net gain of approximately \$367 million (\$319 million after-tax) was recorded in non-interest income – other and reported in the Other operating segment. The transaction increased the Bank's CET1 ratio by approximately 16 basis points.

Shareholder Information

Annual meeting

Shareholders are invited to attend the 193rd Annual Meeting of Holders of Common Shares, to be held on April 8, 2025, at the Canadian Museum of Immigration at Pier 21, 1055 Marginal Road, Halifax, Nova Scotia beginning at 9:30 a.m. Atlantic Time. The record date for determining shareholders entitled to receive notice of and to vote at the meeting will be the close of business on February 11, 2025. Please visit our website at <https://www.scotiabank.com/annualmeeting> for updates concerning the meeting.

Shareholdings and dividends

Information regarding your shareholdings and dividends may be obtained by contacting the transfer agent.

Direct deposit service

Shareholders may have dividends deposited directly into accounts held at financial institutions which are members of the Canadian Payments Association. To arrange direct deposit service, please write to the transfer agent.

Shareholder Dividend and Share Purchase Plan

Scotiabank's Shareholder Dividend and Share Purchase Plan allows common and preferred shareholders to purchase additional common shares by reinvesting their cash dividend without incurring brokerage or administrative fees. As well, eligible shareholders may invest up to \$20,000 each fiscal year to purchase additional common shares of the Bank. All administrative costs of the plan are paid by the Bank. For more information on participation in the plan, please contact the transfer agent.

Listing of shares

Common shares of the Bank are listed for trading on the Toronto and New York stock exchanges.

April 1	April 28
July 2	July 29
October 7	October 29

Valuation day price

For Canadian income tax purposes, The Bank of Nova Scotia's common stock was quoted at \$31.13 per share on Valuation Day, December 22, 1971. This is equivalent to \$2.594 after adjusting for the two-for-one stock split in 1976, the three-for-one stock split in 1984, and the two-for-one stock split in 1998. The stock dividend in 2004 did not affect the Valuation Day amount. The stock received as part of the 2004 stock dividend is not included in the pre-1972 pool.

Duplicated communication

Some registered holders of The Bank of Nova Scotia shares might receive more than one copy of shareholder mailings, such as this Annual Report. Every effort is made to avoid duplication; however, if you are registered with different names and/or addresses, multiple mailings may result. If you receive, but do not require, more than one mailing for the same ownership, please contact the transfer agent to combine the accounts.

Credit ratings are one of the factors that impact the Bank's access to capital markets and the terms on which it can conduct derivatives, hedging transactions and borrow funds. The credit ratings and outlook that the rating agencies assign to the Bank are based on their own views and methodologies.

The Bank continues to have strong credit ratings and its deposits and legacy senior debt are rated AA by Fitch, Aa2 by Moody's, AA by Morningstar DBRS and A+ by Standard and Poor's (S&P). The Bank's bail-inable senior debt is rated AA- by Fitch, A2 by Moody's, AA (low) by Morningstar DBRS, and A- by S&P. As of October 31, 2024, all such rating agencies have a Stable outlook on the Bank.

Credit ratings are not recommendations to purchase, sell or hold a security and are subject to revision or withdrawal at any time by the rating agency.

ScotiaRISE®

We've committed \$500 million in community investment by 2030.

We help support initiatives that provide opportunities for everyone to have the chance to reach their full potential.

ScotiaRISE is our 10-year, \$500 million commitment, and social impact strategy to help strengthen resilience and economic advancement for underrepresented groups.

By working together, we can help create a more inclusive world where everyone can thrive.
